Mr. Zuckert made clear the role of airpower in both today's and tomorrow's defense and the part Florida is now playing, and will continue to play in its development. I ask unanimous consent that the full text of the remarks of the Secretary of the Air Force at the dining-in ceremony at Patrick Air Force Base in Florida, Saturday, March 2, 1963, be printed in the RECORD. It was an important talk, and I commend it to everyone interested in national defense.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY HON. EUGENE M. ZUCKERT, SECRETARY OF THE AIR FORCE, AIR FORCE MISSILE TRAINING CENTER, PATRICK AIR FORCE BASE, FLA., SATURDAY, MARCH 2, 1963

General Davis, officers of the Atlantic Missile Range and Patrick Air Force Base, and honored guests: the "dining-in" is a time-honored military affair which the Air Force adopted from the British. The after-dinner speaker, however, is our own idea, and I am happy to take advantage of it to join in honoring three of our own who are blazing the path of the future—Maj. Donald K. Slayton, Maj. Gordon Cooper, and Maj. Virgil I. Grissom.

It is also an honor and pleasure to welcome two other architects of the future, Walt Williams and Dr. Kurt Debus of NASA, and to have with us members of the Army, Navy, and Marine families at this traditional Air Force gathering.

Of course, those from the other services who measure tradition in centuries may think I make liberal use of the word, but the NASA people understand. Both the Air Force and NASA are products of 20th century technology, so we borrow freely from everybody else's past. Our past is just beginning. We call it future.

It was suggested that I speak tonight about the future of the Air Force in space. As both starting point and finish line for everything I say, just keep in mind that the job of the Air Force is not space, it is defense. It is not research and development, not strategic, not tactical, nor any of these. It is the application of airpower or aerospace power to the defense of the United States and the free world.

Some of my remarks may be responsive to the suggestion about space, but it seems more important to me to talk about the future of the Air Force in the defense of the United States. The future is from now on, and now is cold war.

The cold war, reduced to essentials is a confrontation of sovereign powers in which one side maintains a pressure of aggressive expansionism, forcing the other to maintain a defense against it. The most urgent requirement of that defense is to deter the aggressor from using military force to attain his ends. We are the defenders.

I would like to make four points about that defense.

First, we must have superiority at the top level of intensity of war, and must extend that deterrent superiority to lower levels in order to contain or limit war and aggression.

Second, we must have flexibility and control of the application of destructive power at each level.

Third, we must be prepared to protect ourselves against the extension of aggressive pressure into space, and

Fourth, the Air Force role in this overall defense requirement presents the greatest challenge in the history of any military organization.

In this cold war confrontation, the technological and industrial capabilities of both sides are such that sooner or later, if not now, the unrestrained use of that power for nuclear destruction would make its employment in war a net losing proposition for both sides. The defender must have power to wreak unacceptable damage on the aggressor as a first requirement of his defense. This is where strategic deterrence starts.

But an aggressor whose political system may make expansion a necessity will, if deterred by fear of retaliation from using his full power, seek other opportunities. He will try to find the place to apply his power which he calculates will not provoke his own destruction. Close one avenue to him, he tries another. He can logically be expected to stay short of triggering his own destruction. The aggressor naturally has the initiative in this game so we must be able to apply whatever force is necessary to deny him his objective.

So far, we have been able to do so. The risk has been too great for him. We must keep it that way. We have our own reasons for desisting from war but until we can make him apply the same reasoning to his national behavior, we have no choice but to make sure—and make sure he knows—that war—any war he starts—means certain military defeat for him. We know, of course, that all-out war makes no sense for either side, nor for the rest of the world.

The defender, of course, has to maintain a force adequate to prevent ultimate defeat. This requirement may change, but the use of the force is his final effort. Two courses are then open. The defender can, as a matter of judgment, wait and weigh each application of the aggressor's power in order to or until he can decide it is sufficiently threatening to warrant the jugular response. As a second course, he can prepare to overcome the aggressor's military power before that point is reached. It seems to me that the first course is closed at the end. A sensible defense is to be ready to respond at a lower level with whatever force is deemed necessary to stop the aggressor—and at a net loss for his attempt.

The United States is leader of the free world, in President Kennedy's words, by both strength and conviction. Our conviction, both moral and military, is that we must be prepared to stop aggression at levels of intensity below the level of the maximum destruction.

Our basic strength, our power to deter aggression, our ability to defend ourselves must always be greatest at the top. In our strategic bomber and missile forces, we maintain power adequate to deter an enemy from striking for our jugular. Strategic forces, of course, have the capability of counterforce attack which does not constitute total devastation of a nation.

We have to maintain this superiority at the top, but we must also have it at levels of war more likely to be brought against us. That is why we are building deterrence down from the top level of intensity. The reason is simple. The only way we know of forcing an aggressor to keep down his use of military force is to make each level of intensity of conflict more certain of defeat for him than the one below it. He won't be deterred unless he knows that as his commitment goes up, his chances go down.

One hears talk about the danger and probability of escalation. The effect of my first point, extending the deterrent with superiority at each level is make escalation a penalty and not an opportunity for an aggressor.

At each level where we determine we want to stop aggression, we must be prepared to make the most efficient possible use of every resource available to us, skillfully employing advancing technology to save human resources. It is imperative that for the long haul, we hold the investment at each level to the absolute minimum necessary to maintain effective deterrent superiority. The cheapest way to stop war is at the lowest level of conflict with the quickest possible stop to aggression. To me, this means we use tactical nuclear weapons whenever we determine the military situation demands their use, whether by Army, Navy, Marines, or the Air Force.

If we would have the aggressor desist from any course of action which may be desirable to him but unacceptable to us, we must have him know that we will use whatever force it takes, nuclear or nonnuclear, to stop him. This kind of deterrence employs all services.

The President has made clear his determination to have more choices than no response or total response. This is the purpose of counterforce. This is the reason we must have flexibility in strategic forces. This is why the great increase in what has been called tactical forces, now designated in the budget as General Purpose Forces. One phase of the buildup is the combining of groundpower with airpower in the new STRICOM, headquartered across the State of Florida at MacDill.

At the Air Force Special Warfare Center at Eglin, the accumulated experience of four decades of air operations is being applied to the job of developing airpower techniques for the very low rungs on the ladder of war's intensity. This is the AFCOIN program, or the Air Force part of the Nation's preparation for counterinsurgency struggles.

For this work, we are trying out beefed-up T-28's and B-26's with more power and more weapons—14 50-caliber machineguns and a dozen external ordnance stations, for example on a B-26 with 1,000 more horsepower than the original.

Support techniques are keeping pace. We can snatch a 10,000-pound cargo package off a C-123 without touching down. We can get a C-130E fully loaded into a grass or clay runway of less than 1,000 feet. We are working on a system for snatching a cage-like capsule of 20 to 25 men off one of these planes without landing it. This technique will be a big help to the Army in getting over that first difficult period of concentration of men during an airborne operation.

For the general roles of air superiority and interdiction, our effective power will go up by an order of magnitude with the advent of the F-4C added to the F-105, with both then to be supplemented by the first fighter designed from scratch for dual-service use, the F-111, better known as the TFX.

While we are extending downward the effectiveness of our deterrent power, great changes are taking place at the level of the strategic deterrent. Missiles are coming into the inventory to provide a very special kind of delivery system for nuclear explosives.

The concept of strategic deterrence, of course, is a progression from the strategic bombing concepts of the thirties. The B-47's and B-52's, also progressions from those early bombers, will continue to carry the burden of strategic deterrence for some years. Current projections of the strategic forces, however, assume that a major part of the job can be done by missiles—land based or sea based—at a lower investment of men, money, and machines than would be possible with manned bombers of today's design.

In other words, the B-52 is passing the heavy explosive delivery part of its job on to the missiles. The Air Force believes that the effective life of the B-52 could be extended, in a joint role with missiles, through use of the Skybolt, but the return on the projected Skybolt investment was judged not worth the cost in the light of all the factors involved.

The missiles, as I say, do only the explosives delivery job. They have to be pretargeted and once launched, cannot be recalled or redirected. They cannot follow a movable target. They cannot discriminate. They cannot assess damage, nor report battle conditions. They make for a rigid defense posture. While they necessarily carry the brunt of the strategic strike, total dependence upon them would not be consistent with our objective of controlling destruction and preserving always some kind of foundation for ending the conflict.

Because of the variety of such requirements in our approach to strategic warfare, some type of manned system seems called for. The type of aircraft we've been calling strategic bombers are characterized by extreme range capabilities, very high ceiling, great load-carrying capacity, long endurance, multiman crews, and multijob possibilities. Our current studies are directed at determining the possible application of these flight characteristics at the point within the missions bracket between missiles on one side and high performance fighters on the other. The RS-70 is the most advanced of these concepts but it is not by any means the only type of manned system of significant strategic potential.

We can't say now just where we will come out, but there doesn't seem to be any question as to the value of manned vehicles able to stay aloft for long periods, travel very great distances, fly high or fly low, and fly fast. There are many jobs to be done, reconnaissance-strike missions, observation or surveillance, command and control, or weapon launching.

We can get the flexibility of my second point with airpower. This is one reason why I have no taste for the salty beer that results from the crying into it by those who seem to write off manned systems because of the job changes I've been talking about.

But the main reason why I don't intend to join in drinking any tear-salted beer is that while we still have to do all the old jobs assigned to airpower, we have the difficult, demanding, challenging, and expanding new job to do in space.

Before I say anything about our future in space, let me establish two benchmarks. The first is that the Air Force needs everything it can get from NASA. NASA needs us, too, as the record of how NASA puts things into space indicates, but if there weren't a NASA, the same facility and capability would have to be created some other way.

There is reassuring precedent for the principle of having an outside-of-defense civilian agency provide the type of support we need. The case at point is the Atomic Energy Commission. Our own nuclear weapon flexibility as well as the Polaris-carrying submarine is sufficient testimony.

The clear lesson for us in the space field is that we must put requirements on NASA to meet whatever part of our needs can be met in this way. We must utilize every possible resource to build the necessary military capability and I can assure you that NASA is ready to respond. Jim Webb, the NASA Administrator, harbors no illusions about NASA's responsibilities in support of national defense requirements.

The second benchmark is that there is no such thing as peaceful space or military space. There is just space. A new and massive space program in a civilian agency was launched nearly 5 years ago, with—for reasons which seemed not unreasonable at the time—a great hullabaloo about peaceful objectives.

The Nation is holding to those peaceful objectives, but we also know that the military services will have to do the same thing in space that they have always done in the media of the land, sea, and air. The Air Force forward space program is, therefore, aimed at two general objectives.

The first is to acquire the capability to utilize space in support of the military forces operating in the familiar environments of land, sea, and air. Space offers new aids. Observation warning, communications, military geodesy and meteorology are areas for the application of space technology to defense. All of the services have requirements of their own and it is up to the Air Force to provide them the access they need for their purposes. The Secretary of Defense has assigned the responsibility to us.

Right here, let me caution you against letting any interservice differences blur your judgment or your vision. It is my position that competition in ideas among the three services is desirable. The imaginative strong minded people we need in this business are going to have differences, and they must be resolved constructively.

Our second general objective is to acquire the necessary defense capability for the aerospace regions themselves. We must be able to protect the peaceful activities in space of the nations of the free world. We believe that space can be free to all for peaceful activity only if somebody keeps it free. We are that somebody. The job involves mastering the space environment in order to deny to a hostile power the uninhibited military exploitation of space. We can only do this if we have the ability to detect and counter any military threat. We believe that both manned and unmanned systems will be required, but we cannot say now in what relative investment.

We have a lot to learn. The recent agreement with NASA for joint participation in the Gemini program is one way. That agreement represents an answer from both DOD and NASA to critics who said there was no place in space for military man. Our own activity directed toward manned space vehicles will increase, and with NASA's backup, we'll attain the needed capability earlier than we would otherwise.

A term you hear around Washington to denote the areas of cooperation between Government agencies is "interface." Here at Patrick is one of the primary "NASA-Air Force interfaces." Such terms usually leave me pretty cold but this one does have some descriptive value.

There will be plenty of problems between the Air Force and NASA, but not by any means all at the interface points such as the Cape. We wouldn't either one be true to trust or tradition if there weren't. Any machine as big as the national space effort is bound to have some kind of friction. But just remember, a clutch is a friction interface. Its purpose is to join two shafts for the transmission of power.

The power we can get will provide protection for the free world in space. This was my third point—to make sure that no aggressor can exploit space, either for expansionism on earth or interference in space with the peaceful pursuits of the free world.

The people of the United States know they must have an Air Force second to none if they are to apply their strength constructively in peace. My fourth point covers just a few things, then, that the Air Force officer must believe, know, and practice.

Get these ideas straight:

The Air Force is at the highest state of readiness and response capability in all its history.

It is strengthening that posture almost monthly.

It needs better people than ever before. It has more opportunity for their professional growth and potential contribution to the Nation's defense than ever before.

It needs the old skills, but to a far greater degree, for AFCOIN and general purpose forces, for airlift and air defense, and for the new mission of heavy multiman crew, long endurance aircraft.

And then it needs that whole new range of skills, the skills and techniques which are being developed by the Slaytons, the Coopers, the Grissoms—and all of their colleagues, civil and military—to enable America to keep her place as freedom's leader by strength and conviction.

The Air Force is an organization of professionals. It takes brains and hard work to keep up. The competition is tough, but the opportunities to serve your country and make a mark in the service to which you have dedicated your lives, will continue to expand.

It all adds up to a reminder for those who wear the Air Force uniform that the wild blue yonder is still beyond.

PROPOSED TAX REFORM

Mr. CARLSON. Mr. President, many of our religious denominations are greatly concerned about a proposal for revision of our income tax laws which would change the exemption for gifts to churches and charitable organizations.

I share their concern regarding the proposed revision, and sincerely hope no action will be taken on the part of Congress that will in any way deter our citizens from contributing generously to our churches and charitable organizations.

At a recent annual meeting of the board of administration of the Wesleyan Methodist Church of America, a resolution was adopted expressing their concern over the proposed change.

I ask unanimous consent that the resolution be made a part of these remarks.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

RESOLUTION CONCERNING PRESIDENT KENNEDY'S PROPOSED TAX REFORM

Whereas President Kennedy has gone on record as favoring a revision in the Federal income tax laws to change the exemptions for gifts to churches and charitable organizations by making the first 5 percent (based upon the individual income) subject to income tax; and

Whereas the Wesleyan Methodist Church of America is a denomination which teaches that it is the religious duty of Christians to contribute 10 percent of their income to the work of God and of the church; and

Whereas the proposed change in the Federal income tax laws would thus presumably affect every earning member of this and all other denominations of similarly minded Christians, singling out for increased taxation the charitable givers of the Nation, the very group who ought to be, and have in the past been encouraged, presuming upon their willingness to continue the voluntary giving without which this tax would be meaningless, and discouraging even minimal continued giving: Therefore be it

Resolved, That this board of administration of the Wesleyan Methodist Church of America declares its respectful opposition to this proposal of the President as not being in the national interest and urges our Congressmen to oppose any specific legislation designed to make this proposal effective.

Resolved further, That the secretary of the board send copies of this resolution to every Member of the U.S. Senate and House of Representatives.

STOCKPILE SCANDAL

Mr. YOUNG of Ohio. Mr. President, in the January report of this Nation's stockpile inventories, the point of absolute absurdity was reached.

It is interesting to note that the stockpile of castor oil of nearly 216 million pounds has been reduced by about 2 million pounds. This means that our castor oil stockpile is nearly 146 million pounds beyond the maximum projected need way into the future. In dollars, Mr. President, our taxpayers have approximately $55 million tied up in castor oil. This dates from the Eisenhower administration.

With respect to feathers, the Federal Government stockpiled 600,000 pounds of feathers beyond any projected need, during the Eisenhower administration. It takes a lot of feathers to make a pound, so 600,000 pounds of feathers are feathers indeed.

The junior Senator from Ohio very regretfully reports that at this time $38 million of the taxpayers' money is still represented in stockpiled feathers. What to do with this fluffy stuff is even beyond the intelligence of New Frontiersmen at the White House or in the Congress.

If I may make a suggestion, Mr. President, it would be an excellent idea if we made good use of some of this stockpiled castor oil by administering it—and I believe it would be putting it to good use—to some of the officials of the Eisenhower administration responsible for stockpiling this huge amount of feathers?

GREATEST COLD WAR VICTORY

Mr. YOUNG of Ohio. Mr. President, our Nation's greatest cold war victory came as a result of President Kennedy's firm, determined and unyielding action toward Castro and Khrushchev last October. It is a matter of record that Khrushchev turned tail and withdrew his offensive missiles and aircraft from Cuba.

It is unfortunate that the fruits of this triumph are being recklessly squandered by partisan political criticism from certain persons no longer officials of our Federal Government. Last month former Vice President Nixon charged that President Kennedy blundered in failing to provide air cover for the Bay of Pigs invasion—in other words, that we should have sent air power in to kill thousands of Cuban men, women and children; which, incidentally, would have caused the loss of American lives in so doing.

Americans should note that this Monday morning quarterback—I refer to former Vice President Nixon—was exceedingly silent during 1959 and 1960 when he was Vice President of the United States and Castro was expropriating without compensation the property of American individuals and firms and attempting to spread his communism revolution throughout Latin America. Then he was silent. Today he is a war hawk.

The PRESIDING OFFICER (Mr. INOUYE in the chair). The time of the Senator from Ohio has expired.

Mr. YOUNG of Ohio. Mr. President, I ask unanimous consent that I may proceed for 3 additional minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. YOUNG of Ohio. Mr. President, now a new voice in American politics has been added to the cacophony of abuse and jingoism that has come out in our country on the heels of the President's success. Gov. Nelson Rockefeller of New York has recently criticized the President for restraining Cuban exiles from their hit-and-run raids on Soviet merchant shipping in the Caribbean. By innuendo he has implied that in doing so we are appeasing the Soviet Union.

Mr. President, Governor Rockefeller should know better, and probably does. He should know that these raids do nothing for freedom. Responsible leaders of both parties agree that the raids are ineffectual and carry the possibility of igniting a war. Their continuance would constitute an open invitation to the Soviet Union to send airplanes into the Caribbean to protect its merchant ships. They encourage Khrushchev to slow down, if not stop, the withdrawal of Russian troops from Cuba which is proceeding as a result of negotiations between him and President Kennedy.

In a recent press conference Governor Rockefeller stated:

> Well, it is very hard for me to understand why we are supporting in South Vietnam freedom fighters, and why we are holding them back and preventing them from operating in Cuba. And I hope it is not as a means or as an endeavor to placate or to appease the Soviet.

Mr. President, the situations we face in Vietnam and Cuba are entirely different. In Vietnam we are aiding an established government to rid itself of Communist guerrilla infiltrators. In Cuba the goal of our policy is to oust a regime which is presently in complete control of that unhappy island. As the situations are different, the approaches we take toward them must differ. The policy of the administration toward Castro has been firm and unrelenting. I feel confident it will result in his ouster and the establishment of a free and democratic government in Cuba. We have reason to hope this will be accomplished without the loss of hundreds or thousands of American lives.

It is discouraging to hear these unfounded statements from a leader of one of our two great political parties. There is always room for constructive criticism of our Government regardless of which party is in power. However, it is unfortunate that the Governor of the second largest State in the Union and a leader of that Grand Old Party of which I am not a member should stoop to this kind of partisanship over an issue of such vital importance to our country and to the entire free world.

Mr. President, in the Plain Dealer, one of our Nation's great newspapers, published in my home city, Cleveland, there appeared on April 12, 1963, a column by James Reston entitled " 'New' Rockefeller bows."

In this column Mr. Reston displayed his usual keen insight into the problems facing our Nation, and once again showed why he is universally recognized as one of the Nation's outstanding journalists. I commend this column to my colleagues and ask unanimous consent that it be printed in the RECORD at this point as part of my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Cleveland (Ohio) Plain Dealer, Apr. 12, 1963]

"NEW" ROCKEFELLER BOWS

(By James Reston)

WASHINGTON.—Nelson Rockefeller was in Washington this week, but his old friends scarcely recognized him. He talked like Harold Stassen and acted like Dick Nixon.

The presidential bug has really got him. You could tell because he denied it.

He was in town to gather support for his campaign. Everybody knew it, and he knew everybody knew it, but he followed the old deceptive ritual even though it was obvious to everybody, including himself, that he was deceiving nobody.

Harold Stassen started on the left and when he began to get the White House itch he lurched over to the right. Nixon started on the right, then turned left in trying to beat Kennedy, and right again in trying to beat Pat Brown in California, thereby proving that it's easy to lose both ways.

Governor Rockefeller is following the Stassen route, only with less justification.

This is not so surprising in a candidate seeking to pull the Javits and the Goldwater wings of the party together, but what was surprising here was his reliance on the old Nixon technique of the loaded question, and the vague suggestion of dishonorable practice.

He was asked in his news conference here what he thought the relations of this Government should be with the anti-Castro exile movement.

Governor ROCKEFELLER. Well, it is very hard for me to understand why we are supporting in South Vietnam freedom fighters, and why we are holding them back and preventing them from operating in Cuba. And I hope it is not as a means or as an endeavor to placate or to appease the Soviet.

Question: Do you think it is?

Governor ROCKEFELLER. I hope it is not, I said.

Question: Governor, does this mean that you think there is a possibility of some secret arrangement between the President and Mr. Khrushchev on the matter of holding back the freedom fighters in Cuba?

Governor ROCKEFELLER. Well, I have no idea. But maybe Mr. Khrushchev will release some more of the correspondence and we will find out.

This exchange raises some interesting questions. If the governor were president, would he have us do in Cuba what we are doing in Vietnam? Or is it our intervention in Vietnam he does not understand?

Meanwhile, does he have any evidence that President Kennedy has made a deal with Khrushchev over Cuba? He says he has "no idea" about this. But if he has "no idea" why raise it?

The tolerance for political baloney in Washington is pretty high. The town has produced and swallowed more than its share. Politicians all stoop to conquer sooner or late, but Rockefeller seemed to be stooping pretty low pretty soon.

THE SUBMARINE "THRESHER," AND THE U.S.S. "UTAH" AND U.S.S. "ARIZONA"

Mr. MOSS. Mr. President, like all other Americans, I have mourned this past weekend the 129 men lost on the submarine *Thresher*. The tragedy has stunned and shocked the Nation. It is even more crushing because it came just at Easter—a time of rejoicing for the entire Christian world.

But Easter also offers hope to those who mourn, and eases the pain of the bereaved families. My heart goes out especially to the young wives and mothers who have had to face up these past few days to the cruel task of telling their youngsters that daddy will not be home again. We must try to unlock from the unfathomable sea the cause of the tragedy, and see that it never happens again.

The entombment of 129 brave men some 8,000 feet down in the Atlantic Ocean off Cape Cod calls to mind the similar fate of the men of the U.S.S. *Arizona* and the U.S.S. *Utah* at Pearl Harbor on December 7, 1941. These men will also lie forever in silence on the ocean's bottom. Today this Nation over, Old Glory flies at half mast for the men of the *Thresher*. We are now doing what we can to pay tribute to the men who sacrificed their lives on the *Thresher*, just as long ago we did what we could to honor the men of the U.S.S. *Arizona*. And we honor the men of the *Arizona* day in and day out by the magnificent memorial which we have built over her hulk, and by raising the colors over her at dawn each morning and taking them down at sundown.

But the men of the U.S.S. *Utah* seem to have been forgotten. They lie in the hulk of the *Utah* less than a mile from the *Arizona*'s splendid memorial—but—too far away to be definitely associated with the *Arizona*'s glory. The small plate which adorns the *Utah*'s hull does not even list the names of the 54 officers and men who went down with the ship and whose bodies have never been found. Thousands pass the *Utah* after seeing the *Arizona* without even knowning that it is the tomb of equally brave men who died defending their country.

In February I introduced a bill to erect a simple flagpole over the *Utah* so we may fly the colors over the men who lie entombed there. I am gratified that 37 of my colleagues are cosponsoring the bill. A report was received from the Department of Defense and the Bureau of the Budget this morning on this bill, and I am asking the distinguished chairman of the Senate Armed Services Committee [Mr. RUSSELL] to hold hearings as soon as the committee schedule permits. When we do have a way of paying eternal tribute to our heroic dead we must do it; the tragedy of the *Thresher* has shown us again how cold and empty the tributes can seem when we have no tangible and lasting way to show gratitude, at the place where the tragedy occurred, to the men who have gone forever into the depth and silence of the ocean.

Since I first began my campaign to honor the dead of the U.S.S. *Utah*—a campaign, incidentally, which was sparked by Bill Kreh of the Navy Times—many additional facts about the *Utah* have come to light. I was pleased to receive a letter from the man who was the *Utah*'s captain at the time of the Pearl Harbor attack, Capt. James M. Steele, and to find that he is now retired and living in Washington, D.C. He has advised me that, far from being an unarmed target ship, as had been stated in many magazine and news articles, the vessel had the most advanced antiaircraft guns in our Navy on board, some of which had not yet been installed on any of our major combatant ships. Her big guns had been removed, it is true, when she became a target ship for high level and divebombing aircraft of the Navy and the Army, but she was by no means an unarmed ship.

In fact, as Captain Steele pointed out to me, the highly trained and competent gunnery crew from the *Utah* was able to remove 16-inch and 14-inch guns and ammunition from some of the damaged battleships at Pearl and to assist in the salvage of those ships.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. MOSS. Mr. President, I ask unanimous consent that I may proceed for 3 additional minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOSS. They also removed serviceable 5-inch AA batteries from damaged ships and set them up ashore and manned them for the defense of the Pearl Harbor area. I am glad to be able to clear up the misconception that the U.S.S. *Utah* was not a worthy target for the Japanese bombers, and to stress again the service of her surviving crew in the defense of Pearl Harbor and in the salvage work on the battleships there.

Captain Steele's recollections and the later reports of salvage work on the *Utah* indicate the presence of large amounts of hydrogen sulfide gas trapped within the hull. The ship was the victim of two torpedoes and possibly a large bomb, all taken in the port side.

The Navy tells me there is little question that the *Utah* could have been salvaged as were most of the other battleships, but other ships like the *Nevada* and *California* and *West Virginia* were given precedence because they could restore to the fleet the offensive capability of large caliber guns. The plans for the salvage of the *Utah* continued to be sidetracked by other more urgent work right up to the war's end, and then the battleship *Mississippi* assumed much the same function as the *Utah* after the war when her main batteries were removed and she became AG–128, a test bed for new weapons. Thus the hulk of the *Utah* with its brave dead has been left undisturbed at Pearl Harbor.

Almost every State—and certainly every area of the country—has one or more of its boys listed among the *Utah* dead. Of the 54 men whose bodies were not found or identified, 13 gave California as their home State; 11 Texas; 3 each Illinois, Iowa, Washington State, and New York; 2 each Colorado, Missouri, Virginia, and Massachusetts; 1 each Kentucky, Arkansas, Minnesota, Louisiana, Michigan, Oregon, Ohio, Nebraska, and 1 who did not list his home. His address however, showed he was born in Iowa. Another man was a native of the Philippine Islands. Many men showed next-of-kin in States other than their home at the time of enlistment, so there is hardly a State which is not touched in some way by the ghostly hand of those entombed in the U.S.S. *Utah*.

These U.S.S. *Utah* dead have not been specially honored because the U.S.S. *Utah* was officially decommissioned at the time of the Pearl Harbor attack, and the flag is not flown over a decommissioned ship, and because the Navy holds that the *Arizona* memorial should spread enough glory for all. I feel that neither reason is valid enough to deny the men of the *Utah* the honor of resting under the flag for which they died. Congress can rectify this slight, and I hope we will do so without any further delay.

for Canyonlands National Park.

CANYONLANDS NATIONAL PARK

Mr. MOSS. Mr. President, the Senate is not unaware, I am sure, that I have again this year introduced a bill—S. 27—to create Canyonlands National Park in southeastern Utah. The RECORD carries several speeches that I made on Canyonlands.

The Public Lands Subcommittee of the Senate Interior and Insular Affairs Committee has set a hearing on the bill for the 25th of April in Washington, D.C.

Last session I introduced a Canyonlands bill, and hearings were held in Washington, D.C., and Utah. Support was widespread and general, but opposition was local.

The bill was reported to the Senate for action, but no action was taken. This year the local opposition has subsided, and Utah now presents a united front

I ask unanimous consent to have printed in the RECORD an editorial from the Deseret News of April 9 and one from the Salt Lake Tribune of April 10, 1963, which explain that there has been agreement on the Canyonlands National Park, and that Utah now unitedly supports the bill which I have introduced for the creation of that park.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the Deseret News, Salt Lake City, Utah, Apr. 9, 1963]

NOW LET'S MOVE ON CANYONLANDS

This is the year of decision and time's speeding on. So it was refreshing and heartening to all Utahans interested either in the glories of nature or the economic progress of the State to note the agreement reached Saturday by former opponents on the Canyonlands National Park issue.

Hopefully, this agreement provides the common ground upon which all Utahans can stand in pushing for congressional approval of the park this year.

The time certainly is right. National interest has been created by magnificent pictures in recent publications. Several organizations, including the National Parks Association, are crying for action. And by next year, if rumors prove true, Secretary of Interior Stewart Udall, one of the strongest advocates of a Canyonlands National Park, will be a candidate for the Senate. His successor may be far less interested in Canyonlands.

The potential of a park including the weird and beautiful erosion-sculptured stone wonderland of southeastern Utah is tremendous, particularly as transportation into the area is opened up.

That is coming in the near future. Already, half a million cars a year pass within an hour's drive of the proposed park, on U.S. Highways 160 and 50–6. When Interstate 70 is completed along the route of U.S. 50–6, the great bulk of traffic en route from the East or Midwest to the Las Vegas or Southern California areas will pass close to the park.

Moreover, if legislation is finally approved to build a National Scenic Parkway linking Canyonlands to the Zion-Bryce-Grand Canyon area by way of Glen Canyon, it will open up what is beyond question one of the world's greatest scenic areas.

Utah cannot afford to have this great potential slip away unused.

The compromise worked out between Governor Clyde and Senator Bennett on one side and Senator Moss on the other seems entirely workable. It includes a park of about 250,000 acres in which traditional national park single-use policy would be followed, except that mineral and oil exploration could continue for another 25 years. Mines and wells developed during that time could continue to operate indefinitely.

To minimize such activities in the park, however, areas believed to be of potential value will remain outside the park. So will the area most used for grazing and deer hunting.

The result will be a park that includes all the features that are becoming so well known and loved—Chesler Park, Virginia Park, Druid Arch, Angel Arch, Elephant Canyon, Upheaval Dome, the Needles, the Basin of Standing Rocks.

Tied together with the Dead Horse State Park to the North, it should protect and make accessible a veritable wonderland, both for the tourist who wants to see it from the air-conditioned comfort of his automobile and for the adventurer who wants to set out afoot into some of America's most stark, primitive wilderness.

Utah's leaders in Congress and the statehouse deserve the State's thanks and commendations for putting aside partisan differences and uniting on this program. The same spirit of selfless unity will be necessary to put the bill through Congress at the earliest possible date.

[From the Salt Lake City (Utah) Tribune, Apr. 10, 1963]

Canyonlands Pact

All Members of the Utah's congressional delegation and Governor Clyde are to be commended for reaching an agreement on basic framework for the proposed Canyonlands National Park in southeastern Utah.

Details are yet to be ironed out in Congress which, subject to Presidential approval, has the responsibility for setting up the park. For the first time, however, the Utah lawmakers and Governor have a plan all can support.

The compromise, as we understand it, calls for a national park of about 253,000 acres, embracing some of the most breathtaking scenery in the area adjacent to the confluence of the Colorado and Green Rivers. Excluded would be some mineral-rich land in the northeast corner of the originally proposed park, with other acreage added in the south.

The National Park Service's original plan called for about a million acres, an area sliced to 333,000 acres in Senator Moss' bill last year. Unrealistic multiple-use provisions for the park proper also were dropped.

The Tribute has preferred the creation of a national recreation area under Park Service administration for Canyonlands. This would permit recreation as well as full resource development—and in a State so gravely in need of increased funds for schools, exploitation of all natural resources is needed.

But if State and congressional leaders in Utah agree a national park is the only answer, then it should be kept to a minimum in area, as the present compromise plan seems to do.

There is no question that Utah would benefit from establishment of another national park.

However, except for a few delicate formations and arches and undesirability of permanent developments in improper places, it is foolish to regard the Canyonlands as slipping away forever if not immediately given park status.

Early in 1960 the Tribune called attention to the need for protection in their primitive form of the Needles, Chesler Park, and other popular scenic spots, with less rigid protection for adjacent lands. We feel that in the long run, as the national recreation area concept proves popular and feasible, most of the Canyonlands will come under this type of administration.

AMERICA IS LAST WITH THEM

Mr. YOUNG of Ohio. Mr. President, most of us remember the "American Firsters," who were so vociferous about 25 years ago. I remember very distinctly, as Congressman at Large from Ohio at that time, addressing a crowd of "American Firsters," in Cleveland Heights and being jeered and threatened in the course of my speech. It did not bother me at that time, nor would such a thing bother me now.

They were demanding critics at that time of decent dealing by our Government with friendly foreign nations. They wanted us to build up again a high-tariff wall around our Nation. Congressman Hale Boggs, Democrat of Louisiana, a distinguished leader in the House of Representatives stated recently that the John Birchers and other right-wing lunatic fringe groups seem a resurgence of these virulent and misguided critics of fellow Americans. "They are best described as 'America lasters,'" he said. They always insist our Nation's position is wrong. They demand, "Get the United Nations out of the United States and the United States out of the United Nations." They overlook danger from Red China and Communist Russia but falsely claim Communists occupy official positions in the State Department, are prominent in university faculties, and even in Protestant churches and the PTA. Their right-wing literature and pamphlets make a hero of Moise Tshombe and their hearts bleed for the "oppression" of Katanga as they spread the propaganda of the well-heeled Katanga lobby. They praise De Gaulle of France, Diefenbaker's anti-Americanism, make a martyr of former Venezuela tyrant, Jiménez. America is always in the wrong, according to these pamphleteers. They denounce former leaders, such as President Eisenhower, as "conscious tools of the Communist conspiracy" and become apoplectic with rage over Chief Justice Warren and our great Supreme Court. They are truly "America lasters."

NOTICE OF HEARINGS BY JOINT ECONOMIC COMMITTEE ON THE SUBJECT OF STEEL PRICES, PROFITS, PRODUCTION, UNIT LABOR COSTS, AND FOREIGN COMPETITION

Mr. DOUGLAS. Mr. President, I wish to announce that the Joint Economic Committee has decided to hold hearings on the subject of steel prices, profits, production, unit labor costs, and foreign competition. It is doing this in the context of the program of the committee to hold hearings on the subject of the domestic economy as soon as possible. These hearings on steel, of course, have been touched off by the recent action of Wheeling Steel and Lukens Steel in raising their prices in a selective way.

We believe that such hearings, if properly conducted, could have a salutary effect in helping to inform Congress and the public of the actual effects concerning these matters.

We hope to start the hearings either on Monday, April 22, or Tuesday, April 23.

It is the intention of the committee that before the views of conflicting parties are heard, the committee will attempt to lay a groundwork of fact and detail, on which all can agree, so that the opinions, results, and recommendations will, so far as possible, reflect an informed view of the problem.

THE POLLUTION OF THE COUNTRY'S WATER SUPPLIES BY DETERGENTS

Mr. DOUGLAS. Mr. President, I ask unanimous consent that there be printed in the Record at this point an excellent broadcast by Edward P. Morgan, commenting on the bill which the junior Senator from Oregon [Mrs. Neuberger], the Senator from Wisconsin [Mr. Nelson], and the Senator from New Hampshire [Mr. McIntyre] have introduced calling for the protection of the country's water supply from the damage caused by detergents.

There being no objection, the text of the broadcast was ordered to be printed in the Record, as follows:

Last week the junior Senator from Oregon, Maurine Neuberger, and two freshmen Senators, Gaylord Nelson, of Wisconsin, and Tom McIntyre, of New Hampshire, all Democrats, tackled a growing national health problem which, if neglected much longer, may literally have Americans foaming at the mouth. Jointly they introduced a rather simple bill to call a halt, within 2 years, to pollution of the country's water supplies by detergents.

We Americans use almost 4 billion pounds of this stuff a year and although it may delight housewives by washing away tattletale gray, the product is rapidly emerging as a first-class menace. As reported in this corner previously, it has already spoiled drinking water supplies in a number of communities with insoluble suds, drowned wild ducks by permeating their feathers with chemicals, harmed fish, menaced livestock, and added to the ruination of the beauty and utility of streams.

The diabolical ingredient in modern detergents is a powerful oil-based type of chemical—known as ABS—which although it cleans effectively, contains a stubborn refractory hard core which resists decomposition by bacterial action of waste treatment systems and natural waters. ABS can be washed hundreds of miles down rivers and pollute the water supply of downstream users in other States. It may persist in underground water supplies for years. Senator McIntyre pointed out that its concentration increases as water is reused. For example, "in the Ohio River, where water is reused 4 times, the concentration (of ABS) is already 10 times the national average for streams." He added that in many places in the country billows of foam clog municipal treatment plants, choke large apartment house drains, backing up water to create very serious health hazards.

Edging up to the problem with a cutting comment on another issue—the deceptive packaging of merchandise—Senator Neuberger said: "The housewife * * * has now discovered that it is impossible to buy a container of detergent in a standard size and shape with its contents clearly marked. She is met at the supermarket counter with a cockeyed array of squeezable, narrow-waisted, slant-shouldered detergent packages in odd and mystical measurements. The selection of a suitable detergent at an economical price has become a dismal, new, and unrewarding chore.

"But one dispenser of detergents that the housewife has not bargained for was her own tap faucet." Undissolved ABS has charged out of the plumbing in sickening sudsiness in a number of States.

The Senators' bill would provide Federal standards of breakdown which detergents would be required to meet or be barred from manufacture. Paradoxically, West Germany, where detergents were invented, has already enacted a similar law, and Congressman Henry Reuss, of Milwaukee, recently introduced legislation, in the House embodying its basic elements. Senator Nelson, who, when he was Governor of Wisconsin, earned something of a national reputation in crusading against detergent pollution and for conservation of natural resources, stressed that a detergent has already been developed, with a sugar instead of an oil base, which breaks down satisfactorily in water. The price reportedly was some 15 percent higher than present detergents but the savings in other ways could be incalculable.

However, Nelson doubted that legislative action would succeed until the problem—which he described as in a crisis stage—is better understood. He emphasized that the bill would not be a hardship on the detergent industry or deny detergents to housewives. Nelson argued that Federal action was necessary, in part, because of the extreme difficulty for a single State to do the research and testing necessary to set standards and impose adequate controls, and furthermore because water does not respect State boundaries, water pollution is, as it were, already in interstate commerce.

It was obvious that he had a broader issue in mind. Unless the country girds for battle immediately, Nelson said in his Senate speech, against the ruination of our natural resources and our very environment, Americans "are not going to have clean water to drink, clean air to breathe, decent soil in which to grow their food, and a green outdoors in which to live a few decades from now. This is a battle to preserve the simplest, basic elements necessary to human survival."

Individual State efforts—such as a special $50 million conservation fund in Wisconsin—Senator Nelson argued, "* * *cannot begin to save the environment in which we live against the powerful assaults of industrialization, congestion, pollution, erosion, blight, and decay.

"We need a comprehensive, nationwide program to save the natural resources of America." And, he maintained, "we need this just as desperately as we need a defense against atomic missiles."

The ordinary citizen cannot do much directly about our missile defense but preservation of natural resources surely is something he can take a personal hand in. And if that's soft soap, let the detergent lobby make the most of it.

NATIONAL ACADEMY OF FOREIGN AFFAIRS

Mr. SYMINGTON. Mr. President, hearings have already begun on the proposal to establish a National Academy of Foreign Affairs, and public support for the creation of such an institution is steadily growing.

There would seem every good reason why all Government employees should have the right to further constructive education, as is already given members of the State Department itself.

In the past, legislative proposals providing for institutions to train our foreign affairs personnel have been consistently opposed by the Foreign Service Corps itself.

It is particularly significant, therefore, that the Foreign Service Journal, unofficial spokesman for the Foreign Service, now gives its full editorial support to the bill currently under consideration, S. 865.

As the Journal points out, the proposed Academy "is in no way intended to compete with the activities of established colleges and universities or of the National War College and the services war colleges; rather its role is to fill a gap in the national security training which cannot, for obvious reasons, be systematically conducted in non-Government institutions. The academy thus represents a major conceptual reassessment of training requirements and reflects the radically changed world environment of the 1960's.

Mr. President, I ask unanimous consent that the editorial entitled "Blueprint for Training," from the March 1963 Foreign Service Journal, be printed at this point in the Record.

There being no objection, the editorial was ordered to be printed in the Record, as follows:

Blueprint for Training

Journal readers are aware of the dialog between certain Members of Congress and the Department through the last 5 years and more over the preferred manner in which to recruit and train civilians for roles of responsibility in the conduct of foreign affairs. The debate has been active and enduring since 1959. We have in the past editorialized against proposals that a West Point of diplomacy be established at the undergraduate level; the Department has consistently maintained, without prejudice to its acknowledged responsibilities for providing adequate advanced inservice training, that Foreign Service officers should be a product of the diversified American educational system. Throughout this period, the suspicion has lingered in high quarters that the Foreign Service Institute and the Department's training activities in general were inadequate to the times.

On February 11, however, legislation was introduced into Congress for a National Academy of Foreign Affairs Act of 1963. There now exists an administration blueprint for postgraduate training in the complexities of foreign affairs which has the support of the President and the interdepartmental community. All who have been engaged in this enterprise deserve congratulations. It is hoped that the Congress will see its merits and give it the support it deserves.

The rationale of the Academy is stated in the findings and declaration of policy of the bill:

"The Congress further finds and declares that our responsibilities can be fulfilled more effectively by the establishment of an institution at which training, education, and research in foreign affairs and related fields may be undertaken on an interdepartmental basis which would support integrated U.S. efforts overseas and at the seat of government."

The Academy thus forwards the insights of the successful interdepartmental country team seminar now being conducted at the Foreign Service Institute, i.e., that the integration of national security policy into an effective operational strand requires the careful coordination of the unique capabilities of all affected operational agencies (economic, military, psychological), even though responsibility for coordination will normally rest with the Department of State. The object is to expose each agency's personnel to the capabilities and responsibilities of all others'—to make each knowledgeable of the others' business in the widest possible range of problems and contingencies.

The concept of the Academy is that in the broadest sense its program of instruction and research will be designed to cover all significant aspects of foreign affairs in order to meet the needs of all U.S. departments and agencies actively involved in foreign relations. Its purpose is to short circuit the heavy costs of "trial and error" education while drawing to the maximum on case studies of successful and unsuccessful experience. It is in no way intended to compete with the activities of established colleges and universities or of the National War College and the services war colleges; rather its role is to fill a gap in national security training which cannot, for obvious reasons, be systematically conducted in nongovernment institutions. The Academy thus represents a major conceptual reassessment of training requirements and reflects the radically changed world environment of the 1960's. In scope, depth, purpose, function and structure, its program and purpose are designed to transcend those carried out by the Foreign Service Institute created by act of Congress in 1946.

In supporting the Academy, we can also acknowledge the enormous contributions which the Institute has made to the efficiency of the Service and the allied agencies through its senior training, course content, its programs in languages, area specialization, Communist theory and practice, and techniques of coordinating interagency programs.

The advantages of moving from the Institute to the Academy have been carefully assessed during the past year by two distinguished citizens' panels (the Herter committee and the Perkins' panel); and under the Department's leadership, they have been studied and adopted within the interdepartmental community. We think the concept of the Academy fits the times and represents a solid program of training requirements which can immeasurably strengthen the Department and the Service in the years ahead.

REPORT ON PROGRESS OF SECRETARY OF DEFENSE McNAMARA'S PROGRAM TO REDUCE COSTS IN DEFENSE PROCUREMENT AND SUPPLY—A GREAT AND COURAGEOUS SECRETARY

Mr. DOUGLAS. Mr. President, I rise today to use this forum as a means of expressing to both the Senate and the public in general the great respect and admiration in which I hold the present Secretary of Defense, Mr. McNamara. I believe him to be one of our truly great Secretaries, not only ranking with Stanton and Marshall, but perhaps the best Secretary of Defense of all time. He is not only a man who understands the complex and intricate details of the Defense Establishment, but he has shown the courage to take actions on behalf of the public interest to make our country stronger.

I have never considered myself qualified to speak about those defense matters concerning weapons, tactics, and strategy, and I have kept silent on these matters. However, for a long number of years, I have been deeply concerned with the questions of supply and procurement in the Defense Department and I have gone into these in considerable detail. Perhaps the best way of indicating the respect with which I hold the present Secretary of Defense is to report to the Senate and the country about the way he has unified these activities and greatly improved their efficiency. The facts will stand as testimony both to his ability and his courage.

PREVIOUS CRITICISMS OF WASTE

For many years, a number of us have been concerned about the waste in the military procurement and supply systems. A number of excellent studies have been done by the Hoover Commission and by House subcommittees, including especially those by Congressmen BONNER and HÉBERT. These studies have proved in depth the problems of procurement and supply. Here I want to pay tribute to the way in which a number of very hard-working subcommittees in the House over the years have provided invaluable information to the public and to the Congress. Such has been the work of Congressmen BONNER and HÉBERT. In addition, the then majority leader and now Speaker of the House JOHN MCCORMACK and Congressman TOM CURTIS have shown an unusual understanding of the problems of procurement and supply and, under the McCormack-Curtis amendment, they have provided the legislation by which the procurement and supply activities of the Department could truly be unified and made efficient.

Mr. President, further legislation on this subject is not needed; there is already enough to justify the Secretary of Defense in acting.

For my own part, from time to time in the past I have pointed out great inefficiencies in the letting of contracts, the duplication of the supply systems, the inefficiencies of the military stock funds, and the disposal of excess and surplus property by some agencies and competing services within the Defense Department when other agencies were buying new items of the same kind.

In addition, over the years the General Accounting Office under two great Comptroller Generals, Lindsay Warren and Joseph Campbell, have issued report after report concerning wastes in contracting and supply which have provided the facts which indicate great inefficiencies and the recommendations which could be a springboard for change.

The Defense Procurement Subcommittee of the Joint Economic Committee, of which I am chairman, has, over the years, provided detailed analyses and criticisms of the procurement and supply system of the Department of Defense. Behind almost all of these congressional activities has been the work of an unsung member of the staff of the Congress; namely, Mr. Ray Ward, who has done the daily work on the intimate details affecting these areas.

SAVINGS OF $1 BILLION NOW IN EFFECT—WILL RISE TO $3.5 BILLION

When Secretary McNamara appeared before the Defense Procurement Subcommittee of the Joint Economic Committee last month, he was able to state that he had already taken actions which have saved in the fiscal year 1964 budget alone over $1 billion, I repeat, and that he has initiated actions to go into effect before the end of this fiscal year; namely, fiscal 1963, which will ultimately produce annual savings of almost $2 billion. Furthermore, he has scheduled actions which, when completed, and if he is not prevented, will increase the rate of savings to $3.5 billion a year by the end of fiscal 1965. This is a truly great record and one which needs to be known both by the Senate and the public.

LETTER TO SECRETARY M'NAMARA

As a result of the activities of the Hoover Commission, various congressional committees, and the work of Representatives McCormack, Curtis, Bonner, and Hébert, and of the late Senator O'Mahoney, I addressed a letter to Secretary-designate McNamara on December 30, 1960, drawing attention to what I believed were appalling and even scandalous wastes in the Defense Department's procurement and supply systems.

I ask unanimous consent that the text of that letter be printed at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEAR MR. MCNAMARA: May I first congratulate you on your appointment as Secretary of Defense. I want to wish you well in this post which is of the highest responsibility and where the opportunity to serve the country is unsurpassed.

I am writing to draw your attention to my concern, and I think that of almost every Member of Congress and of private persons who have gone into it, over what is appalling and even scandalous waste in the Defense Department's procurement and supply system. I am enclosing a number of reports and other documents concerning this. May I mention only a few points.

1. Some 86 percent of all contracts—both in dollar and number—are now negotiated rather than let by competitive bidding. This is inexcusable and results in millions of dollars in excessive prices.[1] In fact, in the reports on the latest Defense Department appropriation bill both the House and Senate urged radical reform in this area. We have been met, however, by little more than a series of justifications of the existing system instead of action to carry out the congressional mandate.

2. In the last 2 years alone, the General Accounting Office has submitted over 50 reports going into detail concerning waste in procurement and supply. The testimony of the Comptroller General before my committee indicates that these are representative samples of a much larger universe. Almost every time they go into this question, malpractices and bad practices are found.

3. There is almost a complete lack of integration between and among the supply systems of the individual services and, equally important, within the services. There is vast duplication of personnel, inventories, warehousing, etc., which can only be solved by centralizing the supply systems. This should be done immediately at least with respect to those items which are common to all of the services.

4. The stock fund system has resulted in the accumulation of excess stocks and cash. Each service seems to operate them in a different way. There is no common practice concerning them. They often involve a double appropriation. In addition, the reimbursable requirements have had the effect of preventing other services and agencies from using stock fund materials which have subsequently been disposed of as surplus.

5. The amount and disposal of surplus property is also of scandalous proportions. We are now selling off some $8 to $10 billion of surplus supplies. The question arises, "What kind of a supply system do we have which could conceivably generate such amounts?" In addition, we are receiving only 2 to 3 cents on the dollar when they are disposed of.

Furthermore, there are literally hundreds of examples of concurrent buying and selling—where one agency of the Government buys new supplies which another agency is at the same time disposing of as surplus. A recent Budget Bureau study showed that this was true in two-thirds of the examples and in their study the equipment was new, available in the same geographic area, etc.

6. The Defense Department has at hand one agency which could radically help in solving some of these problems. That is the Armed Forces Supply Support Center. But it is not being properly used. Services have, in effect, a veto over its activities and its hands have been tied.

At the moment the Armed Forces Supply Support Center is attempting, under great difficulties, to match the excess or surplus supply inventory with requirements of the services. But much more is needed. There should be a complete inventory of all supplies so that new procurement or requirement can be matched, against existing stocks. This is not now true and calls for a central agency where all procurement requests can go and be matched against existing supplies before new purchases are made.

In this connection also, many of us believe that the services have excessive quantities in their various inventory categories, i.e., mobilization reserve, etc.

I believe that great savings can be made in procurement and supply in the Defense Department. To summarize—there must be more competitive bidding, greater centralization of purchase and supply, much more efficient handling of the surplus supply and disposal system, and the reform of the stock fund and reimbursable requirements.

---

[1] May be billions.

Fortunately, these reforms can take place under existing law. The Defense Department does not need legislation to effect these reforms.

I think the motto of the Department should be to "use it up, wear it out, make it do," wherever possible. As a minimum, I believe that $2 to $3 billion per year could be saved by merely beginning on these reforms. These savings should then be translated into more missiles, tanks, and combat troops so that our country can be more adequately defended and our people protected.

With best wishes.

Faithfully,

PAUL H. DOUGLAS.

Mr. DOUGLAS. Mr. President, it will be noticed that the letter was written just after the appointment of Mr. McNamara had been announced, but before he had taken office. I believe it initiated much action which has been beneficial, for as a result of that letter and of the activities of the persons whom I have mentioned, Secretary McNamara has met with groups of us at intervals of about every 3 months over the past 2 years. We have held many sessions together.

SECRETARY M'NAMARA'S GRASP OF DETAILS

Secretary McNamara's grasp of the intimate details of the procurement and supply system and his willingness to act on them has impressed all of us tremendously.

When we first met with Secretary McNamara in the early spring of 1961, he not only had read the criticisms which we had made, but he had grasped their complex details intimately and proposed specific actions which he intended to take to make improvements. At the next meeting he held, he reported on what actions he had actually taken and how he was going about improving the situation. For my own part, I must say that this was a great change over what I had seen happen many times in the past. In the past when we made criticisms, they were almost always dismissed as being untrue and no action or little action was ever taken. The Defense Department was almost always defensive and, instead of saying we will try to improve things, denied that any problems existed. But Secretary McNamara not only understood the problems; he was willing to admit the need for action and then to act.

ACTION TAKEN ON NEGOTIATED CONTRACTS

Let me be specific about the way in which Secretary McNamara acted on our recommendations.

First, let me talk about the area of negotiated contracts. We repeatedly pointed out that the Federal Government had been paying excessive prices for military procurement because of the negotiation of contracts. The reports by the Comptroller General, which I have here by the score on the adjoining desk, show that the Comptroller General had been pointing this out over and over again to the Department of Defense, but the Department of Defense previously had taken little or no action upon the criticisms made by the Comptroller General or the steps suggested by him.

Mr. SYMINGTON. Mr. President, will the distinguished Senator from Illinois yield?

Mr. DOUGLAS. I yield.

Mr. SYMINGTON. First, I congratulate the able senior Senator from Illinois for his talk on the accomplishments of Secretary McNamara. Naturally, all of us cannot agree with everything the Secretary does, we know that. The senior Senator from Illinois is one of the great authorities in government on the problem of the taxpayer getting the maximum return for his tax dollar. Do I correctly understand that he believes that with Secretary McNamara as the head of the Defense Establishment, for the first time, or, at least, more than ever before, the taxpayer is getting a greater return for his defense tax dollar?

Mr. DOUGLAS. That is correct.

Mr. President, I ask unanimous consent to have printed in the RECORD, following the comments of the Senator from Missouri, a table which shows the savings already underway and those which will be carried out when the program of Secretary McNamara goes into effect. He has already saved for the taxpayers a billion dollars. By the end of this fiscal year, he will have saved about $2 billion. In a couple of years, he will be saving $3.5 billion; and the end is not yet.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Department of Defense procurement and logistics cost reduction program

[In millions]

	Recurring annual savings to be realized from actions in fiscal years 1962 through current year				
	As estimated Jan. 15, 1963			As reported to President	
	1963	1964	1965	Fiscal year 1963	Fiscal year 1967
1. Buying only what we need:					
a. Refining requirements calculations:					
(1) Major items of equipment	[1]	[1]	[1]	0	0
(2) Initial spares provisioning	$104.0	$157.0	$210	0	0
(3) Secondary items	420.0	502.0	550	$150	$300
(4) Technical manuals	8.0	25.0	30	0	0
Total from refinement of requirements	532.0	684.0	790	150	300
b. Increased use of excess inventory in lieu of new procurement:					
(1) Equipment and supplies	189.0	284.0	394	225	450
(2) Idle production equipment	2.0	10.0	21	0	0
(3) Excess contractor inventory	20.0	20.0	20	0	0
Total from increased use of excess inventory	211.0	314.0	435	225	450
c. Eliminating "goldplating"	64.0	100.0	100	64	100
d. Inventory item reduction	1.0	4.0	5	0	0
2. Buying at the lowest sound price:					
a. Shift from noncompetitive to competitive procurement:					
Total percent competitive [2]	37.0	38.4	39.9		
Amount of saving	281.0	402.0	494.0	160	480
b. Shift from CPFF to fixed or incentive price:					
Total percent CPFF [3]	25.8	19.1	12.3		
Amount of saving	322.0	502.0	684.0	100	600
3. Reducing operating costs:					
a. Terminating unnecessary operations	292.0	357.0	442.0	257	600
b. Standardizing and simplifying procedures:					
(1) Consolidation of 16 requsition systems into 1 on July 1, 1962	10.0	20.0	20.0	20	20
(2) Consolidation of 81 transportation docs into 1	0.0	22.0	32.0	30	30
(3) Reduction of contractor reports	1.0	4.0	25.0	30	30
c. Consolidation and increasing efficiency of operations:					
(1) DSA operating expense savings	$31.0	$33.0	$42.0	$28	$50
(2) DCA and communication system savings	16.0	20.0	25.0		00
(3) Improved transportation and traffic management	17.0	23.0	23.0	40	65
(4) Improved equipment maintenance management	108.0	109.0	297.0	48	300
(5) Administrative vehicles	3.0	9.0	11.0	0	0

---

[1] Savings will be reported as identified. In fiscal year 1962 "requirements" for major items of equipment were reduced by $24,000,000,000. In fiscal year 1963, the Army reduced 1964 pipeline requirements by $500,000,000: and substituted an expanded production base for a mobilization reserve inventory, saving a net of $36,000,000, a total saving of $536,000,000.

[2] Fiscal year 1961 was 32.9 percent; total annual conversion from sole source of $1,900,000,000—savings are 25 percent per dollar converted.

[3] For the first 9 months of fiscal year 1961, CPFF was 38 percent; a reduction of $6,000,000,000 is required to reduce that percentage to 12.3 percent; savings are 10 percent per dollar converted.

[4] Fiscal year 1963 goal reported in July 5, 1962, memo to President, on a conservative basis, as $750,000,000

Mr. SYMINGTON. Mr. President, will the Senator from Illinois yield for a question?

Mr. DOUGLAS. I yield.

Mr. SYMINGTON. It is true, is it not, that the very large number of reports which are on the Senator's desk, and which came from the Comptroller General, came from a man who was appointed by the previous administration?

Mr. DOUGLAS. That is correct.

Mr. SYMINGTON. I asked that question so that no one would think this was a partisan comment on the part of the able Senator from Illinois.

Mr. DOUGLAS. That is correct. Joseph Campbell is a great public servant.

Mr. SYMINGTON. I believe he was previously a member of the Atomic Energy Commission, and prior to that was with President Eisenhower at Columbia University.

Mr. DOUGLAS. That is correct; he was comptroller of Columbia University.

Mr. SYMINGTON. As I understand the import of the talk which the Senator from Illinois is making today, the text of which I have read, he believes that Secretary McNamara is the first Secretary who has really put into practice the recommendations of the Comptroller General to save the vast sums of money which the Comptroller General believes have been wasted.

Mr. DOUGLAS. That is correct; and he is the first Secretary to put into effect the recommendations of the Hoover Commission.

Mr. SYMINGTON. Of course, I cannot speak for Secretary McNamara; but based upon my years of service with the able senior Senator from Illinois, I cannot imagine anyone whom the Secretary would be more pleased to have commend him for his actions in this field. I am sure that Secretary McNamara will be very grateful, as will the country, for the remarks which the distinguished senior Senator from Illinois is making this afternoon.

Mr. DOUGLAS. I appreciate what the senior Senator from Missouri has said. The senior Senator from Missouri was a great Secretary of the Air Force, a splendid administrator, and a devoted patriot, as well. He knows whereof he is speaking.

Mr. SYMINGTON. I thank the Senator from Illinois.

Mr. DOUGLAS. Mr. President, in fiscal year 1960, 86 percent of the defense contracts were negotiated instead of being let by competitive bidding. Under the practice of negotiated contracts, which the Department does business with only one or a very few contractors, and the bids are not subject to outside scrutiny or competition, the possibilities of abuse are manifold. We recommended that far more contracts be let by competitive methods. Secretary McNamara agreed with these criticisms and took the following action:

First of all, he ordered an immediate reduction of negotiated contracts by 5 percent. Furthermore, he and his excellent staff are pressing—and have set goals for it—to move more contracts from the negotiated type to the purely competitive bidding type. Where contracts could not be let under purely competitive bidding type. Where contracts could not be let under purely competitive methods, he has shifted negotiated contracts from the cost-plus-fixed-fee type to fixed or incentive-price type. The cost-plus-fixed-fee contracts gave no incentive for efficiency, and, indeed, actually stimulated increased costs. As I have said, he shifted then to fixed-fee or incentive-price contracts. Under the incentive-price contracts, if the contractor is able to reduce costs below the figure of the initial bid, he receives a fraction of the saving. So in the case of the incentive-price contracts, there is a direct stimulus to reduce costs. For every dollar shifted from cost-plus-fixed-fee contracts to either fixed-fee or incentive-price contracts, the Defense Department estimates that the savings are 10 cents on every dollar involved. The proportion of cost-plus-fixed-fee contracts has been reduced from 38 percent, in the first 9 months of the fiscal year 1961, to 26 percent in the fiscal year 1963; and by the fiscal year 1965 the Defense Department goal is to reduce this percentage to 12.3—or, in other words, from three-eighths to one-eighth.

Shifts from sole-source contracts to contracts subject to price competition provide savings of 25 cents on the dollar. It is in these areas that the Secretary has moved to make savings in the procurement system. If his targets are achieved, the savings in this area alone will amount to over $1.1 billion, on an annual basis, by 1965; and savings which are already in effect this fiscal year have saved $500 million in this area.

INTEGRATION OF THE SUPPLY SYSTEM

The studies of the Bonner committee and of our committee on the management of the nonweapon supply activities within and among the military services have disclosed great wastes which have been caused or permitted by the duplication of the supply systems. This waste has come about because of excessive inventories—to some of which the Senator from Ohio referred in discussing the civilian stockpiling; failure to secure the lowest prices by coordinated buying; excessive employment of personnel; the duplication of warehouses and storage space; and other inefficiencies. The Bonner committee recommended, and the Joint Economic Committee recommended time and time again, that the supply activities for nonweapon items be consolidated under a single agency responsible to the Secretary of Defense.

I emphasize that this recommendation was made, not for weapons—which we believed should be handled by the combat services, but for nonweapons items. The fight to get this change accomplished has gone on for over a decade, and has been resisted by the individual services and by some of the contractors who benefited by the previous inefficient system. But in this area, too, Secretary McNamara acted.

He has integrated the single-manager supply systems, along with the other nonweapon supply groups, into a single Agency, called the Defense Supply Agency, which is responsible to him. This single Agency has been put under the direction of a very able gentleman who bears the same name as the Secretary, but is not related to him—General McNamara.

Under a single head, the supply activities of clothing, subsistence, petroleum, medical and dental supplies, construction parts, automotive parts and equipment, industrial hardware, general stores, electronics, and services such as traffic management have now been brought under one Agency, instead of being under three, as before, or under a single manager. This has been done with a net reduction of a total of at least 3,700, and probably 3,900 jobs. I wish to emphasize that the new Defense Supply Agency and the supply agencies of all the services are now employing from 3,700 to 3,900 less employees than the number of persons the separate services previously employed in these activities.

As of the 1st of July 1963, approximately 1.9 million items, out of a total number of supply items of almost 4 million, will be under the jurisdiction of the Defense Supply Agency. This is only a beginning; and much more needs to be done, especially in the area of standardizing items. But great savings have already been made by this consolidation. Furthermore, the Defense Supply Agency was tested under fire during the Cuban crisis; and the results proved that such a centralized supply system can both save money and be efficient.

That was a real test, last fall, because quick action was required. It had been feared that the consolidation of the services would make them musclebound, and that they would not be able to move swiftly enough. But the Defense Supply Agency moved with great efficiency; and the troops, the air forces, and the naval vessels were equipped and made ready for war, if that had broken out.

That was an extremely courageous decision on the part of the Secretary of Defense, against tremendous opposition from groups which had a selfish interest in perpetuating the old methods.

In this area, much more still needs to be done, for there is no genuine reason why areas such as hospitals, chaplains, construction, housing, contract and auditing services, legal services, and PX's, to name only a few, should not be consolidated, instead of continuing the present system—to give an example—of having separate hospitals for the Army, the Navy, and the Air Force, and with some of the hospitals only half used.

GENERAL ACCOUNTING OFFICE REPORTS

We further urged that the Defense Department carry out, wherever possible, the recommendations made in the General Accounting Office reports. I think it fair to say that in the past, these were, far more often than not, ignored.

The record of what happened to the reports bears out that statement. Secretary McNamara has taken several steps to carry out this recommendation to consider very carefully the reports of the General Accounting Office.

First of all, he has cut in half—and perhaps more than in half—the time allowed for his own subordinates to process the General Accounting Office reports. This time has been reduced from a previous 120 days to 60 days or less.

Second, either he or his deputy—and in some cases both of them—review the General Accounting Office reports and the recommendations it has made, and they have set up a system to make certain that the recommendations are carried out or that there is a very good reason why they cannot be carried out. In other words, he has personally seen to it that the General Accounting Office reports are acted upon.

Third, he has agreed to set up, outside the Defense Department, an independent group to make a review and judgment as to whether the Department of Defense has followed through on the General Accounting Office reports.

It is unprecedented for the Defense Department to be willing to let outsiders pass upon the question of whether the Department has really tried to deal with the recommendations of the General Accounting Office.

Mr. President, what a change this is over the previous system of largely ignoring these valuable reports of the General Accounting Office. What an improvement this is over the previous system.

OTHER ACTIONS

The Secretary has also taken action in many of the other areas about which we have made recommendations—including the stock funds, the disposal of excess and surplus property, and greater use of the General Services Administration for control over general and nondefense-type activities common to many agencies of the Government. In this connection, I may say that the new Administrator of the General Services Administration, Mr. Boutin, has also been making a good record. I hope next week to submit a report on his activities; and I hope the report will be very reassuring. In the area of stock funds, however, I would say that the progress made thus far is not as great as that made in the areas of consolidation of the supply systems and in savings in contracts and procurement. Our committee will continue to press the Defense Department about these matters.

There are additional areas in which great savings have already been made. These include the refining of requirements, especially of spare parts and secondary items; the increased use of excess inventory; the elimination of gold plating; the reduction of operating costs; and the ending of unnecessary operations. Examples include standardizing and simplifying procedures, such as the consolidation of 16 requisitioning systems into 1; the consolidation of 81 transportation documents into 1; and the reduction of the number of contractors' reports.

AN AMAZING PERFORMANCE

Mr. President, this is truly an amazing performance. In my judgment, in this area of procurement and supply, Secretary McNamara's actions are unprecedented. He is a great Secretary of Defense. The country is privileged to have him as our Secretary of Defense and our country is stronger and the public interest better served because of him. He has shown, as only few men have the ability to show, an unprecedented understanding of the complexities of this vast Department.

I am making this speech today because I think the public should know this and because I believe that the public and my colleagues should stand behind him in the difficult decisions he has to make and help protect him from the sniping which is already underway.

Mr. President, former President Eisenhower, as he was leaving office, issued a farewell message to the Nation in which he warned the Congress and the country against the power of the military-industrial complex, with which he was well acquainted, but which, I am sorry to say, he had not been able to check. As he left office, the former President gave as his final injunction to his successor that we should prevent that military-industrial complex from committing the nations to excessive expenditures and wasting its resources, although the former President, as well as the present President, of course, have sought to defend our Nation to the very limit.

That military-industrial complex is a reality among contractors who made enormous amounts by getting excessive prices from the Government and among military services which want to run their own show and which were and are indifferent to economy.

Secretary McNamara is performing some of the labors of Hercules. I will not describe which one of the seven labors he is carrying out, but they are important.

There is danger that the Secretary will be undermined by criticism and by reversal. The Senator from Missouri properly said that, of course, we do not agree with everything which the Secretary does. After great perturbation of spirit, I voted against his recommendation last Thursday on the question of Nike-Zeus missiles. But one can say that the Secretary is a dedicated and efficient executive. Even though we may differ with him from time to time on individual items, the net effect of his work is for the great benefit of our Nation, and we should all stand behind him.

I ask unanimous consent that a copy of Secretary McNamara's testimony before the Subcommittee on Defense Procurement of the Joint Economic Committee also be printed in the RECORD at this point.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SECRETARY OF DEFENSE ROBERT S. MCNAMARA BEFORE THE SUBCOMMITTEE ON DEFENSE PROCUREMENT OF THE JOINT ECONOMIC COMMITTEE, MARCH 28, 1963

Mr. Chairman, members of the committee, it is indeed a pleasure for me to come before this committee for the first time to discuss the progress made by the Department of Defense in improving the economy and efficiency of its procurement and logistics operations. The Subcommittee on Defense Procurement of the Joint Economic Committee is among the pioneers in this effort. To the continuing interest and prodding of this and other committees of the Congress, we owe much of the progress achieved in this area over the last 10 years. The personal interest and warm support of the chairman and Mr. CURTIS and the other members of the committee have been a source of strength to me in my efforts to bring about improvements in our logistics management, many of which stem directly from the committee's recommendations.

As the members of this committee well know, it is extremely difficult to change the traditional way of doing things in the Defense Establishment. Many of the actions we have taken during the last 2 years to improve the management of our procurement and logistics operations were recommended by this and other committees of the Congress and by various nongovernmental committees and commissions, 10 and even 15 years ago. For example, the reorganization of the Army technical services, which we put into effect last year, had been recommended to the President by Secretary of Defense Lovett in 1952 with the comment that "a reorganization of the technical services would be no more painful than backing into a buzz saw, but I believe that it is long overdue."

Resistance to change is not unique to the Defense Department. This same problem is also found in almost any large business organization. Change means that people have to relearn the way they are doing things and this is always a painful and time-consuming process, whether in defense logistics or private business.

The term "logistics," in its broadest application, encompasses the entire spectrum of activity beginning with research and development and extending through procurement, production, construction of facilities, deployment, supply, maintenance, transportation, etc., and ending with the disposal of surplus materiel and facilities. In this sense, our logistics operations account for about three-quarters of the total Defense budget. Looked at in another way—our total payroll for active duty, reserve and retired military personnel and all civilian personnel accounts for roughly two-fifths of our total budget, with the balance (about $30 billion out of a total of $50 billion) accounted for by the purchase of goods and services of all kinds, that is, research and development; the procurement of weapons, equipment, spares, and other consumables; military construction; maintenance; utilities; etc.

Truly important savings in defense expenditures can be achieved only by attacking this entire spectrum of logistics activities, and that is precisely what we are trying to do. Decisions in the development phase of a weapons system will affect not only the cost of development but also the cost of production and operation of the system throughout its life. As this subcommittee noted in one of its recent reports, "It is apparent that two identical items can be procured, stored, inventoried, issued and maintained in a common way much more economically and efficiently than can two different items." Yet, each new weapon or piece of equipment that enters the inventory brings with it thousands of new and different items of spares and supporting equipment. That is why any serious attempt to reduce the number of different items in our logistics system and thereby reduce costs, must begin in the research and development phase.

RESEARCH AND DEVELOPMENT

The research and development phase itself can be broken down into a number of significant sequential steps:

1. Research (basic and applied): The effort directed toward the expansion of knowledge in such fields as the physical and environmental sciences, that is, mathematics, physics, psychology, biology, and the medical sciences.

2. Exploratory developments: Work directed toward the solution of specific military problems, but stopping short of the

actual development of experimental hardware for technical or operational testing.

3. Advanced developments: Projects which have advanced to a point where the development of experimental hardware for technical or operational testing is required, prior to the determination of whether the item should be designed or engineered for eventual service use.

4. Engineering developments: Developments which are being engineered for service use, but which have not as yet been approved for production and deployment.

5. Operational systems development: Continued development, test, evaluation, and design improvement of projects which have already entered the production-deployment stage.

It is from the first three categories—research, exploratory, and advanced developments—that we acquire the "technical building blocks," that is, the new technologies and critical components, that we need for major systems development. We cannot do a proper job of engineering development, least of all operational systems development, unless these building blocks are available. Lack of attention to this principle in the past has been one of the major causes of waste and inefficiency in the research and development program. All too often large-scale weapon system developments, and even production programs, have been undertaken before we had clearly defined what was wanted and before we had clearly determined that there existed a suitable technological base on which to draw in developing a system. And, all too often insufficient attention has been paid to how a proposed weapon system would be used; what it would cost; and, finally, whether the contribution the weapon could make to our military capability would be worth the cost. Let me give you a few examples to illustrate this point.

NUCLEAR-POWERED AIRCRAFT

Here is a case where a major development program was undertaken before a suitable technological base had been created. Nearly 15 years and about $1 billion had been devoted to the nuclear-powered aircraft project before it was terminated in 1961. Throughout its history the program was characterized by attempts to find shortcuts to early flight. Only a relatively small fraction of the money expended was applied to the really critical pacing item, namely the development of an efficient reactor with a potentially high performance. Most of the funds were consumed in aircraft and weapon system design, in trying to develop turbine machinery, aircraft components, radiation resistant tires and oils, and for the construction of various facilities, many of which would be needed only in support of a flight test program. The powerplant development was oriented primarily to the goal of early flight, an approach which yielded little, if any, potential for further growth into a militarily useful system. Neither of the two powerplants under development at the time the project was canceled held any great promise as practical propulsion units. Both would have required very large aircraft with limited speed and altitude characteristics, and involving severe operational and ground handling problems and hazards. Thus, due to the lack of the pacing item, it is highly unlikely that we would ever have obtained anything useful from a military point of view, had we continued the project.

THE P6M JET-POWERED FLYING BOAT

Here is a case where a project was advanced into the production phase long before even the basic design problems were solved. The project was started in 1951 to meet an anticipated requirement for a fast, mine-laying, jet-powered seaplane, capable of flying at transonic speeds at sea level and at high altitudes, with an ability to take off and land in 6- to 8-foot waves and carry a payload of 30,000 pounds over a range of 900 miles. Even though various model tests conducted in 1953 and 1954 disclosed a number of serious design deficiencies, the development was continued. Further technical deficiencies were disclosed during flight tests in 1955 and 1956. Nevertheless, the first production contract for operational aircraft was placed in late 1956. By the time this project was terminated in August 1959 the Government had expended almost $450 million, of which more than $200 million was spent on the production contract. Even then, most of the technical problems had still not been solved.

SM-73—GOOSE AERODYNAMIC DECOY MISSILE

Here is a case where the operational use of a weapon was not clearly foreseen prior to the commencement of full system development. The project was started in June 1955 and terminated in December 1958 at the cost to the Government of about $80 million. The Goose was essentially a pilotless aircraft which was designed to fly at about the speed of a B–52 and appear on enemy radar as a manned bomber. The operational concept called for launching Goose at the same time the manned bombers took off. However, the manned bombers could be recalled and returned to their bases but the Goose could not be recovered once it was launched. Thus, the Goose was incompatible with the new concept of positive control (under which the bombers automatically return to base unless specifically directed to continue to target) and had to be abandoned.

CONSTRUCTION OF A RADIO TELESCOPE AT SUGAR GROVE, W. VA.

Here is a case where the construction of an extremely complex research facility was started before all of the technical problems had been thoroughly studied. Construction of this radio telescope, known as the Big Dish, was decided upon in the fiscal year 1959 budget at which time its total cost was estimated at $80 million. Two years later the cost estimate had risen to $135 million and to preclude a further increase, the House Appropriations Committee established this amount as a ceiling on the project. By the spring of 1962 it was clear that the cost would amount to $190–$200 million, without any assurance the facility would meet the originally stated requirements. In the light of this, and other factors, the project was terminated last July at a cost to the Government of about $70 million.

PROGRAM DEFINITION

In order to minimize such problems in the future we are now following the practice of inaugurating large system development projects only after completion of what we call a program definition phase. This is the phase in which we, together with our contractors, do our thinking and planning—before we start "bending metal."

Very briefly, the program definition phase begins with the solicitation of proposals from industry and involves a number of early study contracts whose purpose is simply to define the program, prior to authorizing full-scale development. In the early stages of the program definition phase we do not attempt to establish rigorous specifications, preferring to encourage initiative and innovation on the part of our contractors or contractor teams. Indeed, where competing approaches present an unusually difficult choice, we may support more than one approach throughout the whole program definition period.

Working together, a contractor team can explore in depth the many unknowns which are present in any new effort. They can accomplish the overall system, design, define the subsystems and major components and begin the early stages of laboratory experimentation and design. Most important, they can identify the critical problems and make good estimates of how long and how much money it will take to solve them.

With this information at hand, we are in a much better position to decide whether or not to proceed with full-scale development. And if we decide on full-scale development, the basic scientific and management team will have already been established, with a visible history of successful collaboration during the program definition phase. Finally, it will be possible to make the decision for full-scale effort with far greater assurance that the cost estimates are sound, that the performance of the system will meet the promise, and that the military requirement will be filled at the time needed.

Prior planning, and even feasibility testing of pacing components, are a lot cheaper than having to reorient, stretch out, or terminate expensive projects after they have been started. There are, of course, exceptions to this general rule. Where a development can add a new and unique dimension to our military capability like the A- and H-bombs and the ICBM, great costs and risks are justified. But such cases are rare. The typical development promises, if successful, to achieve a capability that can also be achieved in other ways or represents an improvement of but modest proportions in our total military capability. In these cases the urgency is not as great and the employment of a more measured and orderly approach to development and production is fully justified. In fact, I have observed that in most cases careful and comprehensive prior planning actually saves time as well as money and results in more effective and more dependable weapons.

Another major source of waste, as I noted earlier, is the parallel development of projects and systems designed for the same general mission. The cost of developing new aircraft today is reckoned in the hundreds of millions of dollars. In the case of the B–70 the development of three prototype aircraft will probably cost us about $1.5 billion and they will still not be designed as operational vehicles. The cost of developing a new major missile system is even higher. We have invested well over $1 billion in the Nike-Zeus already and the Atlas and Titan developments ran well over $2 billion each. Even the cost of developing a new aircraft engine to the point of production is about $150 million.

But this is only the beginning of the increased cost. If two models are produced where one could do the job, the cost of production is also increased. Two production lines instead of one must be set up and tooled and the economies of large scale, repetitive production are lost, thus significantly increasing the cost per unit. Two separate pipelines of spares and unique support equipment instead of one must be established in the logistics system, with all the additional costs involved. And, finally, two sets of obsolete spares and support equipment instead of one will eventually have to be disposed of when the end item is finally phased out of the inventory. We have on hand, at this very moment, more than $12 billion of "excess and long supply" items in our inventories, excluding the billions of dollars of surplus obsolete major end items which have to be disposed of each year. Thus there are very great economic incentives for reducing the number of different weapon systems and major items of equipment in our inventories.

NIKE-TALOS CONTROVERSY

Yet the record is replete with instances of duplicate developments. One of the most memorable cases of parallel weapon projects conducted under the auspices of different services was the Nike-Talos controversy. The land-based Talos, an Air Force sponsored adaptation of the Navy shipborne Talos, was directly competitive with the Army's Nike–B (later the Nike-Hercules) development, the follow-on effort to the Nike-Ajax. The history of this controversy was complicated by the roles and missions issue which need not concern us in this context. What is of interest here, however, is the fact that these parallel developments proceeded right up to the point where both were about to be produced and deployed.

At this point, however, Congress balked at the prospect of such an obvious duplication and refused to authorize the use of construction funds for Talos until the Department of Defense completed an evaluation of the two systems and came forth with specific recommendations. As the report of the Senate Armed Services Committee stated: "The committee concluded that both the Army and Air Force are assigned overlapping roles and missions in the antiaircraft and continental air defense fields. * * * The committee believes that unless concise responsibilities are assigned, duplication of weapon systems costing in the multibillion-dollar ranges might result and that such duplication would obviously be too costly as well as inexcusable from a military standpoint." Faced with this mandate, responsibility for land-based Talos was transferred to the Army in the fall of 1957. Following an evaluation study, the Army cancelled the project in July of 1958 at a cost of the Government of $118 million.

I know that I need not burden this committee with a recitation of the Thor-Jupiter controversy which involved essentially the same kind of issue.

MULTIPLE AIRCRAFT ENGINE DEVELOPMENT

Another area in which unnecessary duplication has long existed is in jet aircraft engine development. While there may have been a justification in the early stages for a large number of differing projects, jet engine technology has now reached a point where parallel development is no longer justified. Indeed the time has come where we should make use, wherever possible, of engines already developed. This we have done in the case of the new C-141 cargo transport aircraft. Here we had a choice of developing an entirely new engine, which would probably have given this aircraft perhaps a 2 to 3 percent improvement in overall performance, or of using an already developed engine, the TF-33, at a saving in development costs alone of well over $100 million. Considering the additional saving which will accrue in production costs and later in supply and maintenance costs, it was clear that we should use the TF-33 engine.

MULTIPLE FIGHTER AIRCRAFT DEVELOPMENTS

One of the most costly areas of duplication has been that of fighter aircraft. For example, in the 1955-58 period there were no less than four aircraft under development to perform the fighter mission—two in the Navy and two in the Air Force. The Navy aircraft were the F4H-1 and the F8U-3. The Air Force aircraft were the F-105 and the F-107. One might argue that there were special requirements associated with Air Force and Navy missions which necessitated basically different aircraft. Even so, both the F4H-1 and the F8U-3 were, as the House Appropriations Committee noted in its report on the 1958 defense appropriation bill, "all-weather fighters with approximately the same mission and operational characteristics." Accordingly, the committee directed the Navy to "take prompt action to decide which of these aircraft it will place in production. This should be accomplished at an earlier date and with fewer test and evaluation aircraft than is presently scheduled." The Navy eventually chose the F4H-1 for production, but by the time the F8U-3 development was terminated, it had cost the Government over $136 million.

In the case of the Air Force, the F-107 was terminated at a cost of about $85 million. Even so, two of the four aircraft, the F4H and the F-105, were actually placed in production. A comprehensive analysis of these two production programs in 1961 convinced me that one aircraft, the F4H, could meet the need of the Air Force as well as the Navy, and do it better than the F-105. Accordingly, further procurement of the F-105 has been terminated and the F4H, now designated the F-4, will be bought for both the Air Force and the Navy. In addition, I have assigned supply management responsibilities for all spare parts and components peculiar to the F-4 aircraft to the Department of the Air Force and I have asked the Air Force and the Navy to develop and submit to me, for my approval, joint plans for the maintenance of this aircraft.

TFX

Perhaps the most important single action we have taken thus far to reduce the number of different weapon systems in our inventory is the TFX, which has been so prominent in the news of late. This aircraft development is designed to provide a replacement for the F-4. Instead of developing and producing two separate aircraft, one for the Navy and another for the Air Force, as was done in the case of the F-105 and the F4H, we decided to develop and produce one aircraft which would meet the requirements of both services. Admittedly, this is not a simple undertaking. The development of a major weapon system to meet the requirements of more than one service is something of a precedent in the Department of Defense. It took more than a year and a half and tens of thousands of man-hours of intensive study by both the Defense Department and industry to perfect this plan.

Yet it should be clear to all who are interested in economy and efficiency in the Defense Establishment that we can no longer afford to undertake major development projects to meet unilateral service requirements where a single project can meet the requirements of more than one service. The additional costs involved are much too great. From here on out, we must seek to develop weapon systems to perform a military task, and if it so happens that more than one service has the same task then they will be required, as a general rule, to use the same weapon system wherever this can be accomplished without compromising essential military requirements. Where operational conditions vary, as for example, in attack carrier operations, the minimum number of changes in the common system will be made to accommodate these differences.

This is the principle involved and I think everyone will agree it is an entirely sound one. While one might argue as to precisely how much one system would save as compared with two, I believe everyone would agree that the saving in logistics costs, as I am using the term here today, cannot help but be very substantial. In the case of the TFX we believe these savings will amount to at least a billion dollars in development, production, and operating costs over the life cycle of this aircraft.

DEPARTMENT OF DEFENSE COST REDUCTION PROGRAM

Because of the great uncertainties inherent in research and development, we have not attempted to establish precise monetary savings targets of that part of the "logistics spectrum," as we have for procurement, production, construction, supply, maintenance, transportation, etc. For the latter, we have established specific time-phased Defense Department goals for some 24 areas of logistics management. Selected goals in turn have been established for the Military Departments and Defense Agencies (i.e., DSA and DCA) so that our key logistics managers know exactly what is expected of them. These goals are admittedly ambitious and will be achieved only if all management levels in the Defense Department give them continuing, high priority attention. Accordingly, the service Secretaries and agency heads have been directed to make a monthly or quarterly review of progress achieved and to report the results to my office. These reports are audited by the Comptroller, both with regard to the goals and the progress against them.

The current cost reduction goals are summarized in the attached table. [Not printed in RECORD.] The last two columns show the goals reported to the President last July. Management improvement actions instituted in 1962 and planned for fiscal year 1963 should ultimately produce annual savings of about $1.9 billion. Our goal for end fiscal year 1965 is to initiate actions which will increase the rate of savings to about $3.5 billion a year. These are higher goals than those reported to the President, but I believe they can be achieved with a real effort on the part of all concerned.

Mr. Morris will discuss these goals in detail later and give you an up-to-date progress report on their attainment. What I would like to do at this time is to discuss some of the basic concepts and principles upon which these objectives have been developed.

BUYING ONLY WHAT WE NEED

Before we can intelligently decide what to buy, we must first determine precisely what is needed, and what is needed must be directly related to realistic and soundly conceived military plans and policies. All too often in the past, materiel requirements were determined on the basis of unrealistic military plans which themselves reflected the wide divergence of views among the services as to the probable nature of a future war. For example, the Air Force, planning essentially for a short nuclear war, was not buying enough combat consumables to support the Army in a conventional limited war. And the Army, envisioning a long, large-scale general war, was generating requirements so large as to be useless in planning its actual procurement programs. As a result, serious imbalances developed in the stocks of weapons, equipment, and combat consumables held by different services and even within the inventories of a single service.

Therefore, one of my first actions in the logistics management area was to insure that the requirements calculations for our major combat items were soundly based on unified contingency planning and realistic, attainable logistics objectives. By redefining our logistics objectives to accord with approved Defense Department-wide contingency plans we were able to reduce our total stated material requirements by some $24 billion. By setting out realistic goals that could be achieved within a reasonable period of time, we have been able to assure that the readiness levels of all related elements of the military forces are raised together and maintained in balance, one with another.

The first step was taken in 1961, in connection with the development of the fiscal year 1963 budget, with the establishment of a specific procurement objective for a large number of important items needed to insure that all of our forces could engage in sustained nonnuclear combat operations for a reasonable period of time. In the 1964 budget, now before the Congress, we propose to take another step to a still higher level of readiness, but again with an eye to the balance among all the related elements of the forces.

In moving toward this goal, we are giving priority to those items in which we are most seriously short, and to those new items which offer large improvements in combat effectiveness in relation to their cost. Modernization simply for its own sake is a luxury we cannot afford. Only by carefully husbanding our resources can we insure that all of our essential materiel requirements are met and that all of our forces are supplied and equipped, on a balanced basis, and are able to carry out the plans we have set for them.

We are also taking steps to get away from the use of often arbitrary and wasteful rule-of-thumb measures for determining pipeline requirements. Instead of simply adopting a standard factor for pipeline computations, we must, at least in the case of high cost, major end items and components, determine quantitative requirements on an item-by-item basis. We must explore every opportunity to shorten leadtimes by using our transportation resources more effectively, by taking steps to increase the post D-day production potential, etc. It is obvious that very great savings are possible if we are able to reduce the pipeline requirements without adversely affecting combat readiness. Let me give you a specific example: in the case of the M–88 tank recovery vehicle, we found that the substitution of a fully adequate transit pipeline factor of 55 days for the previously used arbitrary factor of 120 days enabled us to realize savings of $12.5 million on just this one item. These actions not only reduce procurement requirements, they also reduce storage and maintenance costs for the entire operational life of the item and, eventually, the amount of surplus which has to be disposed of.

The problem of setting sound requirement standards for major items of equipment is admittedly difficult; however, in the area of "supply inventories" the logistics management problem becomes far more complicated. This complexity is caused primarily by the great number and diversity of the items involved—nearly 4 million different items, having a value of $40.6 billion, currently being carried in our supply system. Because these items are so numerous and diverse, we simply must decentralize their management. However, when we do so, we then encounter the tendency of each echelon in the supply system to introduce unilateral safety factors into its requirement calculations. The final result, of course, is that the computed requirement often grossly overstates true needs. To improve the soundness of our supply item requirement calculations, we are undertaking a series of management improvement actions such as wider application of automatic data processing equipment, the increased use of fast logistics communication links, and the continuous review and redefinition of safety factors in our requirements computations.

It is not enough to determine simply the quantitative requirements for equipment and supplies. We must also determine the qualitative requirements as well. There is no point in paying for performance or quality features that are not needed to accomplish the essential military task. In any meaningful sense, procurement of excessive quality, which we call gold-plating, is just as wasteful as procurement of excessive quantities. While it is understandable that an item costing $1,000 may perform more effectively than another costing half as much, we must always make a judgment as to whether the additional performance is worth the doubled cost. This will always be a most difficult area, since informed judgment is required in all such determinations. It is an area, however, in which we have only just scratched the surface of potential management improvement and in which we feel that substantial additional savings can be made in the future.

CONSOLIDATION OF COMMON SUPPLY AND SERVICE ACTIVITIES

In order to be sure that we are "buying only what we need" we must know exactly what we already have on hand and on order; and this, in an organization as huge, diverse and far flung as the Defense Department is far from a simple problem. This is particularly true with regard to long supply and excess items, one of the most galling and troublesome areas of logistics management. Instances of one Service buying items that are being disposed of by another are, to the taxpayer, the most unexplainable and inexcusable kind of waste. Yet this problem can never be entirely avoided as long as you have different parts of the organization buying and managing the same items. One solution, of course, is to have only one element of the organization purchase and manage all commonly used supplies and services, wherever centralized procurement is indicated. And this has been the solution long favored by many Members of the Congress.

The trend toward the consolidation of the logistics functions, including the procurement of common items of supply and services, has been underway in the Defense Establishment for a long time. Certainly, since the end of World War II, the sentiment, especially within the Congress, for faster progress toward consolidation grew markedly stronger. Following the Unification Act, the problem of overlapping logistics functions in the Defense Department drew the repeated attention and criticism of the Congress. Beginning with the recommendations of the Bonner subcommittee in 1952, the efforts of members of this committee in effecting passage of the O'Mahoney amendment to the 1953 Defense appropriation bill and later the McCormack-Curtis amendment to the Reorganization Act of 1958, Congress continually prodded the Department in the direction of truly unified logistics management.

The Defense Establishment, however, moved very cautiously toward that objective with various improvisations such as coordinated procurement, joint procurement agencies and later the establishment of single managers for common supplies and services and the creation of certain defensewide coordinating agencies such as the Armed Forces Supply Support Center. These improvisations, however, did not get to the core of the problem—the need for a single agency charged with the responsibility for procuring and managing all commonly used and centrally procured supplies and services.

I remember a presentation made to me back in 1961 dealing with the lack of standardization in the clothing area. Each service, for example, was buying a different type of butcher smock, each in several sizes—a total of 18 different inventory items. Today we stock only two types in fewer sizes—a total of seven different inventory items. You all know the story of the belt buckles and the exercise bloomers.

Thus one of the first and most pressing tasks I had to face when I assumed the office of the Secretary of Defense was the solution of this long-standing problem of the management of common supplies and services. In reviewing the efforts that had been made since World War II, I concluded that this problem must be attacked head-on. It seemed clear to me, as it had to this committee for many years, that only through the establishment of a separate, single supply support agency could we ever hope to find a lasting solution. The result was the creation of the Defense Supply Agency, which now does the buying, the stocking, and where necessary, the surplus disposal of a wide range of commonly used supplies and services. Within its area of responsibility, it will greatly help to insure that we "buy only what we need."

Already, the new Agency has made possible a personnel reduction of 3,700 in the fiscal year 1964 budget with an operations and maintenance saving of $33 million. Inventory is expected to be reduced by $232 million during the current fiscal year with a further reduction of $112 million in fiscal year 1964. DSA now handles about 1 million supply items but the number of different storage points is being reduced from 77 to 11.

The basic principle that there should be a single agency to procure and manage common items of supply or services for all users is, as this committee has repeatedly pointed out, as valid for the Government as a whole as it is for the Department of Defense. Therefore, in our own efforts to obtain greater efficiency through the consolidation of common logistics support activities, we should not restrict ourselves to Defense agencies alone. Whenever we find that it is more economical to use the capabilities or facilities of other Government agencies, with no loss in military effectiveness, and at the same or less cost, we should not and have not hesitated to do so. The General Services Administration annually buys for us about $770 million of common-use items such as office supplies, furniture and automatic data processing equipment. This agency also helps us in the screening and disposal of surplus property, in the leasing and maintenance of real property, the storage of records, the purchase of utilities, etc.

BUYING AT THE LOWEST SOUND PRICE

Once we have determined what it is we need to buy, the next problem is to procure it at the lowest sound price considering, of course, quality and delivery dates. For over 100 years, formal advertising has been the preferred method of Government procurement. This method not only insures that the price discipline of the competitive system is harnessed to the advantage of the Government but it also minimizes the risk of bias and preferential treatment in the awarding of contracts. However, since the end of World War II only a small portion of defense procurement has been awarded on a formally advertised basis. To a major extent this was unavoidable, as only conventional classes of equipment and supplies, purchased repetitively in volume, lend themselves fully to procurement by this method.

Formal advertising is inappropriate for virtually all research and development work and for the acquisition of many of today's sophisticated weapon systems, where it is impossible to draw up detailed specifications in advance and make firm fixed-price contracts, with selection based on price alone. Moreover, there are a number of other situations where formal advertising is not applicable by law; for example, small business set-asides, small purchases (under $2,500), emergency purchases, the procurement of perishable subsistence, and items subject to military security classification. These, too, serve to reduce the portion of defense procurement that can be accomplished through formal advertising.

Notwithstanding these limitations, we are making a vigorous effort to expand the use of formal advertising. In this connection, the so-called two-step procurement procedure recently approved by the GAO should prove extremely helpful where precise design is not as important as specific performance characteristics. Under this procedure bidders are first asked to submit proposals to meet specific performance criteria without providing a price quotation. These proposals are then examined by the Government engineers and buyers, and those which meet the desired performance characteristics are approved. In the second step, bidders whose products have been approved then submit sealed bids and the contract is awarded to the lowest responsible bidder under the formal advertising procedure.

INCREASING PRICE COMPETITION

But the fact that for much of our procurement we cannot rely on formal advertising does not mean that we should not demand and facilitate competition for defense contracts. This, in fact, has been one of my principal objectives, not only in the procurement area but also in research and development.

One way in which we can increase competition is to minimize sole-source procurement wherein, for example, we automatically buy spares and spare parts from the original producer of the end item. By breaking out these spares from the main contract we can procure them separately through competitive procedures. This, of course, entails the identification of the spares or spare parts, the preparation of procurement specifications, and the seeking out of sources of supply in order to permit competitive bidding. In this effort, we have concentrated first on the high dollar value items already in the defense supply system. Now we are seeking to apply this technique to new items as they enter the supply system and to develop uniform procedures for screening and identifying such items in current and future procurements.

We are also trying to introduce competition at an earlier stage in our procurement process at the point where a new item is ready to be moved from development into production. If successful, this would enable us to avoid paying a price premium on the first large-scale production buy. But use of this method does open up a whole series of new and difficult problems. In order to introduce competition early in the procurement cycle, we must see to it that the necessary drawings and technical data are produced during the development phase so that they may be available at the time the first procurement is made. This is not always possible, especially where time is critical or where the design is still subject to major change. Also, where large engineering and tooling costs are involved, it is unlikely that any new source would be able to compete successfully against the development contractor who may have already completed a large part of the production engineering and tooling.

Experience has demonstrated that very large savings can be achieved by increasing competition. We estimate these savings at about 25 cents on each dollar shifted from noncompetitive to competitive procurement and this is the basis upon which we have computed the savings of nearly $500 million per year to be achieved by fiscal year 1965, as shown on the following chart (chart not printed in RECORD).

REDUCTION IN CPFF CONTRACTS

It has long been recognized that cost-plus-fixed-fee contracts usually provide no incentive for economy, or superior performance. Nevertheless, in recent years, an increasing share of our procurement has been carried out under CPFF contracts, rising from about 13 percent in 1952 to nearly 38 percent during the first 9 months of 1961. To some extent, this shift to CPFF contracting was unavoidable because of the exploding technology of the 1950's which introduced unprecedented complexity and sophistication in our equipment.

However, even where firm fixed-price contracting is not feasible, penalties and rewards can still be utilized. There are other techniques available through which we can provide incentives to the Defense contractor to perform economically and efficiently. The most important method is the use of incentive contracts in which the contractor's fee is increased if he betters the target price or target performance goals, or conversely, is reduced or eliminated entirely if he fails to meet the contract targets. By fiscal year 1965, we hope to reduce cost-plus-fixed-fee contracts to about 12½ percent of our total contract awards, with an eventual annual savings of nearly $700 million. Already in the first 8 months of the current fiscal year we have reduced the cost-plus-fixed-fee contracts to about 23.3 percent of the total as compared to 38 percent in the first 9 months of 1961, as shown on the following chart (chart not printed in RECORD).

REDUCING OPERATING COSTS

An equally important part of our cost reduction program is our effort to reduce the day-to-day costs of operating the Defense Establishment. One important aspect of this effort has been our program for the closing of unneeded bases and installations. To date, we have announced plans to close or reduce in scope some 330 activities, of which 72 are located overseas and 258 within the United States. As Assistant Secretary Morris will report in detail later, good progress has been made in carrying out these announced closures and continuous studies are being made to identify additional installations and bases that can be reduced or closed in future years. We expect by the end of fiscal year 1965 to have initiated actions which will eventually save over $440 million per year. Progress to date is shown in the following table:

Actions announced as of Dec. 31, 1962

	Total
Number of locations	330
Acres to be excessed	274,000
Acquisition cost	$1,922,000,000
Personnel to be released	44,923
Annual savings when action completed[1]	$270,000,000

[1] Many actions require 2 or 3 years to complete.

In an organization as large as the Department of Defense, efforts to simplify procedures can yield surprisingly large savings. Therefore, we are examining our contractor reporting requirements, our requisitioning and transportation procedures, and other types of logistics paperwork with the aim of eliminating unneeded or overlapping procedures and achieving the greatest degree of standardization where elimination is not practicable. Substantial success has already been achieved, and we expect to make even greater progress in the coming years.

Another area where increased management effort can yield significant monetary savings, as well as greater combat readiness, is equipment maintenance for which we spend about $11 billion a year. Actions which we have already taken and plan to take through fiscal year 1965 should produce savings of about $300 million a year. But this is an area in which we have barely scratched the surface. To insure top-level attention to this function and to coordinate the efforts of the entire Department a full-time Deputy Assistant Secretary of Defense for Equipment Maintenance has recently been appointed.

One of the key ways in which we can make savings in the operations of the Department is through the consolidation of like activities. I have already mentioned the Defense Supply Agency but I am sure you will agree that the underlying principle applies to other areas of defense activity as well. The swiftly expanding requirements for modern military communications, for example, and their even more swiftly rising costs have made Department-wide management of certain portions of the communications system both militarily necessary and financially imperative. Accordingly, a new Defense Communications Agency has been established to guide the development of unified long-line communications systems for use by all elements of the Department. This Agency is also responsible for other important functions such as the development and support of the national military command system and the supervision of the military communications satellite development program.

Still another area where consolidation appeared to be a necessity was in headquarters intelligence activities. For this reason, we created the Defense Intelligence Agency not so much, in this case, to reduce costs but rather to utilize more effectively our resources in this vital area.

Real property management, including military family housing, provides another area for reducing operating costs. We have now brought family housing under centralized management in each department and established a new cost accounting system to facilitate better management. And with the cooperation of the Congress, we hope to bring together in a single appropriation all funds for construction, operation, maintenance, improvement and leasing of family housing.

Our efforts to improve the management of the entire logistics spectrum have resulted in some important changes, not only Department of Defense-wide, but also within the military departments. The Air Force in 1961 substantially realined its organizational structure to meet better the management requirements imposed by the radical change in the nature of modern weapon systems. The Army has virtually completed its reorganization started last year, and has significantly reduced the operational complexity and administrative overlapping of the former technical services. And now the Navy, too, is considering a substantial realinement of its organization to fit it better to the demands of modern warfare.

Mr. Chairman, the task of management in the Defense Department is never done. New problems arise as old ones are solved, as evidenced by the constant flow of GAO reports. I can assure you that these reports, as well as constructive criticism from any other source, receive top-level attention in the Defense Department. For example, I examine all GAO reports as they come into the Department and all of the written replies are reviewed and initialed by either Mr. Gilpatric or me, in terms of approving their substance, before they go back to the GAO.

I am sure that the logistics management improvement program, which I have outlined here this morning will not prove to be the final word. But I am equally sure that this program will correct many deficiencies of long standing and result in savings of several billion dollars per year.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. DOUGLAS. I am glad to yield to the majority leader.

Mr. MANSFIELD. I commend the excellent statement by the distinguished Senator from Illinois. As I read his speech, and as I listened to him, my mind went back over my 10 years in the Senate. I do not recall a single 1 of those 10 years in which the Senator from Illinois did not raise his voice on questions of waste in the military, of negotiated contracts versus cost-plus contracts, of the supply system, and other questions. I am sure that the Senator must feel a sense of personal as well as patriotic satisfaction that, after all those years, like a voice crying in the wilderness, so to speak, we now have a Secretary of Defense who not only reads reports, but also tries to do something about the constructive criticisms which have been raised over the past decade or more.

The Senator has indicated that he is making his speech in part to serve warning to those who would seek to undermine Secretary McNamara. To my knowledge, no one in this Chamber has indicated that he or she seeks such a result. But I dare say that there are others who find fault with the Secretary because of the fact that, when called upon, he does make decisions, which he is authorized to do. When called upon, he "knocks heads together," so that a decision can be arrived at. That also is his responsibility.

I suggest that anyone who seeks to undermine Secretary McNamara had better be very sure of the ground on which he is standing before he does so. The Republic is extremely fortunate to have a man of Secretary McNamara's ability, integrity, knowledge, and know-how in this most difficult of departments. He must handle in excess of 50 percent of our Nation's budget. He must know his way around in the field of foreign policy as well as defense. I understand he works from 12 to 16 hours a day. We are very, very fortunate in having Secretary McNamara head that particular Department. I join the Senator from Illinois wholeheartedly in his statement the Secretary McNamara is a great Secretary of Defense. The country is privileged to have him in that position; the country is stronger and the public interest better served because of him.

Secretary McNamara needs, not our sympathy, but our understanding. He knows what he is about. In my opinion, he is one of the best, if not the greatest, Secretary of Defense our country has ever had. Our Nation, as a whole, ought to be very grateful that a man of his caliber heads that particular Department at this particular time. Again I commend the distinguished Senator for bringing his statement to the attention of the Senate today.

Mr. DOUGLAS. I thank the Senator from Montana for his statement, which is precisely what we have learned to expect from him. His statement that in his judgment the Senate is unanimous in its support of the general program of the Secretary of Defense is very reassuring.

Mr. President, I yield the floor.

TEST BAN TREATY

Mr. MILLER. Mr. President, in yesterday's Washington Post there appears an excellent article by Chalmers Roberts entitled "Political Lines Forming on a Test Ban Treaty." The article analyzes some of the major arguments of both proponents and opponents and makes it clear that these arguments rest on proposals which have been advanced for a test ban treaty, and not on any agreed-upon draft of a treaty. This point is well taken, because it should be well known that the Soviet Union has firmly turned down all Western proposals relating to effective inspection and controls to insure that such a treaty is kept inviolate.

One significant statement appears in the article which I believe merits comment. It is this:

> And whatever his current degree of passion for a test ban, President Kennedy could be counted on to use every trick in the trade to put over a treaty if he signed one.

This statement should be considered in light of the fact that widespread concern has been expressed that our negotiators at Geneva have steadily reduced the number of onsite inspections which we say must be agreed upon—to the point that Dr. Edward Teller has felt it necessary to warn that the Russians want us to sign a Munich-type agreement and in this they are supported by widespread public clamor. I ask unanimous consent that Dr. Teller's short statement, which appeared at page 1588 of the Record, be printed at this point in my remarks.

There being no objection, the statement was ordered to be printed in the Record, as follows:

Consequences of a Test Ban

(By Dr. Edward Teller)

> Russian acceptance of a small number of control stations and on-site inspections have raised the hopes for an agreement on a test ban. Such a ban is considered as an important step toward ending the arms race. It is claimed that this serves the interest of the United States. Actually such a ban would be virtually unpoliced. It would endanger our security and would help the Soviet Union in its plan to conquer the world. The reasons for this statement are the following:
>
> #### I. THE TEST BAN WOULD PREVENT VITAL IMPROVEMENTS OF OUR ATOMIC EXPLOSIVES
>
> The Russians have announced that they have solved the problem of missile defense. Our missile defense is unsatisfactory. In the absence of testing, our defense will not improve because we need more knowledge concerning the use of nuclear explosives in missile defense and in the penetration of such defense. If the Russians install a satisfactory defense system while we are unable to do so, this will put us at the mercy of Soviet blackmail and aggression.
>
> We have started the development of clean and cheap nuclear explosives. We need more tests to complete this development. Clean and cheap explosives are needed for battlefield use, for peaceful applications, and for missile defense.
>
> Testing has frequently stimulated the invention of new approaches in the development of nuclear explosives. Past advances of this kind are classified; future advances are unpredictable. Nevertheless these advances are real and important. Without them our weapons laboratories will lose their competence in weapons research.
>
> #### II. THE TEST BAN WILL NOT INTERFERE WITH RUSSIAN PROGRESS
>
> The difficulty to police small underground explosions has been pointed out. The present Russian concessions will certainly not permit the control of small underground tests. Tests of small explosives are helpful in all branches of weapons development.
>
> Even bigger tests can be carried out secretly in space. This fact has been jointly asserted by American, British, and Russian experts meeting in Geneva in June and July 1959.
>
> The Russians have prepared an effective test series while negotiating with us. They have executed this series in the fall of 1961. In the closed Russian society such a maneuver is possible. In the open American society it is not. Repetition of the 1961 tactics may place the Soviet Union into a position of commanding leadership.
>
> Only great and comprehensive openness could guarantee the observance of a test ban.
>
> #### III. A TEST BAN MAY ENDANGER THE NATO ALLIANCE
>
> The avowed purpose of the test ban is to halt the arms race and to set limits to the proliferation of nuclear weapons. It is hoped that a test ban will be applied in a universal manner.
>
> It is unlikely that the ban will restrain the Chinese. But it is highly probable that the ban will be resisted by the French and we shall be expected to exert pressure on them. This may strain NATO to the breaking point. The Russians may desire a ban for this very reason.
>
> In 1938, the Western Allies abandoned Czechoslovakia. This led to World War II. Had the Munich agreement prohibited fighter planes and radar, the consequences would have been the fall of Britain.
>
> The Russians want us to sign a Munich-type agreement and in this they are supported by widespread public clamor. I hope that patriotic Congressmen of both parties will resist the pressure of a public frightened by crises and misled by the mirage of peace.

Mr. MILLER. Mr. President, this statement should also be considered in light of the thinking on the subject which the President has evidenced. For example, in his February 21 news conference, the President was asked:

> Question: Mr. President, just before Senator Humphrey left Geneva, he said that unless a nuclear test agreement were in final stages of preparation by April, that mankind might lose forever this unique opportunity for agreement. Do you think that April should be more or less the deadline month which will determine whether the Soviets ever intend to agree to this?
>
> Answer: No, I don't think April is in the sense of sort of an ultimatum * * *. I wouldn't put down the date and say by this date we will know finally. We have been on this business for 15 years. I must say that a good many people are opposed to this effort which is being directed by Mr. Foster in Geneva, and quite obviously it is a matter which we should approach with a good deal of care. But the alternative, if we fail, of increasing the number of nuclear powers around the world over the next 5, 10, 15, or 20 years, that alternative which I think is so dangerous keeps me committed to the effort of trying to get a test ban treaty * * *. I think people who attack the effort should keep in mind always that the alternative is the spread of these weapons to governments which may be irresponsible, or which by accident may initiate a general nuclear conflagration.

And again:

> Question: Mr. President, what basis do you have, sir, for your belief that a test ban treaty would inhibit the proliferation of nuclear weapons, and if you got a test ban treaty, how would this be used in the case of France?
>
> Answer: Well, in my judgment, the major argument for the test ban treaty is the limiting effect it might have on proliferation. Quite obviously, if it did not have that effect, then the treaty would be abrogated, and any treaty would so state, that either side would have the right to abrogate the treaty if proliferation resulted. Now, on the question of France, France has been recognized as a nuclear power by the Soviet Union. It would be up to the Soviet Union to make a judgment as to what action they would take on the treaty, if France continued to test. There is no guarantee, if we sign a nuclear test ban, that it will end proliferation. It is, however, our feeling that the Soviet Union would not accept a test ban unless they shared our view that proliferation was undesirable, and it might be a weight in the scale against proliferation, and I so regard it.

In summary, then, it appears that the President's main argument for a test ban treaty is that it "might" be a "weight" in the scale against proliferation. Accordingly, we find arguments resting on a balancing of the risks—the risk of proliferation if no test ban treaty is negotiated and ratified versus the risk of cheating by the Soviets and the risk that our own failure to test may prevent us from developing an antimissile defense and improved nuclear devices such as the neutron bomb.

As one who voted for the establishment of an Arms Control and Disarmament Agency, I believe I do not have to explain that I favor a stop to the arms race provided it is accompanied by effective inspection and controls which will insure an effective stop. However, I regret that the main argument for a test ban treaty which the President has advanced is that it just might be a weight against proliferation. This seems to me to be a very weak argument. In fact, there is no indication at all that France or Red China are going to be deterred from going ahead with their nuclear weapon development just because the United States, Great Britain, and the Soviet Union enter into a test ban treaty. So I suggest that the risks of proliferation are going to remain anyhow. On the other hand, the risks of cheating by the Soviets are great—and they will be all the greater if the number of onsite inspections is reduced. We know that the Communist leaders in the Kremlin hold to the philosophy that their end of one world of communism justifies the means; and that lying, cheating, stealing—anything goes. So let us not be naive about the so-called good intentions of the Soviets in these test ban negotiations. And if there are going to be any risks involved, let us make abundantly sure that the risks are in favor of the security of the United States.

In all fairness, I should point out that the President gave assurance in his news conference of March 6 that no test ban agreement would be accepted which would permit a series of underground tests by the Soviets to go undetected. However, this raises the question of what is meant by a series and how effective an inspection system is to be if it is to prevent a series from going undetected. These are rather vague generalities, and I do not believe that they will suffice when and if a negotiated test ban treaty comes before the Senate for ratification.

Finally, Mr. President, let us have it clearly understood that if indeed, as the Washington Post article states, President Kennedy will use every trick in the trade to put over a test ban treaty if he signed one, this is not going to help its ratification in the Senate. Since the legislature is an independent branch of our Federal Government, I believe the American people can have confidence that tricks and emotionalism will, if anything, prejudice the Senate against such a treaty. If the treaty, when and if it is negotiated, is one that is clearly consistent with the security of the United States, it will not require tricks or emotionalism to have it ratified.

I would urge our negotiators in Geneva and those in the State Department and the White House from whom they are receiving their instructions to bear in mind what I have said. There may be a few people in our Government who want a test ban treaty at almost any price, but I am quite certain they are not speaking for the people of the United States. Rightly or wrongly, the impression seems to have been generated that the United States and Great Britain are conducting these negotiations from a position of weakness, because it is our negotiators—not those of the Soviet Union—who have expressed a sense of urgency and willingness to do most of the giving. There is no reason for us to be any more urgent about this than the Soviets, Mr. President. I do not agree with those who say that time is on their side in the arms race. This is defeatist and pure conjecture. In fact, history would show the reverse to be true.

All of us recognize that the work of our negotiators is tedious and requires a great deal of patience and perseverance. However, it should be understood that their work may well go on for many years. The President was wise to make it clear that we are not going to try to meet any deadlines—April 1963, or later. In this, I am sure that most of my colleagues concur.

Mr. President, I ask unanimous consent to have printed in the RECORD the article from the Washington Post and Times Herald of Sunday, April 14, to which I alluded in my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

POLITICAL LINES FORMING ON A TEST BAN TREATY

(By Chalmers M. Roberts)

"It would be the biggest battle since the Treaty of Versailles."

That is the considered judgment of a key administration official about what would happen in the U.S. Senate if President Kennedy were to present it with a nuclear test ban treaty with the Soviet Union. And in the Senate, a key Member who would be in the forefront in defending a Kennedy treaty concurs completely with that judgment.

Maybe there never will be a treaty. It has been a case of close-but-not-quite, or apparently so, so many times that skepticism and wariness are the rule in Washington. Yet if ever hope was eternal, it is the hope of those within and without the administration who continue to push for a test ban treaty.

A PARTY-LINE DIVISION

The reason for the comparison with the epic 1919 Versailles Treaty struggle, which crippled President Wilson and kept the United States out of the League of Nations, is that for the first time in the history of the test ban controversy, the lines are hardening. The opponents are consolidating their position; the proponents seem to be counting mostly on the President and have yet to rally their forces fully.

And, perhaps most significant of all, the division on the test ban treaty is showing major signs of becoming a political division. There are and will be exceptions, of course, but, by and large, Republicans are the major opponents and Democrats the major proponents—of a treaty not yet signed.

Something should be said here about the prospects for such a treaty between the United States and Britain on the one hand and the Soviet Union on the other. The prospects are uncertain but not hopeless. Probably the greatest unknown factor is the effect of current Kremlin policy deliberations on Soviet policy.

For Soviet policy will have to be altered if there is a treaty. And if the Soviets do move an appreciable amount, there very likely will be enough American-British movement to bridge the gap. Something like that appears to be the assessment of both opponents and proponents of the treaty.

REPUBLICANS ORGANIZED

The chances of a treaty thus have stirred the opposition into action. Consider these facts:

The Republicans in Congress, a number of whom have badgered both the Eisenhower and Kennedy administrations for their various negotiating postures over the past 5 years, now have organized their opposition. They have created the Republican Conference Committee on Nuclear Testing with Representative CRAIG HOSMER, Republican, of California, as chairman. HOSMER is a member of the important Joint Committee on Atomic Energy.

The two leading GOP presidential possibilities, Gov. Nelson Rockefeller, of New York and Senator BARRY GOLDWATER, of Arizona, are critical of Kennedy test ban negotiations.

The big political question is whether former President Eisenhower would support a Kennedy test ban treaty. Quite probably, and quite properly, he will take no position until he can examine the text of such a treaty, if there ever is one.

COMMITTED TO IDEA

On a number of occasions involving major policy, President Kennedy has gone out of his way to give his predecessor an intelligence fill-in and to seek his counsel. General Eisenhower has responded in terms of national, not partisan, interest, and some Republicans have grumbled at the effective Kennedy tactic.

But whether the same thing would occur in the case of a test ban treaty remains to be seen. If General Eisenhower stood with the President for a treaty, it would forestall what otherwise might well be a division along party lines, at least as much of a division as was the case with the Versailles Treaty.

On a good many occasions as President, General Eisenhower spoke passionately of the desirability of a test ban. In 1958, his administration came close to a treaty. But as President, Mr. Eisenhower never really prodded his subordinates; indeed, some of them seriously undercut his test ban aspirations.

A QUESTION OF DEGREE

President Kennedy likewise has spoken with great earnestness of the need and hopes for a test ban. But there are differing appraisals of how deeply committed he really is.

To some in the administration, the President seems passionately determined to get a treaty if a reasonable one can be had. To others in the administration, Mr. Kennedy is far less passionate in this desire than he is, for example, about improving the Nation's sluggish economic growth rate.

All agree, however, that the central point in whatever degree of enthusiasm he does have for a treaty is the hope that it might dampen the arms race and do so, first of all, by retarding the proliferation of nations with their own nuclear weapons. These were basic hopes in the Eisenhower administration, too.

Up to April 10, there had been 427 reported nuclear tests. Of these, 253 were American tests, 145 Soviet, 23 British, and six French. It is known, however, that a number of both American and Soviet tests have never been reported. Perhaps the grand total since 1945 is close to 450.

CUBA CRISIS A FACTOR

A central factor in the early pressure for a test ban was the massive amount of radioactivity thrown into the atmosphere by the aboveground tests on both sides. This is still a major factor in pressure here to approve a test ban, but the pressure has diminished as the United States has gone underground (and France, too) and as the Soviets have halted testing. Most Soviet tests have been atmospheric, however, and Senator Hubert H. Humphrey, Democrat, of Minnesota, returned from the Geneva negotiations recently with a feeling that more Soviet tests may come this fall.

Khrushchev's clandestine attempt to set up a missile complex in Cuba also has encouraged test-ban treaty opponents. How, they argue, could the United States put any faith in a treaty when Khrushchev was capable of that sort of thing? And since the United States barely discovered the missiles in time, though they were so close to this country, how could we ever be sure what was going on deep inside the remote Soviet Union?

It has been stated publicly that American ability to detect Soviet tests has increased through refinement of seismological techniques. But what has not been made public is the degree to which American information on the entire Soviet military strength and disposition—including test preparations—has been increased by such means as the Samos and Ferret satellites and other eavesdropping techniques.

Just how good these devices are is top secret; the Soviets almost certainly know more about them than do the American people. Indeed, the Soviets probably know more about them than do most Members of Congress. But the administration insists that even to talk about such techniques would endanger the national security.

Whether true or not, the result is to rob test ban proponents of an effective argument. If a treaty is signed, President Kennedy quite likely will reach a point of having to decide whether to lift the secrecy curtain to bolster his case for ratification. And it must be remembered that ratification requires a two-thirds vote of the Senators present.

Another argument being pushed by test opponents, and which has not been fully answered by the proponents, is whether a test ban would not now be far less effective as a means of slowing the arms race than it might have once been. China's refusal to accept a Soviet nuclear monopoly within the Communist bloc and France's determination to create her own nuclear force independent of the American deterrent make it evident that no American-British-Soviet treaty would bind either of them.

Finally, there is a gnawing feeling on the part of many Americans that somehow the Soviets might achieve a breakthrough in nuclear weaponry through testing. An effective antimissile missile would be a major gain, though test ban proponents argue that that is less a matter of nucelar testing than of engineering and electronics.

Furthermore, the sort of ultimate weapon that the term "neutron bomb" conjures up leads many to worry that a test ban might prevent the United States from perfecting it while the Soviets might do so by cheating. The recent administration disclosure that the United States now has "enhanced radiation," or relatively fallout-free weapons, only adds to this kind of anticipation.

The argument over possible Soviet cheating by hiding smaller tests in caves dug in particular types of soil; the argument over the number of on-site inspections each side would be allowed in the other's territory, and related issues have dominated much of the debate in the past couple of years. But even if the President did satifsy two-thirds of the Senate that these risks were acceptable, the other considerations could lose him vital votes for ratification.

It is now quite clear that much of the American opposition to a test ban comes from those who simply do not want this country to limit in any way its weapons development, above all its nuclear weapons development. And to many who are working for a treaty, it appears that a good many members of the Joint Atomic Energy Committee are in this category. They have powerful supporters among the military in the Pentagon and among the politically minded scientists outside the Government.

Only the President can counter all the specific points of opposition with a summing up of the risks involved in rejecting a treaty as well as in accepting one. Only he can go to the public and say that the risks of a totally unhindered arms race are greater than the specific risks inherent in a test ban treaty.

It is extraordinary that there has been so much argument for so long over a treaty not even negotiated. The reason, of course, is that such a treaty, whatever its actual efficacy in slowing the arms race, would be widely considered as just such a step. It would relieve anxieties the world over, rightly or wrongly.

However, treaty opponents have an argument when they contend that the kind of test ban now possible in sight would not make it any easier subsequently to cut back missile production, abolish nuclear submarines or bombers or keep space free from nuclear weapons. Here the test treaty proponents are on the defensive.

Nonetheless, no one is more aware than are the test ban's opponents of what a powerful force a President of the United States can generate in favor of any particular action if he really tries. And whatever his current degree of passion for a test ban, President Kennedy could be counted on to use every trick in the trade to put over a treaty if he signed one.

Woodrow Wilson, historians now say, was too rigid in his struggle with the Senate; had he accepted some reservations to the Versailles Treaty, he could have won ratification, and the effects of the reservations would have been minor compared to the results of the entire treaty's defeat.

The Wilson debacle in the Senate has haunted every Chief Executive since Wilson. And no one has been more history-minded than John F. Kennedy.

Mr. MILLER. Mr. President, I also ask unanimous consent to have printed in the Record an article published in the Washington Evening Star on March 29, 1963, written by Crosby S. Noyes and entitled "Nuclear Proliferation Hobgoblin."

There being no objection, the article was ordered to be printed in the Record, as follows:

Nuclear Proliferation Hobgoblin

Paris.—The recurring nightmare which petrifies the Western camp and apparently conditions all American foreign policy is that of nuclear proliferation.

Quite evidently, the nightmare afflicts President Kennedy most acutely.

"I am haunted," he declared to a recent press conference, "by the feeling that by 1970 unless we are successful (in banning nuclear tests) there may be 10 nuclear powers instead of 4 and by 1975 15 or 20."

One wonders what disagreeable morsel of intelligence or intuition produces this particular specter. At any rate, it is entirely contrary to the evidence available in Europe. It is also contrary to informed estimates of many nuclear experts. Which are the 10 potential nuclear powers in 6 years' time?

With the exception of Red China and conceivably Israel, one must assume that the other candidates must be among the technically advanced and affluent nations of Western Europe. The possibility of less-developed countries' possession of nuclear weapons within a few years could only be based on an assumption that these weapons would be supplied by some outside power.

What then is the situation in Western Europe which leads to such disturbing predictions?

Britain, which participated actively in the wartime Manhattan project and shared all benefits of the early American effort, has been an active nuclear power since 1952. But the increasing costs and political liabilities of the more advanced weapons systems is today making Britain's future status highly problematical.

France has been actively working on development of nuclear weapons since 1954. By the end of this year it is expected to have a modest stockpile of atomic bombs capable of being transported in supersonic bombers. Thermonuclear weapons and missiles are not scheduled before the 1970's.

ONLY TWO INDICATED

Apart from France and Britain, there is no evidence that any other European country is engaged in a nuclear weapons program.

Of the other NATO countries, most of them have neither the inclination nor the means for such an effort. Most of them, in fact, follow the lead of the United States in actively deploring the spread of nuclear weapons. So far as the smaller countries are concerned, complete American responsibility for nuclear defense of Europe is still an ideal state of affairs.

Of the non-NATO countries of Europe, there has been some speculation that Sweden and even possibly Switzerland might muster the wherewithal to produce a poor man's atomic bomb.

There is, however, no suggestion that either of them is seriously considering such a program.

THE QUESTION OF GERMANY

There remains, of course, West Germany.

It is hard to avoid the impression that, in fact, the cause of the recurrent American nightmare about nuclear proliferation really boils down to a problem of the Federal Republic. Here, at least, is a country with the means and perhaps the ambition to possess nuclear weapons. And one may guess that it is this single possibility—rather than 15 or 20—which Mr. Kennedy regards as the greatest danger and hazard.

How many times has one heard this explanation from anonymous American official sources:

"Of course, we can't help the French with their nuclear program. If we did, what could we tell the Germans when they come around in a few years and ask us for the same thing?"

In any event, the assumption appears to be almost universal that sooner or later the Germans will renege on their formal commitments not to manufacture nuclear weapons. It is also assumed that when this moment arrives it will be a perilous one for the West. Much of American nuclear policy toward the Alliance—including the scheme for a multilateral NATO nuclear force with a built-in American veto—is obviously geared to prevent this moment from arriving.

It may be, however, that the fear of Germany as a nuclear power is based on a completely false premise.

This premise, to put it bluntly, is that Germany on the basis of its past record is chronically unreliable in military matters. It assumes that the Germans, once they possess nuclear weapons, might use them or threaten to use them offensively to attain political objectives.

And yet, surely, given the nuclear situation as its exists today, not even an Adolf Hitler would be mad enough to attempt any such thing. Neither the United States nor Russia can attain political objectives today by threatening each other with their nuclear forces.

The idea that Germany, with an inevitably limited nuclear arsenal, could use it to bring about the reunification of the country is simply preposterous. And once the use of this force for offensive purposes is ruled out the threat to use it is meaningless.

Few people, of course, would suggest that the Germans should be given the bomb or that proliferation of nuclear weapons is a good thing. Yet, when an obsessive nightmare lies at the heart of American policy, one may at least question the reality of the hobgoblins.

Mr. MILLER. Mr. President, I also ask unanimous consent to have printed in the RECORD an article published in the Evening Star of Saturday, March 2, entitled "A-Blast Detection Difficult."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

TO CATCH A CHEATER: A-BLAST DETECTION DIFFICULT

(By Earl H. Voss)

When the United States conducted its first peaceful-uses nuclear explosion 1,200 feet underground in New Mexico, 7,000 ground squirrels came scurring out of their holes within an hour after the shot.

If the United States had been trying to cheat on a test ban treaty and if Soviet onsite inspectors had been close by, the squirrels might have been an important clue.

Onsite inspectors are not expected to be that well positioned, however, even under the U.S. verification program, which is stricter than the Soviet Union's.

How good a job onsite inspectors can or will be allowed to do is one of the major issues of controversy in the test ban negotiations in Geneva.

Identification of underground nuclear explosions at close range is a matter of longstanding controversy which probably will not subside until, and unless. a cheater is actually caught in the act.

THREE PHASES OF INSPECTION

The United States sees three phases in a typical onsite inspection: First, aerial reconnaissance in the general area to which long-distance seismic evidence points; second, surface investigation of an area hopefully measuring only a few square miles, isolated in the first phase; third, drilling to find radioactive debris from the suspected nuclear explosion.

Under the American inspection plan, which Russia has not accepted, a team of 20 to 30 men would go by plane to the area of 40 to 200 square miles within which seismology can now pinpoint a possible violation of a treaty.

If the suspicious event happened in the Soviet Union, some members of the team might be American, but all might be other non-Soviet nationals. The United States recently dropped its demand for American representation on onsite teams sent to the Soviet Union.

FIRST PHASE IS CRITICAL

The first phase of aerial inspection would be to reduce quickly the area of suspicion to 1 square mile or so.

A helicopter would comb the area to look for visible characteristics of an underground explosion such as craters, circular patterns of surface cracks, disturbed soil, and vegetation patterns.

A nine-lensed aerial camera is being developed to use the latest color, infrared, and other techniques to seek varying patterns in the terrain.

There is no disagreement that the job will be difficult. Defense Department officials want to complete the difficult aerial-survey phase within a day or two. They know this is the crucial moment in the on-site inspection process. Each day's delay makes the task of surface inspectors, in the second phase, more difficult.

If no pattern turns up in the aerial sweeps, the whole project becomes hopeless. Drilling at random for underground pockets of radioactivity would involve hundreds of thousands of holes, each taking a month or more. Unless suspicious evidence is found, the inspection are just about bound to conclude their suspicions were ill founded.

PATTERN FOUND IN NEVADA

Experimenters with aerial surveillance have been encouraged by their findings since 1961, at the Nevada underground test site and at the Carlsbad, N. Mex., experiment in peaceful uses of nuclear bombs, code named Project Gnome.

At the Gnome site, ordinary black-and-white aerial photos showed a definite pattern of surface cracks around the explosion. Roots of shrubs like mesquite and yucca were damaged, the plants started to wither and the results showed up in color photography.

The upward push of the explosion shook the soil above, as if the earth had been in a giant flour sifter. The surface was left with a refined or granulated look.

Superimposing all these indicator patterns on one map pointed clearly to ground zero.

The Gnome explosion, however, was buried less than a quarter mile, about 1,200 feet in an area of soft alluvium near the surface, salt beneath. Surface effects could be expected to be more noticeable there than in other environments.

PROBLEMS OF SECOND PHASE

Unless the first phase aerial reconnaissance succeeds in a day or two, the most promising technique of phase two would be handicapped.

This technique is a recording unit for registering aftershocks of earthquakes. The unit is small enough to be transported on a small panel truck, and presumably would be airlifted to the vicinity of the 1-square-mile area singled out in phase one.

In tests at the Nevada underground tests, and on earthquakes, major distinguishing characteristics have been found. Nuclear explosions produce aftershocks for only 3 or 4 days, and their number falls off drastically after the first few hours. Earthquakes produce aftershocks for many days, even weeks.

Aftershocks caused by explosions emanate from a central point, but those from earthquakes occur over a much broader area.

On the basis of this experience, one Defense Department expert concludes that if on-site inspection teams could reach the site within 3 to 4 days after the event, "the presence of aftershocks would be a strong indication that the event was natural in origin."

The event could then be identified as an earthquake and the on-site inspection team could go home.

Absence of aftershocks, however, would not necessarily indicate an underground explosion. It might merely mean that the first-phase aerial survey had pointed to the wrong place.

Aftershocks might even be used as a mask for a sneak test by a clever cheater. Since 1958 seismologists have been warning that one of the major methods for beating a test ban would be to trigger a clandestine nuclear explosion on an earthquake.

EVIDENCE OF CHEATER

Other methods besides monitoring aftershocks are available in the second phase of surface surveying. One is visual inspection, by which some officials in the Defense Department put great store. Clever as a cheater may be, he is likely to leave telltale evidence behind, they believe.

The shot might not be completely contained, thus allowing radioactivity to escape and be picked up by surface monitors. Many of the Nevada explosions vented in this way, officials report.

Minerals and rocks in the area of the shot also might undergo recognizable changes, some scientists say. In some previous American tests, small rocks and pebbles on the surface were flipped over, exposing a different face to the sky which could be picked up easily in aerial photography, it is said.

Radon, a kind of radioactive gas, has been found to seep out of the ground above some Nevada tests, again raising hopes that underground shots cannot be fully hidden. Gamma rays have also been found to leak from crevices near ground zero.

THIRD PHASE: DRILLING

If any of these evidences is found by the onsite inspection team, it must decide where to drill in hope of finding the pocket of intense radioactivity produced by the suspected underground nuclear test.

In this third phase, it is as yet unclear whether more than one drilling rig could operate at a time, to cut the time-consuming operation as much as possible. With a 20- or 30-man team, however, it is doubtful whether more than one crew could be brought in.

Gamma-ray logging would be an important technique in the third phase. As the drilling proceeds, gamma radiation should be picked up well in advance of penetrating the actual pocket of radioactivity.

Mining experts on the onsite team would search mines, if any were nearby, to look for suspicious conditions.

CHANCES "CLOSE TO ZERO"

As late as 1960 American scientists advised the Joint Congressional Atomic Energy Committee that the chances of catching a cleverly concealed shot would be "close to zero." Onsite inspection was singled out as one of the weakest links in the detection-identification chain.

Aside from finding a realistically small area in which to drill, there is the problem of how deep to dig.

In the United States' first underground shot, the 1.7 kiloton Rainier explosion in Nevada in 1957, it took 4 months to find the radioactive pocket, even though the drillers knew exactly where the bomb had been fired.

Presumably drilling times have by now been drastically shortened. But the Rainier shot was buried only 900 feet. Now there is talk that a sneak shot would be buried 6,000 to 10,000 feet.

If each drill hole dug by an onsite inspection team had to go 10,000 feet the time to cover even a small suspect area obviously would be long. And few would expect the Soviet Union to permit a large number of drill teams to work on its territory, in order to cut the time.

This question of Soviet cooperation is one that hangs heavy over the whole onsite inspection idea.

If the inspectors were to encounter a hostile environment, which is not at all hard to imagine in the Soviet Union, the prospects of catching a sneak shot would be less favorable, even the optimists acknowledged.

SENATE HEARINGS SET

The Senate will get a chance to judge the pluses and minuses of the test-ban control system if American, British and Soviet negotiators do reach agreement at Geneva.

One of the most influential committees in making up the Senate's mind will be the Joint Atomic Energy Committee. As preparation for the decisions that may lie ahead, Chairman PASTORE, Democrat of Rhode Island, has ordered public hearings next week.

Test-ban supporters and foes are now preparing to present their views. Their starting point may well be this recent summary of the prospects for onsite inspection by Dr. Charles C. Bates, chief of the underground test-detection unit in the Department of Defense:

"On the basis of results to date, it would appear that the localization and identification of contained nuclear explosions of greater than nominal yield that occur within one or two thousand feet of the surface can be achieved through seismic detection and use of full-scale onsite inspection techniques. This is provided the detonations take place in typical land areas having reasonable amounts of daylight. However, the onsite inspection techniques * * * may well have major deficiencies when applied to searching for possible nuclear explosion cavities where there is a shallow water cover, where the explosions take place at an extremely great depth, or where full advantage is taken of polar darkness followed by spring flooding.

Mr. MILLER. Mr. President, I also ask unanimous consent to have printed in the RECORD an article published in the Washington Evening Star, February 28, 1963, entitled "Value of A-Test Held in Secret Is Discounted."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

VALUE OF A-TEST HELD IN SECRET IS DISCOUNTED

A high American disarmament official conceded today that "a determined cheater" could sometimes outsmart the proposed inspection system for a nuclear test ban.

But he discounted the value of isolated shots in erasing the lead the United States claims in nuclear weapons development.

The Soviet Union could not pull off a secret series which would be needed to catch the United States, Jacob D. Beam, assistant director of the Arms Control and Disarmament Agency, said in a speech prepared for delivery before the Rochester, N.Y., Advertising Club.

IMPROVEMENT SEEN

Capabilities for policing a test ban are "far better than we assumed them to be a few years ago" and are likely to improve "over the years," Mr. Beam said, but added: "I would not like to convey the impression that a determined cheater could not on occasion outsmart the man who is attempting to catch him. It is likely that in this game of cops and robbers, the robber, because he has by definition the advantage of surprise, can, if he goes to great lengths, occasionally fool the cop.

"If, for example, the cheater constructed a very large cave underground, or if he sent a nuclear warhead millions of miles out into space, he might succeed in detonating a nuclear bomb without being caught."

LEAD TOO GREAT

"But this kind of capability would not give the Soviet Union a chance to make any substantial inroads into the U.S. nuclear lead. The chances of the Soviet Union conducting a series of tests which would remain undetected are vanishingly small.

The probability that the advantage to be gained from a single test would be sufficient to make an attempted evasion worth while, is also vanishingly small."

Mr. Beam acknowledged that a nuclear test ban "by itself will not prevent the spread of nuclear weapons." His remarks were taken as an elaboration of the views expressed by President Kennedy at his press conference last week when he said his primary aim in seeking a test ban was to prevent proliferation of nuclear weapons.

* * * * *

Kremlin representatives have stuck by a suggestion made by eight neutral nations at Geneva that onsite inspections be conducted only by invitation of the power suspected of having violated the treaty.

WOULD ACCEPT

The United States has indicated to Russia it can accept as few as seven onsite inspections per year inside the Soviet Union if other features of the system to verify that no nuclear tests are being conducted are adequate.

Premier Khrushchev repeated yesterday the Soviet Union will allow no more than two or three inspections a year inside Russia.

He has offered to allow three unmanned seismic stations on Soviet territory but the United States presently requires seven.

Instead of the previously planned 19 international control stations inside the Soviet Union, the United States is now willing to accept 73 existing seismic stations without international monitors inside the Soviet Union.

LONG-DISTANCE "EARS"

Primary reliance to detect tests would not be placed on these systems inside Russia, but on long-distance detection equipment in the United States and friendly countries on the edge of the Sino-Soviet land mass.

News that another treaty was being prepared coincided with an expression of optimism by Jacob D. Beam, assistant director of the bureau of international relations in the Disarmament Agency.

In a speech prepared for delivery before the Rochester, N.Y., Advertising Club this noon, Mr. Beam said: "Right now, the chances for an agreement on a nuclear test ban are perhaps relatively brighter than anything else we can see on the horizon."

SOME BLANK SPOTS

Like the comprehensive treaty of last August, the new document being drafted reportedly leaves some blank spots for numbers to be filled in by negotiation.

Last year's treaty left blank the annual quota of onsite inspections as well as the percent of the annual number of inspections which could be carried out each year in areas where there are few earthquakes.

The draft of last August also left blank the radius of the area within which long-distance detection units would be required to pinpoint a suspected violation.

In the past the Soviet Union has demanded that the area be kept smaller than long-distance detection stations could pinpoint.

Soviet Ambassador Semyon K. Tsarapkin said in Geneva yesterday Russia will not allow the "black boxes" to form an independent detection network covering all of Soviet territory. In the Russian view, the Associated Press reported from Geneva, the black boxes would only be auxiliary instruments in the Soviet Union's three most earthquake-prone areas which would cross-check reports from other nations' seismic stations.

Western delegates said this would leave most of the Soviet Union outside the range of the "black boxes" and would render the whole "black box" idea virtually meaningless.

Officials here said there is an outside chance the draft treaty will not be presented at Geneva, but they acknowledged it is more likely the document will be advanced soon to put more pressure on the Soviet Union to accept a nuclear test ban.

Mr. MILLER. Finally, Mr. President, I ask unanimous consent to have printed in the RECORD an article written by the esteemed columnist, David Lawrence, entitled "Danger of Expressing War Fears: Russians May Get the Wrong Idea," which, I might add, ties in with what I said in my remarks about the sense of urgency appearing on our side rather than on the side of the Soviets.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

DANGER OF EXPRESSING WAR FEARS: RUSSIANS MAY GET THE WRONG IDEA

(By David Lawrence)

Paradoxical as it may seem, the greatest danger of war today is the constant expression of a fear of war.

The sacrifice of principle to expediency in the past—a readiness by one side to yield to the terror of war—has led to miscalculation and misjudgment by the other side and has brought war just the same.

It is for this reason that a close analysis of what the President has been saying lately about world policy in terms of the Cuban situation is essential to an understanding of the dangers that lie ahead.

One must start with the feeling that Mr. Kennedy is a sincere, conscientious public servant who wants to avoid a war. But so were some of his predecessors who nevertheless found themselves in a war because an impression appeared to prevail in this country that anything is better than war. In many countries, moreover, one even hears nowadays some prominent persons crying out, "better Red than dead."

The policy of the U.S. Government is based at present not on a fear of war as such, but on a belief that war can be avoided, and yet no compromise on principle made. In official circles, however, there is a constant repetition of expressions on fear of war.

This could lead to misjudgment in the camp of our adversaries. The other day on television a commentator read to some Congressmen an extract from what Mr. Kennedy had said, and then, in effect, bluntly asked them, "Now, do you want war?"

The President himself, of course, has not closed the door to the possibility of a major war arising out of Soviet deception and military operations in Cuba. In his last news conference, as he discussed the importance of being certain about our information concerning missiles, he said: "Now, as I say, these things may all come about and we may find ourselves again with the Soviet Union toe to toe, but we ought to know what we have in our hands before we bring the United States—and ask our allies to come with us—to the brink again."

Later on in the conference, Mr. Kennedy came back to the same theme—the possibility of an external action by the United States to get rid of the Communist base in Cuba. He said: "We live with a lot of dangerous situations all over the world. Berlin is one. There are many others. And we live with a good deal of hazard all around the world and have for 15 years. I cannot set down any time in which I can clearly see the end to the Castro regime. I believe it is going to come, but I couldn't possibly give a time limit. I think that those who do, sometimes mislead.

"I remember a good deal of talk in the early 1950's about liberation, how eastern Europe was going to be liberated. Then we had Hungary and Poland and East Germany, and no action was taken. And the reason the action wasn't taken was because they felt strongly, if they did take action, it would bring on another war.

"So it is quite easy to discuss these things and say one thing or another ought to be done. But when they start talking about how, and when they start talking about Americans invading Cuba and killing thousands of Cubans and Americans, with all the hazards around the world, that is a very serious decision, and I notice that that is not approached directly by a good many who have discussed the problem."

But these words of a President are read everywhere, including Moscow. Do these utterances mean that, unless this country is directly attacked, a resolute stand will not be taken by the United States, even if it means war?

The Soviet Government may ponder that question, for it never stops testing its adversaries. Mr. Kennedy stood firm last October, but questions have arisen now as to what will be done by the United States about the continued presence in Cuba of 17,000 military men from the Soviet Union. The critics have helped by bringing this issue to a head.

The reason, to be sure, why nothing was done in Hungary and Western Europe is that the West lost its nerve. The Soviets knew the West wouldn't dare to go the limit to uphold the principles of the United Nations Charter and protect the oppressed peoples who sought to assert their independence only to find the Soviet armies overwhelming them by force.

Yet in 1950, collective action by the United Nations saved Korea and repelled aggression. Many American boys died in that cause, as indeed some Americans have been killed recently in South Vietnam to check Communist infiltration of an independent country.

Neglect of Hungary led to the assertion of Soviet arrogance in East Berlin. Now, if the United States despite all its outward show of firmness—should really lean to a policy of peace at any price in Cuba or anywhere else, there could finally be a provocation to war. Winston Churchill, after World War II was over, wrote of the mistakes of the 1930's:

"Still, if you will not fight for the right when you can easily win without bloodshed; if you will not fight when your victory will be sure and not too costly; you may come to the moment when you will have to fight with all the odds against you and only a precarious chance of survival.

"There may even be a worse case. You may have to fight when there is no hope of victory, because it is better to perish than live as slaves."

TRIBUTE TO COL. BARNEY OLDFIELD

Mr. GOLDWATER. Mr. President, it has been my pleasure to have known Col. Barney Oldfield for many a year through my Regular and Reserve relations with the Air Force. Colonel Oldfield, an accomplished writer and speaker, has given much to the Air Force and to the military strength of our country, so I am happy to see that, even though he is retired from active duty, he is continuing to speak out on matters of concern to our offensive and defensive capabilities. I ask unanimous consent that a speech he made before the convention of the National Lime Association be printed in the RECORD at this place in my remarks.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

REMARKS BY COL. BARNEY OLDFIELD, U.S. AIR FORCE, RETIRED, BEFORE THE CONVENTION OF THE NATIONAL LIME ASSOCIATION, LAS VEGAS, NEV., APRIL 4, 1963

Members of the National Lime Association: Since this is the third day of your Las Vegas convention, it is assumed by the turnout that you have all had your losing streak and that's behind you. This is one of the few convention cities in the United States which is strong on the unconventional, where you actually make money by sitting safely away from temptation in a convention hall. This is only true, of course, if you took the precaution to lock your wife in her room while you're here.

The first thing you have to do to make a speech or otherwise communicate with a group here is to be sure you get some of the atmosphere and the language of the community in what you have to say. This came to me most forcefully in 1957 in July, when we were here for the first live firing of the nuclear warhead rocket at Yucca Flats. Sunday came that first week, and I wondered what kind of a sermon a minister would preach here, so I went to church. He chose the 10 Commandments that day as his text, and made the usual admonitions about keeping them. Nothing new so far. As he came to the summation of his sermon, he pointed his finger out generally over the congregation and said: "And verily I say unto you, if you keep these Commandments, yours will be a jackpot of divine grace."

I don't know whether he changed any minds that day, but as they would say around the green tables, he made his point.

My assignment today is to make some points for aerospace defense. My appearance here is in the nature of a man's past catching up with him, since before joining Litton Industries in Beverly Hills, Calif., in January, I had the distinction of serving longer straight time in aerospace defense than anyone else—almost a third of my 30 years in uniform.

In my time, it went from World War II leftover prop-driven planes with machinegun and cannon mounts and antiaircraft guns to an ability which it now possesses to track every manmade object in air and space over or approaching North America as well as an ability to considerably shatter a manned bomber or cruise missile attack in the atmosphere.

This very existence of an Aerospace Defense Force, which is called the North American Air Defense Command, is a fascinating continental development. It came about because two nations, Canada and the United States, looking up and out at threat avenues, thought their mutual security was really one problem to which each country within its resources could allocate weapons systems and people trained and ready to be employed on a moment's notice. It came about, but it wasn't easy. It is always hard when two or more countries and two or more political leaders sit over two or more military establishments trying for a single strategy.

North America had a traditional view of warmaking, once it was forced on the peoples who live here. That view was to mount an offensive as soon as the production line could be mobilized, and flood the enemy at some far away point or points with all the newest technologies until he was overwhelmed and sued for peace. This was when time was plentiful, but the year I was commissioned—1932—a 12-month chain of coincidences (February 1932 to February 1933) was the time of some seemingly routine history which changed all that.

Roosevelt became President, Hitler took power in Germany, and a man named James Chadwick made a discovery. Hitler was to start a war which would change the outlook of the world at large. Roosevelt was to give the go-ahead to a project to make an atomic weapon useful in war. And James Chadwick discovered the neutron which was the key to atomic fission. That chain of unrelated events in that 12 months gave those of us who survived some of the catastrophic consequences a new point of view.

Everything from then on had to be bigger, except the globe we live on. It had shrunk. Ideas were bigger. Nations were bigger. Power alliances were grander in concept. Politics spilled over national boundaries, and tried to stake out space. Men thought with greater scope, were willing to play for greater prizes against greater odds, and in some areas of the world it became official policy to court the death of a third of a population to gain something called world domination.

In these days of rapidly expanding knowledge about advancing technologies, it is possible for everything to happen quicker and to be known quicker, for the tragic to be more devastating and total. Weaponry advantages have taken on such great connotations politically, they can hold an aggressive nation or power bloc at bay, or failure to acquire them by a friendly government or bloc may so upset the public, or the electorate that the affected governments may shake or fall, or both.

It is safe to say today that more of world affairs turn on security of nations and peoples than on anything else. The age-old question is still: "How safe are we?" and if there is any doubt, the question still is: "How much to fix it?" and the fork-over is pretty cheerfully accomplished.

One of the smaller expenditures in the military budget has consistently been in aerospace defense, but even so, there has been some remarkable progress. Right now, when it is possible for an orbiting device to be on opposite sides of the world in a half hour, the North American Air Defense Command has come to be a focal point for the free world. It notes from minute-to-minute the status of unknown aircraft and submarines approaching the continent. It has the character and speed of the jet stream and other winds aloft to indicate the cheap traffic routes for an air attack at any given hour. It has the number of payloads in orbit, as well as the space junk which accompanied them. It is NORAD's position that it must keep track of everything in order to see whether there have been any new joiners, and what, if any, they represent in security danger. Not only is all this information sent to the Canadian and U.S. Joint Chiefs of Staff regularly, but it is also fed by undersea cables and microwave relays to fighter command in England and Supreme Headquarters, Allied Powers, Europe, in Paris.

As far as complementing warning of attack in the atmosphere, U.S. Air Force and Marine Corps and Royal Canadian Air Force fighter interceptors, U.S. and Canadian Bomarc missiles, and U.S. Army Nike batteries could rise to meet it and make a rather rough picket fence for an enemy attacker to slide into the target complexes.

But when it comes to the ballistic missile attack, the polar oriented Ballistic Missile Early Warning System would signal approach from the Eurasian land mass, but we have no ability as yet to shoot down such a weapons system. In fact, areospace defenses need to advance into capabilities such as these:

(1) The antimissile missile. The best bet is the Army's research and development program called Nike X. Although its forerunner Nike-Zeus has had some successes in major tests over the Pacific, it is still not in production, or deployed.

(2) The improved manned interceptor, or IMI, this is a fighter aircraft, capable of 2,000 miles an hour in speed, and range of at lease a thousand miles. It is necessary to go far out and catch, as well as shoot down a bomber carrier of an air-launched ballistic missile. The standoff employment of a missile from a bomber unopposed would be a way of pitching a lethal warhead into the target without the carrier exposing itself to close-in defenses.

(3) A warning system which will cover all approaches to the continent, rather than just the northern routes, with particular capability to detect sublaunched missile firings. This undoubtedly has to be an orbital system.

(4) A satellite inspector, plus a follow-on satellite destroyer.

There are some who pooh-pooh these things as having no meaning if we just maintain a strong offensive position. Deterrence is only credible, however, if we are flexible enough to make an enemy pay so heavily for entry he stays put. To have an offense without a complementing defense is risky business. Very few professional fighters, even a Sonny Liston, would stand with hands behind their backs and give Floyd Patterson one roundhouse punch hoping to be able to recover and beat him. The number of punches which get through are lessened if a man, or a power bloc keeps dukes up.

It is popular in many quarters to say that no defense could block a determined attack, but what is a determined attack? On that long ago July day, 1957, when we fired the first atomic rocket here at Yucca Flats it turned several hundred cubic yards of the atmosphere into a molten ball—even a near miss would be effective, and it would be no picnic, even with determination, to stand up to that kind of opposition in either a manned bomber or cruise missile. The Bomarc and the Nike-Hercules could make the same nuclear impression. Determination can terminate in destruction, and the present aerospace defense system of North America packs a lot of destruction potential.

This has been a tough century for the pooh-pooher. At its turn, in 1900, a prominent man said of the automobile that a town the size of Philadelphia should expect to have as many as 100 cars by 1950. When Louis Bleriot flew an airplane over the English Channel in 1909, it was mostly assessed as a nervy and foolhardy stunt. The first Army requirement for an aircraft was that it be able to fly 3 days march ahead of the Infantry, and return, and otherwise be collapsible so it could be hauled on a wagon. And World War I was to be a war to end wars, and make the world safe for democracy.

We look back on these things, with the help of hindsight, and say, "How foolish? How could smart men have been so dumb, so short in visualizing what the future would hold?" But then, we come to the present day, and what happens?

A man named Khrushchev has said the Russians have an antimissile missile, which, as he puts it, could hit a fly in the sky.

Last August, two Russians, Nikolayev and Popovich made more than 112 orbits of the earth over a 4-day period, and in that 112 orbits, they were over North America 70 times. Just 6 weeks ago, one of Russia's military leaders declared his country was now able to launch a rocket from a satellite.

Much to the dismay of those who are genuinely concerned, these utterances tend to be dismissed as propaganda, and because we do not yet have these capabilities ourselves, a fallacious premise is resorted to—if we haven't got it, they possibly couldn't have it. Most of us would prefer even the partial protection of a deployed but less than ultimate weapons system designed for aerospace threats than a poorly founded premise. Imagine the predicament we would have been in for aircraft if Orville and Wilbur Wright had been told in 1910 that what they had wasn't good enough, that we would wait until they built a jet which would carry atomic armament.

A wisecrack, deprecating opinion, or statement of airy dismissal is often hard to live with when the future turns into the present as it does rather rapidly these days.

In aerospace defenses, we are now at a very critical point.

It is one thing to have missiles of intercontinental range in silos on your own soil, and manned bombers based in your own country or on the soil of allies, but it is quite another if weapons of mass destruction were to be placed in orbit. While space is so far the province of everyone, free and clear, the regular passage of a thermonuclear warhead of origin in any country which holds its electronic trigger is bound to make political ruffles of high order as it passes over others. Our country has already ruled this development out, in a speech made by Deputy Secretary of Defense Gilpatric last September, but he did say that we would defend ourselves in space if the Soviet Union forces us to do so.

So the gauntlet is down for the scientific and engineering fraternity to meet the military specifications in this regard, and for none to say that the defensive is not worth the doing. It may well be that it will be the only thing left which can be done.

In many quarters now, there is wishful thinking that our best defense, aerospace or otherwise, is apt to be the growling between the Soviet Union and Red China. The safest way to size that one up is this: suppose you were dead and at an undertaking parlor, but were permitted to hear an argument between that undertaker and a collegue about fee-splitting for your funeral. Would it make you any less dead? Or make you feel better about your impending interment at their collective hands?

We have had considerable success in achieving an aerospace defense capability, which 10 years ago would have been thought fantastic, and we should go on from here. The country or man who sits on past successes is apt to smother under the future successes of others. Thank you.

WASHINGTON REPORT

Mr. THURMOND. Mr. President, the American Security Council has been publishing many outstanding articles for the purpose of encouraging and supporting the maintenance of a strong national defense posture in this country. One of the best reports issued by the American Security Council through its Washington Report is being made available to the public today and is entitled "Toward a Technological Pearl Harbor?" This issue of the Washington Report, dated April 15, 1963, was written by an outstanding educator and expert on communism and psychological warfare, Dr. Stefan T. Possony.

I ask unanimous consent that this excellent report be printed in the Record at the conclusion of these remarks.

There being no objection, the report was ordered to be printed in the Record, as follows:

Toward a Technological Pearl Harbor?

The Cuban affair offered a unique opportunity to test how well the United States is being prepared to forestall surprise attack. How did we make out? Unfortunately, not very well.

By the summer of 1962, we had sold ourselves on the notion that Khrushchev was operating on a genuinely peaceful coexistence policy and that, therefore, any major nuclear maneuver by the Soviets was out of the question. Hence, we disregarded numerous indicators which were pointing to a massive Soviet military buildup on Cuba.

Two days after the Air Force was allowed to fly reconnaissance missions, clearcut intelligence of an offensive Soviet nuclear missile and aircraft buildup was obtained. Had we hesitated only a few days longer, the initial Soviet missile force in Cuba would have been in operational readiness.

Confronted with unmistakable evidence, the United States reacted sharply. We forced the Soviets to withdraw their offensive missiles and light bombers. Perhaps a deal was involved by which we abandoned our 45 Thors and Jupiters in Italy and Turkey for the Soviet recall of 42 missiles from Cuba. In any event, the Soviet force went. Secretary of Defense Robert McNamara went on television and presented an unprecedented intelligence briefing to the Nation which demonstrated that the offensive threat from Cuba had evaporated.

However, subsequent testimony by various intelligence chiefs showed that the Soviets are making considerable use of a large number of caves on the Caribbean island. The impression was left that they are setting up arms stores as well as supplies for defensive ground-to-air rockets and the more than 100 Mig-17's, 19's, and 21's which, in addition to thousands of Soviet military men and technicians, admittedly have stayed behind. (A prominent American traveler in Cuba recently gave a private estimate of 30,000.)

Yet the conclusions which Mr. McNamara presented to his audience are valid only if one particular assumption is granted, namely, that the Soviets do not now possess neutron bombs and warheads. Soviet understanding of neutron technology is well documented. Programs designed to achieve a neutron capability are of such a kind that intelligence would discover them only through a lucky break. Notably, many of the test shots needed to develop this technology would not be nuclear and therefore, even if detected, might be disregarded. Most nuclear shots leading to the fusion of deuterium and tritium, whether with or without an initial fission trigger, would be on the fractional kiloton level. Hence, they would escape detection.

If the Soviets were in possession of neutron devices, they could fit them into very small missiles which do not require fixed-launch installations but could be fired from trucks. They also could fit light neutron bombs on their Mig fighters. If so, the Migs would have a good portion of the Southeastern States, some parts of Texas, and a number of SAC bases within their range.

The moral of this discussion is that overreliance on air reconnaissance, though it is a most valuable intelligence technique, may cause disaster. This is particularly true in all those cases where coverage is spotty and infinitely less complete than the coverage we obtained over Cuba.

To avoid surprise, it is not good enough to send out, in the last minute, reconnaissance aircraft to get photographic evidence. It is even more necessary to interpret the enemy's intention accurately and in time. Above all, it is imperative to anticipate his technological moves which precede the actual act of aggression by many years. On this point, the present administration has proved itself to be particularly bemused. The civilian leadership in the Pentagon ignores the possibility that perhaps the Soviets are embarked upon a neutron bomb program. They have made it abundantly clear that the United States will not go in for such a weapon. It is being suggested in Washington that a technological plateau has been reached, which allegedly allows us to pause before we decide on acquiring new weapons systems.

Evidence on continuing and accelerating technological advances in the Soviet Union is pooh-poohed systematically or passed over in silence. It may be useful, therefore, to take a short look at some of the weapons which the Soviets seem to be developing in order to insure our "burial."

Chief Marshal of Aviation Konstantine Vershinin has reiterated frequently that though the decisive role in war henceforth will be played by long-range missiles, no future military operations will be feasible without the participation of large numbers of aircraft. The main role in aviation, according to Vershinin, will be assigned to rocket-carrying bombers capable of striking not only stationary but also moving land and sea targets from a long standoff range. The Soviet Badger and Bear bombers, which have been overflying our carriers, are known to be equipped with air-to-surface missiles. On March 13, 1963, Soviet news broadcasts boasted that Russia has a missile that "can be delivered to any point on the globe" from an intercontinental bomber. The range from bomber to target was claimed to be "a few hundred miles." Future Soviet bombers which will be using air-to-surface missiles as their "basic equipment" (Izvestiya, Dec. 23, 1962), will have supersonic speed and reach an altitude of 98,000 feet. (The Soviets have a limited number of supersonic bombers now.) Insofar as the Pentagon is concerned, it has canceled our long-range Skybolt missile and would like to kill the RS-70. Our B-52 bombers will be phased out in 1968. Without the RS-70, there will be no replacement.

Chief Marshal Vershinin also disclosed: "The further perfecting of new types of aircraft is intended to increase their ceilings, speed, and range. With this goal in mind, work is being done to create atomic engines." One of Mr. McNamara's first acts as Secretary of Defense was to cancel the atomic jet engine.

Col. Gen. V. F. Tolubko, first deputy commander in chief of strategic rocket forces, disclosed in Krasnaya Zvezda (Feb. 20, 1963) the official organ of the Soviet defense ministry, that the Soviet Union already possesses antimissile defense weapons. The Washington Evening Star revealed on March 14, 1963, that the U.S. intelligence has spotted a probable antimissile defense complex being erected around Leningrad. This was apparently revealed at closed hearings before the House Armed Services Appropriations Subcommittee in February, during which both Mr. McNamara and Gen. Maxwell Taylor, Chairman of the Joint Chiefs of Staff, were questioned. Confronted with reports of the Leningrad missile complex, McNamara refused comment, saying that the information was "sensitive." But General Taylor warned that "we face the possibility of a cold war defeat" because the Soviets may beat the United States to an antimissile missile. (Washington Evening Star, Mar. 29, 1963). Nevertheless the Pentagon has put the quietus on the Nike-Zeus system and is now embarked on a substitute project, the Nike-X, which will take many years to complete, and which in the end might not be approved either.

The well-known aircraft designer, Artem Mikoyan, predicted a "semicosmic" airplane, with variable geometry wings, an extended range of several times 100,000 miles, and a speed of 6 to 8 Mach. The Pentagon is most anxious to kill our experimental orbital plane, the X-20 or Dyna-Soar, because it allegedly duplicates a NASA project. This contention is not entirely unjustified because the X-20 would be flown some time after NASA's Gemini and would have a smaller crew. On the other hand, the X-20 has a far superior landing capability—a feature which, of course, is of the greatest importance, if we ever are to obtain a genuine space capability.

But let us grant that Gemini has many advantages over the X-20. Secretary McNamara recently visited the Boeing plant where the X-20 is being designed. After his return, it was announced that a decision on the X-20 was postponed for 6 months, which implies that the decision to kill the X-20 will be made when Congress no longer is in session. But if we can improve on the X-20, why waste money for 6 months and lose time?

Suppose Gemini is the project behind which we should put all our resources; why then is the Pentagon still dragging its feet in allowing the Air Force to participate, in an effective manner, in this NASA project? In October 1960 Mr. Kennedy, in a now forgotten speech, recognized that control of space would entail control of the earth. This was a correct assessment, but we are making no determined effort to achieve, at an early date, a full capability for manned and militarily useful space flight. We still are paying lipservice to the ridiculous dogma that space is good only for peaceful purposes and we are deflecting most of our massive space budget away from using space as a medium to enhance the security of the United States.

The commander of the Soviet Union's strategic rocket forces, Marshal S. S. Biryuzov disclosed (Feb. 22, 1963) that it "has now become possible to launch, at a command from earth, rockets from a satellite, and this at any desirable time at any point in the satellite trajectory." Privately, Khrushchev has made a similar statement, although he declared that the first such device developed by the Soviets will not be put in operation because his scientists are working on a better model. The Cosmos series of Soviet-launched satellites—this is the type with which they carried out their first rendezvous experiment—may be related to this development. Yet the Pentagon continues to insist that it makes no sense to place nuclear bombs into orbit. It even goes so far as to assert that at the present time there is no discernible military function in space, not even a need to defend the United States against nuclear weapons which the Soviets might launch from orbital vehicles.

It is noteworthy that Marshal Biryuzov, who obviously is a partisan of the orbital bomb, has since been appointed chief of staff of the Soviet armed forces. This is the first time that an expert in nuclear long-range warfare has held that position, which heretofore was reserved to proponents of ground warfare.

It will be said that statements by Soviet marshals or even Khrushchev are nothing but "Communist propaganda." But experience has proved, time and time again, that the Soviets talk about new weapons systems only when they have such weapons under development. Perhaps the Soviets will prove unable soon to build a nuclear jet engine. Perhaps the semicosmic plane will appear only in 15 or 25 years. There is no question however that the orbital bomb is entirely feasible now. And, there is no doubt that the Soviets have tested antimissiles and could be deploying them now as an antimissile defense system. Such an initial system might be relatively ineffective, but its propaganda effect would be enormous.

There are a number of additional facts which the Pentagon never disputed but which it is anxious to keep concealed. Colonel General Tolubko derisively compared the biggest American warheads installed in Titan with Soviet missile warheads "whose powers attain 100 million tons." Some skeptics may dispute that the Soviets have 100 megaton warheads now, but hardly any expert denies that their warhead capability is in the 50-million-ton range and will reach the 100-million-ton level in the future. General Tolubko is absolutely right: Yield-wise, U.S. warheads are limping behind Soviet warheads by one full order of magnitude. Yet the Pentagon has announced no decision to correct this deadly deficiency.

Even more frightening is the fact that according to lieutenant general of the air force N. Sbytov, the Soviets possess a bomb with a yield of 160 million tons (Kraznaya Zvezda, Feb. 12, 1963). This claim may be somewhat inflated as yet, but to judge from the Soviet tests of 1961, such a bomb is fully within Soviet capabilities. Our biggest bombs have only about half the yield of the biggest devices tested by the Soviets and they are smaller than several of the bombs which the Soviets tested during 1962. As things stand today, the Soviets have tested twice as many high-yield devices as the United States. Hence they should be ahead of us in the technology of high-yield bombs and warheads. In March 1962, this was almost admitted by President Kennedy himself. But there again, nothing is undertaken to correct the deficiency.

This policy of no-decisions has been creating almost unmanageable problems for the United States. For example, in the summer of 1962, the Secretary of Defense announced that henceforth the United States, whenever possible, would pursue a counterforce instead of a countervalue strategy. This means that we would prefer to attack military targets such as missile sites and air bases, but seek to spare cities. A counterforce strategy has undisputed merits, but it is not enough to announce it: One almost must develop the means to implement the concept.

Yet under Mr. McNamara's administration, missiles with small rather than large warheads are preferred and bomber aircraft which carry the largest firepower are to be "phased out." Not surprisingly, half a year after his counterforce announcement, Mr. McNamara, suddenly recognizing the probability that the Soviets would harden their missile sites, indicated that in the future a counterforce strategy may prove impractical. Moreover, Mr. McNamara is now buying a strategic force which, by type and numbers of weapons, can be used effectively only against cities.

But this is not the end of the contradiction: With growing accuracy and super yields the Soviets are acquiring a counterforce capability which can be used against our hardened missile sites. Mr. McNamara wants to get rid of bombers because he prefers an invulnerable missile force. Present Soviet weapon trends show that our missile force will not be invulnerable. Any good military historian might have told Mr. McNamara that the concept of invulnerability always proved to be a snare and an illusion.

By hook or crook, we are abandoning the nuclear race. Frantically, we pursue the nuclear test-ban treaty. Instead of catching up, we continue to negotiate.

The pattern has been that, with the exception of a minor beefing-up of our guerrilla capabilities, the ordering of a joint Air Force-Navy fighter, and the contracting of Titan III—not for a military space program but as a "building block" should such a program become necessary in the dim future—Mr. McNamara, during more than 2 years in office, has not authorized a single new weapon system. He is slowing down our technological progress deliberately.

If we allow the Soviets to acquire vastly superior nuclear firepower; if we confront a mixed Soviet strategic force consisting of missiles as well as aircraft, with only a missile force; if we do not have the missile defenses while the Soviets possess a capability to shoot down our missiles; and if the Soviets achieve military space capability against which we cannot defend ourselves and for which we have no offensive equipment—then there is no doubt that we would be defeated or could win only at the price of excessive American casualties.

The fact that we presently are investing in R. & D. 50 cents for every dollar we are spending on procurement means that we are financing many exploratory research programs. It does not mean that we are modernizing our decisive weapon systems. Perhaps the philosophy of "the biggest bang for the buck" had its faults. But the present philosophy of "the least bangs for the most bucks" courts disaster. All things considered, it does not look as though under the stewardship of Robert Strange McNamara, the United States is being equipped to forestall a nuclear and technological Pearl Harbor.

ADDRESS BY GOV. TERRY SANFORD, OF NORTH CAROLINA

Mr. ERVIN. Mr. President, the administration of North Carolina's distinguished Governor, Terry Sanford, has, with great success, pursued a program of quality education for our State. On April 8, Governor Sanford, in a speech before the First National Conference of the National Committee for the Support of Better Public Schools, explained North Carolina's education program and how other States might benefit from our mission for better education.

I ask unanimous consent that his speech, which I believe will be of great interest to my colleagues, be printed at this point in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY GOV. TERRY SANFORD AT FIRST NATIONAL CONFERENCE, NATIONAL COMMITTEE FOR SUPPORT OF THE PUBLIC SCHOOLS, STATLER-HILTON HOTEL, WASHINGTON, D.C., MONDAY, APRIL 8, 1963

Friday night a leading American educator was at my house for dinner, and I gathered for discussion several school leaders, college executives, and others charged with the future of North Carolina.

The rambling, easy conversation ranged across our dreams and hopes, our attempts and failures, our spirit and faith, and our purpose as the people of an American State.

One of the guests suggested that we no longer seem to have any goals, and sense of mission.

We talked of the depression of the thirties, the war of the forties, the university in the twenties and thirties looking to the needs of the people of the region who somehow were not sharing in the life of America.

Those indeed, they reminisced, were the days of mission. We knew we had a job to do. Scholars, political leaders, and people generally dedicated themselves to the task and nobody could fail to recognize the dedication. Professors came and stayed at lower salaries than they could have received elsewhere because they "believed."

These were the days of war—war against poverty and then war against tyranny. We had a mission and the mission was simple and the people were united and determined. Even frustrations and failure did not dampen the spirit of the mission. We understand war.

But today those missions of the past several decades seem to have been accomplished. The New Deal is history. We have economic problems, but no longer are we the Nation's No. 1 economic problem. We continue to have tyranny loose in the world, but the sciences have changed the risks in war.

What now should be our purposes? What now should be our mission?

We cannot warm over the past, and shouldn't. Everything seems so complex now, so big, often so frightening. Small wonder that people look for easy solutions, attempt to find answers in simple alternatives. This may explain the fear so many people have of change, any change. This may explain the rash of organizations and political winners whose creed calls for the return of the "good old days."

It is difficult to see the future, to understand the present needs, to recognize, grasp, and follow our mission for the sixties.

Difficulty, however, is no excuse for sitting still, or turning back. This is not the nature of the people of North Carolina, and I am sure it is not the nature of the people of America.

In North Carolina we do have a mission, and our people believe in it, and we are moving and working and finding greater hope than at any time in our history.

Like the people of most States we are proud of many things. We were the site for the first English colony in the New World. Here to Roanoke Island came Sir Walter's bold adventurers and sturdy settlers, determined to make a new world and to know a better chance for every man. It was here at this spot in North Carolina that Virginia Dare was born the first child to English parents in America.

What were these people, a part of our heritage, seeking? They were looking for the chance for the individual that couldn't be found in the confines of the narrow England of their day.

Paul Green described this bit of North Carolina soil as the place where "once walked the men of dreams" singing a new song, "a song for ages yet unborn."

"O new and mighty world to be," they sang, "O land majestic, free, unbounded."

For 375 years since the birth of Virginia Dare and the days of Gov. John White and the disappearance of the first colony beyond the tree marked "Croatoan" this dream has remained the song of settlers, pioneers, immigrants, and Americans seeking the chance for the individual.

This may very well be the goal we are attempting to define today. I think it is. We are still trying to achieve the chance for the individual. Many individuals have that chance, but many do not, even in North Carolina, even in America. Certainly our part in the Alliance for Progress shows we comprehend that this goal is worth seeking in Latin America. Surely we recognize this desire among the people of the emerging nations of Africa. Our foreign policy contemplates that all freemen, and men who hope to be free, are seeking some degree of individual dignity and opportunity.

Today in America this goal means that every child should have the room and place to grow and live, to get the most out of life, to give the most back to his generation, no matter where born, no matter who his parents or how much money they might have or might not have, no matter what his color, no matter what the extent of his capacity or the limitations of his abilities. The Governor of North Carolina at the turn of the century, Charles Brantley Aycock, put it much better: "The equal right of every child born of woman to burgeon out all that is within him."

The several States of our country must understand that these opportunities for the individual cannot be achieved except by the action of the State. It cannot be done if States are going to sit by and wait for the Federal Government.

This is true because the needs are too broad and too diverse for central solution.

It is also true because achieving these individual opportunities is the beginning of the achievement of all of our goals, and the way to do it remains the largest and most fundamental job of the American State.

The way is education.

The communities must be joined as partners, must provide leadership, must put in their share, but the States cannot avoid the responsibility by saying this is a local problem. First leadership must come from the State.

I believe education is the mission of North Carolina, and indeed the primary mission of all American States.

I know there are other goals for which people speak, but if you will examine these goals you will find their achievement depends on the individual and the education of the individual.

The fundamentals of self-fulfillment, the responsibility of citizenship, and the success of democracy itself depend on the quality and scope of our education.

Scientific advancement, all cultural progress, and an effective growing economy will be determined by the excellence of our education.

Adjustment to technological changes, farm practices, urban environment will be found only through a more dynamic system of education.

The health of the people, their rehabilitation where needed, will be served by education.

The stability of government is a result of education.

Education itself in the future will be a product of the education of today, for the level of attainment of future teachers will be a result of the level of excellence of today.

Diplomacy, defense, foreign policy, emerging countries and the other headlines are written today and will be written tomorrow by the performance of our educated men and women, so the hope of the free world will be determined by education.

In spite of the importance of education to world peace and national defense, the job of education remains the primary task of the State. It is a constitutional duty in most States.

I think the States understand this. In talking to Governors, in reading messages to most of the legislative bodies, I am impressed with the official attention being given to education.

Our job is to get the attention and support of the people.

Our job is also to design the kind of school program which reaches everybody. Remember Governor Aycock said "every child."

We will reach all of our goals if we give attention to the individual and his chance in life.

That we haven't remembered this is the reason so many have not shared in the American dream.

Too many are left out.

The child of the disadvantaged area, who comes from a world of poverty to the strange world of school, finds a system not designed for him, and from which most likely he will drop out.

The teenager who didn't learn a skill, who cannot find a job, who is tempted into criminal activities, has missed out on the individual chance.

The Negro child who may study and work but cannot find admission to a job is denied his individual chance.

The retarded child for whom there are no training programs has missed what little chance he might have had.

The older man, employed but unskilled for years, suddenly eased out by automation, missed his first chance and is now missing his last chance.

The talented and brilliant child, unchallenged, allowed to drift along in school, is missing his chance and the Nation is missing his services.

The ordinary student, who goes to an ordinary school, is going to miss his individual chance if his teachers are second rate, if his courses are out of date, if his choice of studies is sharply limited, if his school is less in quality than that of other students in other places with whom he must compete.

The good student who doesn't want to go to college is going to miss his chance if he cannot find technical and other post high school training.

The good student who would do good college work will be missing his individual chance if college is too remote, or too expensive.

These are individuals who will miss the individual chance, who might move on through life without ever having realized the dream of the "new and mighty world to be."

The way for the State to progress is for individuals to progress. The reason for the activities of the State is to help individuals find their chance.

North Carolina thinks this goal is worth the effort.

This is our mission, and we are seeking our mission through education.

I cite North Carolina as one example of what a State must do. Mainly, a State must take what it has, and start where it is, and dedicate itself to the task.

North Carolina has embarked upon the most ambitious program of public school improvement in the history of the State. For the first time we have put education first. It shows what the people will do. This was illustrated when our 1961 general assembly appropriated funds that raised North Carolina to first place in the Nation in the increase of educational expenditure over the previous biennium. New taxes were voted, too, and that is a real test of a sense of mission.

It is further illustrated by the fact that a few weeks ago the chairman of the State board of education appeared before the 1963 legislature to declare that he had no additional requests, that for the first time in the history of the State all of the school requests were contained in the recommended budget.

Considering total Government expenditures, only three States spend a greater percentage than does North Carolina on education.

We have substantially expanded our programs for retarded children, in and out of institutions, in and out of schools, and we expect to continue until these folks have their best individual chance.

We have started programs for gifted children, with over 2,000 enrolled last year, over 5,000 this year, and we expect to reach 50,000 within a few years. In addition this summer we will have, as an incentive for the talented child, a free summer school for 400, with no credit but with demanding work. This is financed by the Carnegie Foundation and other private sources, to help point the way for requiring the best of the best.

We are working with ways now to ease the bewilderment of the disadvantaged child.

To help meet the requirements of rapid industrial growth, to find a convenient opportunity for the unemployed to develop new skills, to pick up the dropouts, we have established 20 industrial education centers across the State, with the capacity to teach almost anything in almost any area. Last year 26,000 students benefited, and we are just beginning.

Salary raises for teachers and faculty members draw more people into the teaching profession, and keep more from leaving.

The legislature is now setting up a system of comprehensive community colleges that will reach all sections of the State, and will greatly expand the ability of the existing schools to provide educational opportunity of quality for our young people. We have completed and are now implementing by legislative and administrative action a far-reaching and comprehensive master plan for higher education.

I do not suggest that North Carolina has achieved everything, but I do suggest that the most effective starting point is the State—State government which reaches out and puts education in front.

If there is any story to report from North Carolina it is that the people will support advances in education when the question is put to them fairly and directly. The people will respond to the needs of education even against heavy odds and under adverse and difficult circumstances. This applies to every State. They will support it, pay for it, believe in it, promote it, and make it their mission as a people.

The people of North Carolina are doing this. Within their means they are providing the financial support, but more important they have given it their spirit.

All across the State teachers are working harder and students are understanding better than ever before the importance of education. Superintendents, principals, school board members, parents, college leaders, all understand that education is the path to progress, and all are caught up in the enthusiasm of making education the mission of our people.

It so happens that this also must be the mission for America. It so happens that this also must be the mission for the free world.

This is something new for us. We have been bent over pulling on our bootstraps so that our goals have had to be limited to part of America. We had regional problems, regional needs. When we talked of leadership we meant leadership of the South. When we spoke of striving to be the best, we were talking of the best in the South.

This is no longer true. We understand the mission. We are preparing to do our part in providing leadership for the Nation. We know something about depressed areas and our people will be helping in this country and in Latin America. We know something about disadvantaged people and our leaders will be helping in this country and in Africa. We know something about the value of giving everybody his best individual chance, and we know about the needs for schools. We know what happens when some of our people do not have that chance, and we are moving out to show the rest of the Nation that the solutions can be found.

We do have a mission. That mission is education.

TAPER-OFF SYSTEM—NORTH CAROLINA PRISON REFORM PROGRAM

Mr. ERVIN. Mr. President, recently I called to the attention of the Senate a phase of North Carolina's progressive prison reform program, as reported in a news article by Robert Baker. Further recognition of this beneficial plan, which allows certain inmates to work in a free society by day, has come in an editorial that appeared in the April 11, 1963, edition of the Washington Post. I ask unanimous consent that the editorial, entitled, "Taper-Off System," which praises North Carolina's work release program, be printed at this point in the Record.

There being no objection, the editorial was ordered to be printed in the Record, as follows:

Taper-Off System

North Carolina has rendered a great service to the science of penology by experimenting with a work-release program for prison inmates. The work-release idea goes a step further than the parole system, which makes it possible for a prisoner with a good record to be released before the termination of his sentence if he has a job and good prospects for staying out of trouble. Under the new plan worked out in North Carolina, a prisoner with a good record, who is serving 5 years or less, may work in private industry by day and return to prison at night.

The economies resulting from the plan are substantial. Instead of living in idleness at the expense of taxpayers, the prisoners released to work on the outside reimburse the State for their board and lodging, support their families and, in some instances build up trust funds that become available to them when they are finally discharged. Of much greater importance, however, is the rehabilitative effect upon the prisoners themselves.

As explained in a report from Raleigh by Robert E. Baker, of our staff, the North Carolina system holds out new hope to prisoners, and the 20 percent who are selected for the work-release privilege have the great advantage of a job and some adjustment to the outside world before they regain complete freedom. The reasoning behind the program starts with the fact that nearly all prisoners (97 percent in North Carolina) will be released sometime. The interests of both society and the prisoners are best served if they are allowed to demonstrate their ability to hold a job and live within the law before the expiration of their terms.

The day may come when all prison inmates will be required to test their stability through the work-release method before being paroled. If this taper-off system is coupled with compulsory schooling for the illiterates, vocational training, psychiatric counseling, and a rehabilitation program for alcoholics, the States may be able to reduce the population of their prisons as some have done with their mental hospitals.

ADJOURNMENT TO THURSDAY NEXT

The **PRESIDING OFFICER.** Under the order of Thursday last, the Senate is to stand adjourned until noon on Thursday of this week. Accordingly, the Senate is now adjourned.

So, at 1:30 p.m., under the order of Thursday last, the Senate adjourned until Thursday, April 18, 1963, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate April 15, 1963:

Foreign Service

E. Allan Lightner, Jr., of Maine, a Foreign Service officer of the class of career minister, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the United Kingdom of Libya.

The following-named Foreign Service officers for promotion from class 1 to the class of career minister:

Aaron S. Brown, of New Hampshire.
Henry A. Byroade, of Indiana.
Fulton Freeman, of California.
Graham A. Martin, of Florida.

Securities and Exchange Commission

Manuel Frederick Cohen, of Maryland, to be a member of the Securities and Exchange Commission for the term of 5 years expiring June 5, 1968.

Tennessee Valley Authority

Frank E. Smith, of Mississippi, to be a member of the Board of Directors of the Tennessee Valley Authority for the term expiring May 18, 1972. (Reappointment.)

Civil Service Commission

L. J. Andolsek, of Minnesota, to be a Civil Service Commissioner for the term of 6 years expiring March 1, 1969, vice Frederick J. Lawton, term expired.

Bureau of Customs

Frank H. Tuohy, of New Jersey, to be comptroller of customs, with headquarters at New York, N.Y.

EXTENSIONS OF REMARKS

Cuba and Broken Treaties

EXTENSION OF REMARKS

OF

HON. STROM THURMOND

OF SOUTH CAROLINA

IN THE SENATE OF THE UNITED STATES

Monday, April 15, 1963

Mr. THURMOND. Mr. President, I call the attention of the Senate to an article on U.S. foreign policy with regard to Cuban communism as prepared by Mr. Hugh J. Boyd, principal of Lake View High School in Lake View, S.C., in eloquently expressing his opinions in U.S. handling of the Cuban problem. Mr. Boyd has reflected much of the sentiment that I have detected among my constituents in South Carolina. I ask unanimous consent that his article be printed in the RECORD.

I also ask unanimous consent to have printed in the CONGRESSIONAL RECORD an impressive column by Mr. Robert Morris, of Dallas, Tex., entitled "Broken Treaties"; and also my newsletter of April 8, 1963, which, like Mr. Boyd's article and Mr. Morris' column, is also on the subject of Cuba.

There being no objection, the article, column, and newsletter were ordered to be printed in the RECORD, as follows:

FREE CUBA OF TYRANNY

(By Hugh J. Boyd)

It's time for us of the United States to stop our wrist-slapping of those Cubans who are making heroic efforts to destroy a few of the vermin who have occupied their homeland. Our own people constantly remind us that we might anger someone if we allow such activity to continue. Some say we must tread lightly or we will step on some little Red toe. We have heard so much of this that we are beginning to draw the conclusion that our country, the United States, is afraid to put its foot down anywhere for fear of its touching the ground. We are told it is better to wait.

What are we waiting for? When are we supposed to get mad? What side are we on anyway? Have we so perverted our sense of justice and reasoning that we now condemn those who would gladly strike for freedom, knowing full well the possible if not inevitable consequences? Have we forgotten the courage displayed by our own heroes who struck for freedom against overwhelming odds and won?

To those who say, "Oh, we must not let them do such things, the blood will be on our hands," we say, "On whose hands is the blood of all those who have died under the oppression in Cuba? Is it not already dripping from the hands of those who for reasons of poor judgment, or pure ignorance are responsible for the rise of Castro?" This we cannot justify, but we can certainly face up to our responsibility, admit a mistake, and make every attempt to free Cuba of its tyranny.

As to a fear of war, this seems stupid; for have not the little rats run for their holes each time their hand has been called? Certainly, no one wants to die, but neither does anyone want to survive in a living hell. This is the blueprint for us, the United States, for the Americas, and every time we give in, or back up, or fail to support those who fight hand-to-hand combat with the Communists, we are asking for just that living hell. Every time we show embarrassment at a mistake—or apologize as we withdraw from an impasse—the beady-eyed little tramps sharpen their teeth for a little larger bite—and lick their chops with a little more anticipation.

The Communists, as individuals, are a weak, slimy lot—the fishy handshakers. Certainly, they are devoted to their cause and collectively they are strong; individually they are cowards, losing themselves in a cause for the simple reason they lack the courage to face the world's problems as individuals. It's about time we reduced them to the sniveling, incipid denominator which is common to all of them; and if not actually act to annihilate, at least to aid and abet those who are devoted to that cause. It's time we pictured ourselves in the position of the Cubans for a few minutes with the stinging tears of anger and insult streaming down their faces, seeking only one thing in life; the privilege of going home to live in peace. We say that we cannot help them, in fact we say we must prevent such provocative attacks against those who occupy Cuba for we run the risk of starting a war.

Is there one among us who believes that if the Communists believed that they could destroy us that they would hesitate one minute with or without provocation, or righteous justification? To whom do they have to answer, or to whom must they plead for mercy for such a sin against mankind? They know no God. There is no consciousness of right or wrong, only that which says "we can win, or we can lose," which would serve to stay their execution of us in their distorted "hall of justice."

Make no mistake, when the Communists think they can win, they will strike; until then, and this need not ever be if we seize the initiative, they will continue to head for the ratholes when we show the necessary determination. Of course, they will continue to gnaw away at our freedoms while still "holed up," creating new pockets of resistance which we must also ferret out and destroy. Give them no peace anywhere.

The dictates of commonsense demand that we take cognizance of the fact that we are losing a war; that there are those who sincerely want to win in their struggle for freedom. We must help them, but more than this, we must realize that we, you and I, are much more involved in international affairs than were our predecessors when entering World War I and World War II; and yet we are still sitting on our too-wide "dead ends," doing absolutely nothing.

It is time the United States set its foot down, and, if necessary, make the whole of South America shake with its thunder. When the "commies" set tail and run from there, follow them to their nests, ferret them out, and make them continue until they are again back in their own paradise with Niki or Maw. There is certainly such a thing as righteous anger.

BROKEN TREATIES

(By Robert Morris)

There was a day when the image we cast around the world was the subject of deep preoccupation on the part of our leaders. If this were so today the mood of those concerned would be one of abject shame.

A few years ago our present Chief Executive complained that we were not sufficiently helping Cuban exiles to restore freedom to their homeland. Later he stated that we could not tolerate a Soviet satellite on our doorstep.

The spectacle for all to see today is that we are indeed tolerating a Soviet satellite at our doorstep. Dramatizing that abject fact, we are conspicuously apprehending, even illegally, not the Castro agents who are radiating from Cuba to destroy freedom in Latin America but the Cuban exiles who aspire to free their homeland.

How dread must this spectacle appear to the people of Central and South America, the next targets of Castro and Khrushchev, particularly in the light of other reflections of the underlying abject mood?

The legal framework that solemnly exists today is clear. Not only do we have the Monroe Doctrine but it has been specifically implemented by the treaties of Rio de Janeiro, Caracas and Punta del Este. These are serious treaties under which we pledged to eradicate not only Soviet power but Soviet ideology from the hemisphere. A Soviet beachhead is proscribed. We are expressly committed by these solemn pacts not to tolerate it, coexist with it or guarantee its integrity. Yet we are patently flouting these compacts.

The Cuban exiles, on the other hand, apparently take the solemnity of these OAS treaties seriously and we now know what is in store for them. We even seize them, and have them seized, in international waters without waiting until they come within our territorial waters.

Of course despair prevails among the Cubans. To show how deeply committed to this illegel posture, emotionally, our State Department people are, they even smear, with dishonorable leaks to the press, the leader of the Cubans in exile.

As if to mock the folly of this Cuban performance, the similar mood of surrender that we engaged in with respect to Laos is now turning into a possible disaster.

In Laos, as in Cuba, to induce Khrushchev to keep his word we pressured General Nosavan's forces, the loyal Laotians, to cease resistance to the Communists and enter into a Soviet-leaning coalition government, on the troika basis.

The pro-Western forces withdrew militarily, according to their pledges. The pro-Soviet forces, reflecting their nature, not only did not withdraw from strategic positions but aggressively moved forward, with augmented strength, from North Vietnam.

Now Secretary Dean Rusk complains that the Communists are not keeping their word. In other words in 1963 he is still attributing to them what have been our standards and our meaning of "keeping one's word." The Communist meaning of a treaty is officially set forth—and put to practice thousands of times—"treaties like pie crusts, are made only to be broken." They will keep a pledge only as long as it serves their purpose.

But an even more chilling spectacle can be found by looking ahead. If we, by our example and by our flouting of protective treaties, continue to crush resistance to Soviet power in Latin America, one country after another will topple. Strategic Brazil and British Guiana are already well on the way.

Castro's agents are moving aggressively ahead. When the leaders of Central America showed signs of taking protective action against Soviet power, our Chief Executive went there to discourage them, promising nevertheless to aid them in stopping subversion.

The subversion—even sabotage—however, continues. Our State Department is not lifting a finger. No, I am wrong, they are lifting a finger—a forbidding finger but the finger is directed at Frances Knight, the competent head of the Passport Division of the State Department who wants to deny passports to Soviet agents going abroad to further world communism.

As we have pointed out, previously, Miss Knight has testified before the Senate Internal Security Subcommittee that her superiors forced her to issue passports to 547 persons she knew to be Communists, who were going abroad, obviously to subvert.

The conditioned American who does not seem to be disturbed at the prospect of a Communist Latin America should think twice when he beholds the trend toward control over our destiny by the United Nations. There we of the West are a minority today. But if we lose the supporting Latin American bloc that makes us somewhat respectable in this minority position, we will be almost alone, surrounded by our enemies, but this time—helpless.

A Choice for Americans

(By Senator Strom Thurmond)

The raids carried out by Cuban exiles against Castro and Russian Communist forces in Cuba have inspired a reaction of official displeasure from the United States. U.S. reaction has been expressed in both action and words. The action has been in the form of arrests of some Cubans in the United States suspected of participating in the raids. Verbally, the United States has officially characterized the raids as irrational.

The actions taken by the United States may have less effect on the Cuban raiders than the raiders themselves have on the combined Castro-Soviet military grip on Cuba. The raiders, so far as is known, do not operate directly from U.S. soil. Those not arrested have announced their intention of continuing their anti-Communist raids.

Verbal expressions of displeasure unleashed by U.S. officials against the Cuban raiders may, in the long run, have a far graver significance than the official U.S. actions, for they will surely be interpreted as an indicator of U.S. policy toward all those who rise up in arms against their Communist captors and rulers.

The Cuban raiders have been labeled "irrational" by State Department spokesmen. However badly the actions of the Cuban raiders may conflict with real or imagined U.S. interests, the charging of Cuban raiders with irrationality ill becomes Americans, of all people.

Cuban refugees have lost much, including their homes, their jobs, friends, loved ones, and above all, their liberty. Political asylum in a foreign land is no substitute. Having lost virtually all else, is it "irrational" for them now to risk their lives, even against hopeless odds, when there appears no other hope that their country will soon escape the terror, hunger, and captivity of Communist tyranny? After all, it is a fact that no country which has been taken behind the Iron Curtain has ever been freed, and the United States has never supported any movements toward liberation.

The Cuban raiders are by no means the first men to gamble against seemingly hopeless odds to gain liberty. Almost 187 years ago, other men, against almost equally hopeless odds, undertook to free their country from foreign tyranny, and to this end, they pledged to each other their lives, their fortunes, and their sacred honor. To American patriots in 1776, there was no other honorable course. So it may seem to Cuban refugees today.

The Cubans are not alone in their plight, however. Millions in eastern Europe, in the Balkan states, in Korea, on the mainland of China, even in non-Russian areas of the U.S.S.R. itself, are suffering from the same tyranny. There are those among these peoples who may again reach the limit of their endurance and conclude that they have no other honorable course but to rise up against hopeless odds.

Would the official reaction of the U.S. Government to such an uprising be condemnation for "irrationality?" Were the uprisings in East Germany 1953 "irrational?" Was the uprising in Hungary in 1956 an example of "irrational" conduct? Both these events caused a crisis in relations between the Communists and the free world. According to our policymakers, had the United States actively supported these uprisings, or even threatened to interfere with Soviet efforts to crush the uprisings, there would have been a risk of escalation into general war. For those who participated in the uprisings, the risk was already total—and most of them paid with their lives, either in the fighting, or in the executions which followed.

For the United States to aline itself with the aspirations of captive peoples for liberty involves a risk. It has been and is official U.S. policy to discourage "nonevolutionary changes" in Communist-held countries in hope of minimizing the risk of war to the United States. It also keeps us on the defensive against the constant efforts of the Communists to continue extending their tyranny worldwide.

Captive people all over the world will recognize in the charge of "irrationality" against Cuban raiders the U.S. policy of minimizing the risk—to Americans. Indeed, it may for them be the "convincer" that captive peoples can never hope to gain American support for their liberty hopes, and trigger against Communist rulers uprisings born of the belief that the future holds no better odds for throwing off the tyranny of communism than the present. At some such point, all Americans, and not just their policymakers, must face the sober choice—to minimize the risks to ourselves, or like our ancestors, to pledge our lives, our fortunes and our sacred honor to the cause of liberty.

SENATE

Thursday, April 18, 1963

The Senate met at 12 o'clock meridian, and was called to order by the President pro tempore.

Rev. John H. Ristow, pastor, Seymour Avenue Methodist Church, Lansing, Mich., offered the following prayer:

O God, our Heavenly Father, we stand before Thee in reverence and humility, acknowledging Thee as the Creator and sustainer of a universe in which goodness cannot die, or truth be eclipsed in darkness.

May Thy divine guidance direct today's deliberations and the decisions that shall be made.

Especially in these restless and troubled times, give each of us the awareness of our responsibility to the great heritage which has given this land her place of leadership in all the world.

Continue in us the unselfish desire to serve our fellow men in the spirit of the Galilean, that peace on earth and good will to all men shall become the living truth among men everywhere.

To Thy glory in the name of the living Christ, we pray. Amen.

THE JOURNAL

On request of Mr. Mansfield, and by unanimous consent, the reading of the Journal of the proceedings of Monday, April 15, 1963, was dispensed with.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States were communicated to the Senate by Mr. Miller, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session,

The PRESIDENT pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

LIMITATION OF STATEMENTS DURING MORNING HOUR

On request of Mr. Mansfield, and by unanimous consent, statements during the morning hour were ordered limited to 3 minutes.

EXECUTIVE COMMUNICATIONS, ETC.

The PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

The Food Stamp Act of 1963

A letter from the Secretary of Agriculture, transmitting a draft of proposed legislation to strengthen the agricultural economy; to help to achieve a fuller and more effective use of food abundances; to provide for improved levels of nutrition among economically needy households through a program of food assistance to be operated through normal channels of trade; and for other purposes (with accompanying papers); to the Committee on Agriculture and Forestry.

Addition of Certain Lands to Cache National Forest, Utah

A letter from the Secretary of Agriculture, transmitting a draft of proposed legislation to add certain lands to the Cache National Forest, Utah (with an accompanying paper); to the Committee on Agriculture and Forestry.

Report on Air Force Military Construction Contracts Awarded Without Formal Advertising

A letter from the Secretary of the Air Force, transmitting, pursuant to law, a report on military construction contracts awarded by that Department without formal advertising, for the 6-month period ended December 31, 1962 (with an accompanying report); to the Committee on Armed Services.

Amendment of District of Columbia Unemployment Compensation Act

A letter from the President, Board of Commissioners, District of Columbia, transmitting a draft of proposed legislation to amend the District of Columbia Unemployment Compensation Act, as amended (with an accompanying paper); to the Committee on the District of Columbia.

Report on Review of Causes of Overpayments of Military Pay and Allowances, Department of Defense

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report on the review of causes of overpayments of military pay and allowances, Department of Defense, dated April 1963 (with an accompanying report); to the Committee on Government Operations.

Report on Followup Review of Supply Management of Selected Radio Communication Sets Within the Department of the Air Force

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report on the followup review of supply management of selected radio communication sets within the Department of the Air Force, dated April 1963 (with an accompanying report); to the Committee on Government Operations.

Reimbursement to Owners and Tenants of Certain Lands

A letter from the Administrator, General Services Administration, Washington, D.C., transmitting a draft of proposed legislation to authorize reimbursement to owners and tenants of certain lands or interests therein acquired by the United States for certain moving expenses and losses and damages, and for other purposes (with accompanying papers); to the Committee on Government Operations.

Admission Into the United States of Certain Defector Aliens

A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, copies of orders entered granting admission into the United States of certain defector aliens (with accompanying papers); to the Committee on the Judiciary.

Temporary Admission Into the United States of Certain Aliens

A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting pursuant to law, copies of orders entered granting temporary admission into the United States of certain aliens (with accompanying papers); to the Committee on the Judiciary.

PETITIONS AND MEMORIALS

Petitions, etc., were laid before the Senate, or presented and referred as indicated:

By the PRESIDENT pro tempore:

A joint resolution of the Legislature of the State of Wisconsin; to the Committee on Agriculture and Forestry:

"Joint Resolution 7A

"Joint resolution memorializing Congress to extend the coverage of the Farmers Home Administration for recreational enterprises to include resort owners

"Whereas the resort owners find it difficult to obtain a loan in amounts sufficient to upgrade and expand present facilities at reasonable rates of interest; and

"Whereas Professor Fine's survey of the resort industry indicates that the earnings of resort owners is below the average income of tradesmen; and

"Whereas Wisconsin is endowed with many fine natural resources which need further development in order to improve the State's economy and thereby make the northern part of Wisconsin more self-sufficient; and

"Whereas the resort operation is so closely allied to the basic objectives of the Farmers Home Administration that it seems logical to extend its privileges to the resort owners: Now, therefore, be it

"*Resolved by the assembly* (*the senate concurring*), That the Wisconsin Legislature memorialize the Congress of the United States to extend the coverage of the recreational loan program of the Farmers Home Administration to include resort owners; and be it further

"*Resolved,* That copies of this joint resolution be submitted to the Secretary of the U.S. Senate, the Chief Clerk of the House of Representatives, the Secretary of Agriculture, the Administrator of the Farmers Home Administration, and to each Member of the Wisconsin delegation to Congress.

"Jack B. Olson,
"*President of the Senate.*
"Lawrence R. Larsen,
Chief Clerk of the Senate.
"Robert Haase,
"*Speaker of the Assembly.*
"Kenneth E. Priche,
"*Chief Clerk of the Assembly.*"

A joint resolution of the Legislature of the State of Wisconsin; to the Committee on Appropriations:

"Joint Resolution 57A

"Joint resolution memorializing Congress to appropriate funds to construct a regional dairy cattle forage utilization research laboratory by the U.S. Department of Agriculture and locate it at or near Madison, Wis., and the University of Wisconsin.

"Whereas the dairy industry is currently suffering from low returns to producers, and must meet increased competition from other foods; and

"Whereas one of the ways to attack this problem is to decrease the cost of producing milk; and

"Whereas the proposed regional dairy cattle laboratory would have for its purpose both basic and applied research in such important areas as:

"1. Improving the handling, preservation and utilization of forages—the principal and most economical feed for dairy cattle.

"2. Studying bacterial, chemical and physiological processes of digestion in cattle and their role in forage utilization.

"3. Studying the effect of forage-concentrate ratios on production costs, milk yields and milk composition.

"4. Developing modern feeding standards for dairy cattle, as many of our present-day guides and standards were developed nearly a half century ago and are no longer adequate in modern dairying.

"5. Determining the genetic factors influencing the capacity of dairy cattle to convert forages to milk.

"6. Developing feeding and management practices that will reduce production costs and increase farm incomes; and

"Whereas the Midwest is the largest and one of the mostly highly developed dairy areas in the country and is also the area where the lowest milk prices prevail; and

"Whereas Wisconsin with 12 percent of the Nation's dairy cattle, produces 15 percent of the milk, far outranking any other State; and

"Whereas Federal scientists could join with university scientists in several strong, related departments in both applied and basic research; and

"Whereas Wisconsin is the largest producer of forages for dairy cattle and has long been active in improving forages for dairy feed; and

"Whereas the proposed dairy cattle research laboratory will not compete with current programs, but will substantially strengthen them: Now, therefore, be it

"*Resolved by the assembly* (*the senate concurring*), That the Wisconsin Legislature memorializes the Congress of the United States to appropriate funds to construct a regional dairy cattle forage utilization research laboratory by the U.S. Department of Agriculture at or near Madison, Wis., and the University of Wisconsin; and be it further

"*Resolved,* That copies of this joint resolution be submitted to the Secretary of the U.S. Senate, the Chief Clerk of the House of Representatives, the Secretary of Agriculture, and to each Member of the Wisconsin delegation to Congress.

"Jack B. Olson,
"*President of the Senate.*
"Lawrence R. Larsen,
"*Chief Clerk of the Senate.*
"Robert Haase,
"*Speaker of the Assembly.*
"Kenneth E. Priche,
"*Chief Clerk of the Assembly.*"

A resolution adopted by the Board of Supervisors of Orange County, Santa Ana, Calif., relating to the classification of Orange County as a separate standard metropolitan area; to the Committee on Banking and Currency.

RESOLUTIONS OF IOWA BEEF PRODUCERS ASSOCIATION

Mr. MILLER. Mr. President, I ask unanimous consent to have printed in the Record, and appropriately referred, a series of resolutions adopted by the Iowa Beef Producers Association at their annual meeting in Des Moines, Iowa.

There being no objection, the resolutions were referred to the Committee on Agriculture and Forestry, and ordered to be printed in the Record, as follows:

Resolutions Passed by the Iowa Beef Producers at Their Annual Meeting in Des Moines, Iowa, March 27, 1963

I. IMPORTS

Resolved, That the Iowa Beef Producers Association go on record to support a program to decrease imports of beef as domestic supplies increase and bring about unfavorable lower prices for beef.

Whereas Iowa produces more pounds of beef for slaughter than any other State, we feel we should be considered and respectfully heard; and

Whereas imports for 1962 increased 50 percent over 1961, we feel this is a tremendous factor in the drop in cattle prices today. It is reported in December alone beef imports into this country amounted to nearly 11 percent of the domestic supply. This is a staggering amount and would be a big factor in helping our market prices drop; and

Whereas we recognize trade is needed to improve the world economy we feel we are being hurt by the increasing tonnage of beef entering this country: We hereby

Resolve, That we as individuals and members of the Iowa Beef Producers Association that a program be developed to decrease imports immediately as domestic supplies increase and the trend of lower prices exists.

II. DUAL GRADING

Resolved, That the Iowa Beef Producers Association go on record of reaffirming their position opposing dual grading.

Whereas Iowa is the top producer of quality corn-fed beef, it is important that we maintain the wonderful image of beef; and

Whereas it is doubtful if the consumer will realize any benefit or advantage from this system; and

Whereas it increases the cost and the beef producer cannot afford any additional hidden costs in merchandising his product; and

Whereas it will discourage heavy grain feeding to cattle and this will tend to increase our huge supplies of corn that we produce so abundantly here in the Corn Belt: We hereby

Resolve, That we as individuals and members of the Iowa Beef Producers Association do now strenuously reaffirm our opposition to dual grading. We, as producers and feeders here in Iowa have much at stake in changing anything that will affect the appeal of beef to the consumer.

III. EXPENSE ACCOUNTS

Resolved, That the Iowa Beef Producers Association go on record as demanding more clarification and general understanding of "expense accounts" ruling; and

Whereas Iowa is the prime beef center of the world we are directly affected by this ruling; and

Whereas hotels, restaurants and institutional trade are big customers of top-grade beef, we are concerned by their declining business; and

Whereas there is a question in the minds of many cattle feeders that there is much misunderstanding on this "Federal expense account" ruling: We hereby

Resolve, That the Federal Government present more clarification and understanding of the "Federal expense account."

IV. WHOLESALE AND RETAIL BEEF PRICES

Resolved, That the Iowa Beef Producers Association go on record as wanting to know why the spread in live beef prices and retail prices; and

Whereas the wholesale prices of choice carcass beef have dropped from 47 to 37 cents in recent weeks. To date this drop in price has not been reflected to the consumer and live cattle prices have dropped far below cost of production; and

Whereas in view of this situation, the Iowa Beef Producers Association asks the following questions:

1. Why have the major food chains failed in recent weeks to feature beef?
2. Why has no organization, on a State and National level, developed a program to sell beef and help the present price situation?

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. KEATING:

S. 1328. A bill for the relief of Woo Zee-Ching; and

S. 1329. A bill for the relief of Han Ah Fong; to the Committee on the Judiciary.

By Mr. JAVITS:

S. 1330. A bill to amend the National Labor Relations Act and the Railway Labor Act with respect to emergency labor disputes; to the Committee on Labor and Public Welfare.

(See the remarks of Mr. JAVITS when he introduced the above bill, which appear under a separate heading.)

By Mr. McNAMARA:

S. 1331. A bill to assist individuals to obtain retirement benefits protected against increases in the cost of living by providing for the issuance by the Treasury of a new series of bonds containing adjustments, under certain conditions, in maturity and redemption values to compensate for increases in the cost of living which may be purchased by individuals and eligible institutions; to the Committee on Finance.

S. 1332. A bill for the relief of Mrs. Fusako Leitzel; to the Committee on the Judiciary.

(See the remarks of Mr. McNAMARA when he introduced the first above-mentioned bill, which appear under a separate heading.)

By Mr. MANSFIELD:

S. 1333. A bill for the relief of Kenneth Shek Mah; to the Committee on the Judiciary.

By Mr. WILLIAMS of New Jersey (for himself, Mr. HUMPHREY, Mr. MORSE, Mr. CLARK, Mr. ENGLE, Mr. HART, and Mr. McNAMARA):

S. 1334. A bill to repeal section 14(b) of the National Labor Relations Act; to the Committee on Labor and Public Welfare.

(See the remarks of Mr. WILLIAMS of New Jersey when he introduced the above bill, which appear under a separate heading.)

By Mr. ALLOTT:

S. 1335. A bill to provide for the free entry of certain stained glass for the Congregation Emanuel of Denver, Colo.; to the Committee on Finance.

By Mr. ALLOTT (for himself and Mr. KUCHEL):

S. 1336. A bill to provide that the price at which the Coast and Geodetic Survey sells radio avigation charts and certain related material to the public shall not be less than the cost thereof; to the Committee on Rules and Administration.

(See the remarks of Mr. ALLOTT when he introduced the above bill, which appear under a separate heading.)

By Mr. LAUSCHE:

S. 1337. A bill for the relief of Frank Mramor; to the Committee on the Judiciary.

STRENGTHENING PRESIDENTIAL POWERS TO DEAL WITH NATIONAL LABOR DISPUTES

Mr. JAVITS. Mr. President, I introduce, for appropriate reference, a bill to amend the National Labor Relations Act and the Railway Labor Act to give the President of the United States new, and, in my opinion, critically necessary, powers to assert the public interest in labor disputes of a national character and labor disputes which threaten to imperil the national health and safety.

The proposed legislation would:

First. Authorize the President to appoint a board of inquiry to make recommendations for a settlement, in addition to factfinding.

Second. Authorize the President to order a 30-day freeze, during which both parties would be under a duty to bargain upon the recommendations, even though neither party is required to accept the recommendations.

Third. Authorize the President to seek appointment by a Federal court of a special receiver to operate such struck facilities, which in the opinion of the court are necessary to protect the national health or safety.

The bill would amend the National Labor Relations Act and the Railway Labor Act.

This legislation is designed to reflect a growing consensus that we must have an established procedure to assert the public interest in major and critical labor disputes.

The Taft-Hartley Act has proved to be an inadequate instrument for this purpose even where the national interest is seriously jeopardized. The administration is forced to rely now upon a procedure which is one of inadequacy and improvisation. I believe we must give the President greater flexibility and new tools to safeguard more effectively the public interest while at the same time providing maximum freedom for collective bargaining.

The statistics bear out our faith in and reliance on the collective bargaining process in a quantitative sense. Man-days of production lost through strikes shows a steadily declining curve: 1.43 percent of total working time in 1946; 0.29 percent in 1956; 0.16 percent in 1962. Since the tumultuous pioneering days of the 1930's, labor and management have slowly, often painfully, worked out techniques of negotiation and resolution of differences under our Federal labor relations statutes. Each is rightly proud of its record; each is rightly apprehensive of unwarranted outside interference.

But the disruption and danger of key work stoppages in critical industries, and services, in communications, transportation, and utilities and in defense industries has become constantly more concerning. This is the public interest which requires new safeguards and new techniques. Disputes which can halt production of steel and basic metals, defense items, fuels and foods, or disrupt our communications can endanger our national health or safety.

In such disputes, the National Labor Relations Act does not provide sufficient safeguards of the public interest. Indeed, it is precisely because of the deficiencies and omissions of these statutes that we seem to be in an era of continuing labor-management crisis, each separate crisis having to be dealt with on an emergency basis in a climate of haste and high emotional feeling. This pattern scarcely contributes constructively to developing the orderly, rational, and objective policy which is necessary to meet the threat to the paramount public interest. What is needed is impartial and objective statutory direction to the parties to the dispute and to the Executive, representing the public interest.

I am putting forward this plan to consider properly the public interest in national strikes as a tried friend of labor. I deeply believe that labor is challenged in this field as never before, and it represents a real opportunity for labor statesmanship. There are certain labor disputes in which the national interest is so deeply involved that they just cannot be fought out to a conclusion by a trial of strength. The people have to have some way to assert their interest through government. It is for this reason that I believe the process of recommendations by a fact-finding board appointed by the President, with a stand-still period during which these recommendations must be considered, is the best plan. The element of compulsion is not invoked except that compulsion which is even more effective—that is, the public being advised of what is a fair settlement and then being able to bring its weight to bear on both management and labor to see that a settlement is made. When this is coupled with some ultimate seizure right, which means that at no time can the government be paralyzed, I believe we have a plan to deal with major strikes that takes us about as far as we can go without inhibiting fundamental freedoms or taking punitive action against unions or employers.

The bill amends section 206 of the National Labor Relations Act to read as follows:

> Whenever in the opinion of the President of the United States, after consultation with the Director, a threatened or actual strike or lockout or other labor dispute affecting an entire industry or a substantial part thereof engaged in trade, commerce, transportation, transmission or communication among the several States or with foreign nations, or engaged in the production of goods for commerce, may, if permitted to occur or to continue, imperil the national health or safety, he may appoint a board of inquiry to inquire into the issues involved in the

> dispute and to make a written report to him within such time as he shall prescribe. Such report shall include a statement of the facts with respect to the dispute, including each party's statement of its own position, and shall, if the President so directs at any time, make recommendations in such a report or in a supplemental report for the settlement of some or all of the issues in dispute.
>
> Upon receiving a report of a supplementary report from a board of inquiry which contains recommendations for the settlement of some or all of the issues in dispute the President may direct that for a specified period not to exceed 30 days no change in the conditions out of which the dispute arose shall be made by the parties to the dispute, except by agreement. During such period the parties to the dispute shall be under a duty to bargain with respect to the recommendations for settlement of the board of inquiry, but neither party shall be under a duty to accept in whole or in part any such recommendations.

Under current law, a Presidential board of inquiry reports on the facts in a dispute, but is specifically prevented from making recommendations for settlement.

The amendment providing for possible seizure authorizes the President to go into Federal court to seek "appointment of a special receiver to take immediate possession in the name of the United States of any plant, mine, or other facility which is the subject of such labor dispute and to use and operate such plant, mine, or other facility in the interests of the United States; and if the court finds that the exercise of the power and authority provided by this section is necessary to preserve and protect the national health or safety, it shall have jurisdiction to appoint such a special receiver and to make such other orders as may be appropriate."

The amendment further provides that such operation by the special receiver is for the account of the employer, but the employer may elect to waive all claims to the proceeds of the receiver's operation and receive instead fair and reasonable rent for the facilities as long as the court deems necessary but no later than 30 days after restoration of labor relations between the parties to the dispute.

The purpose of this legislation, is to recognize and reaffirm the paramount, overriding public interest in the continued effective operation of facilities necessary to protect and preserve the national health and safety.

The bill leaves unchanged the 80-day injunction provisions of the Taft-Hartley Act, except for technical amendments. I recognize the pro and con arguments on the 80-day injunction, but it is consistent with my bill in that neither adopts the principle of compulsory arbitration.

The bill would not cover such strikes as the recent New York City newspaper strike, which could not be considered a dispute affecting the national health and safety. However, this bill, in the provision for public recommendations for settlement, could serve as a model for State legislation, which might under specific conditions be applied to a newspaper strike.

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 1330) to amend the National Labor Relations Act and the Railway Labor Act with respect to emergency labor disputes, introduced by Mr. JAVITS, was received, read twice by its title, and referred to the Committee on Labor and Public Welfare.

Mr. KUCHEL subsequently said: Mr. President, I ask unanimous consent that the senior Senator from New York [Mr. JAVITS] be permitted to have the bill he introduced today remain at the desk for a week for additional cosponsors.

The PRESIDENT pro tempore. Without objection, it is so ordered.

CONSTANT PURCHASING POWER BONDS

Mr. McNAMARA. Mr. President, I introduce, for appropriate reference, a bill which would authorize and direct the Secretary of the Treasury to issue "constant purchasing power bonds."

The purpose of this bill, which is explained in its title, is to protect the future retirement income of individuals from the possible ravages of inflation.

This would be accomplished by allowing them to purchase bonds from the Treasury, the face value of which would be adjusted to keep pace with any subsequent increases in the cost of living.

The result would be that a dollar saved during the working years, would still be worth a dollar—in terms of purchasing power—in retirement. It would mean protection to those living on fixed incomes from the eroding effect of inflation.

Under my bill, individuals and eligible institutions, such as pension plans and insurance companies, also could buy these bonds with certain limitations on amounts.

The cost-of-living protection provision would remain in force only if the bonds were kept until the person reached the age of 60, with certain exceptions such as death or disability. Pension plans and insurance companies would have to retain the bonds for 20 years. The bonds would bear the same interest rate as other savings bonds.

While I am submitting a detailed analysis of my proposal along with the bill, I would just like to point out that individuals could purchase up to $10,000 worth of constant purchasing power bonds a year, with total holdings limited to $60,000.

At the age of 60, the bonds could be redeemed at face value, plus any adjustments due to any increase in the cost of living between the date of purchase and the date of redemption.

Mr. President, this concept of a financial instrument providing constant purchasing power is not new. It has been used extensively in several countries of the world, both by Governments and private institutions, for many years.

A few of the countries where this concept has been used—successfully—include Finland, Sweden, Iceland, Israel, France, Chile, Mexico, and the Peoples Republic of China.

This concept was one of the basic recommendations of the Senate Subcommittee on Problems of the Aged and the Aging, of which I was chairman from 1959 to 1961.

In 1961, the Special Committee on Aging engaged Dr. Joseph Seidenberg, a consulting economist with impressive credentials, to study this proposal. Dr. Seidenberg's findings were published by the Special Committee on Aging.

I first introduced this bill in 1960, and reintroduced it in 1961 because I believe it would go a long way toward meeting some of the inadequacies of the present social security benefits and pension plans.

I should like to examine, briefly, some of the principal arguments that have been raised against this proposal by the Treasury Department, the Bureau of the Budget, and other opponents.

In a report to the chairman of the Committee on Finance, dated August 7, 1961, the Treasury Department raised three principal objections to S. 2181, the constant purchasing power bill I introduced in the 87th Congress.

First, said the Treasury Department, adoption of this proposal would be a tacit acceptance by the Government of the inevitability of inflation.

It would be an admission by the Government that it could not control inflation, and, as such, would increase the strength of inflationary forces.

This same argument—which I regard as specious—could be used against efforts to correct any social or economic ill, such as programs to alleviate unemployment or combat juvenile delinquency.

The answer to this argument, it seems to me, is that while the Government does have a duty to try to keep the dollar stable, the Government also has a responsibility to protect the thrifty retiree, who has saved for his old age, from the ravages of inflation.

As Dr. Seidenberg pointed out in his report to the Special Committee on Aging:

> The introduction of a constant purchasing power bond is but a recognition of an almost incontrovertible fact—a gradual increase in the price level (and) little likelihood of the trend being reversed in the foreseeable future.

As a matter of fact, the issuance of a security with a price index feature could equally well be interpreted as a statement of faith and confidence on the part of the Government that it can and will control inflation. Otherwise, it would not undertake to assume this potential liability.

Secondly, the opponents of this proposal argue that since these bonds would be offered only to one segment of the economy—the potential retirees in the work force—it would constitute unreasonable discrimination against other groups in the population. In other words, protection for one group would be offered at the expense of the general public.

The answer here, it seems to me, is that this Government quite often has recognized the need to pay unusual attention to certain groups within the general public that are in need of special protection.

This is why we have child labor laws. And it is one of the reasons why the Congress and the President have paid increasing attention in recent years to the special problems of the growing elderly sector of our population.

I might point out, also, that the argument of selectivity did not bother the Congress last year when it adopted special legislation benefiting the self-employed and their retirement programs.

In any event, participation in the program I propose would be open to everyone.

One of the reasons we need this program is that we have a constantly increasing number of senior citizens, who are living longer after retirement from gainful employment, and who are without adequate assets or income for their longer life span.

We are, indeed, giving this sector of our population special attention, but only because the need for it is so apparent.

Thirdly, the opponents of my bill argue that this program would drive existing Government savings bonds off the market.

In this connection, it is interesting to note that past campaigns to promote sales of existing Government savings bonds have not been very successful. Dr. Seidenberg, in his report to the Committee on Aging, points out that at no time during the 10-year period, 1950–60, did sales of savings bonds exceed redemption, including earned interest.

This would indicate to me that wage earners and middle-income salaried persons already are quite aware of the inflation-eroded purchasing power of savings bonds.

Other objections of a less substantial nature have been raised. All of them are answerable.

In conclusion, I would say that a constant purchasing power bond program would be a firm step toward meeting one of the most important problems in the area of retirement income security—a problem that will increase in dimensions in the years ahead as the number of aged and aging Americans inevitably increases.

Each year, this proposal has drawn increased attention, and I am hopeful that this year it will receive the additional serious study it deserves.

I ask unanimous consent that at this point in my remarks there be placed in the Record a detailed analysis and the complete text of the bill.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the bill and analysis will be printed in the Record.

The bill (S. 1331) to assist individuals to obtain retirement benefits protected against increases in the cost of living by providing for the issuance by the Treasury of a new series of bonds containing adjustments, under certain conditions, in maturity and redemption values to compensate for increases in the cost of living which may be purchased by individuals and eligible institutions, introduced by Mr. McNamara, was received, read twice by its title, referred to the Committee on Finance, and ordered to be printed in the Record, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Second Liberty Bond Act, as amended, is amended by adding at the end thereof the following new section:

"Sec. 26. (a) The Secretary of the Treasury is authorized and directed to issue, for purchase only by individuals and eligible institutions (as defined in subsection (b)(2)), United States bonds which shall, in the manner and to the extent provided by this section, compensate the holders of such bonds for increases in the cost of living occurring after the date of purchase of such bonds. The various issues and series of bonds issued under the authority of this section shall be in such forms, shall be offered in such amounts (subject to the limitation imposed by section 21 of this Act), and shall be issued in such manner and subject to such terms and conditions consistent with this section, as the Secretary of the Treasury may from time to time prescribe. Except as otherwise provided in this section, bonds issued under authority of this section for purchase by individuals shall be subject to all provisions of law (including this Act) applicable in the case of bonds issued under authority of section 22 of this Act, and bonds issued for purchase by eligible institutions shall be subject to all provisions of law (including this Act) applicable in the case of bonds issued under authority of the first section of this Act.

"(b) For purposes of this section—

"(1) The term 'approved pension or profit-sharing plan' means a pension plan, or a profit-sharing plan the primary purpose of which is to provide retirement benefits for employees and benefits for their beneficiaries, which—

"(A) meets the requirements of sections 401(a) (3), (4), (5), and (6) of the Internal Revenue Code of 1954, and

"(B) is approved by the Secretary of the Treasury, under regulations prescribed by him, as providing satisfactory periodical adjustments of benefits under such plan to compensate for increases in the cost of living. The adjustments under subparagraph (B) must be required under the plan to be made at least annually and not more frequently than quarterly.

"(2) The term 'eligible institution' means—

"(A) a trust described in section 401(a) of the Internal Revenue Code of 1954 and exempt from tax under section 501(a) of such Code which is a part of a pension or profit-sharing plan of an employer, and

"(B) a life insurance company (as defined in section 801(a) of the Internal Revenue Code of 1954) which has obligations under contracts described in sections 805(d)(1) (A), (B), (C), and (D) of such Code.

"(c) Bonds issued under authority of subsection (a)—

"(1) may be issued on an interest-bearing basis or, in the case of bonds issued for purchase by individuals, on a discount basis or on a combination interest-bearing and discount basis;

"(2) shall mature twenty years from the date as of which issued;

"(3) shall be sold at such price or prices, and may be redeemed before maturity, upon such terms and conditions as the Secretary of the Treasury may prescribe;

"(4) shall provide an interest rate (or in the case of bonds issued at a discount, an investment yield) which is the same as that provided for savings bonds issued under section 22 of this Act;

"(5) shall be issued in such denominations, expressed in terms of their maturity values, as the Secretary of the Treasury from time to time determines fulfills the needs of individuals and eligible institutions;

"(6) may, under regulations prescribed by the Secretary of the Treasury with the approval of the President, be retained after maturity by their owners and continue to yield interest at rates consistent with the provisions of paragraph (4);

"(7) shall be nontransferable; and

"(8) may be purchased only by or for individuals and eligible institutions.

"(d)(1) The amount of bonds issued under authority of subsection (a) which may be purchased by or for an individual in any one year shall not exceed $10,000 (computed with respect to the issue price). The total amount of such bonds which may be held by or for an individual at any time shall not exceed $60,000 (computed with respect to the issue price).

"(2) The total face amount of bonds issued under authority of subsection (a) which may be held at any time by an eligible institution shall not exceed—

"(A) in the case of an eligible institution which is a trust described in section 401(a) of the Internal Revenue Code of 1954, an amount (determined under regulations prescribed by the Secretary of the Treasury) necessary to meet obligations of the trust under an approved pension or profit-sharing plan; and

"(B) in the case of an eligible institution which is a life insurance company, an amount equal to the pension plan reserves which are allocable to contracts described in sections 805(d)(1) (A), (B), (C), and (D) of the Internal Revenue Code of 1954 which are purchased or provided under an approved pension or profit-sharing plan.

"(e)(1) Subject to the conditions prescribed in paragraphs (2) and (3), upon the surrender at or after maturity, or upon redemption before maturity, of a bond issued under authority of subsection (a), of the Consumer Price Index (as published by the Secretary of Labor) for the month preceding the month in which such bond is surrendered or redeemed exceeds the Consumer Price Index for the month in which such bond was issued, there shall be paid to the holder of such bond (in lieu of the amount otherwise payable with respect to such bond without regard to the provisions of this paragraph) an amount determined—

"(A) by multiplying the amount otherwise payable with respect to such bond by the Consumer Price Index for the month preceding the month in which such bond is surrendered or redeemed, and

"(B) by dividing the product obtained under subparagraph (A) by the Consumer Price Index for the month in which such bond was issued.

"(2) Paragraph (1) shall apply with respect to a bond purchased by or for an individual only if such individual—

"(A) before the month in which such bond is surrendered or redeemed, has attained the age of sixty years or has died after attaining the age of sixty years, or

"(B) after the purchase of such bond, has become disabled or has died after becoming disabled.

For purposes of this paragraph, in the case of a bond purchased by or for two individuals as joint owners or as coowners, any condition prescribed in subparagraph (A) or (B) shall be satisfied with respect to such bond if such condition is satisfied by either of such individuals. For purposes of subparagraph (B), an individual shall be considered to be disabled only if he is unable to engage in any substantial gainful activity by reason of a medically determinable physical or mental impairment which can be expected to result in death or to be of long-continued and indefinite duration, and if proof of the existence thereof is furnished in such form and manner as the Secretary of the Treasury may require.

"(3) Paragraph (1) shall apply with respect to a bond purchased by an eligible institution only if—

"(A) such bond is held to maturity, or

"(B) in the case of a bond redeemed before maturity, the eligible institution establishes to the satisfaction of the Secretary of the Treasury that such redemption is necessary to enable the eligible institution to fulfill obligations described in subsection (d)(2)(A) or contracts described in subsection (d)(2)(B)."

Sec. 2. Section 21 of the Second Liberty Bond Act, as amended, is amended by adding at the end thereof the following new sentence: "For purposes of this section, the face amount of obligations issued under authority of section 26 shall be determined without regard to the provisions of subsection (e) of such section."

The analysis presented by Mr. McNamara is as follows:

Analysis of the McNamara Purchasing Power Bond Bill

Section 1 of the bill adds a new section, section 26, to the Second Liberty Bond Act.

Subsection (a) of the new section authorizes and directs the Secretary of the Treasury to issue purchasing power bonds subject, unless otherwise provided for in the bill, to the provisions of existing law.

Subsection (b) defines the pension and profit-sharing plans, and the institutions which are eligible to purchase the bonds, and requires that, in case of profit-sharing and pension plans, periodical adjustments be made in the paid-out benefits for the purpose of compensating for increases in the cost of living.

Subsection (c) states that the bonds to be issued—

1. May be interest-bearing (coupon) or discount type, or a combination of the two.
2. Shall mature in 20 years.
3. May be redeemed before maturity.
4. Shall bear interest rates identical with the going rate of interest on ordinary savings bonds.
5. Their denominations shall be geared to the needs of the purchasing individuals and institutions.
6. May be retained after maturity.
7. Shall be nontransferable.
8. May be purchased only by or for individuals and eligible institutions.

Subsection (d) limits the amount of purchasing power bonds that may be purchased by individuals to $10,000 annually, and the total holdings of individuals to $60,000 (both figures computed on the basis of purchase price); it also limits the purchase by, and holdings of, eligible institutions to amounts required to back their obligations under the pension and profit-sharing plans under their management.

Subsection (e) provides for the calculation of the cost-of-living adjustments in the face value of the bonds; it also specifies that such adjustments are to be made in case of individual holders only if the holders have either reached the age of 60 or have become permanently disabled, and in case of institutions only if the bonds are held to maturity or, if redeemed before maturity, if such redemption is necessary to enable the institutions to meet their obligations under the plans under their management.

Section 2 of the bill states that, for purposes of calculating the statutory debit limit, the face amount of the bonds—before cost-of-living adjustments—shall be considered the amount outstanding.

REPEAL OF SECTION 14(b) OF THE NATIONAL LABOR RELATIONS ACT

Mr. WILLIAMS of New Jersey. Mr. President, on behalf of myself, and Senators Humphrey, Morse, Clark, Engle, Hart, and McNamara, I introduce, for appropriate reference, a bill to repeal section 14(b) of the National Labor Relations Act. I ask unanimous consent that the bill lie on the desk until April 26, so that other Senators may join as cosponsors.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the bill will lie on the desk, as requested by the Senator from New Jersey.

The bill (S. 1334) to repeal section 14(b) of the National Labor Relations Act, introduced by Mr. Williams of New Jersey (for himself and other Senators), was received, read twice by its title, and referred to the Committee on Labor and Public Welfare.

SALE OF CERTAIN CHARTS AND MATERIAL BY COAST AND GEODETIC SURVEY

Mr. ALLOTT. Mr. President, I introduce, on behalf of myself and the Senator from California [Mr. Kuchel], a bill to amend the act of January 12, 1895, dealing with printing of public documents, by requiring that charts and reference material for radio avigation be sold to the public at not less than cost. The factors to be included in the computation of cost are delineated in the bill, and include cost of paper and printing, expenses incurred in actual reproduction of the charts after the original cartography, such as photography, opaquing, platemaking, press time and bindery operations, and the full postage rates applicable. It would also allow the Secretary of Commerce to add any cost factors deemed appropriate by him, such as overhead and administrative expenses allocable to the production of the material covered by the bill.

I feel that such a measure is required because our Government, for the last several years, has been in direct competition with private enterprise in this particular field, competing, with the help of Federal subsidy, with an established, reliable private company. I speak of the company involved as being established and reliable from my own personal knowledge. I have visited the facilities of the company, and I have known the founder and president for a great many years. I am well aware also of the importance of high quality avigational material because of my own wartime experience in the U.S. Air Force, and I can state that Jeppesen & Co. meets the highest standards of quality in its field.

Under the act which I seek to amend, the Government may sell, and does sell radio avigation aids for the cost of the printing and paper alone. Clearly this does not reflect the true cost of such material, and obviously when Government puts out a service available to the public at a figure far below its true cost, and a private company is also engaged in furnishing the same service, that company simply cannot compete. In the last session of Congress, the Coast and Geodetic Survey asked for $693,000 not only to continue its unfair competition with private enterprise, but to expand such competition. The increased amount asked was not granted, the Subcommittee on Appropriations having recommended against the increase with the statement, "The committee continues to approve the general policy that it is unwise to put the Federal Government in competition with private business."

As a result of the attention focused on the problem, however, a committee headed by Thomas H. Carroll, president of George Washington University, was appointed by Mr. Hodges, Secretary of Commerce, with the concurrence of FAA, to study governmental aeronautical charting activities with particular reference to the respective roles of Government and private enterprise. The report of that committee was released by the Commerce Department on March 6, 1963. The bill which I introduce today is based on the recommendations contained in that report. It is not intended to eliminate Government participation in the field of radio aeronautical charting and avigation aids, but will tend to bring the cost of Government charts more nearly in line with the realistic cost and thereby effect a saving to the taxpayers of substantial sums annually.

I ask unanimous consent that the bill be printed at this point in the Record.

The PRESIDING OFFICER (Mr. Sparkman in the chair). The bill will be received and appropriately referred; and, without objection, will be printed in the Record.

The bill (S. 1336) to provide that the price at which the Coast and Geodetic Survey sells radio avigation charts and certain related material to the public shall not be less than the cost thereof, introduced by Mr. Allott (for himself and Mr. Kuchel), was received, read twice by its title, referred to the Committee on Rules and Administration, and ordered to be printed in the Record, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 76 of the Act entitled "An Act providing for the public printing and binding and the distribution of public documents", approved January 12, 1895 (28 Stat. 620; 44 U.S.C, sec. 246) as amended, is amended by inserting after the word "practicable" the following: "except that charts and reference material for radio navigation shall be sold to the public at not less than the cost thereof. The Secretary of Commerce, shall, by regulation, from time to time, but not less than once in each calendar year establish the price at which such charts and reference material for radio navigation shall be sold to the public. Such price shall include in addition to the cost of paper and printing, the following: all expenses incurred in actual reproduction of the charts after the original cartography, such as photography, opaquing, platemaking, press time, and bindery operations; the full postage rates, according to the public rates for postal services used; and any additional cost factors deemed appropriate by the Secretary, such as overhead and administrative expenses allocable to the production of the aforesaid charts and reference materials: *Provided, however,* That the costs of basic surveys and geodetic work done by the Coast and and Geodetic Survey shall not be included in establishing the price of such charts and reference materials."

WATER RESEARCH CENTERS AT LAND-GRANT COLLEGES AND STATE UNIVERSITIES—AMENDMENTS

Mr. ALLOTT submitted amendments, intended to be proposed by him, to the bill (S. 2) to establish water research centers at land-grant colleges and State universities, to stimulate water research at other colleges, universities and centers of competence, and to promote a more adequate national program of water research, which were ordered to lie on the table and to be printed.

ENFORCEMENT OF CONSTITUTIONAL RIGHTS—ADDITIONAL COSPONSOR OF BILL

Mr. HART. Mr. President, I ask unanimous consent that at the next printing the name of the Senator from Maryland [Mr. Brewster] be added as a cosponsor of S. 1283, a bill to enforce constitutional rights.

The PRESIDING OFFICER. Without objection, it is so ordered.

NOTICE OF RECEIPT OF NOMINATION BY COMMITTEE ON FOREIGN RELATIONS

Mr. FULBRIGHT. Mr. President, as chairman of the Committee on Foreign Relations, I desire to announce that today the Senate received the nomination of Chester Bowles, of Connecticut, to be Ambassador to India.

In accordance with the committee rule, this pending nomination may not be considered prior to the expiration of 6 days of its receipt in the Senate.

NOTICE OF RECEIPT OF NOMINATIONS BY COMMITTEE ON FOREIGN RELATIONS

Mr. FULBRIGHT. Mr. President, as chairman of the Committee on Foreign Relations, I desire to announce that Monday, April 15, 1963, the Senate received the nominations of E. Allan Lightner, Jr., of Maine, to be Ambassador to the United Kingdom of Libya, and the following-named Foreign Service officers for promotion from class 1 to the class of career minister:

Aaron S. Brown, of New Hampshire.
Henry A. Byroade, of Indiana.
Fulton Freeman, of California.
Graham A. Martin, of Florida.

In accordance with the committee rule, these pending nominations may not be considered prior to the expiration of 6 days of their receipt in the Senate.

NOTICE OF EDUCATION HEARINGS

Mr. MORSE. Mr. President, as chairman of the Education Subcommittee of the Senate Committee on Labor and Public Welfare, I am pleased to announce that open hearings upon S. 580, the National Education Improvement Act of 1963, and related bills will commence at 10 a.m., in room 4232, New Senate Office Building, on Monday, April 29, 1963.

Senators who have sponsored or cosponsored bills relating to education, or who desire to be heard by the subcommittee in connection with any of the measures which will be taken up at that time are cordially invited to appear.

Mr. President, I ask unanimous consent that a list of the bills to be heard be printed at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. MORSE. Mr. President, since it is anticipated that several days may be necessary to hear all individuals and representatives of organizations who have, or will, express an interest in presenting testimony, I am asking that those concerned with any of the measures indicate their interest, in securing an invitation to appear, to the subcommittee staff in room 4230, New Senate Office Building, in writing or by telephone to Capitol 4-3121, extension 5375.

It is presently planned that the first day of the hearing, April 29, will be devoted to the testimony of Senators and to that given by the Honorable Anthony J. Celebrezze, Secretary of Health, Education, and Welfare. On April 30, it is planned to take testimony from additional Senators and from the Honorable W. Willard Wirtz, Secretary of Labor.

On subsequent days, to be announced later, it is planned to take testimony from public witnesses on each title of S. 580 separately. Thus the first day of public hearings would encompass the student loans, work-study, graduate fellowships and student loan insurance proposals of S. 580 plus such other bills as have been introduced bearing upon these student benefit subjects. Following this, measures relating to title II of S. 580, the higher education section of the administration bill, would be heard.

In a similar fashion testimony will be taken on separate days for title III, improvement of education quality measures; title IV which is concerned with elementary and secondary education, amendments to titles III and V of the National Defense Education Act, and Public Laws 815 and 874; title V, relating to vocational and special education; and title VI, which is concerned with an expansion of continuing education, including library measures.

In order to accommodate witnesses who may wish to be heard on more than one title subject matter area, the subcommittee will be pleased either to have them appear on each title or to file supplementary statements for inclusion in the hearing record at the appropriate place.

The concluding sessions of the hearings will be devoted to the testimony of Commissioner Keppel and the Office of Education. It is the hope of the subcommittee that observers from the Office of Education will attend each day's session for the purpose of taking notes upon the testimony offered, in order that the final statements of the Commissioner and his assistants can reflect the views of the administration with respect to the points raised by witnesses.

While no length restrictions of an unreasonable nature will be placed on the written statements submitted, it is the hope of the subcommittee that witnesses will confine oral presentations to under 15 minutes. Wherever possible upon a common subject matter, the subcommittee would like to hear witnesses in a panel format, in order to conserve time and to permit full opportunity to the members to raise questions.

Exhibit 1

Measures Proposing To Be Heard Starting April 29. 1963

COMPREHENSIVE

S. 580: Senators Morse, McNamara, Yarborough, Clark, Randolph, Williams of New Jersey, Burdick, Pell, Mansfield, Humphrey, and Kefauver.

IMPACTED AREAS

S. 105: Senator Cotton.

S. 151: Senators Engle, Long of Missouri, and Burdick.

S. 236: Senators Dodd, Long of Missouri, and Pell.

S. 415: Senators Moss, Pastore, Randolph, Bible, Young of Ohio, Fong, Long of Missouri, Gruening, McGee, Cannon, Hart, and Brewster.

HIGHER EDUCATION

S. 500: Senator Javits.

S. 956: Senators Case and Scott.

S. 1174: Senator Case.

LOANS AND SCHOLARSHIPS

S. 389: Senators Humphrey, Gruening, Long of Missouri, and Pell.

S. 390: Senators Humphrey, Fulbright, Gruening, Long of Missouri, and Pell.

S. 1115: Senator Hartke.

NDEA

S. 275: Senator Inouye.

S. 373: Senators Inouye and Fong.

S. 392: Senator Humphrey.

S. 423: Senator Mundt.

S. 569: Senators Prouty and Keating.

S. 571: Senators Keating and Prouty.

S. 1264: Senator Javits.

ELEMENTARY AND SECONDARY EDUCATION

S. 8: Senators McNamara and Hart.

S. 892: Senator Scott.

VOCATIONAL EDUCATION

S. 1222: Senator Boggs.

MISCELLANEOUS

S. 181: Senators Goldwater, Young of North Dakota, Allott and Morton.

S. 70: Senator Proxmire.

S. 990: Senator Cotton.

OREGON EDUCATOR HONORED

Mr. MORSE. Mr. President, on April 8 I had the privilege of addressing the national convention of the American Personnel and Guidance Association in Boston. I thoroughly enjoyed this opportunity of meeting with scores of dedicated men and women from all parts of the country who were gathered there in their annual meeting.

The occasion has been additionally enjoyable to me since I have learned that the association later honored a distinguished Oregon educator, Dr. Daniel W. Fullmer, who is assistant dean of the general extension division of the Oregon State System of Higher Education, and director of the Counseling Center for Adults of that division, by bestowing upon him the Nancy C. Wimmer Award.

This recognition of Dr. Fullmer by the profession is one which I feel sure will receive wide approbation among those who have known of his fine work. I join in extending to him my personal congratulations and best wishes.

Mr. President, I ask unanimous consent that a statement of the American Personnel and Guidance Association dated April 11, 1963, announcing the award be printed at this point in my remarks.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

DANIEL W. FULLMER GIVEN TOP PERSONNEL AND GUIDANCE AWARD

Daniel W. Fullmer was named last night as recipient of the 1963 Nancy C. Wimmer Award at the American Personnel and Guidance Association Convention now being held in Boston. The award of $1,000 is made annually for outstanding initiative, creativeness, or leadership in establishing, developing, or improving guidance and counseling practices in educational institutions, business, or industry in America.

Dr. Fullmer, director of the Counseling Center for Adults, General Extension Division, Oregon State System of Higher Education, was chosen as winner of the Nancy C. Wimmer Award for:

1. Stimulation and development of the first student counseling service in the Portland Extension Center, Oregon System of Higher Education, that has rapidly expanded to become a community guidance project and effective counseling center.

2. Establishment of an inservice training program for counselor educators in the Oregon General Extension Division staff with the University of Oregon Medical School. This cooperative plan is at the postdoctoral level for all staff members.

3. Organization of an experimental program of family group consultations for possible utilization of the method as a counseling tool for public school counselors.

4. Direction of an experimental workshop on the counseling of minority youth for educators in the Pacific Northwest region.

5. Initiation of a series of educational television programs for high school students and their parents while utilizing to the fullest extent all phases of educational media in the total program of the Portland Extension Center.

A 1940 graduate of Valley High School, Fairview, Ill., Daniel Fullmer attended Western Illinois University where he received a B.S.E. in elementary and secondary education, and an M.S.E. in public school administration.

He taught in the public schools of Illinois and Colorado for 7 years. This teaching experience included work at the elementary, junior, and senior high school levels in teaching, counseling, and administration. In 1955 he received a Ph. D. in education and psychology from the University of Denver.

From Colorado, Dr. Fullmer moved to the University of Oregon to the duties of personnel director for the School of Education where he was responsible for the school's master degree program. During the 2 years he held this position he helped to establish an extension of this office in the Portland Extension Center. He was later transferred to the Extension Center to fill the position of coordinator of graduate studies for the University of Oregon School of Education. At the center he developed a counseling center designed to serve the evening and summer session students and to provide a training facility for school counselors. In addition to serving a limited number of evening extension students, he helped to form a basic program of counselor training designed specifically for school counselors.

In addition to his administrative duties, he completed teaching assignments in educational psychology on the undergraduate level and included measurements in education and statistics among the courses he taught on the graduate level.

During 1959 and 1960 Dr. Fullmer served as director of summer counseling and guidance training institutes under the National Defense Education Act at the Portland Center. From November 1962, to March 1963, he served on special assignment to a consultant in the Counseling and Guidance Training Institutes Branch of the U.S. Office of Education. Author of a number of articles and publications, he is currently in the process of coauthoring a textbook about the school counseling process and preparation of counselors.

THE NANCY C. WIMMER AWARD

The Nancy C. Wimmer Award was established to honor the memory and ideals of Nancy C. Wimmer who served on the staff of Science Research Associates, Inc., in Chicago from 1944 until her death in 1958. The award is made possible through the assured contribution of a major anonymous donor and others who wish to perpetuate her accomplishments and spirit as a member of the personnel and guidance profession.

ADDRESSES, EDITORIALS, ARTICLES, ETC., PRINTED IN THE RECORD

On request, and by unanimous consent, addresses, editorials, articles, etc., were ordered to be printed in the RECORD, as follows:

By Mr. McINTYRE:

Text of an amendment to the rules and regulations for the Federal Savings and Loan System.

"THE SCOPE OF COLLECTIVE BARGAINING"—ADDRESS BY HON. BOYD LEEDOM

Mr. CARLSON. Mr. President, Judge Boyd Leedom has for 8 years been a member of the National Labor Relations Board, and during this time has made an extensive study of our labor-management problems.

On Tuesday, April 16, Judge Leedom spoke at the University of Chicago seminar on collective bargaining. The title of his address was "The Scope of Collective Bargaining." In his address he discussed a method of rescuing our free and private bargaining from decay and destruction. He proposed that there be established a labor peace corps to bring labor and management together in formulating steps to improve the collective-bargaining system.

This labor peace corps would be made up of three men each, of "wisdom, stature, and influence," from the ranks of management and labor.

I ask unanimous consent that there be printed at this point in the RECORD Judge Leedom's address and an article entitled "Idea for Deadlocks: Labor Peace Corps," which was published in the New York Herald Tribune on April 17, 1963.

There being no objection, the address and the article were ordered to be printed in the RECORD, as follows:

THE SCOPE OF COLLECTIVE BARGAINING

(Address of Boyd Leedom, member, National Labor Relations Board, before University of Chicago, Ill.)

Chicago seminar on Collective Bargaining, Most of you already know that the Labor Board has always been fair game for the sharpshooters. But, of the criticism leveled against the Board, most of it is extravagant and unwarranted. Generally, it comes from partisan sources. Often, it is not made for its intrinsic value but rather to serve a critic's special purpose that is sometimes fairly clear, sometimes obscure. Board decisions are continuously under attack either for being prolabor or promanagement; for disregarding stare decisis or for blindly following precedent; for being too short or too long; and for various other reasons.

Recently, two rather sharp attacks on Board decisions occurred in this city. One was by a prominent labor attorney from New York, Frederick Livingston,[1] and the other by a former General Counsel of the Board, Ted Kammholz.[2] Their remarks had a common theme—that the Board has injected itself unduly into the collective bargaining process. Now, in the light of the long history of criticism, this new assault should not be particularly disturbing. Because, however, of the great interest in collective bargaining due to recent lengthy and costly strikes—and I shall have some comments about these later—I think it useful to clear the air a bit by dealing with the Board's role in the collective bargaining process.

I want to talk with you today at some length about (1) the obligation of employers to bargain with unions on basic management decisions; and (2) deal very briefly with those proposals—such as performance bonds—which it seems neither an employer nor a union may insist upon as a condition of entering into a contract.

I would like to help you understand what the Board has done, even though, as many of you may know, I have disagreed with the majority in a number of important decisions during the past year. I shall indicate at which point the other Board members and I part company.

Let me begin with certain fundamentals. Collective bargaining is, I believe, the cornerstone of our national labor policy. Section 1 of the National Labor Relations Act states that the policy of the United States is "encouraging the practice and procedure of collective bargaining." In implementation of the policy, in sections 8(a)(5) and 8(b)(3), the act makes it an unfair labor practice for either employers or unions to refuse to bargain collectively with the other. Through its power to decide representation cases, the Board (1) determines which union represents the employees involved, and (2) which grouping of employees constitutes the unit for which the employer and the union must bargain. Finally, the Board is charged with the duty of making certain that the parties sit down and bargain in good faith with each other—a key job of the Board and one of the most difficult.

It should be emphasized that we have no authority under the act to decide for the parties what the substantive terms of their agreements should be. Section 8(d) explicitly states that the act "does not compel either party to agree to a proposal or require the making of a concession." Or, as the Supreme Court said, the National Labor Relations Act "does not undertake governmental regulations of wages, hours, or working conditions. Instead, it seeks to provide a means by which agreements may be reached with respect to them."[3] The Board, while compelling the parties to bargain, has never attempted to dictate to the parties the terms of their agreement. The question arises then, why all this criticism of the Board for intruding into the collective bargaining process? The answer, in my opinion, is relatively simple: In deciding whether parties are bargaining in good faith, the Board necessarily defines what subjects employers and unions must bargain about. The only guide we have as to the subjects to be bargained about is section 8(d) of the act which requires that parties bargain in good faith "with respect to wages, hours, and other terms and conditions of employment." The Board's problem is one of definition of these terms, and it is this process of definition which has given rise to so much controversy.

[1] Address of Frederick R. Livingston, at Midwest seminar on NLRB policy changes, University of Chicago, Feb. 2, 1963, "Changing Obligations Under the Duty to Bargain."

[2] Address by Theophil C. Kammholz, at American Management Association Midwinter Personnel Conference, Chicago, Ill., Feb. 10, 1963, "A Forecast of Labor-Management Developments to Come."

[3] *Terminal Association* v. *Trainmen,* 318 U.S. 1, cited in *NLRB* v. *American National Insurance Co.,* 343 U.S. 395.

Probably the most controversial issue that has arisen recently in the collective bargaining area is whether an employer's decision to make changes in his business structure—for instance, whether to subcontract certain work, or to eliminate a department or to close down the business entirely—is a mandatory subject of bargaining. In general, employers have claimed that such decisions are management prerogatives and need not be bargained about. Unions, on the other hand, claim that since such decisions affect employees' rights, they are mandatory subjects of bargaining. The Board is split in several ways.

The key decisions on the issue are Fibreboard and Town and Country.[4] In each of these cases, the question was whether an employer was required to bargain with the union regarding its decision to subcontract a portion of its business for economic reasons, resulting in discharge of employees.

The Fibreboard decision was originally handed down in March 1961. A majority of the Board, consisting of Member Rodgers, former Member Jenkins, and myself, found that the employer did not subcontract the work to beat the union. Therefore, inasmuch as the subcontracting was not to discourage union membership, there was no violation of section 8(a)(3). The majority then found (the decision to subcontract being for economic reasons) that section 8(a)(5) does not impose an obligation on an employer to bargain with the union regarding the basic decision to subcontract work. Member Jenkins and I agreed, however, that the employer was, in such circumstances, obligated to bargain with the union regarding the impact of the subcontracting on employees. For example, in our view, the employer must discuss with the union which employees shall be selected for termination, and whether employees may be entitled to receive benefits on termination. Member Ray Rodgers disagreed and would have found that the employer did not have to bargain with the union at all, not even regarding the impact of the subcontracting on employees. Member John Fanning dissented from the majority's decision and would have found that an employer must bargain with the union regarding its basic decision to subcontract and also on all matters flowing from it. Chairman McCulloch, who had just joined the Board, did not participate in that decision. So, the four participating members split three ways on the issue.

The Fibreboard principle lasted until April 13, 1962, about a year. The Board's composition changed and the Town and Country decision, which involved essentially the same issue as Fibreboard, a majority of the Board, comprising Chairman McCulloch, Members Fanning and Brown, decided that (1) the employer had subcontracted work and discharged employees for discriminatory reasons and therefore violated section 8(a)(3); and (2) even assuming that the employer had subcontracted the work for economic reasons, it had an obligation to bargain with the union regarding its basic decision to subcontract the work, the position of Member Fanning in the original Fibreboard decision.

I concurred in the result, but for a different reason. In my opinion, since the employer had subcontracted the work and discharged its drivers for discriminatory reasons, in violation of section 8(a)(3), the drivers remained employees, and the employer was accordingly obligated to bargain with the union as their representative. Its failure to do so, I would have found, violated section 8(a)(5). I made it clear, however, that if, as in Fibreboard, the subcontracting had been for economic rather than discriminatory reasons, I would have disagreed with the result. Member Rodgers again dissented in Town and Country. He would have found that the subcontracting was not discriminatory and that, in any event, an employer has no obligation to discuss with a union either its basic decision to subcontract work or the impact of such decision on employees. Again, the Board was split three ways on the issue, but with a different majority.

In September 1962, on a motion for reconsideration, the Fibreboard decision itself was reversed, with Member Rodgers dissenting, and Member Brown and I not participating, though our positions on the issue differed from each other's and had been stated and reiterated in Town and Country.

While, as I have said, Town and Country and Fibreboard dealt with the issue of subcontracting work, the Board majority has applied the same rule to other types of decisions by an employer in changing the structure of his business. For example, in the recent Star Baby[5] case, a majority of the Board found that an employer was required to bargain with the union regarding its basic decision to go out of business altogether on economic grounds. I concurred, but for the same reasons as in Town and Country. I would have found that as the employer had closed its business for discriminatory reasons, in violation of section 8(a)(3), it had an obligation to discuss the status of employees with their representatives. Member Rodgers took the position that an employer may go out of business entirely, when he wishes, for whatever reason he wishes, even if it is for discriminatory reasons.

To recapitulate, there are three views on the Board as to whether an employer must bargain with the union regarding his decision to make changes in the structure of his business.

The majority position is this: An employer must bargain with the union regarding such decision, even if it is for economic reasons.

Member Rodgers' position: The employer need not bargain with the union at all.

My position: If the decision is based on economic grounds, the employer must bargain only as to its effect on employees; if the decision is on discriminatory grounds, the employer must bargain as to the decision itself.

Let me explain the basis for my disagreement with the majority, on the one hand, and with Member Rodgers, on the other, in cases of shutdown and of contracting work out for economic reasons.

First, the majority position: It requires an employer to bargain with the union as to whether he will close out a segment of his business even though the sole reason is that he cannot afford to operate it. This decision, to close out part of his business, clearly is not one "with respect to wages, hours, and other terms and conditions of employment"—the statutory words. But it does affect "conditions of employment." This "effect" of the shutdown is the nub, it seems to me, of the majority position. The fallacy in this position, as I see it, is that it requires bargaining as to a matter not directly respecting the statutory subjects of bargaining, a matter outside the employer-employee relationship; namely, the nature of the business enterprise in which the employer shall engage. The legal error in the majority rule, is that it goes beyond the statutory requirements, literally. The serious consequence, as a practical matter, is that the rule impedes the employer's decision to operate the kind of business he chooses, by imposing on such decision the consequences that flow from the slow and sometimes tortuous bargaining process when an immediate partial shutdown or other change in the nature of the business might mean survival.

Next, Member Rodgers' position: It has the virtue of permitting management to decide for itself the nature of the business it shall operate. Granting the employer has the unilateral right to close his machine shop, for instance, and contract out the work previously done there, the Rodgers' position seems to me to overlook the fact that significant events "with respect to * * * conditions of employment" are involved in the shutdown, in which the employees as well as the employer have a stake. The shutdown may have eliminated some of the work being performed, but it cannot summarily destroy the employer-employee relationship. This relationship rests on a continuing obligation to bargain about the "terms and conditions of employment" that are directly involved, that is to say, the question of what disposition is to be made of the employees' stake in that relationship. Thus, there are involved such items as existence of other jobs for them, whether the jobs in other departments should go to the affected employees in preference to others, whether there should be severance pay, possible recall rights; and other kindred items separate and distinct from the decision to close the department. It cannot be denied that these are vital areas of bargaining and that the bargaining representative still has an important function to perform in behalf of these employees.

Finally, my position: It seeks to draw a line between the management prerogative of deciding the nature of the enterprise, and the separate, but inevitable questions flowing therefrom respecting the consequences, employment-wise, to the employees, consequences quite clearly, it seems to me, covered by the statutory umbrella of "conditions of employment." This position, as I see it, has the advantage of permitting freedom of action to an employer in an area basically and essentially managerial, and of providing, at the same time, full bargaining protection of employees' rights as they are affected by the employer's exercise of his managerial prerogatives. Thus, he can change the nature of his business as and when he pleases, and take his chances on the consequences, with respect to his employees, in the bargaining process.

So far, I have discussed those matters regarding which the parties must bargain. I want to give only cursory attention to another controversial area of collective bargaining—that is, the types of proposals which employers and unions are prohibited from insisting upon in bargaining negotiations.

This area is governed basically by the Borg-Warner rule, which takes its name from the Supreme Court decision of 1958. The Court, by a divided vote, upheld the Board and ruled that it is a violation of section 8(a)(5) for an employer (or a union) to refuse to sign an agreement unless the agreement contains a proposal which is not a mandatory subject of bargaining—that is, a subject which is not a "term or condition of employment" within the meaning of section 8(d).

The Supreme Court agreed that any lawful proposal, mandatory or nonmandatory, could, if the parties agreed, be included in a collective bargaining agreement. Justice Burton, however, for the majority, reasoned that a party's insistence to impasse on a nonmandatory proposal was in substance a refusal to bargain about other subjects that are within the scope of mandatory bargaining, and such refusal is a violation of section 8(a)(5). The Court made it clear that such insistence was unlawful, even if the parties otherwise bargained in good faith.

---

[4] *Fibreboard Paper Products Corporation*, 130 NLRB 1558; 138 NLRB No. 67; *Town & Country Manufacturing Company, Inc.*, 136 NLRB 1022.

[5] *Star Baby Co.*, 140 NLRB No. 67.

It is important to emphasize the far-reaching impact of the Borg-Warner[6] decision. The Board, as you know, has broadened the meaning of "terms and conditions of employment" to require bargaining on such matters as pensions and insurance. But, under Borg-Warner, certain lawful subjects may not be discussed to the point of impasse. Realistically, this means that it may be futile to propose a nonmandatory subject of bargaining. If the other party objects to the proposal, it cannot be insisted upon and must be dropped.

There has been considerable criticism of the Borg-Warner rule. In the original Board decision in Borg-Warner, Chairman Farmer and I disagreed with the majority, and said, in effect, that it is futile to regard a proposal as bargainable if the other party, by opposing, can sweep it off the table. In the Supreme Court, Justices Harlan, Clark and Whitaker dissented. Justice Harlan, for the dissenters, asserted that the Board has intruded into the bargaining process, since "the right to bargain becomes illusory, if one is not free to press a proposal made in good faith to the point of insistence." Solicitor General (then Professor) Archibald Cox[7] said that the Borg-Warner rule was "unsound and inconsistent with the basic philosophy of collective bargaining." In a very real sense the Board may be making a part of the contract for the parties by holding any given subject not one for mandatory bargaining. The Supreme Court, however, has spoken and the Borg-Warner rule is the law of the land, making it necessary for parties at the bargaining table to consider, and for the Board to decide, which are mandatory subjects of bargaining.[8]

It may be arguable that Borg-Warner has made possible a new approach to the old question of whether furnishing a bond for performance of a collective bargaining contract is a mandatory subject of bargaining. Before and since Taft-Hartley, and also since the Borg-Warner decision was handed down by the Supreme Court, the Board has held, with somewhat varying rationale, that neither an employer nor a union could insist on a bond as a condition of signing the contract. The Circuit Court of Appeals for the District of Columbia has recently affirmed the Board's holding to this effect in the A. D. Cheatham case.[9] But such view is not unanimous. Judge Edgerton vigorously dissented in Cheatham, arguing that performance bonds are a "means of enforcing the agreement" and therefore necessarily a condition of employment. Member Brown in a recent speech,[10] expressed some doubt as to the Board's rule. And now a trial examiner has held there was no refusal to bargain when a union insisted, to an impasse, on a bond to guarantee wages and payments to the employees' insurance fund—where the employer had defaulted on such obligations in the past.[11]

So far, I have discussed collective bargaining when it is functioning well enough for the Board to settle any problems that arise, through unfair labor practice proceedings. But a critical question confronting the public today is, what should be done when employers and unions bargain in good faith and no agreement is reached? We all know the immediate result: we have strikes; strikes which are often lengthy; strikes that are costly; strikes that affect not only the parties to the dispute but the general public as well. Recent examples of such strikes are the New York City and the Cleveland newspaper strikes; the east coast dock strike; and strikes at missile bases. What, if anything, should be done to avert such strikes? Secretary of Labor Wirtz felt the need to observe, in a recent address, that "public tolerance for strikes is diminishing rapidly."[12]

The means presently available for dealing with work stoppages that affect the national welfare, such as the national emergency provisions of the Taft-Hartley Act are not adequate to end the strikes. Thus, in the case of the recent dock strike, after the 80-day cooling-off period ended, the strikers rejected the employer's final offer; the strike resumed and the public continued to suffer. And, of course, Taft-Hartley was not involved in the newspaper strikes, as they were not deemed to create national emergencies. And I do not believe that the efforts of the Federal and State mediation services, or the various improvised solutions, such as the Morse Committee which settled the dock strike, are an adequate answer.

I would say that there have been four basic types of proposals advanced to deal with the problem of strikes: (1) Stronger Government intervention as through "an arsenal of weapons" vested in the executive branch; (2) compulsory arbitration; (3) do nothing; and (4) provide more effective collective bargaining.

Compulsory arbitration and the other forms of Government intervention seem to be undesirable to unions and management alike. While such procedures would have the superficial advantage of eliminating most strikes, I believe that the disadvantages would far outweigh the advantages. Further governmental interference in private economic affairs, and especially compulsory arbitration, might well put an end to collective bargaining as we know it.

Nor do I agree with the do-nothing approach, though some knowledgeable people in industrial relations advocate it. One justification they make is that with unemployment running as high as 5 to 6 percent of the work force, we can bear up under the comparatively small additional manpower loss resulting from strikes. This justification serves to remind me forcibly that two wrongs do not make a right. The do-nothing approach seems hazardous in that it may produce a tremendous ground swell of public resentment that could easily result in excessive, unwise, new regulation.

Because it seems to be open season for pointing out weaknesses in the bargaining process, I join with what I think a constructive suggestion. I would go along with those who seek to create improvements in the process and leave the bargaining up to those who must live with the bargain; that is, management and the unions. If collective bargaining as we know it, and I think it is uniquely American, is to be saved, unions and employers must, simply must, improve the system. Ideas are being expressed toward this end, by union, management, and government people. Among the ideas are prebargaining sessions to create better understanding of the problems that are likely to go on the bargaining table. Another is for intermittent joint conferences between management and employee representatives, the year around, to establish a relationship not built entirely on the antagonisms that arise at contract termination time. And there are others that seem to have merit.

I think it would be a forward step if representatives from the very highest echelons of labor and management—perhaps three men from each side—were chosen to constitute a permanent national body to foster and implement all meritorious ideas for improving the bargaining processes. They could also deal directly with disastrous work stoppages, either through direct intervention themselves, or through capable local men selected by them from the working ranks of management and union officials or, possibly, other sources. They should also provide for studies, and direct the resolution of problems related to automation and other causes of unemployment. Their wisdom, stature, and influence would be their only authority. Functioning properly such a group might well break up a stubborn impasse with dispatch.

Following a New Frontier pattern, such a group might be called the labor peace corps. The men in it should be the real statesmen in their fields—not the zealous crusaders for unions nor the union haters from management. Men of stature and good will, they would be big enough to serve not only the rights of the employees and the management they represent, but the interests of the beleaguered public as well. There are such men, of course, on both sides of our barbed wire entanglement—men such as, in an earlier era, were sought by Moses when another system of settling disputes was breaking down, "able men, such as fear God, men of truth, hating covetousness,"[13] a search that resulted in the judicial system we enjoy today.

A sad commentary on the real prospects of industrial peace, however, is that in all probability neither organized labor, on the one hand, nor the business community on the other, could ever agree on the men who should constitute such a group.

Perhaps most everyone directly involved in industrial relations, often a dog-eat-dog business, would relegate the suggestion for a labor peace corps quite quickly to the status of "Alice in Wonderland." Perhaps it would be more realistic for me to suggest that if effective men, not greatly different from the kind I have described, coming directly from the ranks of management and labor, do not move in soon themselves to solve their own problems, then very likely collective bargaining as we know it will pass into limbo. And the rest of my realism would be this: when free collective bargaining passes from the scene, other cherished aspects of our way of life will be on their way out also.

A short, enigmatic sentence came to mind as I thought of an appropriate end to a speech such as this on industrial relations. I pondered the exact language and the source of the phrase. Then in a state of confusion as to whether it came from the words of some famous Sioux chieftain or from a great prophet, or possibly from Dave Garroway, I decided to use the sentence from my memory, for fear it had no other source at all:

Peace! Peace! But there is no peace.

IDEA FOR DEADLOCKS: LABOR PEACE CORPS

(By Victor Wilson)

WASHINGTON.—When employers and unions bargain in good faith, but no agreement is reached, what can be done to avoid a strike?

A Government official came up yesterday with a possible answer to this question which thus far has baffled the experts.

Forming a prestigious national labor peace corps is the solution offered by Boyd Steward Leedom, a member of the National Labor Relations Board, and Chairman of that body under former President Eisenhower from 1955 to 1961.

Corps members, by Mr. Leedom's definition, "should be real statesmen in their fields, not 'zealous crusaders' for unions, nor 'union haters' from management."

They should be "men of stature and good will; they should be big enough to serve not only the rights of employees and management they represent, but the interest of the beleaguered public as well."

"There are such men, of course, on both sides of our barbed-wire entanglement," Mr. Leedom asserted, "men such as, in an earlier era, were sought by Moses when another system of settling disputes was breaking down—'able men, such as fear God, men of truth, hating covetousness * * *' a search that resulted in the judicial system that we enjoy today."

Mr. Leedom, a Republican, made this series of suggestions about their selection and duties:

"It would be a forward step if representatives from the very highest echelons of labor and management—perhaps three men from each side—were chosen to constitute a permanent national body to foster and implement all meritorious ideas for improving the bargaining process. They could also deal directly with disastrous work stoppages, either through direct intervention themselves, or through capable local men, selected by them from the working ranks of management and union officials, or, possibly, other sources.

"They should also provide for studies, and the direct resolution, of problems related to automation, and other causes of unemployment. Their wisdom, stature and influence would be their only authority. Functioning properly, such a group might well break up a stubborn impasse with dispatch."

Mr. Leedom made his suggestion in an address to a University of Chicago seminar on collective bargaining in that city. Copies of his speech were distributed here.

He told his audience that in the "dog-eat-dog" atmosphere of industrial relations, his proposal would probably be relegated to an "Alice in Wonderland status."

If so, he predicted, and management and labor "do not move in soon themselves to solve their own problem, then, very likely, collective bargaining passes from the scene, other cherished aspects of our way of life will be on their way out, also."

EXECUTIVE ORDER NEEDED TO END FEDERAL SUPPORT OF SEGREGATION

Mr. KEATING. Mr. President, one of the most indefensible practices of the Federal Government in the area of civil rights is the continued contribution of Federal tax funds to State programs and projects carried out on a discriminatory or segregated basis.

The Commission on Civil Rights called attention yesterday, for example, to a grant by the Federal Aviation Agency of over $2 million for the construction of an airport in Mississippi "without questioning the airport's plan to build separate eating and restroom facilities." This is only one of many illustrations of direct Federal financial support for segregation, amounting to hundreds of millions of dollars each year.

The irony in this situation is that the Department of Justice has initiated several lawsuits to prohibit just such practices. Despite these suits, however, the Department of Health, Education, and Welfare and many other Federal agencies continue to ignore the requirements of the Constitution and insist that they have no administrative authority to condition Federal grants on a policy of nondiscrimination.

What these Federal officials overlook is the fact that the Constitution is part of every one of our enactments. No official sworn to uphold the law can ignore the Constitution in carrying out his authority. It is no more legal or moral for Federal agencies to spend Federal funds on unconstitutional projects than it is for State officials to subsidize white-only schools, parks, transportation or other public facilities.

In his special message on civil rights, the President indicated that "legalistic evasions" designed to thwart civil rights would not be tolerated. The Commission's special report, however, makes it evident that "legalistic evasions" continue to frustrate efforts to curb segregationist practices. I applauded the President's statement at the time when it was made, and hope it means that the Commission's recommendations will be heeded. A uniform policy on this subject is very much needed; and I would strongly urge the President to issue an Executive order requiring all Federal agencies to insist upon a nondiscrimination requirement under Federal grant-in-aid programs.

Mr. KUCHEL. Mr. President, will the Senator from New York yield?

Mr. KEATING. I yield.

Mr. KUCHEL. I wish to associate myself with the recommendations which the distinguished junior Senator from New York has just now made.

The Constitution is the law of this land. It is incumbent upon all American citizens and all U.S. agencies to follow the law of the land. The Civil Rights Commission came into existence under Dwight Eisenhower. When it made recommendations, General Eisenhower sent them to the Congress, for action; and where possible, he instituted on his own ipse dixit, that which was necessary in order to carry them into effect.

The Civil Rights Commission has now made recommendations to President Kennedy; and I join the Senator from New York in urging the President to accept those Civil Rights Commission recommendations and to carry them out, so that the law of the land will apply equally to all Americans.

I congratulate the Senator from New York.

Mr. KEATING. I thank the Senator from California, Mr. President.

THE LOS ANGELES BOMBING

Mr. ENGLE. Mr. President, police are investigating the explosion of a homemade bomb in the San Fernando Valley offices of the American Association for the United Nations at 17214 Ventura Boulevard, Encino, Calif., March 31.

The bomb, placed on an outside window ledge, exploded at 10:30 p.m., blowing out the window, spraying glass throughout the office, and igniting a fire which destroyed many of the association's records.

No one was in the office at the time of the explosion and, fortunately, no one was injured.

The bombing occurred on the same night that the Reverend Dr. Brooks Walker, minister of the Emerson Unitarian Church, Canoga Park, was sworn in as president of the San Fernando American Association for the United Nations.

The AAUN in the Los Angeles area is not a newcomer to the threat of the homemade bomb.

On December 8, 1961, a homemade bomb was discovered in front of the downtown Los Angeles offices of the AAUN at 5110 Wilshire Boulevard. The bomb did not explode and the risk of human injury and physical damage was avoided.

Then, on February 1, 1962, homemade bombs went off in two sections of the Los Angeles area. The first exploded at about 8:55 p.m., in the garage of the Reverend Dr. Walker located at 8100 Sale Avenue, Canoga Park. The second exploded at about 9:25 p.m., outside the living room window of the home of the Reverend Dr. John Simmons at 4351 Beck Avenue, North Hollywood. The Reverend Dr. Simmons, a Lutheran minister, is administrator of the Memorial Lutheran Hospital in Pacoima, Calif.

The Reverend Dr. Simmons, like the Reverend Dr. Walker, is active in AAUN functions, and is, in fact, a past president of the San Fernando chapter.

The explosion in the Reverend Dr. Walker's garage shook the home considerably, sending plaster crashing against the crib where the Walkers' 6-month-old son usually slept. Mrs. Walker had moved him into another room on this night and no one was injured.

Similarly, the explosion outside the home of the Reverend Dr. Simmons blasted glass and shrapnel into the living room where Mrs. Simmons had been sitting seconds before the bomb—believed to have been thrown from a passing car—went off.

On the night of these two explosions the Reverend Dr. Walker and the Reverend Dr. Simmons were participating in a panel discussion at the Temple Sinai, a synagogue in Beverly Hills. Their topic was: "The Extreme Right—A Threat to Democracy?"

Then there was a lull in the anti-AAUN activity—except the hanging in effigy of Ambassador Adlai Stevenson on the roof of the organization's Los Angeles offices—until the most recent bombing of the San Fernando chapter headquarters a week ago Sunday.

In all of the bombing incidents, the bombs were homemade, consisting of a pipe capped at both ends and filled with an explosive. The bombings were directed at either the AAUN or at its members.

We can only conclude the obvious. The bombings are the work—or the result of the work—of individuals who make a full-time job of hating, or inflaming old hatreds and nursing new ones, or aiding, abetting and baiting the deep-seated prejudices which have long burdened our society.

I am talking about professional hatemongers. Return to the night of February 1. Before the panel discussion, leaflets were scattered on the ground outside the Temple Sinai. The leaflets contained pictures of the star of David, a hammer and sickle, the initials "U.N." and the words: "Know Your Enemy."

That is how the professional hatemonger works. He drops his refuse and runs. He never concerns himself with facts—only foregone conclusions, prejudices.

It makes no difference to these people that included on the AAUN's national board of directors are the distinguished junior Senator from Oregon, Senator Neuberger, and Walter Reuther, Frank P. Graham, Ralph Bunche, and that among its membership are the names of the distinguished senior Senator from Wyoming, Senator McGee, Bishop James A. Pike, Gen. Matthew B. Ridgway, and John Cowles. It matters little that the President of the United States has said:

> The American Association for the U.N. has a vital task in helping to project the urgent need for strong and vigorous public understanding and support of our participation in the United Nations. In this effort, you have my full encouragement.

These bombings undermine our most basic principles of freedom. They undermine our society itself. If threats, intimidation and, finally, outright violence and terrorism are used to win argument, how many arguments will be carried on?

Terrorism is an alien word to most Americans. But it does happen here. How else can the bombings directed against the AAUN be described?

I condemn these bombings and the professional hatemongers who inspired them. They are a blot on America. They are a blot on freedom.

WARSAW GHETTO DAY

Mr. KEATING. Mr. President, in April 1943 the Jewish inhabitants of the Warsaw ghetto rose in rebellion against the tyranny of Nazi rule. In an epic struggle of incredible valor, the people of the Warsaw ghetto defied the armed might of Nazi military power, and gave to the entire world an example of courage and self-sacrifice that has never been equaled.

Although the valiant freedom fighters of the ghetto well knew that they were hopelessly outnumbered and that they alone could never succeed in bringing down Hitler's military power, their rebellion was a triumphant reaffirmation of the eternal striving of all mankind for freedom, dignity, and spiritual independence. Faith and religious dedication filled them; and with the bravery of desperation they were able to inflict substantial setbacks on the Nazi army.

Mr. President, I am proud to have been the author of Senate Joint Resolution 179, which was passed by the Congress of the United States in August 1962, and was signed by the President on August 28, 1962. This resolution rightly called the attention of the country to the 20th anniversary of this tragic uprising, and specifically called upon the President to issue a proclamation for the observation of April 21 as Warsaw Ghetto Day with appropriate ceremonies and activities.

Mr. President, I was very much pleased, indeed, to observe that on March 5 of this year, in consonance with the joint resolution of Congress, the President invited the people of the United States to observe this historic occasion. I ask unanimous consent to have printed in the RECORD, following my remarks, the text of the joint resolution which I introduced in the Senate last April and the proclamation recently issued by the President, under the terms of that joint resolution.

There being no objection, the resolution and the proclamation were ordered to be printed in the RECORD, as follows:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the twenty-first day of April 1963 is hereby marked in recognition of the astounding courage displayed by the uprising in the Warsaw ghetto against the Nazis. Through such uprising, the men, women, and children who met death on that tragic day and those who perished in concentration camps and in the gas chambers, symbolize the indestructible spirit of liberty which throughout history has ultimately triumphed against the forces of tyranny.

The President is authorized and requested to issue a proclamation inviting people of the United States to observe such day with appropriate ceremonies and activities.

THE WARSAW GHETTO UPRISING—A PROCLAMATION BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

THE WHITE HOUSE, *March 5, 1963.*

Of the more than 400,000 Jews whom the Nazis had previously walled into the Warsaw ghetto, only about 70,000 remained in April of 1943. With deadly efficiency, most of the other inhabitants had been transported by the Nazis to concentration camps and had there been exterminated. The surviving Jews, suffering from malnutrition and disease, with pitifully few weapons and virtually no hope of assistance from any source, determined to sell their lives as dearly as possible. They engaged the Nazis in battle.

The result was known by the Jews to be foredoomed. Yet, though they lacked both military resources and a military tradition, they were able to conduct their struggle against the overwhelming forces of the Nazi occupiers for more than 3 weeks, thereby providing a chapter in the annals of human heroism, an inspiration to the peace-loving people of the world, and a warning to would-be oppressors which will long be remembered.

Now, therefore, I, John F. Kennedy, President of the United States of America, in consonance with the joint resolution of Congress approved August 28, 1962 (76 Stat. 407), do hereby invite the people of the United States to observe the 20th anniversary of the Warsaw ghetto uprising, April 21, 1963, with appropriate ceremonies and activities.

In witness whereof, I have hereunto set my hand and caused the seal of the United States of America to be affixed.

Done at the city of Washington this 4th day of March in the year of our Lord 1963, and the independence of the United States of America the 187th.

[SEAL] JOHN F. KENNEDY.

By the President:

DEAN RUSK,
Secretary of State.

PRESENTATION TO CHARLES B. BOLTON OF THE ALBERT H. KETCHAM AWARD

Mrs. SMITH. Mr. President, last year the Albert H. Ketcham Memorial Award was made to Charles Bingham Bolton for the contribution he had made for the continuation of research in dentofacial growth and development which is today the basis of orthodontic practice.

This is one of the many accomplishments and contributions this young man has made to the welfare and improvement of his fellow men. In his acceptance of the award, Mr. Bolton disclosed his admirable and worthy motivation with the Williams James statement of "the great use of a life is to spend it for something that outlasts it."

I ask unanimous consent to have printed in the body of the RECORD at this point the presentation statement of Mr. J. A. Salzmann, president of the American Board of Orthodontics, and the acceptance statement of Mr. Bolton.

There being no objection, the statements were ordered to be printed in the RECORD, as follows:

PRESENTATION OF THE ALBERT H. KETCHAM MEMORIAL AWARD FOR 1962 TO MR. CHARLES BINGHAM BOLTON BY J. A. SALZMANN, PRESIDENT OF THE AMERICAN BOARD OF ORTHODONTICS

The name Bolton is well and honorably known not only to orthodontists but in the annals of our country as a whole. Orthodontics is indebted to the Bolton family for its generous support of health, education, and welfare programs and especially for establishing the Bolton fund at Western Reserve University. To you, Charles Bingham Bolton, our debt goes beyond financial support, important as this has been in making possible continuing research in dentofacial growth and development which is today the basis of orthodontic practice.

The American Association of Orthodontists, of which you are an honorary member, is fully aware of your own labors in behalf of orthodontics and of dentistry in general. This award is given in recognition of your own services and contributions.

The following are only a few of your activities and the awards which have been bestowed on you: Fellow, American College of Dentists; honorary member, Angle Society of Orthodontia; citation of merit, Angle Society of Orthodontia; honorary member, Alumni Association, Dental School, Western Reserve University; citation of Western Reserve University Dental Alumni Association; citation from Oxford University; honorary member, Cleveland Dental Society; honorary member, Great Lakes Society of Orthodontists; member, National Advisory Dental Research Council, National Institutes of Health, Department of Health, Education, and Welfare, Washington, D.C.; trustee, Western Reserve University; trustee, Wooster College; vice president, Greater Cleveland Council, Boy Scouts of America; trustee, Cleveland Museum of Art; member, executive committee, Bolton fund, Western Reserve University. The foregoing are only a few of the many educational, philanthropic, and civic agencies which have benefited and are continuing to benefit from your dedicated efforts. We are truly indebted to you for your devoted personal interest and attention over the years, which have helped greatly in achieving orthodontic advancement.

It is my honor and privilege, as president of the American Board of Orthodontics, to present this award to you, Charles Bingham Bolton, in behalf of the American Association of Orthodontists and the American Board of Orthodontics.

Response by Charles Bingham Bolton to the Presentation of the Albert H. Ketcham Memorial Award

In May of last year, I received the greatest surprise of my life when the chairman of the Albert H. Ketcham Award Committee of the American Board of Orthodontics, Dr. Salzmann, informed me that I had been selected as one of the recipients of the 1962 Ketcham Award.

In accepting this distinguished honor, I do so with a feeling of deep gratitude and a humble realization that you are recognizing not so much my minute contributions to the fields of orthodontics and oral health but, rather, the efforts and visions of those I have been privileged to be associated with during the past 33 years. The clearer understanding of the process of developmental growth, especially of dentofacial morphology from conception to adult life, that is comprehended today has not been the result of any one individual's efforts. Rather, it is a composite of all the knowledge of men, both great and small, over the many years of scientific endeavor.

I have been more than fortunate to have had a part in the great good work of Holly Broadbent and my distinguished mother, both of whom had unbounded faith and clear vision beyond that of ordinary man. Neither could foresee the total concept, developmental problems, and ultimate use of the roentgenographic cephalometer, as well as the development and use of standards of normal growth. Rather, each had, and still has, the faith that skillfully conceived basic research, provided with sufficient funds, will ultimately benefit mankind by revealing patterns of growth previously unknown. Actually, we are, in my humble opinion, only beginning to comprehend the basic processes involved in dentofacial morpholo and will probably not in our short span of years reach a pinnacle from whence there is no further upward path. This is inherent in basic research, as you know. Once its never-ending challenge has been accepted by a true scientist or those helping him achieve, nothing is a greater stimulus to continued efforts on all fronts—scientific, financial, and coordination between each. In such an atmosphere of expanding horizons have I spent these last years. It has been a most exciting experience.

Accomplishments and rewarding honors such as you have given me today carry a real burden of expectation. Dr. Bronk, President of the National Academy of Sciences, said recently: "A laurel wreath has in it the prickly reminder that more is expected of the wearer." This, in truth, expresses in part the philosophy of the Bolton fund of Western Reserve University. As a group, we look forward to many years of expanding endeavor in the field of growth and development, and we expect to share our experiences with others as we go forward. Thus, we hope to add small particles of luminosity to orthodontics and to oral health. We shall always be doggedly striving to discover and realize the order that exists in nature.

You will wonder why, as a layman, I have wanted to play a part in this quest for basic knowledge. It is simply because I have come to realize that there is a place on the team for a layman who has been exposed to the techniques of the clinician, the researcher, the teacher, the scholar, and the layman and has consequently developed sufficient understanding of these often conflicting points of view to be able to bring the varying methods of attack together to reach a common goal. I have had the good fortune to find the many varying interests of my life focused by countless friends in the field of coordination and cooperation between such disciplines of thought and training. I hope that I can in some small way be worthy of their faith and trust, as well as your expectations.

William James succinctly summed up my fervent hopes when he said: "The great use of a life is to spend it for something that outlasts it."

May I again express my layman's gratitude and humble thanks to you for this most cherished professional honor.

INTERIM REPORT OF COMMISSION ON CIVIL RIGHTS

Mr. HART. Mr. President, I send to the desk, and ask that it be printed in the Record at the end of my remarks, a copy of the interim report of the U.S. Commission on Civil Rights, filed last Tuesday with the President of the United States.

I wish every American would read this report on Mississippi by the Commission on Civil Rights. It seeks to end an intolerable irony.

Currently, the Federal Government with one hand employs its troops, attorneys, and courts to fight discrimination, while with the other hand it continues to supply the funds that sustain racial bias. Clearly, this is indefensible.

On the Senate floor last week, I urged every Federal agency to examine its statutes for authority to cut off funds that support discrimination and segregation in any State or community. I also urged stronger action by Congress.

So I commend the Commission for serving as the conscience of the Nation, and I wholeheartedly support its report, which will supply fresh encouragement for the vigorous civil rights program which the administration already has under way.

There is, I believe, need for very careful and intensive review by every agency of the Government, to make sure that its programs which provide financial support in no way underwrite or sustain the continuance of facilities or programs which segregate in any manner because of race.

Within the next few days, I intend to request each of the agencies to respond to letters I will send asking specific questions as to practices under existing federally assisted programs.

However, I wish to direct an inquiry as to whether the agency feels they have sufficient authority now to hold up funds for programs underwritten by Federal moneys which are operated on a segregated basis or whether additional legislation is required. Frankly, I have an open mind on the subject, although some deep and strong suspicion. I will certainly look with interest upon replies that we receive.

I am also intensely interested in learning whether or not the agencies feel there is sufficient authority available to them to hold up funds where the programs underwritten by these Federal moneys are operated on a racially segregated basis or discriminate in a manner that places members of one race at a disadvantage in benefiting from this Federal assistance.

For a number of years, Mr. President, we have debated whether or not additional Executive action, such as that taken by the President when he issued his housing order, can be more fully utilized, or whether the responsibility lies basically with the Congress to enact additional legislation and place conditions on expenditure of operating funds. I will look with interest to the replies I receive from the agencies.

It is certainly my view that the time to act, both here in Congress and at the executive agency level, is now at hand.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. HART. I yield.

Mr. JAVITS. Parallel with what the Senator from Michigan has said, I, too, am addressing the various Government departments upon this subject in order to ascertain why they are administering the law and making grants through their departments in Mississippi and elsewhere, notwithstanding violations of the Constitution, as has just been so eloquently discussed.

For years I have attempted to amend appropriation bills on the floor of the Senate to deny the use of Federal funds for discriminatory use, on the same theory adverted to by the Commission report: funds contributed by citizens of all States, and I would add, of all shades of color, should not under the Constitution be restricted to citizens of only one color. As far back as its 1959 report the Commission found that nondiscrimination could validly be required as a condition of the receipt of Federal aid, and in connection with the field of housing, it found that this could be done either by Congress or by the President by Executive order. Again in its comprehensive 1961 reports the Commission repeated this principle, stating that "Federal financial support should be withheld from programs which are so administered as to discriminate on racial grounds."

The legal authority for this principle is clear beyond reasonable doubt. I ask unanimous consent that at this point in my remarks there be printed in the Record a fine analysis of the legal basis for the Executive order on housing which is relevant here, prepared by the New York County Lawyers Association's Committee on Civil Rights. The committee recommends, it should also be noted, that the order be amended to cover all public housing, urban renewal projects, and other housing programs to which Federal grants are made, irrespective of when the commitments for their construction were made; subsequent sale or lease of property covered by FHA or VA insurance; and mortgage loans by federally supervised mortgage lending institutions.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

REPORT ON THE PRESIDENT'S EXECUTIVE ORDER ON EQUAL OPPORTUNITY IN HOUSING

This report discusses the legal basis of Executive Order No. 11063, issued by President Kennedy on November 20, 1962, which directs various Federal executive agencies to take certain action with respect to discriminatory practices in housing and related areas; the further responsibilities of government with respect to equal opportunity in housing; and the extent to which further action may be required.

BACKGROUND

There has long been strong agitation among persons and groups concerned with the assurance to all Americans of equal opportunity regardless of race, creed, color, or national origin, for action by the Federal Government to assure that housing programs which receive Federal assistance, either directly or indirectly, are operated without discrimination. The increasing importance of Federal assistance in meeting the housing needs of American families, particularly those of lower and middle income in which minority groups are most heavily represented, has resulted in an anomalous situation in which housing constructed with the assistance of tax funds secured from all citizens is not freely available to all citizens on an equal basis.

Despite the basic policy statement in the Housing Act of 1949 (sec. 2, 63 Stat. 413, 42 U.S.C.A. sec. 1441), in which Congress set a national goal of "decent home and a suitable living environment for every American family," and the even earlier provision of the Civil Rights Act of 1866, in which Congress proclaimed that "all citizens of the United States shall have the same right in every State and territory, as is enjoyed by white citizens thereof, to * * * purchase * * * real and personal property," the U.S. Commission on Civil Rights was still to find, in 1959, that "* * * housing * * * seems to be the one commodity in the American market that is not freely available on equal terms to everyone who can afford to pay." (Report of the U.S. Commission on Civil Rights, 1959, p. 534.)

In 1961, the Commission on Civil Rights devoted an entire volume of its report to the question of housing, making unanimous findings regarding the seriousness of this problem. The Commission found (report of the U.S. Commission on Civil Rights, 1961, vol. 4, pp. 144–145), in part, as follows:

"First, a considerable number of Americans, by reason of their color or race, are being denied equal opportunity in housing. * * *

"Of the many Federal agencies concerned with housing and home-mortgage credit, none has attempted to exert more than a semblance of its authority to secure equal access to the housing benefits it administers, or to insure equal treatment from the mortgage lenders it supports and supervises."

The Commission made detailed factual findings, based on hearings in many parts of the country, on the degree of discrimination which exists, not only in the Southern States, but in most northern communities also. Subsequently, in a report on housing in the Nation's Capital (report of the U.S. Commission on Civil Rights, Civil Rights U.S.A.—Housing in Washington, D.C., 1962), the Commission made further unanimous findings regarding the continued existence of housing discrimination in the Nation's Capital.

The increasing impact of such discrimination upon the public conscience was illustrated in 1960 by the fact both major political parties in their platform statements pledged action to prohibit discrimination in housing built with Federal subsidies, and the candidate who became President pledged himself specifically to the issuance of an Executive order to eliminate discrimination in connection with federally assisted housing programs.

In addition, the Commission on Civil Rights, in 1959, had recommended the issuance of an Executive order, and in its fuller 1961 report on housing reiterated this recommendation in a unanimous statement:

"Recommendation 1: That the President issue an Executive order, stating the national objective of equal opportunity in housing and specifically directing all Federal agencies concerned with housing and with home mortgage credit to shape their policies and practices to make the maximum contribution to the achievement of this goal; and that the President use his good offices to stimulate the participation of all elements of the housing and home finance industries in the achievement of the national objective of equal housing opportunity."

The Commission also made further recommendations as to specific housing programs.

On November 20, 1962, the President of the United States signed Executive Order No. 11063, entitled "Equal Opportunity in Housing."

FEDERAL HOUSING PROGRAMS

A full understanding of the coverage of the Executive order requires a brief review of the various programs in the housing area in which the Federal Government is presently engaged. Most Federal housing programs operate under the Housing and Home Finance Agency (HHFA), which in turn is made up of a number of constituent agencies that actually operate the programs authorized by Congress:

1. The Federal Housing Administration (FHA) insures private lending institutions against losses on mortgage loans and loans for home repairs on single-family homes, multi-family homes, cooperatives, and rental projects. It also operates a new middle income program which, under certain circumstances, may receive Federal loan funds. Since its creation, FHA has insured mortgages on nearly 6 million homes, and projects with almost 900,000 units, as well as home improvement loans for more than 24 million homes.

2. The Public Housing Administration (PHA) makes loans and annual subsidy payments permitting local governmental housing authorities to construct and operate low-rent public housing projects. This has resulted in 3,217 projects with 585,000 dwelling units.

3. The Urban Renewal Administration (URA) makes grants and loans for slum clearance and redevelopment, sharing the net cost of such projects with local communities. Four billion dollars has been authorized for such grants, for areas in which many hundreds of thousands of persons reside.

4. The Community Facilities Administration (CFA) operates a number of special programs including loans to higher educational institutions and hospitals for student and faculty housing, loans to certain sponsors for housing for the elderly, and other nonhousing activities.

5. The Federal National Mortgage Association (FNMA) provides supplemental mortgage market assistance by maintaining a liquid market in home mortgages. It has spent over $10 billion to buy over 1 million mortgages.

In addition, there are a number of agencies outside HHFA which are or could be concerned with the housing market. These are:

1. The Veterans' Administration (VA), among other functions, operates a program of mortgage guarantees and direct home loans for veterans, which are generally comparable to those granted by the FHA. These represent $50 billion in mortgages on 5.5 million homes, and direct loans of $1.5 billion more on 177,000 homes.

2. The Federal Home Loan Bank Board (HLBB), formerly a constituent agency of HHFA but independent since 1955, which is a central reserve and coordinating agency for Federal savings and loan associations. Its constituent agency, the Federal Savings and Loan Insurance Corporation (FSLIC) insures the safety of savings in savings and loan associations up to $10,000, in a manner comparable to the functions of the Federal Deposit Insurance Corporation (see below). Its insured institutions hold in excess of $65 billion in mortgages.

3. The Federal Deposit Insurance Corporation (FDIC) insures deposits in most U.S. banks up to $10,000. The bulk of such deposits are used to make loans, a substantial portion of which cover housing mortgages, which are in excess of $40 billion.

4. The Board of Commissioners of the District of Columbia, the Capital's governing body, whose responsibility includes housing in the District.

5. Other agencies which own or operate housing such as the Defense Department, the Bureau of Public Roads, etc.

COVERAGE OF THE EXECUTIVE ORDER

The President's Executive order covered only certain of the housing programs set out above. It was made directly applicable to four general classifications of property, as follows:

1. Property that is owned or operated by the Federal Government (principally housing repossessed by FHA or VA, and housing on Government installations);

2. Property which is constructed with loans or contributions from the Federal Government, such as low-rent public housing, housing for the elderly, and college, and hospital dormitories;

3. Property built with FHA or VA insurance or loans; and

4. Property developed through federally assisted slum clearance or urban renewal programs.

Except for housing owned or operated by the Federal Government, the Executive order applies only to housing contracted for subsequent to November 20, 1962, although Federal agencies are directed to use their good offices with respect to ending discriminatory practices affecting other housing.

The Executive order also governs the issuance of mortgage loans directly insured or guaranteed by the Federal Government.

The most obvious areas not covered by the Executive order are:

1. All housing constructed under contracts entered into prior to November 20, 1962, including public housing, FHA and VA insured housing, housing on urban renewal sites, and housing for the elderly and urban renewal projects whose preliminary contracts but not final loan and grant contracts were executed prior to November 20, 1962;

2. Mortgage loans not directly insured or guaranteed by the Federal Government, but made by institutions who operate under Federal supervision, such as those whose deposits are insured by FDIC or FSLIC (i.e., the conventional mortgage).

The approach of the Executive order is to direct each Federal agency (and these agencies have, for the most part, issued further orders implementing the Executive order with respect to their own operations) to "take all action necessary and appropriate to prevent discrimination because of race, color, creed, or national origin" in the designated programs. In addition, the order provides for implementation by departments and agencies, enforcement where appropriate, and for the establishment of a President's Committee on Equal Opportunity in Housing which is to recommend general policies report on the progress, and consider other matters relative to the Executive order.

LEGAL BASIS FOR THE ISSUANCE OF THE EXECUTIVE ORDER AND ITS IMPLEMENTATION

The Constitution of the United States prohibits racial and religious discrimination by both the Federal Government and the States and their subdivisions. The due process clause of the fifth amendment contains the clear implication that the Federal Government may not deny any person the equal protection of the laws (*Bolling* v. *Sharpe*, 347 U.S. 497 (1954), the District of Columbia school desegregation case; *Hurd* v. *Hodge*, 334 U.S. 24 (1948), the District of Columbia restrictive covenant case). Similarly, the 14th amendment bars any State or State agency from denying any person the equal protection of the laws (*Brown* v. *Topeka*, 347 U.S. 483 (1954), the school desegregation decision; *Shelley* v. *Kraemer*, 334 U.S. 1 (1948), the restrictive covenant case). Under these provisions, any Federal or State action which discriminates against any person because of race, color, or creed is violative of the Constitution, and it necessarily follows that this applies equally to Federal and State officials who carry out functions pursuant to Federal housing statutes.

The Constitution also imposes on the President the duty to "take care that the laws be faithfully executed" (Article II, Section 3), and the Supreme Court has held that this obligation includes the protection of rights, duties, and obligations growing out of the Constitution itself (*Cunningham* v. *Neagle*, 135 U.S. 55, 71 (1889)).

In addition, while the 14th amendment does not operate against purely private conduct (*The Civil Rights* cases, 109 U.S. 3 (1883)), the Supreme Court has held in many cases, that the purview of the 5th and 14th amendments extends to situations in which private individuals take on quasi-governmental responsibilities or accept public funds or other assistance in carrying on private functions. Thus, for example, *Shelley* v. *Kraemer, supra,* stood for the principle that governmental enforcement is not available for private discriminatory practices; *Kerr* v. *Enoch Pratt Free Library*, 149 F. 2d 212 (C.A. 4th, 1945) certiorari denied, 326 U.S. 721 (1945), for the principle that a privately administered library receiving public funds was subject to the 14th amendment; *Nixon* v. *Herndon*, 273 U.S. 536 (1927), and other cases, that privately run primary elections could not exclude Negro participation; and *Marsh* v. *Alabama*, 326 U.S. 501 (1946), that a company town was bound by the constitutional guarantees of the first amendment, just as a publicly run town would be.

Clearly, when the Government itself sells or rents housing, it cannot discriminate or segregate. When it makes housing available through others, the same principle necessarily operates, for if it did not, the spirit and words of the Constitution would be a nullity for all practical purposes.

It is not necessary that the statute under which the governmental assistance is granted contain such a prohibition, because the Constitution runs through the text of every statute which is enacted. Nevertheless, the constitutional requirements are reinforced, in the case of most housing programs, by the clear mandate of the National Housing Act, setting a national goal of "a decent home * * * for every American family." Irrespective of this, however, the Enoch Pratt Free Library case, supra, is typical of a number of cases which made it clear that, if a party chooses to seek the aid of Government, he is subject to the constitutional limitations imposed on governmental action.

On the basis of these and many other well established decisions, it appears clear that the executive branch of Government has not only the power to but also the duty to bar discrimination in Federal housing programs. Thus, in effect, the Executive order did not establish any new rights, but merely established long overdue means for implementing existing constitutional and statutory requirements.

The only significant court decision to the contrary is by New York Court of Appeals in *Dorsey* v. *Stuyvesant Town Corporation*, 299 N.Y. 512 (1949), cert. den. 339 U.S. 981. We have concluded after examination that that case cannot be strongly urged as binding constitutional precedent today. The Dorsey case, decided by a 4-to-3 vote (with the then minority now representing the majority of New York's highest court), involved discrimination by a corporation which had received assistance in assembling land and had a local tax exemption. The court of appeals found that this was private housing, subject only to certain limited supervision, despite the governmental assistance which it had received. In view of the fact that legislation was enacted by the State of New York to bar a repetition of such discrimination prior to the time the Supreme Court denied certiorari; the fact that such a case cannot again come before the New York courts in order to permit a reconsideration of this decision since these practices are now barred by statute; and the fact that many of the leading Federal cases in this area have been decided since 1949; it is our conclusion that the Dorsey case does not truly represent Federal constitutional law in this area.

There is also a second ground which was apparently relied on by the President in support of the Executive order. That is the Government's power to insert reasonable conditions for the public good in contracts entered into between the United States and other parties. This approach is basic to the Executive order, and the subsequent implementing orders of the constituent agencies of HHFA. Such a contractual clause would be in line with the public policy of the United States under the various cases previously mentioned. Similar Federal authority has for some time been exercised with respect to employment under other Government contracts in procurement for defense and other governmental purposes.

In the special case of the District of Columbia, there is an additional basis for governmental action, applying not only to programs receiving Federal assistance but to housing generally. The District of Columbia has a special status under the Constitution, and the Board of Commissioners of the District of Columbia act as the local executive for the District, under the Constitution and the District of Columbia Code enacted by Congress. Under their general powers, the Commissioners have power to implement the recommendations of the 1962 report of the Civil Rights Commission to issue appropriate regulations prohibiting discrimination on the basis of race, color, religion or national origin in the sale, rental or financing of housing accommodations within the District, and to take related necessary action, on the same basis as has successfully been done in a number of States, including New York. The Nation's Capitol is marred by large slum areas due in great part to discriminatory housing practices. This tarnishes the image of a free America in the eyes of resident and visiting diplomats from all nations of the world.

OMISSIONS FROM THE PRESIDENT'S ORDER

Two major housing areas not covered by the Executive order: (1) Housing constructed under contracts entered into prior to November 20, 1962; and (2) loans for the construction or purchase of housing made by federally supervised institutions.

It does not appear that there is any legal impediment to covering both these fields as well.

If the Executive order is based upon constitutional requirements that there be no discrimination in housing constructed with Federal assistance, then this prohibition necessarily extends to previously constructed housing as well as to housing constructed subsequent to the issuance of the Executive order. The order itself does not change the constitutional mandate, but only deals with agency implementation of the Constitution's requirements.

On the other hand, if the ban on discrimination were based only upon the power of the United States to insert reasonable contract provisions into Federal contracts, they would, presumably, be subject to the constitutional prohibition against impairment of contracts previously entered into by the United States. This argument, however, could apply only to agreements with private parties, such as borrowers under FHA or VA mortgages, since contracts with local government authorities are in any case subject to the State's clear obligations not to discriminate under the 14th amendment.

It is difficult to presume that this Executive order, whose preamble begins with citation of "the public policy of the United States as manifested in its Constitution and laws," and which is issued "by virtue of the authority vested in [the President] * * * by the Constition and laws of the United States * * *," is based on any other grounds than the basic constitutional requirements heretofore discussed. On that basis, there appears to be little legal support for distinguishing between the constitutional requirements applicable to existing federally assisted projects and those henceforth to be placed under contract.

Perhaps the most striking example of the legal and practical inconsistency of such a distinction is illustrated by a public housing project, the contract for which may have been signed on November 19, 1962, which may be ready for occupancy in November 1964, and which will be receiving Federal subsidies until, perhaps, the year A.D. 2024. During all those years, under the terms of the present Executive order (although not under the 14th amendment as interpreted by the courts), the project presumably could be maintained on a segregated basis. The resulting anomaly, existing at a time when projects contracted for subsequent to November 20, 1962, are also in full operation with a prohibition on discrimination, is obvious. Section 102 of the President's order does direct executive departments and agencies to take "other appropriate action" permitted by law to end discriminatory practices in federally subsidized housing under existing contracts, but this falls far short of the mandatory provisions contained in section 101, governing future contracts.

The second distinction among housing programs made by the Executive order is that which excludes from its coverage mortgage loans made by federally supervised mortgage lending institutions. As has been noted, the type of Federal assistance granted to housing varies from program to program, from direct Federal grants, loans and subsidies to mortgage insurance and guarantees. In addition, to these specific housing programs, "conventional" mortgages granted by federally supervised institutions play a major role in the Nation's housing growth. These are estimated to represent the great majority of mortgage financing today. The 1961 report of the Commission on Civil Rights (p. 151, recommendation 3) included a recommendation with a dissent by one Commissioner and a dissent in part by a second), that the Federal Government "* * * take appropriate measures to require all financial institutions engaged in a mortgage loan business that are supervised by a Federal agency to conduct such business on a nondiscriminatory basis, and to direct all relevant Federal agencies to devise reasonable and effective implementing procedures." (The Commission's findings in support of this recommendation are annexed as appendix B.)

This recommendation refers to conventional mortgages granted by institutions under Federal supervision such as those whose deposits are insured by FDIC and FSLIC. The Federal relationship to these institutions does not extend specifically to their mortgages, other than the FHA and VA mortgages already covered. Any exercise of Federal power, therefore, would be based upon Federal benefits to the institution such as Federal deposit insurance, with the leverage the Federal Government has over the institution as a result of public demand for safety arising from such insurance, the absence of which caused widespread public suffering during the depression years of the 1930's. It is not altogether clear whether the general constitutional requirements against discrimination applicable to federally supported housing programs would extend to other activities affecting housing administered by institutions supervised by the Federal Government, but not directly related to the form of Federal assistance received by those institutions. This question is particularly difficult in the case of FDIC and FSLIC insurance, the benefits of which run, in the first instance, to the depositor, although the widely advertised existence of such insurance coverage benefits the institution as a substantial factor in obtaining deposits. On the other hand, it does appear that the Federal Government could, by such devices as writing in nondiscrimination clauses, in contracts of deposit insurance, direct regulation, or other means, require that a nondiscrimination policy be established. Whatever the means adopted, the fact cannot be escaped that there is still a wide area where housing discrimination exists within reach of Federal supervision and control, and that some procedure must be found to end this discrimination at an early date.

There is a further basic defect in the Executive order to which we must also call attention. This is the procedural power granted to various agencies to grant exemptions from the scope of the Executive order. Under this provision, FHA has already excluded the resale of single family homes, an exemption of dubious validity. The power exists to exempt other forms of housing, without standards upon which exemptions must be based. It is an unusual and potentially dangerous provision, in that it grants to an agency authority to determine the extent to which it wishes to enforce constitutional guarantees or Presidential directives.

CONCLUSIONS AND RECOMMENDATIONS

The following are the committee's conclusions:

1. The Executive order against discrimination in housing issued by the President on November 20, 1962, is based on sound and well-established constitutional grounds, and is well within the authority of the President—and his duty—to enforce the Constitution of the United States.

2. The Executive order does not establish any new rights which did not heretofore exist, but does establish procedures and directives for agency enforcement of such rights.

3. The exclusion of contracts entered into prior to November 20, 1962, is not based upon any appropriate legal distinction between such contracts and those subsequently executed, with the possible exception of FHA and VA mortgage contracts.

4. The power of the President to enforce the Constitution extends substantially beyond the scope of this Executive order, and the executive power to implement public policy through the inclusion of contract provisions extends even further.

The committee therefore recommends as follows:

1. That the Executive order be amended to cover all public housing, irrespective of when constructed; all urban renewal projects, irrespective of when contracted for; and all other housing programs to which Federal grants, loans, or subsidies are made.

2. That the Executive order be amended to include subsequent sale or lease of property covered by FHA or VA insurance, on the ground that such sale or transfer subject to FHA or VA mortgages is a new action which should extend to new individuals the benfits of Federal action after the date of the Executive order.

3. That the recommendation of the U.S. Civil Rights Commission with respect to the elimination of discriminatory practices in mortgage loans by federally supervised mortgage lending institutions be given early implementation, through the use of the contract power or other proper tools of Federal supervision and action, with a minimum interference with concepts of free enterprise consistent with achieving effective results.

4. That the recommendations of the Civil Rights Commission with respect to housing in Washington, D.C., which should be a model community demonstrating American freedom and equal opportunity in housing, be implemented at an early date by the Commissioners for the District of Columbia.

ADDITIONAL COMMENTS

While we are acting, in this report, in our capacity as lawyers considering the legal implications of the Executive order, it is incumbent upon us, as American citizens, to add a further comment regarding the Executive order, its background, and its future. We are pleased that some action has been taken in this important area of human need. The continuation of segregation in housing has long been one of the blots on the American image both at home and abroad, and is a basic cause of many other inequalities resulting from segregation, such as schools with students from only one race, unequal employment opportunities, unequal recreational opportunities, and the like, resulting from the racial living patterns created by housing discrimination. Experience in the enforcement of State laws against discrimination in housing, illustrates that such regulations do not necessarily have a depressing effect on home construction, as some uninformed members of the public believe, and that they are a useful and necessary first step in the elimination of other patterns of segregation.

We believe that it is incumbent upon the President in the near future to further implement and expand the Executive order, to the extent we have found in this memorandum to be within his powers. We further believe that it is incumbent upon the agencies concerned to carry out this Executive order, not only as to the letter of the provisions, but in the spirit in which it is written.

This Nation will soon celebrate the 100th anniversary of the Emancipation Proclamation and the 100th anniversary of the Civil Rights Act of 1866, which proclaimed the right of all citizens to equal rights to purchase and hold real property. Many individual States have successfully implemented this policy by adopting strong measures to guarantee full equality in housing. The U.S. Government can and must do no less.

Respectfully submitted.

Committee on Civil Rights, New York County Lawyers' Association: Whitney North Seymour, Jr., Chairman; Harold Baer, Jr., Edward F. L. Bruen, William C. Chanler, Herbert J. Deitz, Benjamin P. DeWitt, Saul C. Downes, Richard W. Hulbert, Isadore B. Hurwitz, Eric M. Javits, Robert M. Kaufman, John J. Loflin, Jr., Leah Marks, Harold Mitherz, Sophia A. Olmsted, Theodore Pearle, Charles Planick, Sol Rabkin, Herbert Schrank, Thomas G. Weaver, Henry Weiner.

Mr. JAVITS. The Commission's present recommendation goes beyond this background only insofar as it recommends withholding of Federal funds for all purposes in Mississippi until the State demonstrates its compliance with the Constitution and laws of the United States. I see no legal difficulty with this application of the principle: since the entire governmental machinery of the State seemingly is arrayed against enforcement of constitutional rights. Even the Governor and Lieutenant Governor of the State are currently under charge of defiance of orders of the courts of the United States. Yet, as the Commission finds in this report, massive Federal assistance to the economy of Mississippi has continued: $270 million for fiscal year 1962 was collected from the State in taxes, but the Federal Government has poured in more than $650 million in grant-in-aid programs, construction contracts, military contracts, and direct civilian and military payrolls. The Commission notes that an additional $400 million moon rocket engine test center is being planned for the State.

And I am particularly appalled that, among all the other appalling statistics spelled out by the Commission, the problem of airport segregation, which was thought to have been solved as a result of my repeated assaults in the Senate upon appropriation bills including airport funds, has reappeared in connection with a jet airport being built at Jackson, Miss., with $2,180,000 of Federal money. As recently as last August 31, when the independent offices appropriation bill for fiscal 1963, including airport construction funds for the Federal Aviation Agency, was before the Senate, I reported with satisfaction that substantial progress had been made, that the FAA had changed its regulations, that the Justice Department had been successful in several suits, and that the problem remained only in one case in which the suit was still pending. Now the U.S. Civil Rights Commission itself reveals that the FAA has failed to adhere to the change which I had been led to believe had been made in its policy, and has failed to question the Jackson Airport's plan for segregated eating and restroom facilities. An airport financed with Federal funds is going to be segregated. Such action is absolutely intolerable in our country.

Unless the Senator wishes to continue to speak, I have another observation to make on that point.

Mr. HART. No. I recall distinctly the action of the senior Senator from New York with respect to airports. I thought we had resolved that question. Let us find out how we stand on this and all other activities of a similar kind. Certainly the continued efforts of the Senator are welcome. Together we shall see what we can accomplish. I hope that it will be significant.

Mr. JAVITS. I am grateful to the Senator.

Mr. President, I ask unanimous consent that I may proceed for an additional 5 minutes.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. JAVITS. I shall be happy to yield to the Senator from Michigan, if he desires to finish any thought on the question.

Mr. HART. Not at this time.

Mr. JAVITS. Mr. President, I wish to mention a fact relating to the U.S. Civil Rights Commission report which is very significant to me: that the report now has the support of the U.S. Civil Rights Commission's Advisory Committee locally functioning in Mississippi. I ask unanimous consent that a story appearing in the New York Times from Jackson, Miss., quoting the vice chairman of the Mississippi Advisory Committee to the Civil Rights Commission, be printed at this point in the Record.

There being no objection, the article was ordered to be printed in the Record, as follows:

MISSISSIPPIANS BACK A U.S. FUND CUTOFF

(By Claude Sitton)

JACKSON, MISS., April 17.—The Mississippi Advisory Committee to the Civil Rights Commission today backed a recommendation for drastic action by President Kennedy to protect Negro rights in this State.

The panel of five white and four Negro Mississippians said it was gratified by the Commission's proposal that Mr. Kennedy consider a moratorium on Federal spending in the State, though it acknowledged the necessity for it with deep regret.

"We find that the existing conditions under which our Negro citizens must live are in the main intolerable, with a continuing deprivation of rights, and an ever-present threat of police brutality and economic reprisal against any citizen who attempts to break the established patterns of segregation," they said. The statement was read by Mrs. Wallis I. Schutt, of Jackson, the chairman, after a 1-day hearing here into reports of violence and police intimidation of Negroes in the Mississippi Delta.

The Commission recommendation to President Kennedy late yesterday urged him to cut off Federal aid to this State unless it acted promptly to halt widespread civil rights violations. Gov. Ross R. Barnett refused this morning at a news conference to comment on the subject.

The Commission's action, according to observers here, may create political difficulties for former Gov. J. P. Coleman, a firm friend of the Kennedy administration. He is expected to seek the Democratic gubernatorial nomination in the August primary.

Mr. Coleman's chances have already been hurt by animosity over the use of deputy Federal marshals and troops to enforce Federal court desegregation orders at the University of Mississippi.

This situation is considered one of the chief factors underlying the behind-the-scenes opposition of some administration leaders in Washington to the Commission recommendation.

Friends of Mr. Coleman averted a similar situation recently in Greenwood. It seemed at one point that it might become necessary for the President to send marshals into that delta city to protect Negro voter registration workers.

However, an agreement was reached under which Greenwood officials released eight Negro registration workers from prison. The Justice Department, in turn dropped its efforts to obtain an injunction against city officials.

There was no doubt here that Negroes and white liberals considered the steps urged by the Commission necessary to preserve civil rights in this State.

In its statement of support, the Advisory Committee said that even persons encouraging Negroes to assert their legal rights were subjected to harassments and threats. The statement went on to say that "if individual rights are not assured by the State government, citizens have no choice but to turn to the Federal Government for protection."

The Committee accused the State of consistently abdicating its responsibilities in this field.

"It has brazenly espoused racist mythology as official policy, thus serving notice on some 42 percent of the population that they are inferior in the eyes of the State," the committee declared. "It has encouraged the people of Mississippi to disregard laws and judicial decisions of the United States, and to place State loyalty above national loyalty.

"It has fostered a spirit of enmity toward our duly constituted National Government, based on false ideas of Federal-State relationships in our American system of government."

The Committee said the Kennedy administration could not continue to allow this situation to exist.

"Unless the Federal Government, too, is derelict in the fulfillment of its constitutional duties, it cannot forever ignore such gross irresponsibility, not to say subversion, on the part of the State government," the Committee said.

Mr. JAVITS. Mr. President, I should like to read one paragraph which I think is greatly informative:

> The Committee accused the State of consistently abdicating its responsibilities in this field—

To wit, the field of individual rights.

> And—

Said the spokesman for the Committee, its chairman, Mrs. Wallis I. Schutt, of Jackson, Miss.—

> it has brazenly espoused racist mythology as official policy, thus serving notice on some 42 percent of the population that they are inferior in the eyes of the State.

The U.S. Civil Rights Commission now puts this problem squarely to the President of the United States. In addition to recommending that he withhold Federal funds, the Commission "urgently requests" the President to "formally reiterate his concern" by requesting all persons" in Mississippi "to join in protecting the rights of U.S. citizens" and by "directing them to comply with the Constitution and laws of the United States." The Commission here refers to the President's constitutional duty "to take care that the laws be faithfully executed," a direct quotation from article II, section 3, of the Constitution. The Commission also urgently requests the President to "continue and strengthen" the administration's efforts to provide Federal protection to the "exercise of basic constitutional rights." What more the Justice Department and the Federal Bureau of Investigation could do under existing law than they have done in Mississippi is not stated by the Commission, but the Mississippi Advisory Committee to the U.S. Civil Rights Commission made the following finding in its January report, which bears repetition here:

> This committee finds that the Federal Government has not provided the citizens of Mississippi the protection due them as American citizens. The Department of Justice has acted in good faith, but the present interpretation of the function of the Civil Rights Division of the Justice Department is unduly and unwisely narrow and limited. This may be due to the inadequacy of funds available to the Division for staff and the like, and it may be due to a reluctance to bring cases to trial under existing Civil Rights Acts in view of the prospect of facing an all-white jury likely to return a verdict in favor of a white law enforcement official accused by a Negro. Whatever the reason, the fact that police officers are rarely tried on civil rights charges has led the public to believe that few serious charges are ever made, and has reinforced the belief among offending peace officers that they may treat or mistreat Negroes as their whims direct them.

The committee then recommended:

> That the President direct the Department of Justice to investigate every allegation of physical abuse of authority by State or local officials in Mississippi, and institute criminal proceedings in all cases in which such action appears to be warranted, regardless of the prospects for conviction.

Since this recommendation was made, so far as I know, no Federal criminal actions have been brought against State and local officials although the acts of violence against Negroes who attempt to register to vote have, as the Commission outlines in its report, increased in frequency and intensity and although meager efforts are apparently made by the local authorities to apprehend or bring to justice the wrongdoers.

With the Mississippi Advisory Committee report and the U.S. Civil Rights Commission report, which the advisory committee supports, the question has now been put squarely up to the President of the United States. I believe it is his duty to do the following. It is not sufficient for us merely to ask or demand that the President instruct the government departments appropriately. I think our attitude must be more specific than that. I think it is now the duty of the President of the United States, if he feels that he needs legislation, to send us a message and ask for it. It is my judgment that he does not need such legislation, even to withhold funds. As a President can withhold funds appropriated by the Congress for the construction of bombers—which President Truman, President Eisenhower and President Kennedy have done—so a President can, it seems to me, withhold other appropriated funds including those from a State which is directly violating the Constitution of the United States.

But if the President feels that he needs legislation, it is his duty to ask for it by special message to the Congress. He sent us a special message on civil rights the other day relating to bills which, with all respect, are not the most critical in this field. Certainly the situation of complete lawlessness in a State demands even more urgently a special message.

Secondly and very importantly, even if the President feels he does not need legislation and even if the Attorney General advises him that he does not need legislation, the President may himself be reluctant to make so critical and important a decision as this, in view of the statements of colleagues from the South to cut off Federal funds to Mississippi that would be one of the most horrendous violations of the Constitution of which they know, then the President ought to do what was done, for example, by President Eisenhower in the case of sending the Marines into Lebanon, and ask the Congress for a concurrent resolution alining itself with him on the question of policy which is here involved.

Mr. President, in my opinion, the crisis is a real national crisis. The country cannot tolerate such suppression of individual rights of citizens as is going on in Mississippi. Democrats are just as alined on the question as we are on this side as Republicans, as the Senate heard from my colleague [Mr. Keating] and the Senator from California [Mr. Kuchel]. The country cannot tolerate lawlessness. That is what it comes down to. We must find a way in which to deal with it. The Senate has been offered time and again the way of litigation in the courts, through the famous part III provision, which it has rejected.

Mr. President, as pointed out by the U.S. Civil Rights Commission, there is another way. Either the Attorney General must be given the right to sue in the courts in civil rights cases, if that is the route we will travel, or the President must exercise the power of denying to a State the money received in taxes from all taxpayers when that State flies in the face of the rights of all taxpayers.

I believe the President has the necessary power. If he does not have it, he should ask the Congress for legislation. If he has—and I think he has—then he may desire the comfort of congressional concurrence in an action which would be a drastic one, but which in my opinion the situation calls upon him to take.

Mr. HART. Mr. President, it is my deep conviction that the clock of history now points to this year as the time when we shall see this Government, in all its branches, concentrate on the job of rooting out Federal programs which, in effect, subsidize discrimination.

Here we have a situation where the tax contributions taken from all Americans are used for programs that only some Americans are permitted to participate in.

This to me resolves the troublesome conflict which many have held as existing—the risk of abandoning programs which are good, in order to achieve the overriding principle of equal treatment.

This administration's record excels any in American history in its efforts, in its determination to practice here in this country what we preach to the rest of the world. This proposal will help achieve that purpose.

There being no objection, the report was ordered to be printed in the Record, as follows:

INTERIM REPORT OF THE U.S. COMMISSION ON CIVIL RIGHTS

Pursuant to its statutory duty to submit reports to the President and to Congress at such times as either the Commission or the President shall deem desirable, the U.S. Commission on Civil Rights submits the following special report with respect to the status of equal protection of the laws in the State of Mississippi:

Since October 1962, the open and flagrant violation of constitutional guarantees in Mississippi has precipitated serious conflict which, on several occasions, has reached the point of crisis. The U.S. Commission on Civil Rights has become increasingly alarmed at this defiance of the Constitution. Each week brings fresh evidence of the danger of a complete breakdown of law and order.

Citizens of the United States have been shot, set upon by vicious dogs, beaten, and otherwise terrorized because they sought to vote. Since October, students have been fired upon, ministers have been assaulted, and the home of the vice chairman of the State advisory committee to this Commission has been bombed. Another member and his wife were jailed on trumped-up charges after their home had been defiled. Even children, at the brink of starvation, have been deprived of assistance by the callous and discriminatory acts of Mississippi officials administering Federal funds.

All this affronts the conscience of the Nation.

The Commission is fully aware that the administration has followed developments in Mississippi closely, that it has taken strong and vigorous action in assuring that violators of Federal law are prosecuted, and that court orders are enforced. Despite the diligent and aggressive handling of each case as it has arisen, the Nation must be concerned that the pattern of unlawful activity shows no sign of abating. Moreover, 9 years after the Supreme Court unanimously decided that segregation in public elementary and secondary schools violates the equal protection clause of the Constitution, Mississippi has taken no step to comply with the law of the land.

Since its organization, the Commission has been deeply concerned with developments in Mississippi. Its hearing scheduled for October 1962 in that State was first postponed at the request of the Attorney General of the United States, and finally canceled. On March 26, the Attorney General, after referring to the Barnett case, stated that:

"While this case is pending, I continue to hold the view that a public hearing in Mississippi by the Civil Rights Commission would not be appropriate. In the meantime, I hope that the work of the Commission staff can continue as in the past on the question of the operation of Federal programs in Mississippi as elsewhere."

Since October the Commission has received more than 100 complaints from Mississippi alleging denials of constitutional rights. Investigation of these complaints, reports of our State Advisory Committee and other evidence confirm the conclusion of the Commission that prompt and firm action is now required. The Commission has concluded unanimously that only further steps by the Federal Government can arrest the subversion of the Constitution in Mississippi.

The Commission notes the action taken by the President of the United States in employing the force necessary to assure compliance with the court decrees in the University of Mississippi case. It is mindful of the unequivocal public statements of the President expressing his belief that discriminatory practices are morally wrong. The Commission, nevertheless, believes that the President should, consistent with his constitutional and statutory authority, employ to the fullest the legal and moral powers of his Office to the end that American citizenship will not continue to be degraded in Mississippi. We urgently request that:

(1) the President formally reiterate his concern over the Mississippi situation by requesting all persons in that State to join in protecting the rights of U.S. citizens, and, in accordance with his duty to take care that the laws be faithfully executed, by directing them to comply with the Constitution and laws of the United States;

(2) the President continue and strengthen his administration's efforts to suppress existing lawlessness and provide Federal protection to citizens in the exercise of their basic constitutional rights; and

(3) the Congress and the President consider seriously whether legislation is appropriate and desirable to assure that Federal funds contributed by citizens of all States not be made available to any State which continues to refuse to abide by the Constitution and laws of the United States; and, further, that the President explore the legal authority he possesses as Chief Executive to withhold Federal funds from the State of Mississippi, until the State of Mississippi demonstrates its compliance with the Constitution and laws of the United States.

The people of Mississippi and of the other States should know that according to information available to the Commission in fiscal year 1962, the Federal Government received from all sources in Mississippi $270 million. During the same period, payments from the Federal Government to the State, counties, municipalities, and individuals exceeded $650 million for grant-in-aid programs, U.S. Corps of Engineers construction contracts, military prime contracts, and direct civilian and military payrolls. Examples of additional Federal programs benefitting Mississippi include area redevelopment loans and grants, small business loans, accelerated public works projects, and Federal Aviation Agency grants.

Massive assistance to the economy of Mississippi has continued past the time when the State placed itself in direct defiance of the Constitution and Federal court orders. For example, the National Aeronautics and Space Agency is proceeding with plans to build a $400 million Moon rocket engine test center in Pearl River and Hancock Counties, Miss.

Taking into account the need to comply with statutory requirements which limit the discretion of the executive branch, and recognizing that the location of large Federal installations must reflect national needs, the Commission believes there is an overriding constitutional obligation to make certain that Federal funds are expended in a manner which will benefit all citizens without distinction. The Federal Aviation Agency failed to take cognizance of such an obligation when it granted $2,180,000 for the construction of a jet airport to serve Jackson, Miss., without questioning the airport's plan to build separate eating and restroom facilities.

The financial benefits accruing to Mississippi and its citizens as a result of Federal programs are necessarily financed by American citizens throughout the Nation. The Commission deems it appropriate and desirable that the legislative and executive branches of the Federal Government inquire into the moral and legal considerations arising out of a situation where, in large measure, the lawless conduct and defiance of the Constitution by certain elements in one State are being subsidized by the other States.

The Commission does not want the people of Mississippi, either Negro or white, to lose benefits available to citizens of other States. Rather, its goal is that all citizens in the United States be assured the full enjoyment of the rights guaranteed by the Constitution. It is upon adherence to that great charter with its powerful moral premises that our survival as a free society depends.

Respectfully submitted,
John A. Hannah,
Chairman.
Robert G. Storey,
Vice Chairman.

April 16, 1963.

VERRAZANO DAY

Mr. WILLIAMS of New Jersey. Mr. President, in 1909 a statue of Giovanni da Verrazano was unveiled and dedicated at Battery Park through the dedicated efforts of Italian-Americans. The inscription in Italian on the statue notes that Verrazano, a Florentine, was the first to sail the waters of New York Harbor, and that he preceded another, Hudson, for whom they were named and whose shores were destined to be the site of one of the capital cities of the world:

> Giovanni da Verrazano, Florentine che primo Europeo precorrendo altro piu fortunato dal quale ebbero il nome navigo queste acque le cui terre erano destinate per una della citta capitali del mondo.

On April 17, 1524, Verrazano, sailing for the King of France, entered what is now New York Harbor. His report to the King read as follows:

> We found a very agreeable site located within two small prominent hills (those overlooking what is today the Narrows), between which flowed to the sea a very great river.

He reported that his ship, the *Dauphine*, "anchored off the coast in a good shelter—probably Gravesend Bay—since we did not wish to venture in without knowledge of the entrances." A small boat was put to sea and went through the Narrows, whose waters were found to be deep; the report noted that, "Any laden ship might have passed." After about half a league, it was discovered that the river "made a very beautiful lake with a circuit of about 3 leagues." The "lake," of course, was upper New York Bay, viewed for the first time by white men.

Verrazano named this bay for the sister of the King of France, Marguerite. He and his men did not stay long since "a gale of unfavorable wind" began to blow, putting the *Dauphine* in imminent danger of running aground on the low shore of what is today Long Island. Verrazano's report noted that, "Because of its commodiousness and beauty we much regretted leaving the said land."

It is fitting that a bridge more than 2½ miles long linking Brooklyn and Staten Island at the Narrows will bear his name. The Verrazano-Narrows Bridge will be a huge double-deck structure, with six traffic lanes on each deck. Its twin towers will rise 690 feet, 90 feet higher than the towers of the George Washington Bridge. The main suspension span, measuring 4,260 feet, will be 60 feet longer than San Francisco's Golden Gate Bridge. This great bridge will be a tribute at long last to the greatness of Verrazano's place in our history.

THE WARSAW GHETTO UPRISING, APRIL 1943

Mr. WILLIAMS of New Jersey. Mr. President, when we think of a wall around a captive people today, Berlin comes immediately to mind. The 19th of April will mark the 20th anniversary of an uprising against another wall surrounding and sealing off from the outside a group of people. This will be the anniversary of an uprising of the Warsaw Jews, forced from their homes into the confines of a ghetto by Nazi occupiers, and from that ghetto, systematically taken to the gas chambers and death.

The fact of death being so near was slow to come to these poor and forgotten peoples of the Jewish quarter in Warsaw—what was happening and had happened to them was so beyond comprehension that not even those living with it knew what was in store. First, with the arrival of the Nazi invaders in 1939, came restrictions of civil freedoms, then all the Jews of the city were forced into one area to live, were cut off from the outside, "Aryan" world. Then came the mass deportation to work camps outside the city. Whole families were forcibly deported to those camps, and nothing was heard from them again. Slowly, but in mounting horror, the word came back that the work camps were really death camps. Those marched from the ghettos were never heard of again because they were marched to the slaughter.

When those of the ghettos finally realized their fate there was no more talk of compromise with the awful reality that had surrounded them for the last 3 years—it was either to fight and die as a martyr to the fact of their being, or it was passive acceptance of being murdered at the will and convenience of the Nazi.

The decision was to fight. The obstacles were not considered, the store of arms limited, but the will was there. It was the season of the Passover, a time of remembrance and hope for all Jews. It was also the time that the Germans picked to make a last cleanup drive of the 40,000 Jews remaining in the ghetto, and start them on the trip to the extermination camps.

On the morning of April 19, the storm troopers, with their Polish and Ukrainian allies, started into the ghetto area, but this time instead of the cries of mothers, their children torn from protecting arms, they were met with bombs and bullets—the uprising was on.

Poorly equipped, with little food or water, the heroic fighters held out against repeated attacks by troops and planes—while the young and old, mothers and children, hid from the fight. The resisters concealed themselves in attics and cellars; they slept during the day and prepared their traps for the Nazis at night. Finally, in an effort to break their stubborn resistance, the entire ghetto area was put to the torch. Driven from attic hideouts, the people of the ghetto went underground. They were beaten but would not give up. They would die by their own hand rather than be taken by the Germans. On May 8 the central command post was taken, and most of the leaders of the uprising met their end. Still, the struggle went on until finally, by the end of May there was almost nothing left but rubble and a few buildings. Defeat came, defeat in death.

It is for us today to remember these heroic days 20 years ago, and to dedicate ourselves, as the governing body of a nation devoted to freedom with justice and equal opportunity for all, that the deaths of the Warsaw ghetto defenders shall not be forgotten. Their sacrifice should inspire us, in our deliberations, to insure this liberty and equality to all peoples.

RESPONSIBILITY FOR HOUSING DISCRIMINATION

Mr. HART. Mr. President, all of us are aware that the achievement of equal opportunity in housing is a complex job. In this area, even more than in others, buckpassing is the order of the day.

Recently, I had an opportunity to read excerpts from an address by the executive director of the National Urban League, Mr. Whitney M. Young, Jr., delivered at the 15th Annual National Civil Liberties Clearinghouse Conference in Washington last month. Mr. Young quite candidly illustrated how widely shared is the responsibility for discrimination in housing.

Mr. President, I ask unanimous consent that excerpts from Mr. Young's remarks be printed at this point in the Record in connection with my remarks.

There being no objection, the excerpts from the address were ordered to be printed in the Record, as follows:

Excerpts From Address by Whitney M. Young, Jr., Executive Director, National Urban League, Washington, D.C., March 28, 1963

HOUSING DISCRIMINATION—WHO'S RESPONSIBILITY?

Mr. Chairman, distinguished colleagues on the platform, ladies and gentlemen, I am deeply conscious of the importance of this subject at this time, the competence and wisdom of my fellow speakers and certainly awed by the array of experts present in this audience. On an impulse, I have nevertheless discarded my previously prepared speech, on which my staff and I struggled so hard. It was an excellent speech, filled with the kind of technical details and reflecting the type of erudition which this audience deserves and expects. My reason for this decision to talk in rather simple, frank language stems from the fact that only a few hours ago I arrived in Washington from a 5-day tour of Army and Navy bases in this country, as a member of the President's Committee on Equal Opportunity in the Armed Forces. One of our main concerns was housing for the Negro serviceman and his family, the great bulk of which must be obtained off base. This experience, fresh in my memory, gave me an opportunity to see firsthand, not only the tragic situation to which these defenders of our Nation must involuntarily submit, but also the deplorable state—both quantity- and qualitywise—of housing for most Negro citizens around the country. I stand here today angry and ashamed of man's inhumanity, his indifference and his cruelty to his fellow human being, his fellow American. That we should permit or subject citizens to live in the hovels and the hellholes I have seen is unworthy of a great country and a damaging indictment against our claim as leaders of a free and democratic society.

Housing discrimination—Whose responsibility?

All of us, our sin is either that we did it, or we permitted it. Let's be specific.

1. The real estate broker and the builder, who reacting to a real market or trying to create an artificial one, aroused or appealed to prejudice by establishing neighborhoods and developments on the basis of racial exclusiveness. This was more than a pitch for snob appeal. It was a deliberate, ofttimes

overt propagandizing of the dangers of living in racially inclusive neighborhoods by implying that life was safer and better in the exclusive neighborhood.

2. The moneychangers, which includes most lending institutions and the insurance brokers with the Federal Government, setting the example and leading the way. They not only swallowed the myth, but most often worked hand in hand with the builders and realtors in making the system firm and airtight.

3. City planning boards, on which Negro citizens are rarely if ever represented, are now aided and abetted by urban renewal boards who make a mockery of citizen participation. These officials sit at drafting boards and in strategy sessions planning or plotting, not how to open a city for all ethnic groups or even how to eliminate future slums and ghettos, but rather preoccupied with expressways to transport the commuter and shopper quickly to town; with clearance of land largely inhabitated by Negroes, to build new industry; high rise commercial buildings and high rent apartments to attract the tired and retired commuter back to the city. Relocation which comes as an afterthought with low priority rarely shows imagination or creativity. It usually consists of putting the displaced in public housing, older homes made vacant by panic-selling white citizens and panic-buying Negro citizens. Not infrequently a moment of conscience will yield a development of low income or middle income minimum standard housing, which by the nature of the approved site and the demand, these few homes become another Negro ghetto.

4. Mayors, city councils, and public housing authorities have somehow managed to place practically every public housing project that is to be occupied by Negro citizens either in or on the fringes of the Negro community. And even those built for white occupancy were usually placed fairly close by out of a fear that some day the Federal Government might even decide that Federal money should not forever continue to support racial segregation.

There are also the city officials who create and perpetuate slums by almost universally adopting an unwritten double standard when it comes to city services, zoning considerations, and code enforcement. In some cases, this is even interpreted and admitted as a concession made to the Negro to maintain his housing supply. In reality, it is a concession to wealthy owners of slums and also compensation for the guilty officials who do not move more forcefully to open the entire city for all citizens.

5. Finally, even some Negro citizens have played a role, though minor, white realtors have no monopoly on block busting. They have taught the art to some Negro real estate brokers who have gotten into the act. Some Negro citizens, out of desperation and resignation, have built large and beautiful but segregated developments. Another handful have perpetuated segregation by not capitalizing on the efforts of a few fair housing committees or not fully exploiting the few good laws that exist.

Yes, we can with validity and ample justification, point our fingers at all these individuals and groups as performing a role in housing discrimination. But, they could not have accomplished this, if just a few citizens had indicated otherwise. The truth is that each of us has within him somewhere the need for privilege, advantage, distinctiveness, exclusiveness. It is everyone's secret desire to be a big shot—American style—but since only a few can be the "tops" in their chosen profession or art, they fall back on whatever they have that is different. With white, it is whiteness. In some communities and facilities it is a combination of whiteness and being Christian. In this situation, all that is needed is an elementary knowledge of psychology and Madison Avenue promotion. Not only do the bigot and the dumb succumb, but also the liberals and the intellectuals. People can be both, but not necessarily. It would be an interesting survey to see how many liberals, including intergroup relation professionals, who live in these lily white neighborhoods or apartments. I know several rather prominent ones.

All this leads me to my first suggestion and the one that to me is basic. Somehow, we must help people to see integration as an opportunity not a problem. For the Negro it is obviously a better opportunity for decent housing and education, but it is an opportunity also for white citizens: (1) To rid themselves of some of the drab sameness that so characterizes their neighborhoods, schools, clubs, etc.; (2) to increase their creativity which only comes through diversity; and (3) to better and more realistically prepare themselves and their children for the kind of a world which exists in part today and certainly in full tomorrow.

We must begin now to reverse the distorted norms and the stupid status symbols of the past which did more to reflect our insecurity and our "nation of sheep" behavior than it did to reflect our intelligence. We must rid ourselves of the desperate need for the protection of color similarity in anything. This calls for some real soul searching and a rather drastic change for most Americans around what is important. What is success? What is good? Then and only then will we move into the intelligent realization that exclusiveness of any type can lead only to stagnation while inclusiveness helps us grow, mature, and become creative in the ways that are truly important.

My second suggestion is that we quit deluding ourselves by trying to identify a single factor as the all-important one in the struggle against race discrimination. The dangers are twofold: (1) People always pick the answer most remote to their personal responsibility and so do nothing; and (2) it just is not true that there is a single solution. Unless you have a good education, you cannot get a good job, and without a good job you cannot buy a decent house in a decent neighborhood where your child can get a good education.

Finally, let us recognize that without law and firm aggressive administrative action nothing much is really likely to happen in housing. Only a handful of States and cities have truly effective legislation. I am also convinced that here again legislation and administrative action must come from the Federal Government. In city after city I was told by public officials and military base commanders that only legislation and clear directives from Washington would solve the problem. And let's face it, the recent Executive order which graciously excluded all existing housing and generously exempts the sources of finance is only a feeble first step. It is significant only because nothing had been done and our praises and commendation to the President reflected more the sordidness of our past and the sickness of our present society, than it did the revolutionary nature of the order itself. And even here, I am optimistic only about its implementation because of what I have heard about Governor Lawrence.

I only hope he will get a staff and a committee which will be more concerned about making life livable for suffering minorities than about whether they are antagonizing real estate boards, builders' associations, and chambers of commerce. This will not be easy as most commissions have found, but some have done it and not only relieved the oppressed, but earned the respect and affection of their fellow citizens.

All of us, as well as our organizations, are challenged. Certainly, we in the Urban League, who for over a half century have been pursuing this goal are challenged. Through our 65 affiliates, hundreds of full-time staff and thousands of volunteers in the strategic urban areas, we are preparing for a dramatic push in this area which will include not only our own organizational effort, but a new level of cooperation and consultation with other private and governmental institutions.

I submit our alternatives are tragic to contemplate. The time for courageous action is now. Tomorrow will be too late.

MSU SAYS WELCOME HOME TO PEACE CORPS

Mr. HART. Mr. President, I am pleased to be informed by R. Sargent Shriver, Director of the Peace Corps, that Michigan State University has established 20 or more graduate assistantships for returning Peace Corps volunteers.

At first glance, the fact that one of our finest universities would find a place for the volunteers, on their return, might seem a lucky break for them. Actually, I believe the institution itself will be the gainer by having in its midst these young men and young women of intelligence and dedication whose 2 years' service overseas will have given them a new perspective and a maturity which will enrich the educational experience of those who come in contact with them. I congratulate MSU and the volunteers.

THE PROBLEM OF HEALTH CARE FOR THE AGING

Mr. JAVITS. Mr. President, the problem of health care for the aging will continue to grow more urgent and more complex unless Congress takes action on a practical solution. With the percentage of the aging in our population steadily increasing each year, and costs for hospital and other health care rising rapidly while the retirement incomes of the aging remain relatively static, it is obvious that prompt action to provide assistance in meeting these high costs is essential. Millions of Americans are not going to be able to afford the health care they need without the kind of health care insurance proposed in my bill.

I ask unanimous consent to print in the Record an article entitled "Chances Brighten for Passing Medicare Measure—in 1964" which appeared in the Rochester (N.Y.) Democrat and Chronicle, Sunday, March 10, 1963.

There being no objection, the article was ordered to be printed in the Record, as follows:

CHANCES BRIGHTEN FOR PASSING MEDICARE MEASURE IN 1964

What are the chances for enactment of a national program of health benefits for elderly citizens in 1963?

Since such proposals have bounced around Congress for several years, it is understandable that millions of Americans are once more anxiously asking that question.

Chances are slim that the President's proposals to pay for hospital and nursing home care through social security will get far this year. But there are reasons to believe that a medicare bill will squeak through in 1964, an election year. But it will have to survive an explosive battle.

For like it or not, the health problems of nearly 17 million Americans 65 years old and older are hopelessly tangled in politics.

The social security-financed program has never reached the House floor for a vote. Prospects for such are brighter because of a political move placing two medicare backers on the House Ways and Means Committee to replace retiring opponents. Up to now the committee has been dominated by a majority against the bill. This brings the majority against it down to one.

Medicare supporters hope to manipulate the slim margin and get the plan out. Once the bill reaches the House floor—still an "iffy" assumption—its backers hope for enough grassroots support to overcome the counterpressures. The American Medical Association, trumpeting its tired fears that the program would open the doors to State medicine, will mobilize its biggest drive in opposition and conceivably could succeed in killing the medicare bill.

If the measure passes the House, the bill should have easier going in the Senate. Three more Democratic Senators are expected to avert the narrow medicare defeat of 1962. Some improvements in the administration's newest bill and modifications offered from both sides of the aisle should attract more Republican support.

An educated guess is that this won't happen in 1963. Up to now Congress has shown little enthusiasm for the Kennedy legislative program. The Ways and Means Committees, which handle medicare, will be involved with the tax program throughout most of the year.

The real battle over the legislation is months away, but the illnesses and hardships of the aging cannot be postponed. They are with us.

Older persons are the victims of a medicare paradox. Science has checked the great killers of the past—the infectious diseases—but in so doing it has enlarged to staggering totals the aged population with its concomitant afflictions. Over the age of 60, two of five people have some form of chronic disease. The pattern of the needs for medical science clearly lies in the degenerative field.

The Kennedy proposal of 1963 comes closer to meeting those needs than the 1962 model.

Its major points are uniform national coverage; social security payment of inpatient hospital costs for up to 90 days; care in a skilled nursing home; home health care visits and some diagnostic services. The costs would be met by a one-quarter of 1 percent boost in the social security tax and an increase in the taxable annual earnings base from $4,800 to $5,200.

The new program removes a glaring flaw in last year's proposal—it sets up a separate health insurance trust fund to cover more than 2.5 million aged people not eligible for social security benefits. This improvement results from a compromise proposal offered last year by Senators Jacob K. Javits and Clinton P. Anderson.

Another provision should be added—option to let beneficiaries have their benefits paid by private health insurance which would be reimbursed by the trust fund. There is much to be said for letting a private nonprofit organization with experience in the field, such as Blue Cross, administer medicare instead of the Department of Health, Education, and Welfare.

We urged that a medicare program be enacted last year provided it carried the basic improvements just enumerated. It failed. In the meantime the over-65 population has increased by many thousands. Their health woes have multiplied, too. How much longer must they wait for this humanitarian program to eventuate? Politics or not, it could come this year if Congress cared enough.

THE NEW GERMANY

Mr. JAVITS. Mr. President, the visit to Israel of Dr. Eugen Gerstenmaier, President of the German Bundestag, last November, marked a high point in the relations between the two countries. Dr. Gerstenmaier was a member of the German resistance to Hitler and the Nazi movement, and was held prisoner in a concentration camp until U.S. troops freed him in April 1945. His presence in Israel and frank discussions about the political transformation of Germany from a totalitarian Nazi state to a democracy and its sincere efforts to make amends for Nazi crimes made a significant contribution to better understanding between the two countries.

I ask unanimous consent to print in the Record excerpts from his address entitled "Are the Germans Changing?" which he delivered at the Hebrew University in Jerusalem, November 21, 1962.

There being no objection, the excerpts were ordered to be printed in the Record, as follows:

Are the Germans Changing?

I

The breakdown of the Weimar Republic and Hitler's seizure of power, his racial phobia and the ensuing war led to the death of a total of 50 million people, of whom 6 million were Jews and 7 millon Germans; as a further result, Germany was divided into three parts and the Communists extended their sphere of domination from the former eastern frontier of Poland right into the center of Germany. Germany ceased to be a great power, let alone a world power. It is not in a position to safeguard itself or even its capital city by its own means. Although it has been able to offer 12 or 13 million refugees and expellees the opportunity of starting a new life, it cannot provide reasonable living conditions for 17 million of its citizens in central Germany, to say nothing of achieving a social and political community with them.

I believe that the fact that Hitler had to lose the war in the end has come nowadays to be at least an intellectual if not a moral recognition by the greater part of the German people. However, the fact that afterward the free world had to lose the peace is still beyond the comprehension of most Germans. Here lay one of the chief unconscious obstacles raised against putting Adenauer's foreign and security policy into effect. The setting up of the Bundeswehr, introduction of military service and German entry into NATO met with fierce opposition, since these acts implied an engagement with other powers whom many Germans bore a grudge, not because the partners were former war enemies, but because they had let themselves be hoodwinked by Soviet Russia.

Such grudges were mixed in many cases with a feeling of unbounded resignation. "What next, little man?" many Germans had already asked themselves in the clamour of the prewar Nazi period, when faced with the ruthlessness of the totalitarian state. During the war this feeling of being nothing more than an object developed into a sense of complete powerlessness, also in those who had joined in quite readily at the outset. Finally, with the unconditional surrender, this state of affairs seemed clinched by other absolute forces. The reeducation carried out in Germany by the Americans did not succeed in overcoming this feeling. Nor was the political situation in the world—with the development of two giant blocs which met with arms at the ready on German territory—likely to refute the average German's conviction that he was no more than an object of world politics. An object under Hitler, an object afterwards—this feeling became an inner danger and even today has not been completely overcome.

The feeling has, however, also played its part in doing away with many illusions, because in this idea that Germany was merely an object in the hands of stronger powers came the final fall of both national socialism and the nationalism handed down from the 19th century. Nevertheless, however highly one may rate this development, such opinions and feelings are not sufficient. As much as the reality may seem to speak in their favor, they do not do reality justice, with their de facto denial of every opportunity for action worth mentioning. Indeed, the virtual withdrawal from resistance, which this attitude implies, as well as withdrawal from personal and national commitment to the demands of right and duty, is amoral. True, the dreadful superiority of unscrupulous powers has a paralyzing effect, but it is nevertheless blameworthy to let oneself lapse into surrendering one's own responsibility. The consequence is a void or vacuum which renders the individual (as well as the entire nation) incapable of looking his deeds and misdeeds, and therefore himself and his future, seriously and compellingly in the face. The central question which I must set myself is therefore not whether a transformation has taken place in Germany—that goes without saying—but whether this transformation is the result of such serious and critical soul-searching on the part of the Germans; what are the powers behind it; and what is its aim?

II

The political transformation of Germany since the Second World War is based on the systematic renunciation by German policymakers of the sovereign policy of a nation-state. I do not in the least doubt that this renunciation is also approved of by the greater part of the German population behind the Iron Curtain. It is of far-reaching significance since it consummates Germany's abdication of its own great power policy between east and west. It also represents Germany's refusal to undertake any separate action with respect to the east. This renunciation is not quite unchallenged in Germany even today, not because old forms of thinking inherited from the days of Bismarck are still alive, but because some people still hold fast to the illusion that a neutral Germany would be able to obtain its unity and assert its free existence. However, since the Social Democrat Opposition adhered to the line of the Adenauer foreign policy, this neutralism has lost every serious possibility of political success in Germany.

One of the basic reasons for this change is found in the threat deriving from the ever-increasing expansion of power on the part of Soviet Russia and its satellites. One can, however, go as far as to say that even without such a threat a fundamental change would have taken place in the philosophy of German foreign policy and would have called for practical consequences. The recent visit paid by the French head of state to the Federal Republic provided a striking example of this. The welcome given General de Gaulle was so hearty and even tumultuous that it surpassed all expectations. Inevitably, the opinion was voiced that this was precisely a proof of the German's bent for the Fuhrer cult. However, without doubt this interpretation overlooks the decisive point. Whoever has walked over the bloodstained Franco-German battlefields of two or even three wars, and opened his eyes to the urgent need for peace between these two peoples, can understand how sincerely the French head of state was welcomed in Germany. Enough of these wars between Germany and France. Enough of the long history of disaster between us and our neighbors.

This determination burst upon De Gaulle in all its intensity in Germany. It is this determination that alined Germany wholeheartedly with the idea of European unity. In the "Kreisauer Kreis" we envisaged the future of Germany, ever since the beginning of the Second World War, only on the basis of a lasting partnership with our European neighbors. Others saw it likewise. But apparently it took the hostilities of the Second World War and the rise of such powerful political realities as the United States and the Soviet Union to do away with the opposition—which existed not only in Germany—against the ideas. European integration and the Atlantic alliance were not considered by the Germans merely as an opportunity of making a political virtue of necessity; we regarded them as the positive meaning, in terms of world history, behind a terrible catastrophe. And German policy had to be put to the service of this meaning, that is, of setting up a new and lasting order of freedom and peace in Europe.

This attitude represented a mixture of political reasoning and instinctive willingness to start afresh. German foreign policy was only a proof of this; nor did it abandon its goal when that goal was challenged in the name of national reunification. In Germany, reunification is recognized as an obligation. But this does not alter the fact that postwar German foreign policy is determined by a carefully considered order of precedence, in which freedom—and thus solidarity with the free world—hold the first place; peace—and therefore renunciation of any aggressive or revisionary war—the second; and national unity, logically, the third. That is by no means an unproblematical concept of policy, but it is one which the great majority of Germans have freely endorsed. I believe that one can regard this, as well as the reasoning which lies behind it, as the sign of a real transformation in Germany.

III

It is obvious that in such a transformation not only does the structure of foreign and military policy undergo a change, but the traditional national sentiment and consciousness are also affected. It would be even more exact to say that without the transformation of both policy and opinion such a deeprooted political change cannot take place. To be sure, it is a very tricky matter to define the nature of German national sentiment today. Even whether it still exists and may be spoken of as such is controversial. I am convinced that this national spirit is constantly called forth and kept alert by the demand for German reunification and also by the struggle for Berlin. There is nevertheless no doubt about it that this national sentiment and consciousness have changed through and through.

Everyone is aware of the fact that Hitler and his companions were supercriminals; but the question the older generation is thus set remains unsolved: How is it possible that you could have followed and obeyed him? Actually, the question in itself is such an irrefutable reproach that it scarcely needs to be posed. Everything that could be said in reply is insufficient to wipe out this reproach. The result is that the subject is usually avoided in the hope that time, with its new problems, will make the questioners forget their query. For even those who refuse to admit the theory of collective guilt know that they cannot answer otherwise than with open self-humiliation.

The German national spirit did not run riot for the first time with national socialism; just as did the national consciousness of other peoples, it already fell prey to impassioned nationalism of the 19th century, at least temporarily. German conservatism and, all the more so, German liberalism were too weak to prevent this impassioned and corrupting outburst. Later, defeat in the First World War and acceptance of the war guilt imposed on Germany in the Treaty of Versailles hindered, rather than aided, German national consciousness in recovering and returning to normal after 1918. But it was national socialism with its racial madness and uncontrolled demands that finally completely poisoned the feverish national spirit of the Weimar period. We have seen nationalism, hysterical nationalism, at work before and since in other countries. But Nazi racial hatred poisoned German nationalism to such an extent that mass crimes, unequalled in modern history, could be committed on its behalf. In my opinion it is untrue that totalitarian compulsion alone could bring about the extermination of millions; this required the deadly poison of an ideology fanatic enough to produce the class of executioners and henchmen needed for such an operation.

Are the Germans changing? What are the elements of this change? Let me answer these questions as follows in summary form:

1. The change lies in the fact that there has been a basic change in German politics. The turning away of present day German politics from the idea of the national sovereign state, and the entry of the free part of Germany into the integrated structure of the European and Atlantic world, is just as much a historically evidenced truth as is the spiritual and religious change. The change not only has altered the conception of state, but also has entered deeply into the national consciousness and has changed that too. It has not only effected a critical distance from national socialism, but it has also led to its rejection as a matter of conscience. It has not only called the picture of German history into question, but has also changed the historical thinking of the German people.

2. The aims of this German change are, according to the will of all parties, powers and groups represented in the Bundestag today, none other than the strengthening of our dearly won, liberal constitutional state. In conformity with the extent of its power, it is ready to take the responsibility for the burdens and obligations of its past. It also sees the realization of German national unity as a human obligation to its 17 million fellow countrymen who are being denied the human right of self-determination. It is our aim to live together with them in permanent association with the free world and to be a dependable partner of every honestly disposed state.

3. The danger for the Germans is neither the return of national socialism in any form nor a turning towards communism or revenge. The internal danger for Germany is much more a spiritual and mental vacuum and the widespread illusion that this can be overcome by the maximal satisfaction of material needs. The external danger for Germany is the nonacceptance of a morally valid settlement by Soviet Russia.

This survey of Germany has been undertaken with careful consideration and in the knowledge that only a few individual aspects of the picture could be considered at all. In almost everything, I have risked mentioning only those aspects that had to be mentioned, were questionable or which could have caused doubt. Perhaps, however, the effort has enabled you to understand how one German, who has made mistakes, but who has nevertheless striven toward sincerity, sees and feels able to see Germany today.

I know quite well that almost everything I have said can be seen two ways. Nobody need go to any effort in order to find examples of narrowmindedness, thoughtlessness, indeed of malicious stubbornness in all the aspects discussed in this address. But this element is not typical; it is atypical. Nevertheless, it is there. It is confirmed by the fact that the German people have never been nor are now identical units. The picture that I have drawn here on the soil of Israel stems from the contact of one German with his people in widely varying realms of external and internal circumstance. It may be that the light in which the picture has been presented comes, more than I realize myself, from hope and from faith.

I confess that as soon as I remind myself of where and before whom I have been making this effort, there fall on me again, and with terrible force, some of the images and documents that stand not only between you and the Germans, but also between a great part of the world and my people. These images of the past suffice to reduce us Germans to silence. It is a silence of the shame and heartache of countless people of my people before the people of Israel.

HAZARDS IN OUR ENVIRONMENT

Mr. RIBICOFF. Mr. President, public attention is focused as never before on problems of environmental hazards and their effect on our way of life—our crops, on wildlife and on people themselves. Actually, the problems have been with us for some time and are growing worse. Some hope that if we ignored them they would go away. But that hope is forlorn. These problems thrive on public inertia.

Rachel Carson's book "Silent Spring" has awakened us all to the hazards in our environment that were nonexistent 25 years ago. Her book, which has generated much public discussion and debate, concentrated on the hazards of chemical poisons used so abuntantly today to control pests, insects, plant diseases and so forth.

Today health authorities all over the Nation are hunting down a contaminated fish product which is already known to have killed two women in Detroit, Mich. Most people thought the high standards required in food production had eliminated that kind of hazard. The fact is, unfortunately, that food poisoning is still with us.

We read with a hopeful "it cannot happen here" attitude of hundreds dying in London as a direct result of breathing poisonous air. We forget that it did happen here, in Donora, Pa., and it can happen again just as it has in the past.

Frequent reports of fish kills in our Nation's watercourses go almost unnoticed except by dedicated conservationists and others who have for years fought for adequate pollution control measures to protect our streams and lakes. But the problem of water pollution hits home hard in the New York metropolitan area when hundreds of people contract infectious hepatitis as a direct result of eating shellfish taken from beds contaminated with sewage.

These are but a few examples of the hazards confronting each one of us in his daily life. As the summary report of the Committee on Natural Resources of the National Academy of Sciences points out:

> Man is altering the balance of a relatively stable system by his pollution of the atmosphere with smoke, fumes, and particles from fossil fuels, industrial chemicals, and radioactive material; by his alteration of the

energy and water balance at the earth's surface by deforestation, afforestation, cultivation of land, shading, mulching, overgrazing grasslands, reduction of evapotranspiration, irrigation, drainage of large swamplands, and the building of cities and highways; by his clearing forests and alterations of plant surface cover, changing the reflectivity of the earth's surface and soil structures; by his landfilling, construction of buildings and seawalls, and pollution, bringing about radical changes in the ecology of estuarine areas; by the changes he effects in the biologic balance the physical relocation of water basins through the erection of dams and channel works; and by the increasing quantities of carbon dioxide an industrial society releases to the atmosphere.

There is a continuing worldwide movement of population to the cities. The patterns of society are being rapidly rearranged, and new sets of aspirations, new evaluations of what constitutes a resource, and new requirements in both type and quantity of resources are resulting.

The effects on man himself of the changes he has wrought in the balance of great natural forces and in the new microenvironment which he has created are but dimly perceived and not at all well understood.

It is time to take stock, to determine where we have been, where we are, and where we are going. We cannot continue to pollute our environment if we are to keep this earth habitable. The Washington Post last Saturday editorially asked:

> How close are we coming to Miss Carson's nightmare of a silent spring, in which the sedge is withered on the lake and no birds sing?

To find some of the answers, at least, will be the purpose of the study to be conducted on "Interagency Coordination in Environmental Hazards" by the Subcommittee on Reorganization and International Organizations of the Committee on Government Operations.

I ask unanimous consent to have printed at this point in the RECORD an article from the New York Times for April 14 entitled "Great Debate Over Pests—And Pesticides."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

GREAT DEBATE OVER PESTS—AND PESTICIDES

(By Lawrence Galton)

Across the country today people are debating matters that once were of concern only to a relatively few specialists and special groups: conservation and nature's balance, and which may be worse, depredatory pests or the means used to try to obliterate them.

The means, of course, are pesticides—a large and rapidly growing group of compounds designed to control insects, weeds, plant diseases, and rodents.

Their dangers were the theme of National Wildlife Week, recently sponsored by the National Wildlife Federation. A concerned Government has set up a special investigating group, a pesticides committee of the Federal Council for Science and Technology. The pesticide industry, which does a $300 million annual business, is disturbed.

Nature lovers, conservationists, and others who have been warning for some years that pesticides do not stop with pests but are killing birds, fish, and small game as well—and, worse still, constitute a vast threat to human health—are delighted and encouraged that an earnest, rousing indictment by biologist-author Rachel Carson in her book "Silent Spring" finally focused public attention on the problem.

At the same time, many scientists—including those who recognize that there is a problem—worry that, in an emotionally surcharged atmosphere, the public may become confused and unduly apprehensive and there may be pressure for unwise, ill-conceived restrictions on the use of existing—and the development of new—pesticides; this, they fear, could cause incalculable harm.

Just how valuable and necessary are the chemicals? What is known—and what is not—about their possible dangers? How widely are they used, how much abused? Are there feasible substitutes for them? And can the present furor serve a useful purpose?

Although chemical pest control has been practiced to some extent for centuries—even 4,000 years ago, sulfur was being used against insects—it was the introduction, in 1942, of DDT, a potent synthetic compound, that opened up a whole new era. With DDT—and, soon thereafter, other new synthetics, all far more effective and at much lower rates of application than anything known before—it came to be considered practical to use chemicals on an unprecedented scale to protect farm and forest crops and for public-health purposes.

Today more than 50,000 compounds, employing 490 basic chemicals are on the market. Pesticide production in the United States has reached a total of about 1 billion pounds a year.

The impact on agriculture has been profound. In 1940, the average farmer produced enough for himself and 10 others; in 1962 he produced enough for 26 others. Certainly not all the productivity gain has been due to pesticides; mechanization and genetic improvements in crops and livestock played important roles.

But some 3,000 species of insects, perhaps as many plant diseases, and an unknown but huge number of rodents, weeds, and other pests adversely affect cultivated crops grown in the United States. Even now, with widespread use of chemicals, agricultural pests still cause an estimated $15 billion worth of crop destruction yearly—a quarter of total production. Before, the loss was far greater—sometimes almost catastrophic.

In 1946, for example, blight attacked tomatoes, destroying over 50 percent of the crop in 10 States; yields in Pennsylvania fell so precipitously that discouraged farmers cut tomato culture back from 34,200 to 19,400 acres. In the Midwest, during World War II, when the European corn borer attacked millions of acres of sweet corn, production of the crop was largely abandoned. It required development of suitable chemical spray programs to put the crops back on an economically sound basis in the two areas.

Without pesticides, it has been estimated that production in the United States of apples, citrus fruits, cotton, and potatoes would be reduced by 50 percent; of meat, milk, and wool by about 25 percent.

Not just helpful, the chemicals have become essential now—and for three reasons, according to Dr. D. E. H. Frear, professor of Agricultural and Biological Chemistry at Pennsylvania State University: (1) Rapid, worldwide transportation leads to swift importation of many insects and diseases; (2) farmers are going in for intensive production with high-cost-per-acre crops, and insects or diseases that would destroy even a small part of such a crop must be eliminated; and (3) consumers who once, for example, would cheerfully cut a worm from an apple and eat the remainder, now are accustomed to perfection and won't consider buying a wormy apple.

In 1961, a report of a special committee of the National Academy of Sciences-National Research Council, a distinguished body which serves as an official scientific adviser to the U.S. Government, noted: "It seems indicated the American people cannot be fed adequately unless crops and livestock are protected from insects and other pests"; and chemical pesticides today are "as much a part of farming as the tractor."

In forests as well as on farms, insects, if unchecked, take a huge toll. Even now, more than 160 destructive types annually chew up 1 billion cubic feet of young forest growing stock and 7 billion board feet of saw timber—enough, it has been estimated, for 60 percent of the homes constructed annually. Many authorities foresee need for far more intensive use of pesticides in the future to meet rising demands for forest products.

As for public health, pesticides are credited with bringing profound benefits. Once prevalent over a large part of the United States, malaria has been virtually eradicated through DDT spraying (the disease still kills 2 million annually elsewhere and a worldwide eradication program is underway). Typhus and dysentery are kept in check with the help of chemical control of insect vectors.

"No less than 5 million lives have been saved, no less than 100 million illnesses have been prevented through the use of DDT for controlling malaria, typhus, dysentery and many other diseases," estimates E. F. Knipling of the Agricultural Research Service of the U.S. Department of Agriculture.

But if pesticides are valuable, they can also be dangerous. Not all are poisonous to humans, but many are. In 1961 they caused 89 accidental deaths.

The toll, if not huge, is deplorable. But it must be viewed in perspective, say scientists who defend pesticides. Almost twice as many fatalities a year are known to be caused by aspirin, almost half as many by bee stings. Moreover, most victims are, on the one hand, children who accidentally get hold of a pesticide and drink it, and, on the other, sprayers who fail to follow established safety rules. For example, two farmhands dusting turnips in Massachusetts ignored the need for protective clothing, worked in jeans and short-sleeved shirts, complained of being sick a few days later at 5 p.m., were hospitalized by 7 p.m., and dead, despite treatment, by 10 p.m.

"There has never been one medically documented death due to proper use of insecticides," says Dr. Frederick J. Stare of the Harvard School of Public Health. All chemicals have toxic levels if used improperly. Even table salt, innocuous in ordinary amounts, becomes poisonous in large—as it did in the tragic incident at a Binghampton, N.Y., hospital when it was substituted accidentally for sugar in formulas fed to babies.

Before any pesticide can be sold (only 1 of 2,000 original candidates ever reaches the market), it must undergo feeding tests on laboratory animals which may continue for 2 years or longer. With data from such tests, the Food and Drug Administration sets a tolerance—an allowable level of pesticide trace that may persist in or on food crops after harvest. The level always is well below any amount that may have begun to produce trouble in test animals. The safety factor often is 100. And checks are made on interstate shipment of crops for compliance with tolerance requirements.

In a recently completed special study, FDA scientists analyzed food samples representing the total diet of a 19-year-old boy, statistically the biggest eater in the U.S. population. The samples—about 60 pounds of groceries, 1 week's supply—were obtained every 3 months from chain stores in the Washington, D.C., area beginning in May 1961 and—starting May 1962—in Atlanta, Minneapolis, St. Louis, and San Francisco as well. Most foods showed no pesticide residues; others contained only minute traces. The findings are interpreted by the FDA as indicating that the American food supply is safe.

It is a fact, however, that even slight traces of DDT on food accumulate in human tissues. "But not," insists Dr. Stare, "to harmful levels. There is no evidence that ill health in man, except for those who may have a true allergy to DDT, has ever been caused from DDT residues on food."

Long before the present furor, charges were made that increasing use of DDT and other pesticides was linked to the rise in cancer, hepatitis, and many other disorders, even including sinusitis and insanity. Reviewing the facts in 1960, Dr. Wayland J. Hayes, Jr., of the Public Health Service, noted that some diseases supposed to have increased because of DDT had, in fact, shown no increase; others, such as cancer and heart trouble, had indeed increased but because a greater proportion of people were living to be old enough to have them.

"The very existence," he wrote, "of highly active compounds, some of which are stored in the tissues of a majority of people, requires prolonged investigation of those whose occupations enforce exposure many times greater than that of the general population. However, there is nothing to be gained * * * by irresponsible statements * * * in the absence of epidemiologic proof that a wide variety of illnesses from which mankind has suffered for generations is now caused * * * by the newer economic poisons."

As recently as the summer of 1962, an editorial in the Journal of the American Medical Association declared: "There is no confirmed record of clinical effect from eating food treated with pesticides according to approved agricultural practice."

Concern has been expressed that long-term ingestion of pesticide traces could, at some point in the future, impair fertility, and perhaps lead to genetic defects. Responsible scientists do not outrightly dismiss such possibilities. "Most scientists who are familiar with the field," says Dr. I. L. Baldwin, professor of Agriculture Biology at the University of Wisconsin, "feel that the danger of damage is slight." But they underscore the need for careful, continuing research and, in the meantime, for respectful, discriminating use of pesticides.

Some new light on possible pesticidal effects on human health—not from residues on food but from careless use of sprays—comes in a recent report by Dr. Douglas Gordon Campbell, a psychiatrist of the University of California Medical School, who cites a patient referred to him after many medical examinations had failed to show any organic cause for his blurred speech and loss of coordination.

On a hunch, Campbell had a test made of the man's fatty tissue. It showed six times the average amount of DDT. "When I asked about insecticides, he reported a pattern of use which corresponded to flareups of his symptoms. I am convinced he was suffering from chronic DDT poisoning." So, believes Campbell, were a number of other patients with obscure, seemingly neurotic symptoms, all of whom were either agricultural workers or avid gardeners.

When it comes to wildlife and fishery resources, pesticides have produced losses, sometimes alarming. There have been reports of marked declines in the numbers of chickadees, warblers, woodpeckers, blue jays, thrashers, and other varieties of birds in some places.

One study at Michigan State University covering an area that had 370 robins in 1954 revealed only 15 in 1957 after 3 years of spraying for mosquitoes and elm bark beetles. DDT apparently had stuck to tree leaves; earthworms ate the poisoned leaves when they fell; robins were poisoned when they ate the worms.

Soon after DDT became available, reports of farm-pond fish kills began to appear. In 1950, extensive fish kills were noted simultaneously in 14 fish streams tributary to the Tennessee River in Alabama, and investigation showed the cause to be insecticides washed from cotton fields when a storm front produced intensive thundershowers.

A Public Health Service investigation underway since 1959 indicates that water pollution by pesticides is no small affair. But it also appears that the problem of wildlife and fish losses has stemmed in large part from improper use of pesticides.

"Part of these losses," says Dr. V. H. Freed, chairman, Department of Agricultural Chemistry, Oregon State University, "occurred at a time when our knowledge concerning use of these chemicals was inadequate to avoid such unfortunate incidents. Today, however, our more advanced knowledge is such as to provide safeguards. * * * Suitable control and commonsense in the use of these chemicals need not result in serious hazard to either man or animals."

Many of those most concerned about damage to wildlife do not make blanket condemnations.

"Many and perhaps most control programs have been conducted without causing significant or longlasting effects upon wildlife," says Clarence Cottam, director of the Welder Wildlife Foundation. "These generally have been well directed where a minimum of poison has been used. Many other extensive projects, some less skillfully or less wisely directed, where large quantities of highly toxic, broad-spectrum, stable poisons have been broadcast, have proven highly destructive to wildlife resources."

In checking reports of serious wildlife losses, the National Academy of Sciences-National Research Council has found that a very high percentage relate to special programs involving less than 10 percent of all acres treated with pesticides. Such programs—a notable example is the one against the fire ant in several Southern States—are aimed at total eradication rather than immediate practical control and have used high dosages of insecticides.

"A review of accumulated literature on wildlife losses * * * seems to indicate clearly that increased dosage rates are a major factor. In such cases it should be the responsibility of the control agencies to keep dosages to the minimum required to obtain desired results," the Academy-Council report observes. And it also notes that pest-control agencies now are using, even in the fire-ant program, two spaced, low-dose applications that may be just as effective as the one walloping dose that is hazardous to wildlife.

Recently, too, H. Page Nicholson, Director of the Public Health Service investigation of water pollution by pesticides, has reported that aerial application of the chemicals is a frequent cause of acute fish poisoning. "In many such cases, improved skill in application or perhaps repair of leaky equipment may be all that is necessary to mitigate such losses."

Along with consideration of revised legislation in some States to tighten control of airplane spraying, Nicholson also notes the need for better soil-conservation practice to retard surface-water runoff, a significant factor in water contamination. And he strongly urges better education of farmers, pest control operators and the public about the consequences of misuse of pesticides. "Such instances as cleaning a spray rig in a creek, 'letting a little poison go into a lake to see what would happen,' or similar thoughtless or careless acts too frequently have been causes of serious episodes."

An argument heard increasingly today is that large-scale use of pesticides is upsetting natural balance—that in trying to suppress certain organisms, man has "tripped the delicate balance of populations by which nature accomplishes far-reaching aims."

"It would be more accurate to say that pesticides are used to suppress organisms already out of balance," declares Entomologist George C. Decker. "Nature recognizes no such categories as pests (and) beneficial forms. * * * in nature every living organism is engaged in relentless competition with every other organism upon which its interests impinge.

"Man is part of that environment, but by virtue of a unique attribute called intellect * * * has risen to a position of dominance. * * * in his ascent, man selected, protested, and propagated certain plants and animals. * * * other species detrimental to him or to (his desired) organisms he regards as pests to be suppressed."

Adds Chemical and Engineering News, an American Chemical Society publication: "Any human society beyond the nomadic tribes has developed through assault on the balance of nature."

Argues an editorial in the December 1962, issue of Progressive Farmer: "We upset the balance of nature to some extent whenever we break ground for a crop, kill a timber wolf, or cut a tree to build a house. It is unavoidable. It is only through disturbing nature's balance by intervening drastically in his own behalf that man has been able to live on earth in a civilized way."

What of possible alternatives to chemical pesticides?

Farming practices—plowing under crop refuse in which pests otherwise can survive over winter, use of crop rotation which breaks their food chain, and, where possible, planting at dates unfavorable for pests—are valuable but have not unfortunately, provided complete solutions.

Nor have resistant crop varieties. While many plants have been developed to resist specific pests, they may be attacked by other pests—and, after a time, even by new tough strains of the original pests against which they were bred.

Parasites and disease organisms have been introduced with some success. One notable example: use of imported beetles to combat the poisonous Klamath weed, widespread in California, has returned some 100,000 acres of land to useful production.

Sterilization clearly has possibilities. It is being used successfully in a campaign against the screwworm fly, which attacks livestock. Male flies treated with radiant energy from cobalt 60 are released in heavily infested areas. The sterile males mate with normal females. Eggs are produced but do not hatch. Since the female screwworm mates only once, the result is race suicide.

Along with radiation, more than 2,000 compounds have been under study for sterilant activity. Some have been found active for houseflies, mosquitoes and Mexican fruit flies. Although still experimental, there is reason now to believe, Dr. Alexejb Borkvac of the Agriculture Department's Entomology Research Division reported recently, "that chemosterilants will, possibly within the next decade, assume an important place in the control and eradication of many harmful insects and perhaps starlings, rats, and nematodes."

Recently, Dr. R. A. Harton of the Army Quartermaster Research and Engineering Command reported isolation of the sex attractant of the female cockroach, a substance so potent only a few molecules are sufficient to excite a male. "It may be used to control the insect by attracting the male to traps baited with it," Dr. Harton suggests. "As more insect attractants become known and available by synthesis, they can be expected to aid or even supplant existing methods of control.

Last December, University of Hawaii zoologists reported that 160 decibels of sound will kill a cockroach in 30 seconds and that male mosquitoes can be lured to an electrified screen by a device which imitates the noise of female mosquitoes wings. Although many practical obstacles remain to be overcome, the day may come, the researchers reported, "when a person could carry with him a little box about the size of a portable radio that would give off a sound, preferably ultrasonic, to drive insects from the area around him."

As of now, however, chemicals remain the mainstay. Many who worry about them clamor for more intensive efforts to develop practical, nonchemical methods of pest control. And perhaps one healthy result of the present controversy will be increased emphasis on, and financial support of, such research.

There could be other healthy results.

It seems clear that pesticides have made important contributions to human health and progress but that they can be dangerous when abused—and that they have been abused in the past.

It has been alleged that even some Government agencies have been callous in carrying out pest-control programs, failing to give enough consideration to hazards to animals and to how pesticides could be used with minimum risk.

In June 1961, before the present controversy erupted, a Federal Pest Control Review Board was appointed to scrutinize Federal agency programs. It points to some progress in promoting more refined and safer techniques—for example, substitution of spot treatment of breeding areas of grasshoppers and Mormon crickets in the West to head off incipient infestations, in place of widespread aerial spraying after pest populations have built up.

It has been suggested that the board be given definite authority by law to review, modify or veto pest-control programs proposed by Federal agencies. The special Pesticide Committee of the Federal Council for Science and Technology, set up in the summer of 1962 to review the whole problem of pesticides, may have something to say on this score along with making recommendations for other measures.

It has been suggested, too, that other States might well follow the lead of Massachusetts, which now has a pesticide board in the State department of public health with power to license aerial sprayers and others who apply pesticides commercially and to issue rules and regulations covering application of pesticides to protect public health, wildlife, waters and other natural resources.

But even the best legislation cannot solve the whole problem. Pesticides would seem to belong in the same category as automobiles—with great potential for good or harm, depending upon how they are used. And the present controversy, if it teaches not only farmers and pest-control operators but every home gardener and housewife to respect and use them with caution, will have served a very great purpose.

THE CUBAN SITUATION

Mr. SMATHERS. Mr. President, within the past few months there has been a preponderance of articles in our Nation's newspapers on the Cuban situation. Nearly every syndicated writer has devoted at least one column to this subject, and I would venture to say that there is hardly a daily newspaper in our country that has not expressed an editorial opinion on the matter.

Although the positions taken in these articles range from advocacy of a U.S.-led invasion of Cuba to a policy of temporary containment and coexistence, they all agree that Castro-communism cannot be permanently tolerated in the hemisphere and that something must be done to eradicate it once and for all.

This preoccupation over Cuba among our news media, not only in the abundance of printed words but also in the general tenor of the articles, I believe reflects two things. First of all, the American people are deeply concerned over Cuba and regard it as a serious threat to world peace. Secondly, because Cuba does not lend itself to an easy solution and because the problem has had such a long and unsatisfactory history, there is the feeling that somehow from the outpouring of words, the careful analysis of past events, and the calculated appraisal of future consequences and alternatives, someone might stumble upon an answer to this difficult problem.

Unfortunately, this has not been the case. Almost every article on Cuba that I have read in the past 3 months—and there have been many—goes to great lengths to explain why the United States cannot and must not support an invasion from its shores and warns that a blockade of the island might lead us into a direct confrontation with Russia and perhaps nuclear war. And with these observations, I generally agree.

But is there not some course of action we can follow which, while avoiding a conflict of American and Russian troops, will provide a realistic and long-range solution to the Cuban affair? I believe there is.

On March 15 of this year I made a lengthy Senate speech on Cuba, in which I proposed that the United States recognize a Cuban Government in exile. I do not intend to expound on this proposal, as I am sure that my Senate colleagues who are interested in this idea can refer to the CONGRESSIONAL RECORD of the aforementioned date.

I would not be presumptuous enough to state that my plan provides the only possible solution to the Cuban situation. But I do submit that it has as its final goal the ridding from the hemisphere of Fidel Castro and communism, and proposes to do this with the least possible involvement of the United States.

Furthermore, it seems to me incumbent upon us to offer to the displaced refugees from Cuba—men and women who have been driven from their homeland because they refuse to knuckle under the Communist dictatorship—some source of hope. We must do more than pay lip service to the sacrifices which they have made for the ideals of individual liberty and democracy which we in this country extol. This must be done if we are not to suffer a tremendous loss of prestige in the eyes of the world. And it must be done to provide much needed inspiration to the Cuban refugees, lest they become completely disillusioned with democracy as a way of life and a form of government.

Furthermore, all Latin Americans must know that we mean what we say about communism; that, actually, not only will we make speeches about it; but also we will in fact oppose it and we will help others to oppose it, and that our opposition is total and unrelenting.

Anyone, I am sure, who has been reading the papers in the past few days will agree that our relations with the Cuban exiles in the United States have never been worse. While not having all the facts in the matter, or being in a position to make a judgment in the dispute, I do believe that the frustration and resentment which exists among the exiles is due primarily to the fact that they do not see any U.S. proposal being thought out, much less implemented, to bring about the downfall of Castro communism.

The PRESIDING OFFICER. The time of the Senator from Florida has expired.

Mr. SMATHERS. Mr. President, I ask unanimous consent that I may proceed for an additional 2 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SMATHERS. Mr. President, let me make it clear that while the United States has a great stake in freeing Cuba, this is essentially a problem of the Cubans and the Latins. It is not the obligation of the United States to send a division of marines into Cuba, but I do believe that it is up to the United States to help develop an effective plan, a plan that places the major responsibility for the liberation of Cuba in the hands of the Cubans and Latins of Central and South America. In this way the final program undertaken would be one of Cubans versus Cubans, and Latins versus Latins.

Recognition of a Cuban government in exile, I believe, is the best way to make a start toward eliminating communism in Cuba from the hemisphere. Based in some Central American country and headed by Cubans, assisted by Latins, an exile government would necessarily require the material and financial assistance of the United States. But the manpower, the involvement of military troops—should that unhappy situation ever occur—and all the consequences of the use of arms, would rest collectively upon all the nations of this hemisphere, and not primarily upon the United States.

Because I believe in this program and think it should be afforded the consideration of those nations and peoples whose task it would be to implement this plan, I again recommend that a meeting of the Organization of American States be called for the purpose of submitting for their evaluation a proposal calling for recognition of a Cuban government in exile.

In suggesting this action, I am not attempting to force my idea for an exile government on the United States or any nation in the hemisphere.

I am happy to say, however, that since I first offered this proposal nearly 2 years ago, a number of spokesmen from Latin America, representing Latin American nations, have exhibited an interest and a desire to see an exile government for Cuba established.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. SMATHERS. I ask unanimous consent to proceed for 1 additional minute.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SMATHERS. In the Washington Post of April 15, Max Freedman, whose literary style and artistry in the use of the English language are unexcelled, mentioned in his column my idea for a Cuban government in exile. Although

Mr. Freedman opposes this plan for several reasons, he states that it has gained some strength.

Mr. President, I ask unanimous consent to have included in the RECORD at this point the article by Max Freedman to which I referred.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SOLUTION IN CUBA WILL NOT BE CHEAP—U.S. ATTITUDE TOWARD EXILES REFLECTS ABSENCE OF UNITY AMONG REFUGEES

(By Max Freedman)

Gov. Nelson Rockefeller has deserved, and has received, a widespread rebuke for his slapdash and mean-spirited comments on the Cuban problem. It is the beginning of wisdom, in everything that concerns Cuba, to resist the allurement of cheap solutions. This lesson is particularly true about the role of the Cuban refugees.

One must be strangely insensitive to the suffering of the Cuban people to look with anything but admiration and respect upon the determination of these refugees to overthrow the Castro regime. Many of these people know from cruel, personal experience the magnitude of the tyranny which has caught Cuba in its grip. All of them resent Cuba's inglorious drift into Communist servitude. They are ready to fight, and if necessary to die, for the redemption of their country. Their devotion is in the great tradition of freedom. Only a churl would question the credentials of their faith or remain skeptical about the ultimate triumph of liberty over despotism.

But idealism by itself does not make a policy. The harsh tasks which confront the refugees and the American Government require the most careful exercise of responsible judgment. They require the selection of the right men, the right objectives, and the right time. Otherwise the enterprise of Cuban freedom will flounder in failure.

There is a common impression, whose popularity does not atone for its error, that the Kennedy administration in some craven way has kept the refugee leaders from more resolute action. This version of recent events will be supported by no official in Washington who has been given a significant part in the shaping of Cuban policy. The administration, despite many contrary rumors, has vetoed or diluted no heroic program of unified action for the sufficient reason that no such program has been presented. It is dramatic but misleading to picture the Cuban refugee leaders as men aflame with a noble purpose which they are unable to reach because of the awkward timidities of American officials.

It is closer to the mark to suggest that the refugees must still compose all their differences and agree on a policy that can be defended in terms of success and not merely in terms of splendid aspiration. Sweetening one's judgment with every measure of generosity, it is still necessary to say that the refugee leaders have not always been the wisest or the most farsighted counsellors on Cuban policy.

Perhaps it is unreasonable to expect this wisdom from men suffering such adversity. But here is one neglected element of the problem that deserves to be taken into account before the United States makes its next move in Cuban affairs.

Nor is it possible to ignore this problem when one weighs the risks and the gains of forming a Cuban Government-in-exile entitled to full and open support from the United States. This proposal, first advanced many months ago by Senator SMATHERS, Democrat, of Florida, had a dusty reception but it has gained strength, if only because of the failure of better ideas to emerge in the debate. More will be heard of it in coming weeks.

The history of governments in exile is not encouraging. Few of them ever succeed in becoming the real government of the country for a significant period. Think back to the days of the last war. A cluster of exiled governments took refuge in London.

They had access to the British and American governments. In some cases they had promises of political and military support. But in the main this comradeship was a delusion. Events went their own way, and the chatter of exiled leaders signified little. The most notable exception was General de Gaulle, and he, significantly enough, was always the exile who showed the greatest independence in his dealings with Washington and London.

Has this experience any meaning for Cuba today? It has a direct lesson for the refugee leaders no less than for the American Government. The United States may blunder into a premature and avoidable risk if it sponsors a Cuban Government in exile now. It may choose the wrong men for such a government. There are other objections, but that one is enough to justify patient analysis before any final judgment is made. The Cuban leaders must ask themselves whether they would really wish to be thus identified, in public, as the clients and wards of the United States. That may not be the passage to power in Cuba.

The future of Cuba will be determined less by Washington or Miami than by what happens inside Cuba itself. The refugees and the American Government can succeed in their common task only if they place themselves on the side of the emergent forces in Cuba that will one day be dominant in a free country. That day may not be as distant as the impatient advocates of immediate action now fear. It certainly will never be hastened by the reckless advice of Governor Rockefeller.

Mr. SMATHERS. Mr. President, it is entirely possible that the Latin American nations, upon closer examination of this proposal for a Cuban government in exile, will also reject it as being infeasible, or because the time is not "ripe" for undertaking this kind of program. I only ask that, by calling a meeting of the Organization of American States, we give them the opportunity to decide—no matter what their decision may be.

It is my judgment that after all the facts are in and the situation carefully weighed, the Organization of American States will conclude that recognition of a Cuban government in exile is the best course of action on which we should embark in order to free the hemisphere from Castro and communism.

Some time ago, our esteemed majority leader, the great Senator from Montana [Mr. MANSFIELD], encouraged all those who have constructive solutions to the Cuban problem to come forth with them. I have done so. In some areas my plan has been criticized, but I submit that at least one of its virtues is that it is a plan, and I do not know of any other constructive plan that has been proposed. I think it will work.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senator from Florida may have 1 additional minute.

The PRESIDING OFFICER. Without objection, the Senator from Florida is recognized for 1 additional minute.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. SMATHERS. I am delighted to yield to the distinguished Senator from Montana.

Mr. MANSFIELD. I may say to the Senator from Florida that shortly I intend to make some remarks on the Cuban situation, and most especially on the speech being made during the noon hour by the Senator from New York [Mr. KEATING]. I may say, though, relative to what the distinguished Senator from Florida has just said, that he has offered proposals, that his statements on the Cuban situation have not been general, and one particular proposal, his idea of a government-in-exile, is worthy of serious consideration, because we cannot operate with 12 major groups of Cubans, and numerous smaller groups going off in all directions. That has been one of the weaknesses in our relations between the Cubans-in-exile and the Government of the United States. That is one of the weaknesses which must be corrected before any effective policy can be found.

I congratulate the Senator from Florida for being consistent in this instance, as he has in the others, and, most important, for coming here with proposals which he thinks will be effective and which are worthy of serious consideration.

Mr. SMATHERS. I thank the Senator from Montana.

MIDDLE EAST POLICY

Mr. WILLIAMS of New Jersey. Mr. President, in recent weeks a number of disturbing reports have appeared in the press regarding the growing missile capacity of Nasser's Egypt. The fact that these missiles are being built with the help of German scientists, many of whom are former Nazis, is a bitter reminder that evils spawned by their Hitler regime still exist. There can be no doubt about how President Nasser intends to use these short-range weapons; they are and will be a direct threat to Israel, still the No. 1 enemy of the Arab States. In the shifting morass of Arabian politics, with its constantly changing alliances and regimes, the one solid ground of agreement has been the irrational hatred for the free, democratic State of Israel. The dangers of this situation are now increased by the new alliance of Iraq, Syria, and Egypt—all three ancient enemies of Israel. Syria and Egypt both border directly on Israel, while the well-equipped army of Iraq is separated only by the small Kingdom of Jordan. Israel had some respite while General Kassem ruled Iraq and the Arab world was split by his bitter feud with Nasser. With the formation of a new United Arab Republic, Iraq, Egypt, and Syria will again constitute a powerful threat to her security.

Mr. President, our ties with Israel have been close from the very foundation of that country. We have watched with sympathy and admiration her struggle for independence and her growth as a free and democratic nation. In the beginning many thought that this small country could not long survive. But Israel, approaching her 15th anniversary, has grown to a point where she is now lending valuable technical assistance to the developing nations of Africa. Yet, in a part of the world where politics are too often marred by bloody revolutions, dictatorial rule and feudal despotism, Israel has always remained faithful to free democratic institutions. The progress of Israel is vivid proof that even in the Middle East a nation can defend itself and develop its economy without recourse to authoritarian rule. Israel has always exemplified the ideals of the free world.

Are Egyptian threats to Israel genuine or only for propaganda purposes? It does not seem logical that a country with the meager capital resources of Egypt would spend the vast sums required for missile development just for their parade value. Neither can these weapons be dismissed as defensive, for the facts show the weapons are ground-to-ground missiles with the range to strike Israel's major cities. If President Nasser ever decides to use the missiles he has developed at such great expense, they will give him a very great, and possibly decisive, military advantage.

Mr. President, the delicate balance of power in the Middle East has maintained a precarious peace so far. It is now undergoing a radical shift. The Middle East is beginning its own small-scale version of the expensive East-West arms race. It must be remembered that Israel is developing a nuclear capacity of her own, a nuclear capacity that would probably be turned to warlike uses, if the external threats become great enough. We face an explosion in the Middle Eastern tinderbox that would endanger the life of our faithful friend, Israel, and open the way for renewed Russian intervention. Now is the time to press for a peaceful settlement to the issues that divide Israel from her neighbors before negotiations have to be conducted in the heat and confusion of a crisis atmosphere. We must continue to make every effort, both through the United Nations and our own diplomacy, to bring an end to the Middle Eastern arms race.

There is no excuse for standing by while the forces for conflict gain momentum. Nothing is more tempting to a potential aggressor than the feeling that he might be able to get away with something. Let Nasser be absolutely sure of the disastrous consequences of starting a war against Israel.

There are three steps that should be taken to preserve the balance of power and the peace of the Middle East. First, this Government should reaffirm our intention to uphold our moral obligation to defend the independence of Israel.

Secondly, the strongest pressure should be brought to bear on Egypt, already a substantial beneficiary of our aid, to abandon the senseless development of unnecessary missiles. Just because Egypt has in recent months adopted a strongly anti-Communist line does not give her an absolute guarantee of U.S. aid, particularly if this aid is indirectly used to threaten the security of other nations.

Thirdly, we should also call upon the German Government to use every legal means to prevent the employment of their citizens in this deadly work. Although we cannot blame the German Government for the unworthy actions of some of her citizens, Germany has a heavy responsibility to do everything in her power to put an end to their activities.

The aim of our Middle Eastern foreign policy is not merely making sure that everyone is suitably anti-Communist. Our goal is to insure the peaceful political and economic development of all the Middle Eastern nations. If these nations become truly independent and economically strong nations providing a decent life for their people, we would have nothing to fear from Communist infiltration. But the outbreak of war would mean the total failure of our Middle Eastern policy. Now is the time to make sure that such a war never comes about, however small the possibility.

Mr. President, I ask unanimous consent that an article from Newsweek magazine and an editorial from the Washington Post which describe the dangerous situation in the Middle East be printed in the body of the RECORD.

There being no objection, the article and editorial were ordered to be printed in the RECORD, as follows:

[From Newsweek, Apr. 15, 1963]

ROCKETS IN EGYPT

Once before the small one had entered Prime Minister David Ben-Gurion's office in Jerusalem. All he said was: "Adolf Eichmann is captured. He is on his way to Israel." Ben-Gurion held out his arms and embraced Iser Helperin, his secret service chief. Last week, the small one was back again, visiting the Prime Minister at a vacation hotel on the banks of Lake Tiberias. By the time the interview was over, Helperin knew that he had to resign over a matter of policy—and he did.

Helperin quit because his latest mission had carried him into the delicate realm of international politics—particularly the relations between Israel and West Germany. In his efforts to see to it that the 300 German technicians who work in Egypt's Military Factory 333 return home, he has poached on B-G's particular strategy to keep Israel and West Germany on amicable terms.

Military Factory 333 (mainly devoted to the assembly of small jet trainers) is the place on the banks of the Nile, near Cairo, where the Egyptians are reported to be producing ground-to-ground rockets. By modern standards, these missiles are not very good, hardly more advanced than the V2's which Hitler rained down on Antwerp during World War II. This reflection is of little consolation to the Israelis, for there is no defense against these rockets with their high explosives and they are powerful enough to reach Israel's crowded cities.

The key German rocketeers—perhaps 12 altogether—are headed by Prof. Wolfgang Pilz, a silver-haired veteran of Nazi wartime rocket development. Protected by a heavy security guard, the team lives in and around the fashionable Kubba suburb of Cairo, changing residence every few months and never appearing in public.

THE PAST

Other scientists and technicians in Egypt—around 200 of them—are working on the prototype of a supersonic jet fighter for President Nasser. The brains behind the team, from his headquarters in Augsburg, is Hitler's ace designer Willy Messerschmitt, whose planes gave the Luftwaffe air supremacy during the early part of World War II. Two of Messerschmitt's top men in Egypt are former Nazis. Ferdinand Brandner, a 51-year-old Austrian, was a colonel in Hitler's Storm Troops. Senior medical officer of the team is the notorious Hans Eisele, who conducted human guinea pig experiments at Buchenwald.

These scientists have been living dangerously in recent months. Although there is no concrete proof, it would seem that they have been hounded by the agents of the small one. Six Egyptian workers were killed when they opened a crate and picked up a book of instructions that blew up. The German wife of Egyptian scientist Hassan Kamel was killed when a bomb, intended for her husband, exploded in a plane over Germany. One German rocket expert, Heinz Krug, working for the Egyptians, mysteriously disappeared, and is rumored to be in the hands of the Israeli secret police.

THE ENEMY

There is no evidence that Ben-Gurion is against this campaign of intimidation. But he does believe that it should not interfere with good relations with West Germany, particularly as Bonn is still sending Israel payments under its $820 million reparation agreement. Helperin evidently didn't agree, since he launched a worldwide press attack that tried to place the blame on Adenauer's government for condoning a Nazi-like effort to help Nasser, a sworn enemy of the Jews. Moreover, the ominous fact that Egypt may soon possess an arsenal of ground-to-ground high-explosive missiles was obscured by inflammatory talk of nuclear and bacteriological warheads.

The whole affair has actually deeply embarrassed the West German Government which is trying to live down its Nazi past. Bonn's Foreign Minister is seriously considering canceling passports held by the scientists if they continue their missile-building activities in Egypt.

ISRAEL'S SECURITY

The American anxiety about armaments in the Middle East was inadequately reflected in Under Secretary of State Harriman's curious letter to a New York Congressman. Writing to LEONARD FARBSTEIN, Mr. Harriman said that alarm over German scientists in the United Arab Republic was exaggerated—after all, if the Germans weren't there, Egypt would be more dependent on the Soviet Union for developing missiles and jet aircraft. This comes close to arguing that we should be grateful for the Soviet forces in Cuba because otherwise there might be a Chinese army in the Caribbean.

What is missing in Mr. Harriman's note—and indeed in most of the lofty State Department utterances on the Middle East—is any real feeling for the plight of Israel. Here is a tiny country wholly surrounded by nations that have sworn its elimination. The United Arab Republic, now flushed with political success in Iraq and Syria, is on the verge of developing ground-to-ground missiles that could rain terror on Israel. It is of small comfort to Israel that these may be good, non-Communist missiles developed with the help of Germans so thoroughly anti-Russian that some of them worked for Hitler.

The air surely ought to be cleared, and quickly, by a reassertion of American interest in the continued security of Israel. Of course this will be interpreted by some Arabs as further tribute to the so-called "Jewish vote" which, like a pernicious ectoplasm, is supposed to permeate American policy. But where was the Jewish vote at the height of an election campaign in 1956 when the United States not only opposed Israeli aggression but also Great Britain and France—all partners in the folly of Suez?

In point of fact, the United States has leaned over backward to encourage cordial relations with President Nasser and all other Arab States. There is broad sympathy for the social goals of the United Arab Republic. This support has taken concrete form in foreign aid, and in the case of recognizing the republican regime of Yemen, Washington has crawled out on a limb in good part in order to demonstrate good faith toward Arab nationalism.

But if the United Arab Republic is determined to develop an offensive missile capacity, then it should be made plain that the United States will not simply express pained disapproval and find comfort in the political purity of the weapons. Ground-to-ground missiles would place Israel at a perilous disadvantage, even if conventional bombs were lodged in their nose. Missiles can strike at a compact target and nullify the reserve power of Israel's Army. If Mr. Nasser develops an operational offensive missile, then there will be no alternative but to see that Israel has an adequate deterrent capacity too.

No American can contemplate without sorrow such an escalation in the Middle East arms race. Even the Soviet Union has given tacit recognition to the delicate balance of forces in the area; though Moscow has been willing to provide defensive missiles to Arab countries, it has stopped short of assistance in equipping Iraq or the United Arab Republic with offensive ballistic missiles.

The immediate task of American diplomacy is to explore every reasonable means of curtailing arms shipments to the Middle East on a multilateral basis. Specifically, this could include informal approaches to the Soviet Union, now in a mood of disenchanted reappraisal concerning the Arab world. There is at least a theoretical common ground between East and West on the desirability of preserving the peace in the Middle East. The world would breathe easier if both offensive missiles and nuclear devices were ruled out of the region under an agreement that provided effective inspection.

This should be the goal of American policy, and it would be vastly encouraging if the United States would state a large purpose rather than retreat into the lifeless platitudes of the Harriman letter ("the U.S. Government is, and has been, exploring all avenues of approach to an effective amelioration of a worrisome and complicated problem"). At the same time, it ought to be made clear that if all attempts at regional arms control fail, Israel will get the help it needs and not just snappish lectures about "worrisome and complicated problems."

THE NATIONAL ECONOMY

Mr. ALLOTT. Mr. President, once in a while some of us receive communications which are really outstanding, commenting on events of the day. Some time ago I received a letter from Thomas Patterson Campbell, of Denver, a longtime friend of mine, whose grandfather was a Member of this body. The letter was later printed in the Denver Post. I ask unanimous consent that it be printed at this point in my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DENVER COLO.,
February 20, 1963.

HON. GORDON ALLOTT,
Senate Office Building,
Washington, D.C.

DEAR GORDON: As the years sneak by, we all become somewhat accustomed to the sights and sounds of idols tumbling off their pedestals. But, in the idiom of the day, I was really bugged when the revered Walter Lippmann suddenly appeared in the role of pitchman for Doc Heller's shell game (Denver Post, Feb. 1, 1963). True to type, of course, Walter was a bit condescending in his spiel and quite evidently annoyed that some of the yokels were a bit reluctant to be fleeced again.

Well, out here on the old frontier, some of us peasants are not convinced that if the same mistake is repeated often enough, everything will turn out right—even when assured by the learned Walter that "the principle of the 1964 budget is a new one—because the country is confronted with an economic problem which first appeared toward the end of 1957."

Nor were we greatly reassured when another self-appointed (though lesser) prophet, one Sylvia Porter (Post, Jan. 30, 1963), proclaimed that all our economic woes can be cured by greater consumer spending, by "increasing the disposable personal incomes of consumers. The Federal Government can help achieve this by paying out more than it takes in or by cutting personal income taxes—or both. The Federal Reserve System can help achieve this by making borrowing easier and cheaper, for this encourages consumers to borrow and spend more than they earn."

In passing, we got a covert chuckle out of Conrad's heretical cartoon (Jan. 30, 1963), depicting a wife telling her frantic, debt-ridden husband: "According to Mr. Kennedy, the reason we're broke is we're not far enough in debt."

For whatever reason, it is evident that the Messrs. Lippmann and Heller (and their assorted shills) have chosen to ignore (if they ever knew) the history of money and debt. Otherwise they would have noted that their wonderful new principle was first tried out in Athens some 2,600 years ago; that it has been repeated, without significant variation, in every land, language, and age, by both public and private crooks, innumerable times, and that it has been a uniform and dismal failure in each and every attempt.

But apparently the lesson is never learned. Some 200 years after Solon rescued the farmers and shopkeepers of Athens from bondage to creditors (594 B.C.), by abrogating all debts and debasing the coinage, Aristophanes ("Frogs") wrote: "In our Republic bad citizens are preferred to good, just as bad money circulates while good disappears." (Some 1,900 years later, Sir Thomas Gresham rediscovered this truth); and about 2,000 years after Aristophanes, Thomas B. Macauley (History of England) commented: "It may be doubted whether all the misery which had been inflicted on the English nation—by bad kings, bad ministers, bad parliaments and bad judges was equal to the misery caused by bad crowns and bad shillings."

Again, and hastening to a period the venerable Lippmann should remember in his own experience, in 1919 the Weimar Republic found itself with an unmanageable internal debt. Perhaps the Germans did not realize that they should not worry about such trivialities; after all, they owed it to themselves. But their duly elected rulers chose to pay off that debt by increasing the disposable personal incomes of consumers in a simple, direct method; namely, by printing more and more money. By 1923 the Reichsmark was worth (in purchasing power) one-trillionth of its original gold value; the debt had been wiped out, along with the entire middle class, and the way had been paved for the advent of Hitler, the Third Reich, and the Second World War.

Surely Uncle Walter remembers October 24, 1929. But one wonders if he knows that the speculative stock bubble was punctured by selling based initially on distrust of foreign borrowing in New York (to stimulate artificial gold movements) and by a break in the bond market in May 1928? Does he know what closed the Kreditanstalt in Vienna in September 1931, and how that forced England and France off the gold standard; not to mention what later happened to their currencies?

Surely Lippmann, Heller and Co. recall the 8 years of tax and tax, spend and spend, elect and elect under F.D.R.; 8 years of pumppriming, killing pigs, plowing under crops, confiscating gold, tinkering with the discount rate, clipping the dollar by 41 cents; 8 years of pirouetting to the arcane incantations of John Maynard Keynes—then and now (as Lord Keynes) the high potentate of the ancient order of the greek swindle—and finally sideslipping into World War II with some 14 percent of the civilian labor force still unemployed.

That's all history; and maybe Uncle Walter holds with G. B. Shaw that history is a set of lies agreed upon. Anyway, say both Walters, things are all new and different now: "The chronic sluggishness since 1957 has been due to insufficient total demand."

I do not know, of course, how or by what yardstick the learned Lippmann defines "total demand." We who are not included in the sacrosanct circle of economic advisers to the President have the quaint notion that consumer demand is measured by personal consumption expenditures, is published regularly (component of gross national product) in the Department of Commerce Survey of Current Business. Consumer spending, in turn, is related to national income. The record shows, however, that changes in national income do not cause equivalent changes in consumer spending because many ordinary people have the weird habit of saving a part of their disposable income. For instance, in the period 1949–51, the national income increased some $64 billion a year, or 30 percent, while consumer spending rose only about $29 billion, or 16 percent. Again, in the period 1956–58, the national income increased by only about $9 billion (4 percent), but consumer spending went up some $23 billion (9 percent). The reason for this seeming anomaly is that personal savings more than doubled in the 1949–51 period and remained almost constant in the fateful 1956–58 years. Or, in brief, people do not always and invariably spend 93 percent of their disposable income; nor will total demand rise quickly after a tax reduction. Nor, by the same token, would the elimination of some $12 billion in wasteful, deficit spending send our economy roaring to hell in a Jaguar.

Heller, et al., complain bitterly that the alleged sluggishness of the economy is entirely the fault of private business: lack of enterprise, no imagination, timidity, outright restraint of trade, etc. Therefore, they conclude, Government must make a bold attempt to overcome the sluggishness. This involves the tacit assumption, so dear to all Socialists, that once a person or a group of people are elected, appointed or in any way associated with the Federal Government, he or they undergo a miraculous metamorphosis: singly and collectively they become omniscient; they would rule, under Divine Right, more and more by regulation and less and less by law.

As for private business, it is no better or worse off now than it has been for the last 18 years. It is caught between the Scylla of Big Government and the Charybdis of Big Labor. The usual pattern of events has been, and will be again, that as business improves, manufacturers have to use their less efficient facilities; they hire more inexperienced workers and pay increasingly higher wages; costs increase, profit margins narrow—and may become negative even while sales are still rising. Then comes a "recession"—and the cycle starts over again, but at an even higher wage level.

If there is anything, any one factor, which is relatively new in our economic picture, it is foreign competition. We rebuilt Europe and Japan; we have poured out billions in foreign aid to all and sundry; and in the last few years the EEC (Common Market) has become an increasingly important factor in all Western bloc trade (see Balance of Payments, Survey of Current Business, p. 17 et seq., January 1963).

But even this adverse condition does not make our prospect hopeless. If big labor were made responsible and accountable, by having to incorporate and being subject to the antitrust laws; and if big Government will stop repeating the same childish mistakes ad nauseam and refuse to swallow the nostrums offered by the Keyneses and the Hellers, we cannot only survive, but continue to grow and prosper. If, however, we insist that consumers (we, the people) must "borrow and spend more than they earn" and that the Federal Government, by plan and design, must pay out more than it takes in, then it is inevitable that our burden of debt, both private and public, will become intolerable and unmanageable. In that unhappy event, we shall have to contrive our own version of Solon's "Seisachtheia": either repudiate all debts outright or wipe them out by inflation. In either case, of course, our economic structure would be shattered and all creditors of all classes and types ruined, together with pensioners, annuity holders and a host of other innocent bystanders living on fixed-dollar income. Hoc facto, the way will be wide open for the Lippmanns, the Hellers, and their fellow travelers to lead us down the primrose path, to the lilt of lunatic laughter, into the promised land of socialism and equal poverty for all.

Nonetheless, and with best personal regards, I beg to remain,

Sincerely yours,

T. P. Campbell.

PRESERVING GOVERNMENT CONTRACT INTEGRITY

Mr. KUCHEL. Mr. President, I ask unanimous consent to have printed in the Record the text of an interview by Ralph W. Crosby, of Iron Age magazine, with Senator Clifford P. Case on the subject of defense contracts. I have been glad to join with Senator Case in his efforts to achieve safeguards to insure the integrity of our Government contract processes.

I was glad to see the Iron Age article, and also to read in the press that Secretary of Defense Robert S. McNamara and his deputy, Roswell Gilpatric, have endorsed the objectives of the proposed legislation which some of us have joined the Senator from New Jersey in sponsoring.

There being no objection, the interview was ordered to be printed in the Record, as follows:

Safeguards Needed for Contract

(Government contracts have come under heated attack. Political influence and other pressures have been charged. In this exclusive interview Senator Case warns of the dangers, suggests measures and safeguards.)

(By R. W. Crosby)

Question. Senator Case, you are in the center of a broad controversy over Government contract policies. What would you say is the basic issue in the whole controversy over influence on contract awards, lack of competitive bidding, and the other problems involved?

Answer. The basic issue is protection of the national interest. As we all know, Government defense contracts are big business. In the past fiscal year, the Defense Department awarded more than $28 billion in contracts. Approximately 35 percent of these were on the basis of competitive bidding. The remaining 65 percent—almost two-thirds of the total—were made in the category of negotiated contracts.

With such huge sums involved and with decisions made in the private way in which negotiated contracts are developed, it is more important than ever that the national interest be the sole criterion in awarding Government contracts and, among other things, that we get a dollar's worth for a dollar spent.

These contracts are of such substantial amounts that in some cases success or failure in winning a particular contract may well mean making or breaking a particular firm. They have heavy impact on the welfare of hundreds of thousands of people—employees, management, and stockholders. They affect vitally the interest of entire communities and, indeed, the interest of many States, including my own.

Question. Do you believe, then, that the U.S. contract award system needs revision?

Answer. If the official contract policy were carried out, we would need no revision. But recent actions and statements in high official circles, indeed in the highest, raise doubts as to whether what actually goes on conforms with official policy.

Question. What, exactly, are the problem areas in the contract controversy?

Answer. The problem area most prominent in the news these days is where evaluation panels, consisting of officials of an agency or outside experts, make recommendations as to a contract award, which are subsequently reversed by the head of the agency.

A full disclosure of all relevant facts would benefit everybody. An informed public opinion would exert irresistible weight in support of decisions which are soundly based and against those which are not.

Another problem area revolves around reports of political influence in contract awards. Again, the principle of full disclosure of all ex parte communications by Members of Congress or the executive branch, or anyone other than the bidder, would help protect the integrity of the contracting system.

A third problem is that while several committees of the House and Senate have partial jurisdiction over these contracts, the responsibility is not centralized in one committee. Because of this lack, Congress does not have an experienced, continuing watchdog organization to check large and complicated contract awards.

Question. Would you give us some examples which would illustrate these problems?

Answer. Yes, I would refer to two situations.

A major project in the scientific world is the so-called Mohole project, to drill a hole in the bottom of the sea as a part of a tremendous geological project being undertaken by the National Science Foundation to pierce the earth's crust and sample its interior. This has been termed "man's greatest geological project," and the 5-year contract was originally estimated to cost $43,600,000. Brown & Root, Inc., of Houston, Tex., was awarded this plum despite the fact that one NSF panel rated this firm third best in the field of three and another NSF panel rated four firms as better qualified.

Initial progress reports on this project indicate a minimum cost of $65 to $70 million—more than 50 percent over the original estimate—and that the project is behind schedule.

A similar topside reversal of evaluation panels is apparently involved in a major Defense Department aircraft contract award, for the TFX fighter plane.

The hearings by the Senate Permanent Investigations Subcommittee have featured charges of substantial errors in mathematical computations as well as some unusual procedures in selecting the winning bidder.

Question. How do you propose that these problems be solved?

Answer. I have proposed legislation to carry out a three-point program based on my experience on the Armed Services, Space, and Appropriations Committees. The legislation, embodied in bills S. 960 and S. 961, would:

1. Require that a record be maintained, open to public inspection, of all ex parte communications, whether written or oral, in regard to a defense or space contract by anyone, including Members of Congress or the executive branch, other than the bidder.

2. Require full, complete, and prompt public disclosure of the basis on which a negotiated contract award is made, except for information classified for security provisions or where forbidden by existing law.

3. Establish a special joint House-Senate committee authorized to review defense and space contract awards with primary attention to negotiated contracts. This watchdog committee would consist of a Democrat and a Republican appointed from each of the following committees: Senate and House Armed Services Committees, the Senate and House Appropriations Committees, the Senate and House Government Operations Committees, and the Senate and House Space Committees.

Timely disclosure is important for several reasons. From the point of view of the Government, if there has been an error or favoritism in an award, it can be corrected before funds are committed or work has been started for which the Government is obligated to pay. From the point of view of both the Government and the contractors who lost out, review after the point of no return, as it were, has been reached may be helpful for the future but does nothing to right the immediate wrong.

Question. What are the chances of passage for these bills?

Answer. Many people agree action is necessary, but it will be difficult to attain even though five other Senators have joined in sponsoring the bills. The proposed Joint Committee on Contracts cuts across many privileges and prerequisites which present committee chairmen cling to.

Unless we take corrective action, and take it soon, there is a real danger that the "I can do more" pattern will become deeply fixed in our politics and economy. Not only will this lower the standards of political campaigning across the country, it involves the very real hazard that the military-industrial complex of which former President Eisenhower warned in his farewell address, may become entrenched as a military-industrial-political complex. Such a development could have far-reaching and serious implications for our society here at home and our relations in the world at large.

Question. Do you believe, as some Congressmen have charged, that certain contracting rules are rigged to assure certain companies will win specific contracts?

Answer. I am not familiar with these charges. Of my own knowledge, I have no evidence that contracting rules are rigged in favor of certain companies. My general impression of the career personnel in the Pentagon is that they are dedicated, honest people who are eager to maintain the integrity of the Government's contracting system. I believe, therefore, that they and many of the political appointees would welcome the legislation which I have proposed.

Question. Senator, what about the use of contracts to coerce companies into following a certain Government policy?

Answer. I have not sufficiently studied the issue nor the legislation proposed to curb it to make a judgment on that. However, it seems to me that public disclosure of contract communications, as sought in my bills, would take care of this problem, if it is a problem. In fact, the legislation I am proposing would create a place for everyone to go. It would operate against influence and pressure all along the line.

Question. Are businessmen included in this "everyone"?

Answer. Yes. It is disturbing to me that a contractor may remain quiet in these cases for fear that he will get in disfavor with Government officials. The contractor must always worry about how his actions will affect his position on the next contract. Because future contracts mean so much to his business, the contractor is liable to yield to pressures. But bringing contract negotiations before the public and having Congress review the contracts should relieve the burden.

Question. You mentioned the controversy over the TFX contract, Senator. What do you believe will come out of the investigation of the handling of this contract?

Answer. It is difficult to predict, since the investigation is still underway. I do believe that the investigation has been a useful one in that it has reminded the public how important individual contracts can be to particular communities and States, and has demonstrated the need for giving the public more facts on how the successful bidders on such major contracts are chosen. Comments by editorial writers and columnists have indicated that they feel that this incident has demonstrated the need for legislation along the lines of the bills which I have proposed.

THREAT TO ISRAEL'S SECURITY

Mr. **KUCHEL**. Mr. President, my distinguished colleague, the senior Senator from New Jersey [Mr. CASE], has called my attention to an editorial entitled "Israel's Security," which appeared in the Washington Post Saturday, April 13.

As one of the Senators who recently wrote to the President about the problem of German scientists participating in the development of missiles and other offensive weapons in the United Arab Republic, I, too, was much interested in this editorial.

Since my colleague is today necessarily absent, I ask unanimous consent, Mr. President, to have printed in the RECORD a brief statement by Senator CASE and the text of the editorial on which he comments.

There being no objection, the statement and editorial were ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR CASE

The participation of German scientists in the development and construction of missiles and other offensive weapons in the United Arab Republic is a matter of deep concern to all those interested in the preservation of peace, not only in the Middle East, but for the entire world.

The development of such weapons would threaten the very existence of the State of Israel, whose Arab neighbors have repeatedly expressed their intent to drive Israel into the sea.

Our own Government's role in this matter is a crucial factor. I am disturbed by the apparent lack of any firm policy on our part with regard to the acute dangers of a spiraling arms race in the Middle East. I am also deeply troubled by the apparent lack of concern for the desperate situation in which Israel would find itself in the event that an expanding United Arab Republic, aided by German scientists, developed ground-to-ground missiles which could overcome the rugged ability and defensive skills of this brave little land.

It would certainly not be an adequate response by this country to let this matter drift, as the Middle Eastern arms race escalates. I hope that we will soon have more positive word from the Department of State on the results of its reported exploring all avenues of approach.

The lead editorial in the Washington Post of April 13 called attention to the lack of any real feeling for the plight of Israel in the Department's recent note. I believe it will be of interest to all who are seriously concerned with this problem.

[From the Washington Post, Apr. 13, 1963]

ISRAEL'S SECURITY

The American anxiety about armaments in the Middle East was inadequately reflected in Under Secretary of State Harriman's curious letter to a New York Congressman. Writing to LEONARD FARBSTEIN, Mr. Harriman said that alarm over German scientists in the United Arab Republic was exaggerated—after all, if the Germans weren't there, Egypt would be more dependent on the Soviet Union for developing missiles and jet aircraft. This comes close to arguing that we should be grateful for the Soviet forces in Cuba because otherwise there might be a Chinese army in the Caribbean.

What is missing in Mr. Harriman's note—and indeed in most of the lofty State Department utterances on the Middle East—is any real feeling for the plight of Israel. Here is a tiny country wholly surrounded by nations that have sworn its elimination. The United Arab Republic, now flushed with political success in Iraq and Syria, is on the verge of developing ground-to-ground missiles that could rain terror on Israel. It is of small comfort to Israel that these may be good, non-Communist missiles developed with the help of Germans so thoroughly anti-Russian that some of them worked for Hitler.

The air surely ought to be cleared, and quickly, by a reassertion of American interest in the continued security of Israel. Of course this will be interpreted by some Arabs as further tribute to the so-called Jewish vote which, like a pernicious ectoplasm, is supposed to permeate American policy. But where was the Jewish vote at the height of an election campaign in 1956 when the United States not only opposed Israeli aggression but also Great Britain and France—all partners in the folly of Suez?

In point of fact, the United States has leaned over backwards to encourage cordial relations with President Nasser and all other Arab States. There is broad sympathy for the social goals of the United Arab Republic. This support has taken concrete form in foreign aid, and in the case of recognizing the republican regime of Yemen. Washington has crawled out on a limb in good part in order to demonstrate good faith toward Arab nationalism.

But if the United Arab Republic is determined to develop an offensive missile capacity, then it should be made plain that the United States will not simply express pained disapproval and find comfort in the political purity of the weapons. Ground-to-ground missiles would place Israel at a perilous disadvantage, even if conventional bombs were lodged in their nose. Missiles can strike at a compact target and nullify the reserve power of Israel's Army. If Mr. Nasser develops an operational offensive missile, then there will be no alternative but to see that Israel has an adequate deterrent capacity, too.

No American can contemplate without sorrow such an escalation in the Middle East arms race. Even the Soviet Union has given tacit recognition to the delicate balance of forces in the area; though Moscow has been willing to provide defensive missiles to Arab countries, it has stopped short of assistance in equipping Iraq or the United Arab Republic offensive ballistic missiles.

The immediate task of American diplomacy is to explore every reasonable means of curtailing arms shipments to the Middle East on a multilateral basis. Specifically, this could include informal approaches to the Soviet Union, now in a mood of disenchanted reappraisal concerning the Arab world. There is at least a theoretical common ground between East and West on the desirability of preserving the peace in the Middle East. The world would breathe easier if both offensive missiles and nuclear devices were ruled out of the region under an agreement that provided effective inspection.

This should be the goal of American policy, and it would be vastly encouraging if the United States would state a large purpose rather than retreat into the lifeless platitudes of the Harriman letter—"the U.S. Government is, and has been, exploring all avenues of approach to an effective amelioration of worrisome and complicated problems." At the same time, it ought to be made clear that if all attempts at regional arms control fail, Israel will get the help it needs and not just snappish lectures about worrisome and complicated problems.

FEDERAL WATER POLLUTION CONTROL ACT—MONTANA

Mr. **MANSFIELD**. Mr. President, the Federal grant-in-aid program has been one of the most beneficial aspects of our Federal system. Through various grant-in-aid programs the Federal Government has come to the aid of cities, communities, and institutions by supplementing local funds, participating in local betterment projects, and making technical and planning services available. The Federal agencies have stepped in where others have not been able or willing.

Perhaps one of the most successful grant-in-aid programs has been the Federal Water Pollution Control Act. Since the beginning of the program in 1957 and up to the end of March of this year 67 projects have been approved in Montana. Grants under the program totaled $3,750,311.56 during this period. These funds aid local pollution projects costing in excess of $15 million. These projects have benefited 309,625 Montanans, and 933 miles of streams in the Treasure State have been improved because of this program.

The Water Pollution Control Act has provided incentive and the means for improved sanitation, improved water systems, and clean streams. Mr. President, I ask unanimous consent to have printed at the conclusion of my remarks in the

Congressional Record a tabulation of individual projects approved in Montana. It is an impressive documentation of a Federal-State program which has been of tremendous service to the people of Montana.

There being no objection, the tabulation was ordered to be printed in the Record, as follows:

Addendum to project register, Dec. 31, 1962

Status	Location	Name of applicant	Population code	Description	Type construction	Estimated eligibles	Federal grant offer	Month

EXPLANATORY NOTES

STATUS

Status of projects is indicated as follows:

1. Project approved (grant offer made).
2. Project under construction.
3. Project completed.

LOCATION

Listed alphabetically by State.

NAME OF APPLICANT

As listed in the project application.

POPULATION CODE

Federal grants made on a basis of population:

1. Less than 2,500
2. 2,500 to 5,000
3. 5,001 to 10,000
4. 10,001 to 25,000
5. 25,001 to 50,000
6. 50,001 to 125,000
7. 125,001 to 250,000
8. 250,001 to 500,000
9. 500,001 and over

DESCRIPTION

Description of the project as outlined in project application:

1. Treatment plant
2. Outfall sewer
3. Intercepting sewer
4. Other
5. Treatment plant, outfall sewer, and intercepting sewer
6. Treatment plant and outfall sewer
7. Treatment plant and intercepting sewer
8. Outfall sewer and intercepting sewer
9. Waste stabilization ponds with appurtenances

TYPE CONSTRUCTION

Type of construction as described in the application:

1. New
2. Extension or addition
3. Remodeling and alteration
4. New, extension and remodeling
5. New and extension
6. New and remodeling
7. Extension and remodeling

ESTIMATED COST OF PROJECT

Estimated project cost in which Federal grant funds are participating.

FEDERAL GRANT ORDER

Amount(s) of the Federal grant(s) offered to the applicant. Accelerated public works grants are always identified. Water pollution control grants are identified as such only when a project has also received an APW grant.

PROJECT APPROVED

Month and year in which the project was approved and the offer of a grant was made to the applicant.

CUBA

Mr. MANSFIELD. Mr. President, when I turned on the radio this morning I was greeted with the announcement on the news broadcast that "KEATING Strikes Again."

Naturally I was interested. I always wonder what is happening when one of my colleagues strikes. In the broadcast, I was informed that the distinguished junior Senator from New York [Mr. KEATING] was going to make a speech on the Cuban situation before the American Newspaper Publishers Association today.

I have had an opportunity to read the speech of the distinguished Senator, and I find it is a well prepared speech, and that in many respects it is a most constructive speech.

There are areas in which I would disagree with the junior Senator from New York. However, by and large I believe that he is making a distinct contribution to a better understanding of the situation which confronts us all, regardless of party affiliation.

In reading the speech of the distinguished Senator from New York, I note that he says, on the first page:

> It is foolish for anyone to pretend that there are easy answers to the Cuban problem. There are not now. There never were.

I agree with that statement completely.

Then he continues:

> The candidates in every national campaign—when interest in public affairs is at its highest—do a great deal to confuse and mislead the public by excessive promises of solutions, results, and changes.

I would suggest there that in addition to the word "national," he might use "State, district, local, and county campaigns." I say that because it is not confined to presidential campaigns, as I assume that is what the Senator is speaking about, and in the past tense.

I would say it would be more accurate to include all kinds of campaigns.

On the second page the Senator states:

> In my own judgment, both major parties have made serious blunders in Cuba and must share responsibility not only for the conditions which now exist, but for the lack of any consistent policy for coping with them.

I would agree with that statement.

The PRESIDING OFFICER (Mr. JAVITS in the chair). The time of the Senator has expired.

Mr. MANSFIELD. Is there further morning business?

The PRESIDING OFFICER. If there be no further morning business, morning business is closed. The Senator from Montana is recognized.

Mr. MANSFIELD. On the second page the distinguished Senator from New York states:

> In developing a common policy, we must start with agreement on certain premises. I see no useful purpose to be served, therefore, by recriminations over past mistakes. The only hope for bipartisanship on Cuba, in my judgment, is for our political leaders to leave the past to historians and devote their energy to devising a common policy for the future.

Again I thoroughly agree with the distinguished Senator from New York.

In the next paragraph he states:

> The first lesson of Cuba is that—

Let me say parenthetically that it seems rather strange for me to be making this speech before the Senator from New York has even had an opportunity to make his speech before the Newspaper Publishers Association.

The Senator states:

> The first lesson of Cuba is that we must concentrate our attention on the key pieces, not the pawns of the cold war struggle. Khrushchev is the problem in Cuba, not Castro. Castro himself is no more of a menace to the United States than any other Latin American dictator, past or present, who has put his own personal megalomania and position ahead of the welfare of his people.

Well, Mr. President, I would not give the chief credit to Mr. Khrushchev, that he is the real problem in Cuba. I would go a step further, and, instead of dissociating Castro from Khrushchev, I would lump them both together, because they are made of the same cloth.

In the next paragraph the Senator states:

> The missile crisis showed that there were limits to our forbearance, but of late we have also given the impression that under some circumstances we will take steps to protect the Communist establishment in Cuba.

Mr. President, I would agree with the first part of that statement, that there are limits to our forbearance. However, I certainly disagree with the second part of the statement, that "of late we have also given the impression"—he does not say that we are doing it, but that we have "given the impression that under some circumstances we will take steps to protect the Communist establishment in Cuba."

Nothing could be further from the objective of this administration.

Then on the next page the distinguished Senator from New York says:

> Those who say we must deal with communism in Cuba by concentrating all our efforts on social and economic problems in Latin America, however eloquent they may be and however worthy and necessary such efforts may be, just aren't fully facing up to the facts.

That is a questionable statement, because, if I recall the historical background of the Alliance for Progress, it did not state that a concentration of efforts under the Alliance or under any other program would cure the social and economic problems of Latin America.

I think the emphasis was that the "cure" so-called, would have to be administered by the nations themselves, and that all that our country could do would be to help on the periphery.

I emphasize, however—and I think history—even modern history—will bear this out—that there are Castro columns in many countries in Latin America, and that if something is not done by the countries of the hemisphere to help themselves, along with the peripheral assistance from us, those Castro columns will take advantage of the difficulties, such as hunger and poverty, which will make themselves felt and are even now making things extremely difficult for the governments now in power.

In the next paragraph, the Senator from New York continues:

> I have supported the Alliance for Progress in the past and expect to continue to do so. But the Alliance can no more be relied upon as a complete cure for Castroism in Latin America than a few additional public works projects would be regarded as a complete cure for unemployment in our own country.

I am delighted that the Senator from New York will continue, as I knew he would, his support of the Alliance for Progress in the future, but again I reiterate that we know that neither the Eisenhower administration, which started the Alliance for Progress, nor the present administration, which continued it, has stated that the Alliance for Progress would be "a complete" cure for Castroism in Latin America or anywhere else. Continuing, the Senator from New York says:

> While I do not regard the recent outburst of refugee hit and run attacks on Cuba as a very promising or effective remedy for Castroism, these outbursts mirror the frustration and confusion that has overcome our Cuban friends.

I would agree with that statement in all details, as I suppose every other Member of this body would, too. Further down on page 3, the Senator from New York refers to what he calls the fourth lesson of Cuba. I should say, after reading the paragraph beginning his discussion of the fourth lesson of Cuba, that what the Senator has said there and in the succeeding paragraph would meet with the approval of all Senators. On the next page, on the same point, he says:

> On this same point, I also understand from Navy personnel that in spite of the surveillance we are conducting to make sure that weapons, personnel and other tools of subversion are not clandestinely shipped out of Cuba, some Navy ships have specific orders not to searchlight smaller vessels that are constantly moving in the Cuban and Caribbean waters at night.

I should assume that the information which the Navy personnel is disseminating would be available to the Chief of Naval Intelligence and would most certainly be available to Mr. John McCone, Director of the Central Intelligence Agency. I express the hope that there is no division or split among the various intelligence agencies which are supposed to combine their findings and report them to the Director of the Central Intelligence Agency, who in turn, after an analysis, is supposed to bring the intelligence before the National Security Council and the President for their consideration. Continuing, the Senator from New York states:

> The Soviets will continue to advance, to test us, to apply Communist pressures on the frontiers of the free world wherever and whenever they thing they can gain by it.

That is true. Continuing, the Senator from New York states:

> It is up to us, not to tell them to stay home, but to make it so unpleasant for them that they will come to that conclusion on

their own. We cannot tell them what to do. We have to prove to them that there is nothing else they can do. That is what we did in October, but we have not done it before or since. Until we convince them that these excursions—and incursions—are a part of a "travel now—pay dearly" plan on their part, we are inviting them to continue planning their all-expense tours to this hemisphere.

Well, what program does the Senator from New York propose that the administration enforce in carrying out what he suggests in that respect? In the next paragraph the Senator refers to his 14-point program. I believe that that program, either in whole or in large part, has been elucidated on the floor of the Senate. I believe also that the Senator from New York stated that this program had been given to the Director of the CIA, Mr. McCone. I am glad to note that later in his speech the Senator from New York mentions that he has been in fairly close contact with both Mr. McCone and Secretary of State Rusk. In his speech, the Senator states:

> After all, nothing is older and more traditional than a naval blockade as it was applied by the President in October. Although I do not favor such action now, that so-called quarantine was one of the standard tools of the 19th century diplomacy. We made it work again, against a 20th century threat by using our own 20th century enforcement ability.

I am glad that the Senator from New York is so emphatic with respect to where he stands on the question of a naval blockade at this time. On the next page of his speech, the Senator from New York states:

> For instance, I see little to be gained in engaging in any numbers game with regard to Soviet troops in Cuba.

But then the Senator states:

> But, according to my information, since the withdrawal of the technicians who accompanied the MRBM's and IRBM's and bombers in mid-November, there has been no substantial reduction of Soviet military personnel in Cuba. There were and are in the neighborhood of 17,000 men there.

He compares those figures with the figures given out by the administration, and then states:

> Frankly, however, I don't think the basic problem in Cuba is affected substantially by whether there are 17,000, 14,000, or 20,000 Russian troops in Cuba.

I point out—and it is, of course, public information—that the statement made by the administration as to the number of troops and technicians in Cuba was made on the basis of information furnished by Mr. John McCone, Director of the CIA. Mr. McCone, in turn, got his information from the combined intelligence agencies which make up an aspect of this Government's security arm. I believe also that Mr. McCone, Mr. McNamara, and the President have all stated that they were not in a position, and could not be in a position, to give hard and fast figures as to the number of troops that were in Cuba, and that what they gave to the appropriate congressional committees, to the people of the country, and to the press, was their best estimate based upon the best intelligence they could compile..

Later in his speech the Senator from New York states:

> The sixth lesson I draw from the Cuban situation is that while disagreements are inevitable, attempts to discredit the motives and sincerity of every critic are bound to contribute to disunity.

I certainly would not find it difficult to appreciate what a critic of this administration has said, provided that when he criticized, he did so in a constructive manner and offered something in the way of possible alternatives. I am happy to say that so far as the Senator from New York is concerned, he has, by and large, always been constructive. He has presented ideas and made suggestions. I wish I could say the same for other critics of the administration, who can find disagreement with everything but nothing constructive to replace it. The junior Senator from New York also says:

> Yet our own officials often, dangerously often, are more concerned to discredit their critics than to use the national concern as a powerful part of their diplomacy. This national conviction and determination should be one of the diplomatic strengths of a representative form of government. Instead one gets the impression that it is regarded as an embarrassment, that many would rather defend the status quo, whatever it is, than try to alter it. Again and again, the flashes of anger, the outbursts and the concentrated attacks of our top officials are directed not at the Communists, but at those who are worried over the present situation and working, and fighting to defend the very same ideals to which we are or should be publicly committed.

Let me say that I, as one Senator, certainly would not approve of any attempt to bring discredit upon any Senator or any other American, either in or out of Congress, for expressing the right to disagree. I think that is an inherent American right. I would qualify that only to this extent, again, as I have previously done—namely, that when criticism is made, I would hope it would be constructive.

Toward the end of the speech, the Senator from New York [Mr. KEATING] made it clear that he has had opportunity to meet both with Secretary Rusk and with Mr. McCone, the Director of the CIA, on Cuba, and that he has the impression that his recommendations have been given serious consideration. In fact, I am sure they have.

The Senator from New York stated:

> In fact, while many points of my program, obviously, have not been implemented, a number of measures have been taken by the Government in recent months, paralleling some of my proposals for an economic squeeze on the Communists. While I certainly have not been consulted in the formulation of the policies—nor is there any reason why I should have been—the attitude of both Secretary Rusk and CIA Director McCone was entirely constructive and from a personal point of view, very encouraging.

I think that is a sound statement and a statesmanlike comment.

And toward the end of his speech, the Senator from New York said:

> In my judgment, a consensus of the American people can be developed in support of a firm and realistic program designed to drive the Communists from Cuba. This consensus would be reflected by a return to bipartisanship in the spirit of the Vandenberg era. What this will require, as I have tried to point out in my remarks, is better communication, a sharing of responsibility for the conditions which exist in Cuba, a more candid disclosure of facts to the American public, confidence that leaders in either party will not attempt to make political capital out of success or failure in Cuba, and the articulation not of an easy, but of a clear and consistent program of action.

I wish to say that, by and large, I agree with what the distinguished junior Senator from New York said. There are points of difference; but his is the kind of speech which I think is constructive in large part and can be considered a contribution to a better understanding and a better facing up to a difficulty which confronts us in this hemisphere.

Mr. President, at this moment the distinguished junior Senator from New York [Mr. KEATING] is delivering a major address on the Cuban situation—or, more accurately, on our Government's response to that situation—to the American Society of Newspaper Editors. The major purpose of his speech is to define and examine the concept of bipartisanship in foreign affairs, as it has developed in recent years, and as it relates to Cuba.

In this speech the Senator from New York very rightly calls bipartisanship "a means of strengthening the role of the United States in its international and diplomatic ventures." He says it represents "a symptom of the consensus shared by the American people on foreign policy issues." He says:

> Communist Cuba is an obvious case on which no clear consensus of opinion exists.

In part, that is clearly true.

Mr. President, in our country there are voices—Walter Lippmann calls them "the voices of the warwhoopers"—who call for an immediate invasion of Cuba. Some of them would have us participate in such an invasion, and some believe the job could be done by other countries in the Organization of American States. The Senator from New York [Mr. KEATING] is not one of those "warwhoopers." As he says in his remarks, he opposes a blockade now, and has always opposed an invasion.

But there are other voices, even in high places, who insinuate that the administration has "appeased" the Soviets in the Cuban affair. But, Mr. President, as the Senator from New York says about "easy answers to the Cuban problem"—

> The course of events in Cuba shows how unwise and dangerous such campaign oratory is, and I hope it will serve as an object lesson as to the need for restraint in future political contests.

Mr. President, I am reminded of the visit of the Governor of the great State of New York to the Capital of the Nation during the past week, and I am reminded of some of the things he said and some of the insinuations he made and some of the peculiar comparisons he made. He did not in my opinion, speak in a statesmanlike manner on the Cuban issue while he was here—in contrast to the way in which the Senator from New York [Mr. KEATING] is today addressing the American Society of Newspaper Editors.

Other voices are calling for "unleashing" the Cuban exiles on our shores, no matter what consequences that might have on the conduct of U.S. foreign policy in the area. Again, the Senator from New York [Mr. Keating] is not among those voices.

We do hear the voice of the Senator from New York [Mr. Keating] asking for a forthright and firm policy aimed at the elimination of the Soviets from Cuba. In other speeches he has presented a plan for economic action against the Communists in Cuba—a plan which seemed to me to be directed not so much against the Soviets as against Cuba itself. But the Senator from New York [Mr. Keating] says that a Castro Cuba, with the Russians absent, would be more an object of pity than an object of fear. What concerns him is the continued existence of Soviet forces in Cuba. He calls for firm action by the President. The Senator from New York says he believes this strengthens the President's hand, and does not undermine him "as do cries for caution, more accommodation," and so forth.

At this point, Mr. President, I may suggest that the voice of caution is not to be abhorred, even in connection with the Cuban situation. Voices, such as that of the Senator from South Dakota [Mr. McGovern], which call for an end to our obsession with Cuba as the only matter of consequence in Latin America, should be listened to. Anyone who believes that the excision of the last Russian from Cuba will "cure" the problem of Latin America, is indeed a dreamer.

It is part of the duty of responsible Government officials not only to urge firm action against obvious dangers, but also to caution the people against self-delusions of that kind.

I share the faith of the Senator from New York [Mr. Keating] in the wisdom of bipartisanship in foreign affairs. As he says, he has had numerous meetings with officials of the State Department and the CIA over the Cuban matter. The Republican leadership in Congress has been kept informed of developments. Ultimate responsibility for the conduct of our policy vis-a-vis Cuba rests, of course, with the President.

I should like to point out, in following up what the distinguished Senator from Florida said earlier today, that there are other suggestions which might be considered, in addition to the setting up of a government-in-exile to which recognition might be extended by this country.

But let me say that recognition of a Cuban government-in-exile should be seriously considered only when the various anti-Castro groups get together under a responsible and recognized leadership. That is not the case today, because, as I understand the situation, there are at least 12 major groups of anti-Castro Cuban refugees, and there are many more smaller groups. If there is to be a possibility of recognition of a Cuban government-in-exile, solidarity and real accommodation and real leadership must be forthcoming.

In addition to giving serious consideration to the recognition of a Cuban government-in-exile, I think consideration might well also be given to a hemispheric quarantine of Cuba, on the model recommended by the Organization of American States in imposing economic sanctions against the Dominican Republic in 1960, and that ways should be found to prevent the training of propagandists between Cuba and Latin America—both ways—and in that way to lessen contacts between Communist leaders and parties in Latin America with their counterparts in Cuba.

The OAS should not only proclaim principles and adopt resolutions, but should also take the leadership in a matter which is not only a U.S. problem but a hemispheric problem as well. The authority exists in the Organization of American States if its members wish to exercise it.

I would hope that we would not become so involved in any one particular problem that we would lose sight of the other problems which confront the President of the United States. Of course, he must consider Cuba. He does give it prior consideration. He must consider the rest of Latin America, Western Europe, the emerging African situation, the situation in the Middle East, the difficulties which confront us now in southeast Asia, and most especially in Vietnam, and possibly in Laos. He must consider also the situation as it affects the 7th Fleet in our relations with Taiwan; the situation in Korea, which is far from settled, because there all we have is a truce and an uneasy one.

This man who is President of the United States, who is criticized so often and so easily by so many, not only must consider the foreign policy of our country in at least a dozen areas, if not more, but he also must consider the domestic policy of our Nation. Problems are brought to his attention day after day after day by people who do not have to make the decisions. They can make speeches. But there is only one man in our country who has final authority and responsibility under the Constitution in the field of foreign policy. That man is the President of the United States. He has it whether he is a Democrat or a Republican President of our country.

What he needs is support. I hope that regardless of party, that support, based on sound and good bipartisanship, will be forthcoming, because the President is one man in this Nation who needs that kind of backing.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. JAVITS. New York seems to be very much in the news this morning and in the forefront of the Senator's mind. Since I am at the moment New York's sole representative on the floor of the Senate, I hope the Senator will allow me a minute to speak.

Mr. MANSFIELD. I am delighted, because I have some more information on New York if the Senator wishes to bring it up.

Mr. JAVITS. I think that what the Senator has said about my colleague [Mr. Keating] will be very much appreciated by him. I gather that the general thrust of the Senator's feeling is that the remarks of my colleague [Mr. Keating] represent on the whole an exercise of bipartisanship in the development of our policy in Cuba in a responsible way.

I appreciate what the Senator has said about the President's burden. I have just been through a very intensive campaign in New York, where 10 percent of the Nation's population live. I know of nothing in the foreign policy field—and though I am not too happy about it, I am almost tempted, because I feel so strongly about the civil rights issue, to say that it is probably the paramount issue, both foreign and domestic. It gives the American people a deep sense of malaise that there is something wrong about what is going on in Cuba. Americans desire very much to find a course on which they can feel more secure on Cuba.

They not only feel that the situation in Cuba is very dangerous, since that country is so close to our shores, but also in a personal sense, too, they believe that it is a very serious source of infection for the whole Western Hemisphere.

We talked about the Marshall plan and NATO to deal with the Communist threat to Europe. I believe the American people were never more cognizant of the fact that the Communist threat is right here at home. Perhaps every policy, economic as well as military, may have to be revised to take care of the Cuban situation.

It is very understandable to me, therefore, that my colleague has addressed himself in such a thorough way to it. That he was proved right last fall is now a matter of history. Therefore, I am glad to note that his words are being listened to with the respect that they deserve. But I emphasize to the Senator that those of us who talk about Cuba are impressed with the way it appeals to the people we represent and how it appeals to our sense of urgency and concern. It is fair to say that they consider it the No. 1 security issue before them.

As to the constructive aspects, I join with the Senator, as does my colleague [Mr. Keating], in a bipartisan effort to strip this whole discussion of partisan aspects or partisan advantage. I have noted the important points which the Senator has made which would represent affirmative American policy.

I should like to make two observations to the Senator.

First, I believe what is disquieting the American people more than anything else is that they do not know accurately what commitments, if any, President Kennedy has made to Chairman Khrushchev. They do not know whether there is any vestige of a commitment with respect to Cuba which does tie our hands. I do not believe that there is any. I so much respect the President's view and appreciate the delicacy of his position that I myself have not uttered words which would force him to disclose precisely whether there are any commitments. In the same way I have said that I support the President in his action regarding Cuban refugees at the present moment. I may not feel that way tomorrow if I think the situation has changed. But for the present I feel that he must be supported because he is the man at the gun, and he has the best understanding of the delicacy of his situation.

As the Senator is commenting on the question, and since he is a man of such authority in respect to the administration, I desire to say that sooner or later the American people, to obtain some integration in their thinking about Cuba, need to understand that our hands are really completely untied in every conceivable respect in respect to any action we might feel called upon to take, whether it is a quarantine or anything else.

Our colleague, the Senator from Kentucky [Mr. COOPER], who is the present occupant of the chair, desired to be sure that we were free to reimpose the quarantine. I joined with him in his question.

The people wish to know—and they have a right to know—that we are completely free to take any action on Cuba necessary to our national interest.

The other subject I should like to place before the Senator is a question in relation to a security organization or a mutual defense organization in the Caribbean and Central America. Again recognizing the delicacy of the President's position, I do not wish to force any suggestion on him. I only point out that here is something critically important that could complement the idea that we keep a check on who goes in and out of Cuba. We should give the Central American and Caribbean countries a sense of strength in respect of resistance either to Communist subversion or infiltration from Cuba. I know very well the problems of Mexico. But I think even Mexico would be very much affected by the impressive demonstration of the willingness of Central America and the Caribbean nations to commit themselves to a mutual defense obligation. Those are two of the points which are not covered in the Senator's statement which I should like to submit to the Senator for his observation.

Mr. MANSFIELD. Mr. President, I do not believe I heard everything that the Senator said. But I believe he mentioned the fact that the President should have a free hand to decide what should be done under any circumstances. In other words, the President should have the same kind of flexibility in the conduct and carrying out of our foreign policy as the Senator has expressed his point of view in regard to his present position on the question of Cuban exiles and the hit-and-run raids on the islands of Cuba and certain Soviet ships.

"Freedom" is a pretty hard word to define in relation to an individual who has the responsibility which the President of the United States has. As I see it—and I am sure that the Senator will agree—the President cannot look at merely one piece on the chessboard, but must see the whole board and how all the pieces fit. What he may do in one part of the world will undoubtedly, in this day and age, have an effect in other parts of the world as a consequence.

The President does retain a degree of flexibility. When a situation arises which puts a different slant on a particular question, it has been the President's policy, by and large, in his less than 2½ years in office, to call down the leadership and discuss many of his problems.

I see the acting minority leader, the distinguished Senator from California [Mr. KUCHEL], on the floor. He has been there on a number of occasions. His colleague the Senator from Illinois [Mr. DIRKSEN] has, also. The Senator from Iowa [Mr. HICKENLOOPER], the Senator from Massachusetts [Mr. SALTONSTALL], and other Senators on that side of the aisle, as well as their counterparts on the Democratic side, have been called on occasion. So I would say that, if we can intertwine the words "freedom" and "flexibility," that would be about the best way we could describe the responsibilities which must be administered by any President of this country.

Mr. JAVITS. Mr. President, if the Senator will yield further, I know that my colleague, the Senator from Iowa [Mr. MILLER], apparently is under some compulsion to catch a plane. Could we suspend this discussion temporarily, for I wish to continue it, so that the Senator from Iowa may be recognized?

Mr. MANSFIELD. Yes.

Mr. MILLER. Mr. President, I thank the distinguished majority leader and also my good friend from New York.

THE BALANCE-OF-PAYMENTS MIRAGE

Mr. MILLER. Mr. President, the American Institute for Economic Research, in its Research Reports dated April 15, 1963, explores again the question of "The Balance-of-Payments Mirage." It calls attention to the need for more definitive information from the Government on its policies regarding this vitally important matter. And it warns of the consequences of continuing deficit financing of international payments by the Government, asserting that "further tampering with the Nation's purchasing power could open the floodgates to the ravage of domestic inflation."

I ask unanimous consent that the article, entitled "The Balance-of-Payments Mirage" from the April 15, 1963, issue of Research Reports of the American Institute for Economic Research, may be printed in the RECORD.

The PRESIDING OFFICER (Mr. JAVITS in the chair). Is there objection to the request by the Senator from Iowa?

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE BALANCE-OF-PAYMENTS MIRAGE

In the 1962 balance of payments of the United States the net value of all receipts for goods, services, long-term investments, and unilateral transfers was less than payments for the same items by $1.3 billion. However, the Department of Commerce reported a deficit of $2 billion.

The $1.3 billion is a measure of the change in net short-term indebtedness of the U.S. Government and all residents of the United States. If the purpose is to show only the Government liquidity position, which appears to be the Commerce Department intention, that purpose should be stated more clearly than it usually has been. At present the official definition of balance-of-payments deficit twists the transactions into a form that serves this particular purpose. In doing so, it gives rise to uninformed proposals for elimination of the deficit.

In one sense the balance of payments is always in balance, like the balance sheet of a corporation. This is not an absurd idea to those who understand double-entry bookkeeping. Exports of goods, for example, are offset either by receipt of goods from abroad or creation of credit obligations. The credit obligations would appear in the balance of payments as long-term investments or short-term loans. In this way all payments offset all receipts, including settlements made by transfers of gold ownership for those who are able and willing to convert claims into gold.

The gold outflow from the U.S. Treasury in 1962 was $890 million; in 1961, $857 million.

In 1962 net short-term obligations to foreign countries increased $445 million; in 1961 they decreased $52 million (see table 1). This may be interpreted as a deterioration of our balance-of-payments position in 1962 by one-half billion dollars. Since these obligations included an increase in short-term loans to the U.S. Government, they represent deficit financing of international payments by the Government.

This may be compared with official reports of an improvement in the balance-of-payments deficit from $2.4 billion in 1961 to $2.2 billion in 1962.

Separating private transactions from Government transactions and Government-financed transactions in the 1962 balance of payments, we find that private receipts exceed private payments by $879 million. When short-term loans are eliminated, the excess is $1,441 million, a possible measure of balance-of-payments surplus on private accounts.

Table 2, which separates private transactions from Government transactions, is based on Department of Commerce figures. Although it is the best information available, nobody really knows exactly how much of private transactions results from Government grants and spending abroad. Although aware of these limitations, we are taking the official reports at face value for the purposes of this particular analysis.

Net private receipts from goods, services, and long-term investments were $2,122 million more than private payments. Included in this figure are payments for private foreign investments of U.S. residents amounting to $2,584 million. However, in seeking to improve the balance-of-payments position it would be shortsighted to restrict investments and lose future receipts from income on those investments.

Private exports of goods and services in 1962 topped private imports by $4,460 million. Artificial devices to increase this trade balance, if successful, can lead to undesirable distortions in the American economy. Devaluation, unpegged foreign exchange rates, exchange controls, and protective tariffs are proposed solutions that fail to come to grips with basic causes.

Some urge that balance-of-payments deficits require either a domestic price decline or foreign exchange depreciation as a corrective. This reasoning may be more suitable when economic maladjustments are the cause of the balance-of-payments deficit. When political decisions are behind the problem, economic solutions are not in order.

Excluding gold exports, the Government's international payments exceeded receipts from those exports of goods and services that were directly financed by Government payments. Here is the crux of the balance-of-payments problem.

TABLE 1.—*Changes in short-term indebtedness reflected in the U.S. balance of payments*

1962

[Millions of dollars]

Receipts:	
Net short-term foreign loans to U.S. Government	990
Sales of foreign convertible currency	17
Gold sales	890
Total	1,897
Payments:	
Net trade and capital payments	1,335
Net private U.S. short-term loans abroad	467
Net decrease in private short-term foreign loans to United States	95
Total	1,897

1961

Receipts:	
Net increase in private short-term foreign loans to United States	1,552
Gold sales	857
Total	2,409
Payments:	
Net trade and capital payments	805
Net decrease in short-term foreign loans to U.S. Government	17
Purchase of foreign convertible currencies	115
Net private U.S. short-term loans abroad	1,472
Total	2,409

TABLE 2.—*U.S. balance of payments*[1]

1962

[Millions of dollars]

Private receipts:	
Exports of goods and services	25,723
Net foreign direct and long-term investments in United States	246
Total	25,969
Private payments:	
Imports of goods and services	21,263
Net U.S. direct and long-term investments abroad	2,584
Private remittances to foreign countries	681
Net U.S. short-term loans abroad	467
Net decrease in short-term foreign loans to United States	95
Balance	879
Total	25,969
Government receipts and Government-financed receipts:	
Nonmilitary exports of goods and services financed by Government grants and capital	2,798
Net short-term foreign loans to U.S. Government	990
Sales of foreign convertible currency	17
Balance from private sector	879
Gold sales	890
Total	5,574
Government expenditures:	
Net military expenditures	2,368
Nonmilitary grants	1,872
Pensions, etc	243
Net payments for nonmilitary services	75
Net U.S. long-term loans abroad	16
Unrecorded transactions	1,000
Total	5,574

[1] Excluding exports of goods and services transferred under military grants and payments made on military grants of goods and services.

Maladjustments in the balance of payments due to political considerations do not lend themselves to correction by tampering with the motivating forces of a market-directed economy. A better approach is to apply corrective action to the Government sector of the balance of payments, where the problem originated.

The fact is that the United States has, by governmental actions, created much of the balance-of-payments deficit. The deficit was not created by the hand of God, or an unkind fate. They planned it that way. The problem could be solved in part by reversing the steps taken.

Any other balance-of-payments remedies will be self-defeating. Devaluation would destroy some of the value of foreign loans to the United States, nullifying our attempts to be the benefactor of those countries suffering dollar losses from devaluation. Moreover, further tampering with the Nation's purchasing media could open the floodgates to the ravages of domestic inflation. In one way or another this Nation must live within its means. If it is going to do so, we should protect the stability of the dollar and avoid other harmful consequences, including a serious loss of prestige throughout the world.

DEMOCRATS USE GUILE ON MONEY BILLS

Mr. MILLER. Mr. President, in the Washington Evening Star for April 15, 1963, there appeared an article entitled "Democrats Use Guile on Money Bills," written by Jack Bell, of the Associated Press. I believe the point made by Mr. Bell in this article merits attention by readers of the CONGRESSIONAL RECORD, so I ask unanimous consent that the article may be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

GOP OUTFOXED—DEMOCRATS USE GUILE ON MONEY BILLS

(By Jack Bell)

Democratic congressional leaders have found a pinchback formula they believe will lessen the political impact of Republican economy demands and help gain passage of major administration bills.

Their formula is a simple one. They get committee approval of measures calling for a relatively high level of expenditures. When the bill is brought before the full membership for action, they support a Democratic amendment to reduce the amount while resisting all Republican efforts to cut deeper.

The Senate leadership followed this procedure in gaining passage of the administration's mass transit bill. A committee had put a price tag of $500 million on the program. A floor amendment by Senator SYMINGTON, Democrat, of Missouri, trimming the total to $375 million, was adopted and the bill was passed after all Republican proposals were beaten down.

Similarly, a youth-employment measure which had called originally for a $100 million outlay was increased to $120 million in committee.

When it reached the Senate floor, Senators PROXMIRE, Democrat, of Wisconsin, and SYMINGTON got it reduced to $100 million. Republicans got nowhere in efforts to trim it further.

The Democratic House leadership found itself in a dilemma when Republicans joined with southern Democrats in committee to knock a $500 million public works item out of a supplemental money bill.

In this case, they marshaled their forces and restored the item by a House vote—but only after cutting it back $50 million.

The upshot of all of this activity is to put administration Democrats in a position to reply to Republican charges that they are spenders by pointing to specific instances where they voted to cut President Kennedy's proposals.

The Republicans give every evidence they intend to continue pounding away on efforts to cut at least $10 billion from the $108 billion Mr. Kennedy asked in advance appropriations for his $98.8 billion spending budget for the year beginning July 1.

THE PRESIDENT-TO-THE-RESCUE STORY

Mr. MILLER. Mr. President, in last night's Washington Evening Star the lead editorial, entitled "Just a Bit Phony," commented on the alleged telephone conversation between the President and Mrs. Martin Luther King. I believe the point of the editorial is well taken, so I ask unanimous consent that the editorial may be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

JUST A BIT PHONY

If one is merely a reader of headlines, an Associated Press story from Atlanta could be taken to mean that the Reverend Martin Luther King, Jr., now jailed in Birmingham, Ala., was able to call his wife, who has just had a baby, only through the gracious intervention of President Kennedy. To the extent that the story conveyed this impression, it was a phony.

What happened, as far as we can find out, is that the President, according to Mrs. King, "had been in touch with Birmingham." This is a bit on the vague side. Mrs. King added, however, that the President phoned and told her: "I've arranged for your husband to telephone you very shortly. You probably know we sent FBI agents in last night to talk with him and he's all right."

Having in mind that the burdens of the Presidency are said to be the heaviest in the world, it is good to know that Mr. Kennedy, even while on a brief vacation at Palm Beach, could spare the time and energy to intercede in the Reverend Mr. King's behalf. The only thing that concerns us is whether the President really did much, and if so, what it was that he did.

To the best of our knowledge, no one in Birmingham was preventing the Reverend Mr. King from calling his wife. In fact, Police Chief Jamie Moore, who enjoys a local reputation in Birmingham as an honest man, say that the Kings talked to each other on the day before the President-to-the-rescue story appeared, and that the telephone conversation between husband and wife was not arranged by Kennedy or anyone connected with the President.

All of which causes us to wonder. If President Kennedy called Mrs. King and told her he had been in touch with Birmingham, we certainly do not question the accuracy of the statement. But what, precisely, does this mean? With whom did the President get in touch? Was it this getting in touch which made it possible for the Reverend Dr. King to call his wife? We doubt it very much. And we wonder what this business is all about. Could it possibly have anything to do with such things as votes, gullible people, or politics?

SOME ECONOMIC FACTS OF LIFE

Mr. MILLER. Mr. President, in yesterday's Washington Evening Star the esteemed columnist, Mr. David Lawrence, had an article entitled "Some Economic

Facts of Life," relating to financial figures of the 15 steel firms, which he feels are vital data for the United States. In view of the impending hearings on the steel price increase by the Joint Economic Committee, I believe this merits the attention of readers of the CONGRESSIONAL RECORD, so I ask unanimous consent that the article may be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SOME ECONOMIC FACTS OF LIFE—1962 FINANCIAL FIGURES ON 15 STEEL FIRMS ARE CALLED VITAL DATA FOR AMERICA

(By David Lawrence)

Much has been said about the difference between so-called liberals and conservatives. Perhaps the simplest definition is that the latter have a profound respect for the economic facts of life, usually obtained through actual experience, while the former cling to the illusion that there is some magic way by which two and two can make five.

A most interesting example of the value of economic facts is to be found in a table of figures printed on the financial page of the New York Herald Tribune on Tuesday of this week. This gives the actual capital expenditures and depreciation allowances of the 15 largest steel companies and contrasts them with the dividends and the net income of the same companies in 1962.

If capitalism in the United States is to survive, and if Nikita Khrushchev's prophecy that our grandchildren will live under communism is to be proved wrong, then the four categories of figures in that table constitute the most essential piece of information that has been furnished in the perennial controversy about prices and wages.

This ought to be read and studied, particularly by those Members of Congress who, at the behest of the White House, start investigations designed to persecute and intimidate businessmen who venture to raise prices, though no such scrutiny occurs when labor unions raise wages.

For what does the table show? First of all, there is the plight of the smaller company—like Lukens Steel—which has just raised its prices on selective items of steel. The net income of Lukens for 1962 was $3,273,000, but, out of this, $1,240,000 had to be paid in dividends—which, like profits, seems to be an ugly word, though dividends are really a wage payment for the use of invested money. People will never furnish new capital to a company that doesn't pay back what it has borrowed or whose stock diminishes in value when earning capacity deteriorates and dividends grow less and less.

Every company has to figure out how much it can pay to the investors each year. If it borrows from banks, it must also give some assurance as to when repayment of loans will be made. Also, while companies may get a tax deduction for all expenses incurred in the operations of a business, capital expenditures are by no means covered to the same extent. As plant wears out there are some deductions for depreciation, but this doesn't pay for the new cost of replacing a factory or old equipment.

Now, Lukens Steel in 1962 spent $6,611,000 for plant and equipment, but its net profit—after paying $1,240,000 in dividends—was about $2,033,000. This is the sum that has to be put into surplus or used to pay off capital borrowed. The depreciation allowance of $3,918,000 isn't enough to cover all outlays for plant and equipment.

Is the situation any different with a larger company? The case of Bethlehem Steel Corp. is even more discouraging. Thus, the net income in 1962, after paying operating expenses, was $88,677,000. This seems like a lot of money and usually figures like these get headlines as big profits. But the word big applies only to the size of the company and not to the economic facts of the case. For, while Bethlehem paid a low rate of dividends, the total amounted to $105,523,000, or more than was earned for the year.

So there was nothing to put into surplus. In fact, surplus of other years had to be used for dividends, and nothing was available out of 1962 earnings for new plant and equipment, for which a total of $192,831,000 was expended in 1962. The sum of $155,466,000 was available from depreciation allowance, but there was still a gap of $37,365,000 in capital expenditures that had to be borrowed or taken from funds accumulated in previous years.

Yet there is a faith on the part of the American investor that somehow the steel companies will make better earnings in future years. So, based on a belief that communism is not just around the corner and that economic sense will prevail in Washington—especially in Congress—the steel companies have gone ahead with a capital-expenditure program of $1 billion every year for the last 3 years, and are making selective price increases now so as to earn a profit to cover in part the wage increases granted over the last 5 years.

Profits are essential. Increased wage costs can be destructive when they wipe out profits or reduce them to the point where investors hesitate to invest their money in an enterprise. Economic facts like these, however, are not taught in most of the schools of journalism or in the colleges where the favorite textbooks are those written by some of the economists who become presidential advisers. They hold that deficit spending by the Government is sound finance and, by inference, that private companies can operate on the same theory.

THE COST OF LIVING

Mr. MILLER. Mr. President, last August 20 in the Des Moines Tribune the columnist, Sylvia Porter, had an article entitled "Living Costs May Inch Up, but That's Still Not Inflation." Miss Porter pointed out:

> The price index is up about 1.2 percent from the level of summer, 1961. It is almost 1 percent above the level at the start of 1962.

She further stated:

> When the statistic is released next week, it will be front-paged. News that the consumer price index has hit a new high always is headlined and it almost surely will revive talk of inflation—inflation even in this cycle of sluggish business advance, stickily high unemployment, excess plant capacity in industries throughout the Nation.
>
> Will this talk be justified? Is a rise of 1 to 1¼ percent in the consumer price index in 1962 on top of a rise of ½ percent in the index in 1961 "inflation"?

She added:

> It is not.

Mr. President, I considered making a comment on Miss Porter's article at the time, but I did not feel that it merited the attention of the people, because I thought the facts would speak for themselves. Unfortunately, Miss Porter has not seen fit to leave well enough alone; and, accordingly, on Tuesday, April 16, 1963, in the Evening Star she has another article entitled "Cost of Living Continues Crawl," in which practically the same approach is taken. She points out:

> The cost of living will continue to climb in 1963 as it climbed in 1962. As the year rolls on, the Government's index of consumer prices will hit new peaks. As always, the rise of this index will bring cries of alarm about "inflation."

She also said:

> This degree and type of rise in consumer prices cannot be called inflation by any accepted definition of inflation—even though new alltime highs in living costs are a certainty.

Then she pointed out, Mr. President:

> We cannot ignore the tragedy of the millions who are unemployed and the millions who are wholly dependent on small, fixed pensions. These challenges we must meet.

Mr. President, I do not know whether Miss Porter is familiar with the meaning of the king's English, but although I am not an economist I think I know what inflation means. I believe that the American people know what inflation means. I believe it does an injustice to the English language to say that an increase in the consumer price index such as she has pointed out is not inflation by any accepted definition of the term. I think Miss Porter would do well to consult a dictionary.

Mr. President, I appreciate Miss Porter's sympathy with the millions of people who are unemployed and the millions who are wholly dependent on small, fixed pensions, but I should like to find out what Miss Porter suggests when she says, "These challenges we must meet."

I suggest that the solution is very simple, Mr. President. It is for a majority of the Members of Congress to practice the moral and political courage of seeing to it that we do not spend more than we take in Federal revenues and that we maintain a stable dollar, which is what we are not now doing.

During the past 2 years, using the figures of the Council of Economic Advisers, we know that while the United States was going $14 billion deeper into debt, there also was inflation which shrunk the purchasing power of our people's hard-earned money by more than $14 billion.

Mr. President, if there is another $12 billion deficit for fiscal year 1964, we can be very sure that there will be a continued erosion of our dollars.

Mr. President, I ask unanimous consent to have the two articles by Miss Porter to which I have referred printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

LIVING COSTS MAY INCH UP, BUT THAT'S STILL NOT INFLATION

(By Sylvia Porter)

Early next week, the U.S. Government will report that our cost of living either is holding at the highest level in history or, more probably, again has risen slightly to another alltime peak.

This will be disclosed in the monthly report of the Bureau of Labor Statistics showing that in July the Consumer Price Index—the only measure we have of living cost changes in our country—was at or a bit above the 105.3 mark it hit in June. (The index has been updated so that the base of 100 is now the 1957–59 period. An index of 105 means that today it costs $105 to buy the goods and services $100 bought in the closing years of the 1950's.)

The price index is up about 1.2 percent from the level of summer, 1961. It is almost 1 percent above the level at the start of 1962.

THE ODDS

There is virtually no chance that the index will decline during the rest of this year. Rather, the odds are that when the books are closed on 1962, the record will show prices of typical goods and services in an average city family's marketbasket 1 to 1½ percent over 1961.

When the statistic is released next week, it will be front paged. News that the Consumer Price Index has hit a new high always is headlined and it almost surely will revive talk of inflation—inflation even in this cycle of sluggish business advance, stickily high unemployment, excess plant capacity in industries throughout the Nation.

UNJUSTIFIED TALK

Will this talk be justified? Is a rise of 1 to 1¼ percent in the Consumer Price Index in 1962 on top of a rise of one-half percent in the index in 1961 "inflation?"

It is not. I've said this before, I say it once more. The one-half-percent rise in 1961 was remarkable stability, so extraordinary it had few precedents in modern U.S. economic history. A rise of the magnitude now foreseen for 1962 will be reasonable stability.

The very idea of a price index holding absolutely steady is unrealistic in a dynamic society such as ours is; inherent in the definition of dynamic is "change."

EXAMPLES

The to-be-published overall price index, for instance, probably will show food prices have risen because of seasonal forces while clothing prices have declined because of summer clearances, the cost of medical care has climbed because of hikes in hospitalization insurance rates, while prices of new cars have slipped because of concessions on 1962 models.

Even more indicative is the fact that a big question mark in the July index is the cost of gasoline—with seasonal pressures suggesting more costly gas while price wars suggest cheaper gas.

More of the same is shaping up for the balance of the year. The cost of services will still be mounting month after month, although the pace of the postwar climb is definitely slowing and the signs are clear that service costs finally are catching up.

Rents still will be going up a bit month after month, but also at a slower pace, a reflection of the increase in apartment vacancies and the softness in the housing market in general.

Food prices will be at least firm with higher prices for restaurant meals pulling the food index up.

PAY INCREASES

But the increases will be moderate, spotty—nothing like the big across-the-board rises we saw in past inflation periods—and alert managers of the household budget easily will be able to sidestep many of them.

And most important is the picture that emerges when the 1962 price climb is placed against the 1962 employment-pay background. For the fact is that tens of millions of Americans do have jobs and are getting pay increases that average substantially more than the increases in the prices of goods and services they buy.

They are not only matching the cost of living rise but also beating it by around 2 percent on average, gaining "real" purchasing power.

Not sharing in this good fortune are the unemployed and their families. Their plight is the blackest spot in our economic pattern.

Also not sharing are the millions entirely dependent on fixed pensions. They lose every time a price of an essential product or service climbs.

But bitter though this part of the story is, it cannot hide the shining fact that the higher incomes of the vast majority of U.S. families have more than offset living cost increases in recent years, and in 1962 this vast majority again will be enjoying the best bread-and-butter year of their lives.

Your Money's Worth—Cost of Living Continues Crawl

(By Sylvia Porter)

The cost of living will continue to climb in 1963 as it climbed in 1962. As the year rolls on, the Government's index of consumer prices will hit new peaks. As always, the rise of this index will bring cries of alarm about "inflation."

Despite the increase in steel prices, despite the fact that service costs are still rising, despite the early winter jump in fruit and vegetable prices, the increase in living costs this year will be held to a crawl. Barring events that cannot now be foreseen, the best forecast is that for the whole year the increase in the Bureau of Labor Statistics' Consumer Price Index will be under 1½ percent.

This degree and type of rise in consumer prices cannot be called inflation by any accepted definition of inflation—even though new alltime highs in living costs are a certainty.

INCREASE IS ESTIMATED

The probability is that at the start of 1964 it will cost between $1.07 and $1.08 to buy the same market basket of goods and services $1 would have bought more than a half decade ago—not much of an upswing considering the length of time involved. And while on the index the dollar will be worth less in the marketplace in January 1964, than in January 1963, prices of some important things are declining. There are hidden markdowns in many areas.

When the BLS reports the March consumer index next week, the chances are it will be approximately where it was in February—slightly over 106 (1957–59 equals 100). The rise in the index early this year was due almost entirely to the big increase in fruit and vegetable prices after the winter freezes, but this trend has run its course. Meat prices were lower in March. Sugar prices have skyrocketed, but sugar doesn't have much weight in the index.

Here's a rundown of the 1963 outlook for prices of goods and services.

Food: Seasonal upturn in summer, seasonal downturn in fall and early winter, without any significant factors pushing prices sharply one way or the other. The food price index will be tilted upward, though, if the increase in the cost of sugar is translated into higher prices for bakery products, soft drinks, candy, etc.

Durable goods: Some price increases are on the way and the reasons go far beyond the steel price increase, but competition is too rough to permit major across-the-board price increases.

Housing costs: Prices will be pulled up by gradual increases in the cost of maintenance and repairs and quite possibly by rises in real estate taxes and interest rates. The cost of a house itself, however, isn't going to change much in this competitive era.

Rents: Still climbing despite vacancies in areas throughout the country, but the rate of rise is now a creep.

Clothing: Up a bit. When the April index is issued, it well may be higher because of the introduction of the spring lines.

SERVICES STILL GOING

Services: Higher. Costs of medical and personal care are still climbing, but again the rate of rise has perceptibly slowed.

So, where do you come out? If you have a steady job with year-to-year pay increases of more than 1½ percent, you come out ahead. Your "real" purchasing power is continuing to increase an average of 2 percent a year.

As a housewife, you also can come out ahead if you shop with moderate care. Taking advantage of the food specials and bargain sales in reputable stores can cut big chunks from your expenses.

We cannot ignore the tragedy of the millions who are unemployed and the millions who are wholly dependent on small, fixed pensions. These challenges we must meet.

But for the vast majority, 1963 is shaping up as another good year.

THE CUBAN SITUATION

Mr. MILLER. Mr. President, I am sure the record will reveal that I have refrained from making any extremist type statements on the Cuban situation, but I have been sitting here long enough to have heard some of the comments made about some of the positions of the Republican Party. I wish to say, speaking as only one Member on the Republican side of the Senate, I wholeheartedly endorse the principle of a bipartisan foreign policy and particularly with respect to Cuba. I also point out that we do have a bipartisan foreign policy with respect to Cuba. That is not the problem.

The problem is that while we have a bipartisan foreign policy with respect to Cuba, and the Republicans and Democrats alike are joined together on it, one reason why the Republicans and a good many of the Democrats, I might point out, are unhappy about the situation is that we have not had an implementation of that policy. Until we have an implementation of the policy, I fear and regret this is going to be an issue.

I thank the Senator.

Mr. COOPER. Mr. President, I know I share the feeling of all those who heard the majority leader. We commend him upon the dispassionate and objective critique that he has made of the speech of the junior Senator from New York [Mr. KEATING]—the speech which he is now making before the American Society of Newspaper Editors. It is characteristic of the majority leader's fairness.

The speech of the majority leader has meaning because, in the last few weeks and months, there has been some criticism, which I believe unjustified, of the junior Senator from New York because he has made from time to time comments and recommendations regarding our policy in Cuba. I know that on several occasions, after hearing his speeches or reading them, I have said on the floor that I have considered his speeches to be constructive, informative, and useful. They did not bear the mark of a "war hawk" or, as the majority leader has said, "war whooper."

I know that a great many of us feel strongly that bipartisanship in foreign policy is essential, particularly in regard to issues which bear upon the security of the country.

Bipartisanship is always difficult to describe. I know I have attempted to do so several times. I believe it means we should be mutually thoughtful, constructive, moderate, just, and fair in our discussion of these issues, and have the knowledge that when a decision is made at last by the President of the United States, we must support him, and support him gladly.

I think it is also agreed there should be an opportunity, under bipartisan policy, to discuss these matters and discuss them fully.

I know we remember, at the time of the crisis last fall, the great concern we felt when we were briefed and knew the country might be very close to war. There was deep concern among the people of the country, and we stood by the President when he made his courageous decision.

What happened at that time points up the danger of the continuing situation—one which under certain circumstances might again lead to war.

What has troubled me, and I think it has troubled a great many people in this country, is the feeling which the Senator from New York mentioned a while ago—a feeling of unclearness, a feeling that the policy or goals of the administration on Cuba are unclear, unclear to the people, difficult as is the problem.

I believe the Soviet presence in this hemisphere is really the issue which troubles the people. It is their presence in Cuba which gives power and authority to Castro. It is troubling not only because it establishes a base for arms and subversion, but also because it gives strength and force and support to Castro and to Communist elements throughout this hemisphere.

I consider that a goal which the people of our country would understand, and one which is rightful, is the continued insistence by the administration that Soviet Russia must withdraw its troops. For if circumstances develop because of their presence which provoke or increase the danger to our security, we might again have to face the issue which the President faced last fall.

Now I wish to ask the majority leader a question, and I speak with knowledge and understanding of the problems facing the President of the United States—a man whom we knew in the Senate, whom we respected then, and respect today. I have no doubt that the President is trying to bring about the removal of Soviet troops. It was stated last fall, and on many occasions since, that Soviet Chairman Khrushchev said the Soviet troops would be withdrawn.

If it is a matter of which the majority leader has cognizance, and on which he can speak out, I would like to know if that was his understanding.

Mr. MANSFIELD. Mr. President, may I say to the distinguished Senator from Kentucky that that was the understanding of the Senator from Montana, and still is his understanding. However, I would point out that, to the best of my knowledge, no date certain was set when they would be taken out of Cuba; and, to the best of my knowledge, the President's statement to the effect that there are approximately 12,000 Soviet troops and technicians remaining in Cuba, from a high of 22,000 last October or November, is approximately correct.

The Senator from New York [Mr. Keating] cites the figure 17,000. I do not know what the source of his information is, except that he does refer to naval personnel as having informed him on some subjects. But certainly, if the President of the United States cannot depend on the Director of the Central Intelligence Agency, who in turn is alert not only to intelligence which his own Agency furnishes, but that which is furnished by other intelligence groups in our country, then I do not know on whom he can depend. I personally am prepared to take the President's word, and I do so wholeheartedly and unquestionably.

The Senator from New York has said we should not play the numbers game. He cites the figure 17,000. He refers to the administration figure of 12,000 or 14,000. He brings in 20,000 somewhere. I agree with him that we should not play a numbers game, but we should recognize that our intelligence agencies in this country are adequately staffed with personnel and adequately financed, so far as money is concerned, and these are the agencies which must furnish the administration in power—or any administration—with the best intelligence at their disposal. Only on that basis can the Chief of the Nation, the President, and the National Security Council operate the plans and work out the problems which concern them.

Mr. COOPER. I have never questioned the authority of the President.

Mr. MANSFIELD. The Senator from Kentucky has not.

Mr. COOPER. I have always assumed the President and the Government have more sources of information and better means of evaluating information than has a Member of the Senate. I accept that as a fact.

Mr. MANSFIELD. If the Senator will yield, that was the assumption under which I worked even when Mr. Eisenhower was President of the United States. I think it is a good assumption to work under at all times, because the Congress has made adequate preparations to take care of the right kind of agencies to furnish the right kind of information to the persons who have the right to conduct the foreign affairs of this country.

Mr. COOPER. I have always assumed the thesis expressed by the distinguish majority leader, although these agencies can make mistakes. But I want to get off the subject of numbers, and emphasize the policy—the goal which the people of the United States will understand; one which is valid, and one which the majority leader has said, and I think correctly, can be bottomed upon the promise of Khrushchev. It is that our administration will do everything in its power to secure the removal of the Soviet presence in Cuba.

Our country stands upon solid ground in pursuing this policy. If Mr. Khrushchev promised the removal of the Soviet force, I cannot see that the continued insistance of our administration that he keep his promise will lead to any confrontation that would be different from that which existed last fall.

Mr. MANSFIELD. Not at all.

Mr. COOPER. But Mr. Khrushchev's promise is not the true base of such a policy. The extension of Soviet force into this hemisphere violates even the kind of status quo that Khrushchev has urged for the Soviet Union's purposes. Not long ago he spoke about East Berlin and East Germany. He said that they had become an integral part of Communist Eastern Europe, and that the Soviet Union would not tolerate any intrusion by the Western Powers, including the United States, into that area.

Yet he has extended Soviet force into this hemisphere.

I say this reluctantly: Taking into full consideration the very strong position of our country last fall at the time of crisis—when Mr. Khrushchev was required to admit his wrong by the withdrawal of missiles—if the Soviet Union continues to maintain its forces in Cuba, then the Soviet Union has made the great gains in the whole affair.

I am sure the President is using all the means, other than force, which are available to him at this time, to insist upon the withdrawal of the Soviet forces—and we support him.

Nevertheless, if the country can know that, with respect to Cuba, it is our purpose to secure the withdrawal of Soviet forces, and to take every step that can properly be taken to do this, it would be indeed helpful, and it would give more comfort to all of us.

If these means fail, if provocations occur, and if the danger to our security continues because of the Soviet presence, I would believe that it could lead in time to a crisis such as we faced last fall.

Mr. MANSFIELD. I believe the Senator is making an assumption which could possibly turn out to be a justified assumption. I do not know. The Senator from Kentucky does not know. I do wish to assure the Senator that, so far as the President is concerned, he is doing everything in his power to bring about not only a reduction in the Soviet troops and technicians in Cuba, but also to bring about a withdrawal of both from that island back to their homeland or elsewhere outside the Western Hemisphere.

I know that the President is doing all he can do, in his position, and in the light of the circumstances which confront him. I assure the Senator from Kentucky that what he has said has been taken to heart.

I compliment the Senator from Kentucky on his consistency, and I wish to say that, while it is true he has not spoken much on Cuba or any other aspects of our foreign policy, that fact has meant a loss to the Senate, to the country, and to the administration.

Mr. KUCHEL. Mr. President, first I wish to say to the distinguished majority leader that he has my continuing respect, simply because of the fairness with which he comments on all public questions, in this instance on the very excellent address made by the distinguished junior Senator from New York [Mr. Keating] today.

It is needless for me to add that he has also my fond friendship, just because he is a "good guy."

I wish to make some comments on the subject he has discussed, if I may. I am a Republican. I am a Republican U.S. Senator. I am an American first, just as the Presiding Officer is first an

American, and just as every other Member of the Senate is first of all an American.

There will be some lurid, emotional, and ill-considered comments made by some people, whose intellectual gyrations get a little phrenetic on foreign policy generally. Some of these statements will be made by Democrats, and some of them will be made by Republicians.

I believe that my friend, the majority leader, will not mind my recalling that when Dwight Eisenhower determined to cancel our recognition of the Castro government, because Mr. Eisenhower would not make the people and the Government of the United States take anymore insults from that vile little person, some of my brethren across the aisle denounced Eisenhower for doing it. I do not believe that served a very constructive purpose. Eisenhower was right in what he did. I hope we over here on this side of the aisle will try to be constructive when we speak out on public questions, particularly on those questions which involve the very future of America.

A few days ago the second anniversary of the Bay of Pigs occurred. It was from Eisenhower on down that the tone of the Republican Party in this country was set. It was General Eisenhower, speaking from Gettysburg, who said, "We all face the same evil. Let us not now engage in partisan, political comment. I suggest we do not now make the fiasco of the Bay of Pigs one of political discussion." There was a responsible, patriotic American speaking. There was a great American, who acted as he saw the light in the best interest of the country as, indeed, he always did. Yet, occasionally, some of the lunatic fringe have denounced Eisenhower as a "Communist dupe." Think of it.

My able friend, the Democratic leader in the Senate, has mentioned the goal of our country. What is the goal of the Government of the United States and the people of the United States? Is it not the security of our country? Is it not the perpetuation of our liberty? Is it not the advancement of this world toward peace and justice with honor?

I think it is; and particularly with respect to Cuba, I believe the goal of the American people and of our Government was reflected in the Cuban resolution which we wrote here in the Senate and in the other body last year.

I want this country to be united. I want the country to recognize that the President of the United States, whoever he is, during his term, speaks for all of us in matters of foreign policy. But I want it also to be clearly understood that when able men, like the junior Senator from New York, rise in the Senate or in the country to make constructive comments, they have a right—indeed, a duty—to do so, and that they reflect the heartfelt, soulfelt concern of the American people when they do so. The American people are concerned—deeply concerned—and will continue to be concerned so long as there is any communism in this hemisphere; so long as there is communism anywhere on the globe.

Let us never forget the duplicity and the deceit by which the Soviet Union took into Cuba rockets which could have blown into ruin and rubble great cities in the United States and in this hemisphere.

I think some of us can be pardoned for wondering whether a promise on any subject by the Soviet Union is susceptible of complete credibility. The American people—and I believe the junior Senator from New York [Mr. KEATING] reflects their thinking—want firmness, vigor, and honorable dedication to principle by any occupant of the White House. That is what we want. The people of the country are united with respect to that desire.

We seek peace; but in the words of the present occupant of the White House, we have fought wars before. We seek to advance the cause of peace with justice in this country. And, in advancing that cause, responsible and constructive comment is the duty of each of us.

I merely say to my friend, MIKE MANSFIELD, a great Senator, a great representative of the Democratic Party, a great leader in this Chamber, that there will be no division between Senators whom he represents on his side of the aisle and Senators on this side of the aisle in wanting and urging the President of the United States to apply firmness and vigor in the conduct of the foreign policy of this country.

MODEL U.N. ASSEMBLY

Mr. MOSS. Mr. President, this year on April 19 and 20 the Ninth Model United Nations Assembly is to be held at the University of Utah in Salt Lake City. Students will participate and represent member nations in sessions similar to those held by the real U.N. Assembly in New York City. These students will concern themselves with the same international problems with which that organization must deal. They will endeavor to see problems through the eyes of the nationals whom they are designated to represent. Even the Iron Curtain countries will be represented with vigor and zeal. The realism of the debate and the insight displayed by these high school students is reassuring to oldsters who wonder how our land will fare for leaders when we are gone. Through such participation, these students seek to better understand the underlying principles and actual operations of the United Nations as well as gain insight into the complex and often confusing problems which face the nations of the world today. For "ye shall know the truth and the truth shall make you free."

I commend the high school students of Utah for their efforts, Mr. President, and wish them success in their endeavor. For they are demonstrating not only sound scholarship but also sound American citizenship. They are developing an understanding of the peoples of the world in which we must live.

As we are all aware, an informed and active citizenry is one of the greatest assets a nation can claim; and it is an asset essential to a strong democratic society. I am thus deeply disturbed to find that there are some among our citizens who object to this Model U.N. Assembly. There are some, who because they may disagree with the activities of the United Nations do not want it to be discussed. These citizens seek to inflame rather than to inform our students—they wish to convince them with half-truths rather than let them make up their own minds based on the whole truth.

With this purpose in mind, one Robert W. Lee, secretary and editor of a group which styles itself as the Citizens' Information Committee, which apparently is composed of people who are unalterably opposed to the United Nations and that for which it stands, have mailed out widely a propaganda package purporting to expose the truth about the United Nations. This particular package is made up of several mimeographed articles and a copy of "The Dan Smoot Report." All of this material deals with the U.N. as an instrument of the Communist conspiracy, opposed to the ideas and principles upon which our Nation was founded. Their charges are substantiated by such tried and trusted principles as guilt by association.

One of the avowed purposes of this package, Mr. President, is "that those who have undertaken to protest the Model United Nations Assembly may have additional material with which to document their case." Obviously, objectivity, or any attempt to present both sides of a given question, is ignored. An examination of one or two of the so-called arguments presented by the Citizens' Information Committee will reveal their total disregard for fact and figure and total dependence on the irrational and the irrelevant.

In an article entitled "Eyewitnesses Refute U.N.," it is charged that the U.N. has wrecked the Congo and brought chaos and crisis where none had existed. The statement or misstatement that "The United Nations has started all this scandalous mess—destroying a prosperous young country where black and white were working and living together" is typical. No attempt is made to explain why the U.N. went into the Congo or what it has done there. Only the mistakes of U.N. troops or administrators—and admittedly there have been mistakes—are mentioned.

The article does not point out, however, that the United Nations entered the Congo only at the urgent request of the legitimate government of that nation after law and order had broken down within the newly independent state, after the Army had mutinied, and only after the infant Congolese Government was unable to maintain control. Mobs roamed the streets, hunger haunted the countryside, and divisive elements broke into open conflict.

In this desperate situation the Congolese Government sought aid, first from the United States, and then sought it from the U.N.

President Eisenhower saw that only the United Nations could render such assistance without involving the infant Congolese nation in a cold-war power struggle. That is why the United States did not respond to the plea of the Congolese. We did not want the Soviets to enter the Congo and, by giving their so-called aid, create a Soviet satellite in the heart of Africa. On the other hand, had the United States alone given aid, in the minds of the Congolese we would have been guilty of colonialism from which they had only recently been freed. In either case the cold war would have moved into the heart of Africa. Thus, the only suitable alternative was the United Nations. Wisely, both Presidents Eisenhower and Kennedy have given U.S. support to the U.N. presence in the Congo.

Because of U.N. action the Congo today is free and whole. It is edging forward along the path of law and order. No American soldier will die there. And, perhaps most important, no Soviet soldier will live there. The Congo has a chance for real independence. If the Citizens' Information Committee is in reality concerned with spreading the truth about the United Nations, this, too, should be pointed out.

In a second article included in the package the "Universal Declaration of Human Rights" of the U.N. is compared with the Constitution of the U.S.S.R. The Citizens' Committee implies that because there is a similarity between the two, and differences between the universal declaration and our own Declaration of Independence and Bill of Rights, the U.N. document is obviously a Communist treatise. Such reasoning would seem to smack of the guilt-by-association principles which we have all come to disavow.

For example, it is pointed out that article 26 of the Universal Declaration of Human Rights states "everyone has the right to education. Similarly, article 121 of the Russian Constitution states, "Citizens of the U.S.S.R. have the right to education." It is implied that the statement in the Declaration of Human Rights is thus communistic in design. There is no attempt, however, to point out at the same time that while not in our Constitution, the system of universal free public education has been the cornerstone of our society and the strength of the American system.

I would ask the Citizens' Information Committee which sees subversion in similarity, are then our public schools communistic in design?

Mr. President, I could point out many more half-truths and erroneous implications which are found throughout the statements issued by this committee, but I do not feel that these statements merit such attention. Indeed the only attention merited by these articles is that attention which brings about awareness of the tactics which are being used in an attempt to misrepresent and misinform for motives known only by those who have issued them. For if we are aware of these tactics, they cannot accomplish their aim of misrepresentation and misinformation; and then they will be unable to destroy the value of free and open discussion which the Model United Nations Assembly represents and promotes.

I am confident that the high school students of Utah will not fall prey to these propaganda efforts. I am confident that they will seek objectivity in their understanding of the United Nations. They will consider its faults and failures as well as its strengths and successes. And in doing so they will reaffirm our proud heritage of informed and active citizens seeking to strengthen our society and solve its problems.

Mr. President, these interested and intelligent students do not deserve the disruptive attentions of the Citizens' Information Committee and similar groups. Rather they deserve our attention and our support. I know that they have all of our good wishes that the Ninth Utah Model U.N. Assembly will be effective and informative.

Mr. President, the Deseret News has said better than I, in an editorial on April 11, the purpose and value of this model assembly. I ask unanimous consent that it be printed in the RECORD at this point.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

MODEL FOR UNDERSTANDING

In a world of 3 billion human beings, half of them living in Asia, 250 million more in Africa and three-fourths of the inhabitants of the earth members of nonwhite races, few things are more important than the building of mutual understanding.

Creation of understanding is, of course, a prime goal of the United Nations. It is also the goal of such activities as the Model U.N. for high school students, held annually throughout the Nation.

Utah's Model United Nations Assembly will convene Friday and Saturday at the University of Utah, with 1,400 students from 76 high schools in attendance. Regardless of one's feelings about the U.N. itself, there can be little doubt of the value of this annual effort to analyze its weaknesses and strengths as well as the issues before it.

The intriguing feature of the Model U.N. is the way its play acting helps develop fuller understanding of world issues and peoples and at the same time fosters an appreciation of the very real and technical difficulty of reaching agreement among nations.

Each school chooses the nation it will represent throughout the year. Under the guidance of faculty members, students study their nation and its problems in relation to the world community. To make the best possible preparation for the assembly, students must employ all conventional methods of study and in addition hold caucuses with other schools and discussion groups. Delegates who attend the Model U.N. must come exceptionally well prepared. They should leave with more patient understanding of the complexity of world affairs, less inclined to insist on oversimplified, dramatic solutions that actually create greater problems and dangers than they solve.

Success to Utah's high school Model United Nations Assembly in its great effort to influence students to join hands and work together cooperatively to keep our land of liberty a land where there is always the freedom to come to grips with hard issues and to better understand our neighbors.

ADJOURNMENT UNTIL MONDAY, APRIL 22, 1963

Mr. KUCHEL. Mr. President, if there is no further business to be transacted, I move, in accordance with the order previously entered, that the Senate adjourn until noon on Monday next.

The motion was agreed to; and (at 1 o'clock and 53 minutes p.m.) the Senate adjourned, under the order previously entered, until Monday, April 22, 1963, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate April 18, 1963:

DIPLOMATIC AND FOREIGN SERVICE

Chester Bowles, of Connecticut, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to India.

IN THE COAST GUARD

The following-named person to be lieutenant commander in the U.S. Coast Guard:

Edward J. Ard

The following-named person to be lieutenant in the U.S. Coast Guard:

Lawrence R. Montali

The following-named persons to be lieutenants (junior grade) in the U.S. Coast Guard:

Richard C. Binzley
Robert M. Massenburg
Robert G. Rugur
Theodore E. Deming
Karl F. Wassenberg

IN THE AIR FORCE

The following-named officers to be placed on the retired list in the grade indicated, under the provisions of section 8962, title 10 of the United States Code:

In the grade of general

Gen. Samuel E. Anderson, 92A (major general, Regular Air Force), U.S. Air Force.

Gen. Emmett O'Donnell, Jr., 387A (major general, Regular Air Force), U.S. Air Force.

Gen. Truman H. Landon, 93A (major general, Regular Air Force), U.S. Air Force.

In the grade of lieutenant general

Lt. Gen. George W. Mundy, 358A (major general, Regular Air Force), U.S. Air Force.

Lt. Gen. James E. Briggs, 356A (major general, Regular Air Force), U.S. Air Force.

The following-named officers to be assigned to positions of importance and responsibility designated by the President in the grade indicated, under the provisions of section 8066, title 10 of the United States Code:

In the grade of general

Lt. Gen. Robert M. Lee, 590A (major general, Regular Air Force), U.S. Air Force.

Lt. Gen. Jacob E. Smart, 592A (major general, Regular Air Force), U.S. Air Force.

Lt. Gen. Joe W. Kelly, 612A (major general, Regular Air Force), U.S. Air Force.

Lt. Gen. Gabriel P. Disosway, 654A (major general, Regular Air Force), U.S. Air Force.

In the grade of lieutenant general

Maj. Gen. William O. Senter, 648A, Regular Air Force.

Maj. Gen. Raymond J. Reeves, 1082A, Regular Air Force.

Maj. Gen. Maurice A. Preston, 1337A, Regular Air Force.

Maj. Gen. David Wade, 1582, Regular Air Force.

Maj. Gen. Edwin B. Broadhurst, 1350A, Regular Air Force.

Lt. Gen. Edward H. Underhill, 421A (major general, Regular Air Force) U.S. Air Force, to be senior Air Force member, Military Staff Committee, United Nations, under the provisions of section 711, title 10 of the United States Code.

IN THE NAVY

Vice Adm. George F. Beardsley, U.S. Navy, to have the grade of vice admiral on the retired list pursuant to title 10, United States Code, section 5233.

Rear Adm. Morris A. Hirsch, U.S. Navy, to be reappointed Director of Budget and Reports in the Department of the Navy for a term of 1 year.

The following-named officer of the Chaplain Corps of the Regular Navy for permanent promotion to the grade of rear admiral subject to qualification therefor as provided by law:

James W. Kelly.

EXTENSIONS OF REMARKS

Aid to Housing for the Elderly

EXTENSION OF REMARKS
OF

HON. THOMAS J. McINTYRE

OF NEW HAMPSHIRE
IN THE SENATE OF THE UNITED STATES
Thursday, April 18, 1963

Mr. McINTYRE. Mr. President, the need for increased private financing for housing for the elderly is very clear. This point has been made repeatedly by the senior Senator from Pennsylvania, with whom I was pleased to join in offering S. 1170, a bill to open new sources of financing for such housing.

The Federal Home Loan Bank Board recently implemented the provisions of the Housing Act of 1961 providing for a special housing for the aged lending program for Federal savings and loan associations, authorizing them to invest up to 5 percent of their assets in loans on housing for the aged. Federal associations will be permitted to make mortgage loans up to 90 percent of value with maturities running up to 30 years. The new regulation helps to meet a pressing social need. Needless to say, this authorization for the institutions of the Federal Home Loan Bank System is barely a beginning. It will take a determined effort, including legislation such as S. 1170, before satisfactory progress can be made toward achieving a solution of this problem.

I ask unanimous consent that the text of an amendment to the rules and regulations for the Federal Savings and Loan System (12 CFR Part 545) be printed in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

SECTION 545.6–16. Housing Facilities for the Aging:

(a) General provisions: Subject to the provisions of this section and the provisions of paragraph (a) of section 541.12 of these regulations, a Federal association may, if permitted by the terms of its charter, invest in installment loans or participating interests therein which are secured by improved real estate designed for the purpose of providing accommodations for occupancy by aging persons over 55 years of age, or of providing rest homes or nursing homes, so constructed or altered as to be suitable primarily for the occupancy of aging persons over 55 years of age, and limited principally to the occupancy of such persons. Said authority shall be exercised by a Federal association only by the making of loans in accordance with the provisions of this section. Such loan plans, practices and procedures, not inconsistent with this section or with other provisions of this part otherwise applicable to such loans, as may be used in the making of such loans, are hereby approved by the Board.

(b) Basic limitations: (1) A Federal association may make or invest in loans, or participating interests therein, under this section only when (i) the real estate security is located within such association's regular lending area, (ii) the loans are made on a monthly installment basis and (iii) the aggregate amount of the investments made under this section does not at any one time exceed 5 percent of the association's assets.

(c) Limitations on specific loans: (1) the principal obligation of each such loan shall be specified in the security instrument with respect to such loan and shall not exceed (i) 90 percent of the value of such real estate security therefor, if the loan is not an insured loan as defined in section 541.15 of these regulations, or (ii) the maximum percentage of the value of such real estate security acceptable to the insuring agency, if such loan is an insured loan as so defined. Each such loan shall be repayable monthly within 30 years or, if an insured loan, within the period acceptable to the insuring agency.

(2) A Federal association shall not make any loan pursuant to this section unless and until it has obtained a statement signed by the borrower or, if the borrower is a trust, partnership, corporation, or syndicate, signed by its authorized officer or agent, certifying that the security property has been or, as a result of such loan will be, constructed or altered to provide housing accommodations suitable primarily for aging persons over 55 years of age or to provide a rest home or a nursing home for such persons and certifying that the initial occupancy of such property will be limited principally to aging persons over 55 years of age.

(3) A Federal association shall not make any loan on existing housing accommodations for the aging, rest homes, or nursing homes pursuant to this section unless and until it has obtained evidence from the appropriate State or local authorities that the security property has been approved by such authorities, for occupancy by aging persons over 55 years of age or, if applicable, as a rest home or a nursing home for such persons. In any jurisdiction where such facilities are not subject to regulation under State or local laws or ordinances, a Federal association shall not make any loan pursuant to this section unless and until it has obtained a statement signed by an architect or, in the absence of an architect, such other qualified person as the board of directors of the association may designate certifying that the security property is designed primarily to provide housing accommodations for aging persons over 55 years of age or, if applicable, to provide a rest home or nursing home for such persons. If the security property is to be constructed or altered as a result of a loan made pursuant to this section, a Federal association shall not make such a loan unless and until it has obtained evidence from the appropriate State or local authorities that the plans and specifications for the construction or alteration comply with all applicable State and local laws or ordinances and that the security property, if completed according to such plans and specifications, will be approved by such authorities for occupancy by aging persons over 55 years of age or, if applicable, for occupancy as a rest home or a nursing home for such persons. If the security property to be constructed or altered as a result of the loan is located in a jurisdiction where such facilities are not subject to regulation under State or local laws or ordinances, a Federal association shall not make any loan pursuant to this section unless and until it has obtained a statement signed by an architect or, in the absence of an architect, such other qualified person as the board of directors of the association may designate, certifying that he has inspected the plans and specifications for the construction or alteration and certifying that the security property, if constructed or altered according to such plans and specifications, will be designed primarily to provide housing accommodations for aging persons over 55 years of age or, if applicable, to provide a rest home or a nursing home for such persons. Notwithstanding any other provision of this subparagraph 3, if the loan is an insured loan as defined in section 541.15 of these regulations, the association may accept the determination of the insuring agency as evidence of compliance with the requirements of this subparagraph 3.

(d) Relationship to the other provisions of the regulations: Except as expressly provided by this section, the exercise of any authority conferred on or vested in any Federal association by this section shall be subject to, and limited or restricted by, all other provisions of this part: *Provided*, That loans or investments made pursuant to this section shall not be included in the aggregate amount of investments referred to in section 545.6–7.

(Sec. 5, 48 Stat. 132, as amended; 12 U.S.C. 1464. Reorg. Plan No. 3 of 1947, 12 F.R. 4981, 3 CFR, 1947 Supp.) (Effective May 13, 1963.)

By the Federal Home Loan Bank Board:
HARRY W. CAULSEN,
Secretary.

HOUSE OF REPRESENTATIVES

MONDAY, APRIL 22, 1963

The House met at 12 o'clock noon.

The Chaplain, Rev. Bernard Braskamp, D.D., offered the following prayer:

Psalms 118: 24: *This is the day which the Lord hath made; we will rejoice and be glad in it.*

Almighty and ever-blessed God, as we face the duties and tasks of this new day and again look unto Thee for guidance, may we be abundantly blessed with wisdom and understanding.

Fill us with a passion for justice and righteousness and may we not only be zealous and eager for our own rights but may we respect and safeguard the rights of others and help supply their needs.

We pray that the legislation, which the Congress is proposing and seeking to enact into law, may be for Thy glory and for the welfare of our beloved country and all humanity in its search for a happier and healthier way of life.

Hear us in the name of the Master who went about doing good. Amen.

THE JOURNAL

The Journal of the proceedings of Thursday, April 11, 1963, was read and approved.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Ratchford, one of his secretaries, who also informed the House that on April 19, 1963, the President approved and signed a bill of the House of the following title:

H.R. 4423. An act permitting the Secretary of the Interior to continue to deliver water to lands in the third division, Riverton reclamation project, Wyoming.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. McGown, one of its clerks, announced that the Senate had passed without amendment a joint resolution of the House of the following title:

H.J. Res. 234. Joint resolution to provide the reappointment of John Nicholas Brown as Citizen Regent of the Board of Regents of the Smithsonian Institution.

The message also announced that the Senate had passed, with amendments in which the concurrence of the House is requested, a bill and a concurrent resolution of the House of the following titles:

H.R. 2440. An act to authorize appropriations during fiscal year 1964 for procurement, research, development, test, and evaluation of aircraft, missiles, and naval vessels for the Armed Forces, and for other purposes; and

H. Con. Res. 119. Concurrent resolution to print as a House document the Constitution of the United States, with an analytical index and ancillaries regarding proposed amendments.

The message also announced that the Senate had passed bills and concurrent resolutions of the following titles, in which the concurrence of the House is requested:

S. 247. An act to authorize survey and establishment of a townsite for the Juneau Indian Village in Alaska;

S. 394. An act to validate the homestead entries of Leo F. Reeves;

S. 873. An act to direct the Secretary of the Interior to convey certain public lands in the State of Nevada to the county of Lincoln, State of Nevada;

S. Con. Res. 6. Concurrent resolution accepting the statue of the late John Burke, of North Dakota, and tendering thanks of Congress therefor;

S. Con. Res. 7. Concurrent resolution authorizing the temporary placement in the rotunda of the Capitol of a statue of the late John Burke, of North Dakota, and the holding of ceremonies incident thereto;

S. Con. Res. 8. Concurrent resolution to print the proceedings in connection with the acceptance of the statue of the late John Burke, of North Dakota;

S. Con. Res. 9. Concurrent resolution for ceremonies in the rotunda in connection with the statue of the late Joseph Ward, of South Dakota;

S. Con. Res. 10. Concurrent resolution to tender the thanks of Congress to South Dakota for the statue of Joseph Ward, to be placed in Statuary Hall;

S. Con. Res. 11. Concurrent resolution to print as a Senate document the proceedings at the acceptance of the statue of Joseph Ward, to be placed in Statuary Hall;

S. Con. Res. 32. Concurrent resolution authorizing the printing for the use of the Senate Select Committee on Small Business of its hearing of the 87th Congress on "Space Satellite Communications"; and

S. Con. Res. 35. Concurrent resolution authorizing the printing of additional copies of part 1 of the hearings of the Joint Economic Committee on the January 1963 Economic Report of the President.

The message also announced that the Vice President has appointed Mr. JOHNSTON and Mr. CARLSON members of the joint select committee on the part of the Senate, as provided for in the act of August 5, 1939, entitled "An Act to provide for the disposition of certain records of the United States Government," for the disposition of executive papers referred to in the report of the Archivist of the United States numbered 63–10.

OVERTONES OF DICTATORSHIP IN KENNEDY EFFORTS TO MANIPULATE STEEL PRICES

Mr. ALGER. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The **SPEAKER**. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. ALGER. Mr. Speaker, does the President believe he has dictatorial authority? The attitude of President Kennedy as it concerns the setting of prices by various steel companies indicates the President misunderstands his role in our capitalistic, private enterprise system. Without specific legislation authorizing price and wage control, the Chief Executive has no constitutional right to intervene in the price structure of any business or industry.

Yet, what has been the history of the President's actions in steel? Last year he brought the full weight of his Office to bear to prevent the steel industry from taking action for which the steel companies alone, in a free society, were solely responsible. We remember too well the midnight raids by the FBI, the threatened antitrust suits, and the scare headlines engineered by the White House to set public opinion against the steel companies. President Kennedy succeeded in forcing price control on free industry just as surely as if he had assumed the role of a total dictator.

Many gave him the benefit of the doubt last year and accepted the explanation he may have acted in haste and that such action would not be repeated. What is now happening? Again the steel companies have announced certain price increases. While we have not yet had a display of Kennedy tantrums, nor has the President issued any threats, we do have statements from the White House to the effect that selected steel price increases would be acceptable to the President. Evidently the President does assume he has the power to dictate prices without regard to legislation, without consultation from Congress and in complete disregard of his constitutional powers. Are we to see in this attitude of President Kennedy the dark shadows of dictatorship? Does President Kennedy already feel he has sole responsibility in the management of our economy? If he has already assumed this power, the people should be made aware of it.

As a Member of Congress who is sworn to uphold the Constitution in the name of the people of the Fifth District of Texas, I demand to know, Mr. President, what is your master plan? What power and authority do you think you have, and what form of government and changes in our society are you contemplating as your prerogative as the U.S. President?

COMMUNICATION FROM THE CLERK OF THE HOUSE

The **SPEAKER** laid before the House the following communication from the Clerk of the House of Representatives:

APRIL 15, 1963.

The Honorable the SPEAKER,
House of Representatives.

SIR: Pursuant to authority granted on April 11, 1963, the Clerk received from the Secretary of the Senate on Monday, April 15, 1963, the following messages:

That the Senate passed H.R. 277, entitled "An act to amend the act of April 22, 1960, relative to the transfer of certain public lands to the Colorado River Commission of Nevada.";

That the Senate passed H.R. 1087, entitled "An act to release the right, title, or interest, if any, of the United States in certain streets in the village of Heyburn, Idaho, and to repeal the reverter in patent for public reserve.";

That the Senate passed H.R. 1544, entitled "An act to authorize David H. Forman and Julia Forman to bring suit against the United States to determine title to certain lands in Maricopa County Ariz.";

That the Senate passed H.R. 2291, entitled "An act regarding a homestead entry of Lewis S. Cass.";

That the Senate passed H.R. 2294, entitled "An act to authorize the Secretary of the Interior to convey certain land situated in the vicinity of Unalakleet, Alaska, to Mrs. William E. Beltz.";

That the Senate passed H.R. 5067, entitled "An act to amend the Agricultural Adjustment Act of 1938, as amended.";

That the Senate passed without amendment House Concurrent Resolution 86 entitled "Concurrent resolution to authorize the printing as a House document the pamphlet entitled, 'Our Flag'.";

That the Senate passed without amendment House Concurrent Resolution 98 entitled "Concurrent resolution to authorize the printing of a wall map of the United States."; and

That the Senate passed without amendment House Concurrent Resolution 108 entitled "Concurrent resolution to provide for the printing of "How Our Laws Are Made" as a House document."

Respectfully yours,
RALPH R. ROBERTS,
Clerk, U.S. House of Representatives.

U.S. SCIENCE EXHIBIT, SEATTLE WORLD'S FAIR—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The **SPEAKER** laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Foreign Affairs:

To the Congress of the United States:

Pursuant to the provisions of section 5(b), Public Law 85–880, approved September 2, 1958, I transmit herewith the final report of the U.S. science exhibit, Seattle World's Fair.

JOHN F. KENNEDY.
THE WHITE HOUSE, *April 22, 1963.*

CONSENT CALENDAR

The SPEAKER. This is Consent Calendar day. The Clerk will call the first bill on the Consent Calendar.

VETERANS' ADMINISTRATION MEDICAL INSTALLATIONS

The Clerk called the bill (H.R. 228) to amend title 38, United States Code, with respect to the salary of directors and chiefs of staff of Veterans' Administration hospitals, domiciliaries, and centers.

Mr. FORD. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

AMENDING THE BANKRUPTCY ACT

The Clerk called the bill (H.R. 1049) to amend sections 334, 367, and 369 of the Bankruptcy Act (11 U.S.C. 734, 767, 769) and to add a new section 355 so as to require claims to be filed and to limit the time within which claims may be filed in chapter XI—arrangement—proceedings to the time prescribed by section 57n of the Bankruptcy Act (11 U.S.C. 93n).

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 334 of the Bankruptcy Act (11 U.S.C. 734) is amended to read as follows:

"Sec. 334. Within ten days after the petition is filed the court shall give notice by mail to the debtors, the creditors, and other parties in interest of a first meeting of creditors to be held not less than fifteen days nor more than thirty days after the date of the mailing of such notice. The last date for filing claims shall be set forth in such notice."

Sec. 2. That after section 354 of the Bankruptcy Act (11 U.S.C. 754) a new section is added to read as follows:

"Sec. 355. Where a petition is filed under section 322 of this Act, subdivision n of section 57 of this Act shall apply."

Sec. 3. That paragraph 3 of section 367 of the Bankruptcy Act (11 U.S.C. 767) is amended to read as follows:

"(3) the consideration deposited, if any, shall be distributed and the rights provided by the arrangement shall inure to the creditors affected by the arrangement whose claims (a) have been filed prior to the date of confirmation but within the time prescribed by section 355 of this chapter and are allowed or (b) have been filed after the date of confirmation but within the time prescribed by section 355 of this chapter and are allowed; and".

Sec. 4. Paragraphs (2) and (3) of section 369 of the Bankruptcy Act (11 U.S.C. 769) are amended to read as follows:

"(2) are disputed or unliquidated, have been scheduled by the debtor, and are filed within the time prescribed by section 355 of this chapter; or

"(3) arise from the rejection of executory contracts by the debtor and are filed within the time prescribed by section 355 of this chapter."

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

PROMULGATION OF RULES OF PRACTICE AND PROCEDURE UNDER THE BANKRUPTCY ACT

The Clerk called the bill (H.R. 2859) to provide for the promulgation of rules of practice and procedure under the Bankruptcy Act, and for other purposes.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. GROSS. Mr. Speaker, reserving the right to object, may I ask someone who has knowledge of this bill the purpose of it?

Mr. CELLER. The Supreme Court of the United States already has authority to prescribe rules regulating bankruptcy proceedings. This would give the Supreme Court the same general rulemaking authority in bankruptcy that it has already been given in civil procedure, admiralty, criminal procedure prior to and including verdict, and review of decisions of the Tax Court.

Mr. GROSS. Does the Supreme Court not have that authority?

Mr. CELLER. Apparently there is some question about it. To resolve that question we seek to pass this bill.

Mr. GROSS. That is the only thing involved?

Mr. CELLER. That is all.

Mr. GROSS. Can the gentleman tell me how we are getting along with bankruptcies these days? Are they increasing or decreasing?

Mr. CELLER. In some sections of the country, as far as I can gather, there are a good deal of increases. In other sections, while there are no decreases, they are about the same as heretofore. I would say by and large there is a slight increase in bankruptcies.

Mr. GROSS. With 2 years of the New Frontier, we do have an increase in bankruptcies?

Mr. CELLER. I think that is a moot question. I do not think I can say about that.

The SPEAKER. Is there objection to the present consideration of the bill?

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That title 28 of the United States Code, is amended by inserting in chapter 131 thereof immediately following section 2074 of that chapter a new section reading as follows:

"§ 2075. Bankruptcy rules

"The Supreme Court shall have the power to prescribe by general rules, the forms of process, writs, pleadings, and motions, and the practice and procedure under the Bankruptcy Act.

"Such rules shall not abridge, enlarge, or modify any substantive right.

"Such rules shall not take effect until they have been reported to Congress by the Chief Justice at or after the beginning of a regular session thereof but not later than the first day of May and until the expiration of ninety days after they have been thus reported.

"All laws in conflict with such rules shall be of no further force or effect after such rules have taken effect."

Sec. 2. The analysis of chapter 131 of title 28 of the United States Code, immediately preceding section 2071 of that chapter, is amended by inserting therein immediately after item 2074 thereof a new item reading as follows:

"2075. Bankruptcy rules."

Sec. 3. Section 30 of the Bankruptcy Act is repealed but its repeal shall not operate to invalidate or repeal rules, forms, or orders prescribed under the authority of that section by the Supreme Court prior to the enactment of this Act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

USE OF LANDS WITHIN THE SEQUOIA NATIONAL PARK

The Clerk called the joint resolution (H.J. Res. 180) to authorize the continued use of certain lands within the Sequoia National Park by portions of an existing hydroelectric project.

There being no objection, the Clerk read the joint resolution as follows:

Whereas portions of the Kaweah number 3 plant of Southern California Edison Company consisting of diversion works, water conduits, and related facilities were constructed and are being operated and maintained on the Middle and Marble Forks of the Kaweah River near the southwesterly boundary of Sequoia National Park under a permit dated March 5, 1912, granted by the Secretary of the Interior pursuant to the Act of Congress dated February 15, 1901 (31 Stat. 790); and

Whereas said permit expires on March 5, 1962; and

Whereas the power and energy generated by the Kaweah number 3 plant is used to serve the public including use in connection with the administration and enjoyment of the park; and

Whereas Southern California Edison Company has made application to the Secretary of the Interior to renew such permit to occupy and use said lands which are necessary for the continued operation of its Kaweah number 3 plant; and

Whereas the continued operation and maintenance of said facilities within Sequoia National Park upon such terms and conditions as the Secretary of the Interior shall deem necessary for the protection and utilization of the park is in the public interest: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior is hereby authorized to issue a permit to occupy and use lands of the United States within Sequoia National Park necessary for the continued operation, maintenance, and use of the hydroelectric project known as the Kaweah number 3 project of Southern California Edison Company.

Sec. 2. The term of such permit shall expire not later than August 6, 1974, and the permit shall contain such other terms and conditions as the Secretary of the Interior shall deem necessary for the protection and utilization of Sequoia National Park.

Sec. 3. Such permit shall specifically recite that the privileges granted thereby are to be exercised in accordance with the rules and regulations of the Federal Power Commission which are determined by the Secretary of the Interior to be applicable.

With the following committee amendments:

Page 2, line 14, through page 3, line 4, strike out all of section 3 and insert in lieu thereof the following language:

Sec. 3. Such permit shall specifically recite that the privileges granted thereby are to be exercised in accordance with the Federal Power Act (16 U.S.C. 791(a)-825(r)) and the rules and regulations thereunder which the Secretary of the Interior, after consultation with the Federal Power Commission, determines to be applicable.

Strike out all of the preamble.

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CUDDEBACK LAKE AIR FORCE RANGE, CALIF.

The Clerk called the bill (H.R. 3574) to provide for the withdrawal and reservation for the use of the Department of the Air Force of certain public lands of the United States at Cuddeback Lake Air Force Range, Calif., for defense purposes.

There being no objection, the Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subject to valid existing rights, the public lands, and the minerals therein, within the areas described in section 2 of this Act are hereby withdrawn from all appropriations and other forms of disposition under the public land laws, including the mining and mineral leasing laws and disposals of materials under the Act of July 31, 1947, as amended (61 Stat. 681; 30 U.S.C. 601–604), except as provided in subsection (b) of this section, and reserved for the use of the Department of the Air Force for a period of ten years with an option to renew the withdrawal and reservation for a period of five years upon notice to the Secretary of the Interior, and subject to the condition that the reservation may be terminated at any time during either of such periods by the Secretary of the Air Force upon notice to the Secretary of the Interior.

(b) The Secretary of the Interior may, with the concurrence of the Secretary of the Air Force, authorize use or disposition of any of the lands or resources withdrawn and reserved by subsection (a) of this section.

(c) Upon request of the Secretary of the Interior at the time of final termination of the reservation effected by this Act, the Department of the Air Force shall make safe for nonmilitary uses the land withdrawn and reserved or such portions thereof as may be specified by the Secretary of the Interior, by neutralizing unexploded ammunition, bombs, artillery projectiles, or other explosive objects and chemical agents. Thereafter the Secretary of the Interior pursuant to law shall provide for the appropriate use or disposition of all or any part of the land withdrawn and reserved under provisions of this Act. Nothing in this subsection, however, shall be construed to prevent the Secretary of the Air Force at that time from making application for further withdrawal and reservation of all or part of said lands under laws and regulations then existing.

SEC. 2. The lands withdrawn and reserved by this Act are those that are now or may hereafter become subject to the public land laws within the area described as follows:

Approximately 7,546 acres, more or less, within the Cuddeback Lake Air Force Range, San Bernardino County, California, and more fully described as follows: Sections 5, 6, 7, 8, 17, 18, 19, 20, 29, 30, 31 (except the south half of lot 2 in the southwest quarter of section 31), and 32, township 30 south, range 43 east, Mount Diablo Meridian, San Bernardino County, California, a total of 7,546 acres, more or less.

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

CLAY COUNTY HOSPITAL, BRAZIL, IND.

The Clerk called the bill (H.R. 2364) for the relief of the Clay County Hospital, Brazil, Ind.

There being no objection, the Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to the Clay County Hospital, of Brazil, Indiana, the sum of $7,057.50. The payment of such sum shall be in full settlement of all the claims of the Clay County Hospital against the United States for payment of civil defense matching funds for an emergency generator for an addition to such hospital which payment was not made in the fiscal year ending June 30, 1960, because funds were not available for such purpose, and cannot now be made because of regulations which prohibit the retroactive payment of such funds: *Provided,* That no part of the amount appropriated in this Act shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

HAZARDOUS DUTY PAY

The Clerk called the bill (H.R. 1159) to amend the Classification Act of 1959 to authorize the establishment of hazardous duty pay in certain cases.

There being no objection, the Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That title VIII of the Classification Act of 1949, as amended (5 U.S.C. 1131–1133), is amended by adding at the end thereof the following:

"SEC. 804. The Commission shall establish a schedule or schedules of pay differentials for irregular or intermittent duty involving unusual physical hardship or hazard. The appropriate differential shall be paid to any officer or employee to whom this Act applies for any period in which such officer or employee is subjected to physical hardship or hazard not usually involved in carrying out the duties of his position. Such pay differential—

"(1) shall not be applicable with respect to any officer or employee in any position the classification of which takes into account the degree of physical hardship or hazard involved in the performance of the duties thereof;

"(2) shall not exceed an amount equal to 25 per centum of the rate of basic compensation applicable with respect to such officer or employee; and

"(3) shall be paid under regulations which shall be prescribed by the Commission."

SEC. 2. The amendment made by the first section of this Act shall become effective on the first day of the first pay period which begins more than 90 days after the date of enactment of this Act.

With the following committee amendment:

Page 2, line 15, strike out "ninety" and insert "one hundred and eighty" in lieu thereof.

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

ADDITIONAL HEALTH BENEFIT PLANS

The Clerk called the bill (H.R. 1819) to amend the Federal Employees Health Benefits Act of 1959 to provide additional choice of health benefits plans, and for other purposes.

Mr. FORD. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Michigan [Mr. FORD]?

There was no objection.

ADMINISTRATIVE EXPENSES OF RETIRED EMPLOYEES HEALTH BENEFITS

The Clerk called the bill (H.R. 3517) to amend the Retired Federal Employees Health Benefits Act with respect to Government contribution for expenses incurred in the administration of such act.

Mr. FORD. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Michigan [Mr. FORD]?

There was no objection.

ACCELERATION OF DATE FOR TAKING ECONOMIC CENSUSES

The Clerk called the bill (H.R. 3545) to amend section 131 of title 13, United States Code, so as to provide for taking of the economic censuses 1 year earlier starting in 1968.

There being no objection, the Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 131 of title 13, United States Code, is amended to read as follows:

"§ 131. Collection and publication; five-year periods

"The Secretary shall take, compile, and publish censuses of manufactures, of mineral industries, and of other businesses, including the distributive trades, service establishments, and transportation (exclusive of means of transportation for which statistics are required by law to be filed with, and are compiled and published by, a designated regulatory body), in the year 1964, then in the year 1968, and every fifth year thereafter, and each such census shall relate to the year immediately preceding the taking thereof."

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

DEFINITION OF THE TERM "CHILD" UNDER RETIREMENT ACT

The Clerk called the bill (H.R. 3612) to define the term "child" for lump-sum payment purposes under the Civil Service Retirement Act.

There being no objection, the Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 1(j) of the Civil Service Retirement Act (5 U.S.C. 2251(j)) is amended by adding at the end thereof the following sentence: "The term 'child', for purposes of section 11, shall include an adopted child and a natural child, but shall not include a stepchild.".

SEC. 2. The provisions under the heading "Civil Service Retirement and Disability Fund" in title I of the Independent Offices Appropriation Act, 1959 (72 Stat. 1064; Public Law 85-844), shall not apply with respect to benefits resulting from the enactment of this Act.

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

The SPEAKER. This concludes the call of the Consent Calendar.

PRIVATE CALENDAR

The SPEAKER. Under the previous order of the House, this is the day set for the call of the Private Calendar. The Clerk will call the first individual bill on the Private Calendar.

COL. FRANK D. SCHWIKERT, USAF

The Clerk called the bill (H.R. 3623) for the relief of Col. Frank D. Schwikert, U.S. Air Force.

There being no objection, the Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury, not otherwise appropriated, to Colonel Frank D. Schwikert, 6311A, United States Air Force, Andrews Air Force Base, Maryland, the sum of $3,539.22 in full satisfaction of his claim against the United States for reimbursement in addition to the amount he received under section 2732 of title 10, United States Code, for household goods and personal effects destroyed as a result of a fire on April 19, 1962, at the Perry Moving and Storage, Incorporated, Seattle, Washington, while the property was stored in a warehouse under a Government contract: *Provided,* That no part of the amount appropriated in this Act shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this Act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

MAJ. LEONARD H. POTTERBAUM, U.S. AIR FORCE

The Clerk called the bill (H.R. 3625) for the relief of Maj. Leonard H. Potterbaum, U.S. Air Force.

There being no objection, the Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Major Leonard H. Potterbaum, 35382A, United States Air Force, Box 7235, Area B, Aerospace Systems Division, Wright-Patterson Air Force Base, Ohio, the sum of $5,777.93 in full satisfaction of his claim against the United States for reimbursement in addition to the amount he received under section 2732 of title 10, United States Code, for household goods and personal effects destroyed as a result of a fire on December 4, 1956, at the National Movers Company, Incorporated, East Rutherford, New Jersey, while the property was stored in a warehouse under a Government contract: *Provided,* That no part of the amount appropriated in this Act shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this Act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

ARTHUR C. BERRY AND OTHERS

The Clerk called the bill (H.R. 3627) for the relief of Arthur C. Berry and others.

There being no objection, the Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the hereinafter named persons are relieved of all liability to refund to the United States the amounts listed opposite their names or such lesser amounts as may be outstanding on the date of enactment of this Act. Said amounts represent overpayments of retired or retainer pay resulting, through no fault of the payees, from erroneous computations of retired and retainer pay, due them from the Department of the Navy, or the amount of service on which such pay was based in the several amounts set opposite their respective names as listed therein:

Chief Yeoman Arthur C. Berry, United States Fleet Reserve, $1,801.72;

Chief Boatswain's Mate William W. Brewer, United States Fleet Reserve, $236.75;

Lieutenant Commander William R. Davis, United States Naval Reserve (retired), $90; Machinist's Mate First Class Rufino De Las Penas, United States Fleet Naval Reserve, $190; Chief Commissaryman Theodore E. Denno, United States Fleet Reserve, $44; Chief Boatswain's Mate Albert T. Diedrich, United States Fleet Reserve, $462.77; Chief Pay Clerk (W-2) Stephen Hruska, United States Navy (retired), $320.58; Lieutenant Junior Grade Thomas C. Ingle, United States Navy (retired), $123.60;

Lieutenant Junior Grade Bruce C. Jeppson, Medical Corps, United States Naval Reserve (retired), $37.02; Chief Machinist's Mate James L. Keppel, United States Fleet Reserve, $1,439.28; Commander Austin S. Kibbee, United States Naval Reserve (retired), $5,847.85; Chief Aviation Structural Mechanic Lee J. King, United States Fleet Reserve, $85.68; Lieutenant John J. Lowe, United States Navy (retired), $1,161.76; Chief Machinist Donald A. McFarland, United States Navy (retired), $1,395.64; Chief Boatswain Hugh F. MacNichol, United States Navy (retired), $9,686; Chief Machinist's Mate Everett Murphy, United States Fleet Reserve, $340; Chief Storekeeper Arthur V. Newell, United States Fleet Reserve, $1,839.21; Lieutenant Commander Benjamin D. Parish (Medical Corps), United States Naval Reserve (retired), $48.42; Chief Warrant Officer Opie G. Ray (W-2), United States Navy (retired), $742;

Ensign Nathan R. Sewell, Junior, United States Naval Reserve (retired), $549.18; Rear Admiral Kirby Smith, Civil Engineering Corps, United States Naval Reserve (retired), $4,400; Boatswain's Mate First Class Anastacio Torres, United States Navy (retired), $184.24; Chief Pharmacist James W. Walker, United States Navy (retired), $665.28; Lieutenant George A. Whitlock, United States Navy (retired), $1,783.92.

SEC. 2. In the audit and settlement of the accounts of any certifying or disbursing officer of the United States, full credit shall be given for the amount for which liability is relieved by this Act.

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

WORLD GAMES, INC.

The Clerk called the bill (H.R. 1213) for the relief of World Games, Inc.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in recognition of the outstanding success of the 1959 Games of the Modern Pentathlon in promoting international good will toward the United States of America, the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to the World Games, Incorporated, a Pennsylvania corporation, the sum of $41,567, to enable the corporation to discharge the obligations incurred by the corporation in connection with the 1959 Games of the Modern Pentathlon held at Hershey, Pennsylvania, September 26–30, 1959. Such sum shall be paid only on condition that the corporation shall use such sum to discharge such obligations: *Provided,* That no part of the amount appropriated in this Act shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this Act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum of not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CARMELA CALABRESE DiVITO

The Clerk called the bill (H.R. 1292) for the relief of Carmela Calabrese DiVito.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of

America in Congress assembled, That, for purposes of sections 101(a)(27)(A) and 205 of the Immigration and Nationality Act, Carmela Calabrese DiVito shall be held and considered to be the minor natural-born alien child of Pasquale and Lucy DiVito, citizens of the United States.

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

LAWRENCE E. BIRD

The Clerk called the bill (H.R. 1267) for the relief of Lawrence E. Bird.

There being no objection, the Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $2,867.17 to Lawrence E. Bird, 5689 Valley Street, Dayton 24, Ohio, in full settlement of his claim against the United States for expenses incurred in January and February of 1960 in connection with replacing a well on his property destroyed by certain construction activities at Wright-Patterson Air Force Base, Ohio. This claim is not cognizable under the tort claims provisions of title 28, United States Code: *Provided,* That no part of the amount appropriated in this Act shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this Act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendment:

On page 1, line 5, strike out "$2,867.17" and insert "$2,517.17".

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

LT. CLAUDE V. WELLS

The Clerk called the bill (H.R. 1286) for the relief of Lt. Claude V. Wells.

There being no objection, the Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Lieutenant Claude V. Wells, United States Navy, retired, is relieved of any liability under the Act of July 31, 1894 (5 U.S.C. 62), to pay to the United States all amounts received by him as a civilian employee of the Department of the Navy from February 9, 1959, through September 17, 1960, and as an employee of the General Services Administration from September 18, 1960, through July 5, 1962; and is relieved of all liability to pay to the United States all amounts received by him as a retired commissioned officer of the United States Navy between February 9, 1959, and July 5, 1962, in contravention of the Act of July 30, 1932 (5 U.S.C. 59a). In the audit and settlement of the accounts of any certifying or disbursing officer of the United States, credit shall be given for amounts for which liability is relieved by this Act.

With the following committee amendment:

Page 2, following line 6, insert the following:

SEC. 2. The Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Lt. Claude V. Wells an amount equal to the aggregate of the amounts paid by him, or withheld from sums otherwise due him, in complete or partial satisfaction of the liability to the United States specified in the first section.

SEC. 3. No part of the amount appropriated in this Act shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this Act shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

MRS. ETHEL KNOLL

The Clerk called the bill (H.R. 1428) for the relief of Mrs. Ethel Knoll.

There being no objection, the Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That national service life insurance policies V-320-78-33 and V-322-62-08 issued on the life of George L. Knoll (Veterans' Administration claim numbered XC-5392945) shall be held and considered to have been in force on the date of his death, January 7, 1959. Payments made by reason of this Act shall be made out of the national service life insurance appropriation.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

T. W. HOLT & CO. AND/OR HOLT IMPORT & EXPORT CO.

The Clerk called the bill (H.R. 1447) for the relief of T. W. Holt & Co. and/or Holt Import & Export Co.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury is authorized to pay out of any money in the Treasury not otherwise appropriated, to T. W. Holt and Company and/or Holt Import and Export Company, the sum of $8,478.19. The payment of such sum shall be in full satisfaction of the claim of the said T. W. Holt and Company and/or Holt Import and Export Company against the United States for repayment of excessive customs duties erroneously collected by the Bureau of Customs on canned meat imports from Argentina, which were imported by the said T. W. Holt and Company and/or Holt Import and Export Company between December 8, 1948, and July 3, 1950, and on which the customs duties were liquidated between January 9, 1951, and January 6, 1953: *Provided,* That no part of the amount appropriated in this Act in excess of 10 per centum thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this Act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

OLIVER BROWN

The Clerk called the bill (H.R. 1459) for the relief of Oliver Brown.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Oliver Brown, 122 East Routzong, Fairborn, Ohio, is relieved of all liability to refund to the United States the sum of $395.86, representing an overpayment of salary between the period May 1960, and July 1, 1962, due to an error in computation by Wilkins Air Force Station, Shelby, Ohio. In the audit and settlement of the accounts of any certifying or disbursing officer of the United States, full credit shall be given for the amount for which liability is relieved by this section.

SEC. 2. The Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Oliver Brown the amount certified to him by the Secretary of the Air Force as the aggregate amount paid to the United States by the said Oliver Brown, or withheld by the United States from amounts due him, on account of the liability referred to in the first section of this Act: *Provided,* That no part of the amount appropriated in this Act shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this Act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendments:

Page 1, line 5, strike "$395.86" and insert "$387.82".

Page 1, line 6, strike "May 1960" and insert "July 10, 1960" and strike "July 1, 1962" and insert "May 19, 1962".

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MELBORN KEAT

The Clerk called the bill (H.R. 1561) for the relief of Melborn Keat.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $1,000 to Melborn Keat, of Pen Argyl, Pennsylvania, in full settlement of his claims against the United States for the refund of the amount of a bail bond which another individual was required to post in connection with a hearing in Allentown, Pennsylvania, in April of 1960, which was furnished by the said Melborn Keat in the form of a certified check for $1,000 drawn to the order of a United States commissioner and delivered to him in his official capacity which amount was not returned because the check or the proceeds therefrom were never deposited with the United States district court: *Provided*, That no part of the amount appropriated in this Act in excess of 10 per centum thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this Act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

PATTI JEAN FULTON

The Clerk called the bill (H.R. 1853) for the relief of Patti Jean Fulton.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for purposes of the Civil Service Retirement Act, Patti Jean Fulton shall be deemed to be the adopted daughter of Harold E. Fulton, deceased former employee of the Ordnance Ammunition Command, Joliet, Illinois. No benefits shall accrue by reason of the enactment of this Act for any period prior to the date of enactment of this Act.

SEC. 2. Notwithstanding any other provision of law, benefits payable by reason of the enactment of this Act shall be paid from the Civil Service Retirement and Disability Fund.

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

MRS. RITA M. BRAVI

The Clerk called the bill (H.R. 1876) for the relief of Mrs. Rita M. Bravi.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding the provisions of section 212 (a)(4) of the Immigration and Nationality Act, Mrs. Rita M. Bravi may be issued a visa and admitted to the United States for permanent residence if she is found to be otherwise admissible under the provisions of that Act: *Provided*, That a suitable and proper bond or undertaking, approved by the Attorney General, be deposited as prescribed by section 213 of that Act.

With the following committee amendment:

On page 1, line 10, at the end of the bill, change the period to a colon and add the following:

"*Provided further*, That this exemption shall apply only to a ground for exclusion of which the Department of State or the Department of Justice had knowledge prior to the enactment of this Act."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

MRS. DAVID ISHMAEL

The Clerk called the bill (H.R. 2179) for the relief of Mrs. David Ishmael, Manhattan, Kans.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $862.17, to Mrs. David Ishmael, Manhattan, Kansas, in full settlement of her claim against the United States for the reimbursement of the amount of expenses and other losses and damages occurred in resettlement as a result of her displacement in connection with the acquisition of land (tract numbered A–54) due to the construction of Tuttle Creek Dam and Reservoir project, Kansas: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendments:

Page 1, line 8, strike "occurred" and insert "incurred." Page 2, line 2, strike "in excess of 10 per centum thereof."

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

STELLA McKEE

The Clerk called the bill (H.R. 2245) for the relief of Stella McKee.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding the limitations contained in section 33 of the Trading With the Enemy Act, as amended (50 App. U.S.C. 33), with respect to the filing of claims and the institution of suits for the return of property or any interest therein pursuant to section 9 or 32 of such Act (50 App. U.S.C. 9 or 32), Stella McKee, a United States citizen, may, within six months after the enactment of this Act, file a claim for the return of certain property, namely, her interest under item 7 of the will of Fritz Glogauer, deceased, the title to her interest having been acquired by the United States under the Trading With the Enemy Act by vesting order numbered 4907 of the Office of Alien Property; and that claim shall be considered on its merits in accordance with the remaining provisions of that Act: *Provided*, That if no such return is made within a period of sixty days after the filing of such claim, the said Stella McKee shall be entitled within one year of the expiration of such period, to institute suit pursuant to section 9 of such Act (50 App. U.S.C. 9) for the return of such property.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

KENNETH F. MILLER

The Clerk called the bill (H.R. 2257) for the relief of Kenneth F. Miller.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury is hereby authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Kenneth F. Miller of North Tonawanda, New York, the sum of $50, such amount representing reimbursement to said Kenneth F. Miller for paying out of his funds a settlement of claim for damages arising out of an accident which occurred May 2, 1961, in the Dominion of Canada when he was operating a Treasury Department vehicle in the course of his duties as an inspector with the Bureau of Customs: *Provided*, That no part of the amount appropriated in this Act shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary nothwithstanding. Any person violating the provisions of this Act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MARVIN M. GREENLEE

The Clerk called the bill (H.R. 2292) for the relief of Marvin M. Greenlee.

There being no objection, the Clerk, read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Marvin M. Greenlee, of Fairbanks, Alaska, the sum of $5,000 in full settlement of all his claims against the United States for his expenses incurred in 1953 in salvaging Marine Corps helicopter HRS–2, Bureau Number 129037, which crashed December 5, 1952, on San Gorgonio Mountain, California, while rendering assistance to an Air Force rescue team: *Provided*, That no part of the amount appropriated in this Act shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this Act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

OUTLET STORES, INC.

The Clerk called the bill (H.R. 2300) for the relief of the Outlet Stores, Inc.

Mr. CONTE. Mr. Speaker, I ask unanimous consent that this bill may be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

JAMES M. NORMAN

The Clerk called the bill (H.R. 2302) for the relief of James M. Norman.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That James M. Norman, of Memphis, Texas, is hereby relieved of all obligation to refund to the Federal Crop Insurance Corporation the sum of $2,001.48, representing the sum he has been determined to owe by reason of erroneous payments made by such Corporation.

With the following committee amendment:

Page 1, line 7, after the word "Corporation", insert the following proviso: ": *Provided,* That the Secretary of the Treasury is authorized and directed to reimburse the Federal Crop Insurance Corporation, out of any money in the Treasury not otherwise appropriated, the sum of $2,001.48 representing the overpayment."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

MAURICE CASNER AND EILEEN G. CASNER

The Clerk called the bill (H.R. 2326) for the relief of Maurice Casner and Eileen G. Casner.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Maurice Casner and Eileen G. Casner, his wife, are hereby relieved of all liability to pay the United States the amount of $574.53, representing financial assistance extended in the years 1943 through 1946, when Eileen G. Casner and her son, Michael Allen Casner, were interned by the Japanese at Shanghai, China. The amounts claimed by the United States include funds furnished for subsistence during the period of internment and transportation at the end of the internment period. In the audit and settlement of the accounts of any certifying or disbursing officer of the United States, full credit shall be given for amounts for which liability is relieved by this Act.

With the following committee amendments:

Page 1, line 6: Strike "1943" and insert "1942".

Page 1, line 9: Strike "subsistence" and insert "comfort, medical aid, and maintenance".

Page 1, lines 10 and 11: Strike "and transportation at the end of the internment period".

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

LT. COL. EDWARD C. CAMPBELL

The Clerk called the bill (H.R. 2327) for the relief of Lt. Col. Edward C. Campbell.

There being no objection, the Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Lieutenant Colonel Edward C. Campbell, Army of the United States, retired, the sum of $427.83, in full settlement of his claims against the United States for reimbursement of expenses and losses incurred by him during the period beginning September 14, 1959, and ending October 1, 1959, both dates inclusive, during which period he was required to travel from Fort Sill, Oklahoma, to Fort Sam Houston, Texas, for the purpose of submitting to physical and medical examination in connection with his application for correction of his military record to indicate his retirement from military service for physical disability: *Provided,* That no part of the amount appropriated in this Act shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this Act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

VICTOR L. ASHLEY

The Clerk called the bill (H.R. 2699) for the relief of Victor L. Ashley.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Victor L. Ashley, of Green Cove Springs, Florida, is relieved of liability to the United States in the amount of $6,848.44, representing an overpayment of compensation from January 27, 1957, through October 2, 1961, received by him while employed with the Florida group, Atlantic Reserve Fleet, Green Cove Springs, Florida. In the audit and settlement of the accounts of any certifying or disbursing officer of the United States, credit shall be given for amounts for which liability is relieved by this Act.

SEC. 2. The Secretary of the Treasury is hereby authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to the said Victor L. Ashley an amount equal to the aggregate of the amounts paid by him, or withheld from sums otherwise due him, in complete or partial satisfaction of the liability to the United States specified in the first section of this Act: *Provided,* That no part of the amount appropriated in this Act in excess of 10 per centum thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this Act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendment:

Page 2, lines 8 and 9, strike out, "in excess of 10 per centum thereof".

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

FRANCIS JANIS AND CERTAIN OTHER INDIANS

The Clerk called the bill (H.R. 2700) for the relief of Francis Janis and certain other Indians.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the following Indians are respectively relieved of liability to the United States in the amounts set opposite their names:

Francis Janis, $450; Arthur Pat Janis, $360; Isaac Brave Eagle, $720; Donald Leroy Little, $720; Thomas Big Owl, $360; Charles Thunder Hawk, $360; Benjamin White Face, $360; Morris Eugene Kills Back, $360; Jackson One Feather, $720; Wallace Henry Little, $720; Betty Ann Merrival, $180; Paul Stands, $180; Theodore Kills Ree, $180; Ralph Ghost Dog, Senior, $360; Garvard Good Plume, $180; Eldred O. Brave Eagle, $180; Wallace Red Shirt, $180; Calvin W. Fast Wolf, $180; Lawrence O. Cross, $180; Gerald One Feather, $180; Maurice One Feather, $180; Edward E. Two Bulls, $180; Kenneth J. Short Bull, $180; Benton Rowland, Junior, $180; Eugene Rowland, $180; Paul J. Little, $180; David Bald Eagle, $180; Augustine Gus Knox, $1,080; Norman L. Knox, $180; Donald R. Knox, $180; Alexander E. Swalley, $180; George Brave, $360. Such amounts were advanced by the Department of State in 1958 to pay for the transportation of the persons named and members of their families to the United States from the World's Fair at Brussels, Belgium, where they were stranded when the organization which brought them there to take part in an exhibit, and which was obligated to return them to the United States become insolvent. In the audit and settlement of the accounts of any certifying or disbursing officer of the United States, credit shall be given for any amount for which liability is relieved by this Act.

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

DR. AND MRS. ABEL GORFAIN

The Clerk called the bill (H.R. 2706) for the relief of Dr. and Mrs. Abel Gorfain.

Mr. CONTE. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

VASILIKI MOUNDROUKAS

The Clerk called the bill (H.R. 2708) for the relief of Vasiliki Moundroukas.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of the Immigration and Nationality Act, Vasiliki Moundroukas shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this Act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available.

With the following committee amendment:

Strike out all after the enacting clause and insert the following: "That the Attorney General is authorized and directed to cancel any outstanding orders and warrants of deportation, warrants of arrest, and bond, which may have issued in the case of Vasiliki Moundroukas. From and after the date of the enactment of this Act, the said Vasiliki Moundroukas shall not again be subject to deportation by reason of the same facts upon which such deportation proceedings were commenced or any such warrants and orders have issued."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CHARLES WAVERLY WATSON, JR.

The Clerk called the bill (H.R. 2728) for the relief of Charles Waverly Watson, Jr.

Mr. GROSS. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

WILLIAM C. JESSUP

The Clerk called the bill (H.R. 2736) for the relief of William C. Jessup.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That William C. Jessup of Portland, Oregon, is relieved of all liability for repayment to the United States of the sum of $778.70, representing the amount due the United States as an indebtedness for the cost of shipment of household goods in excess of costs allowable under section I of the Administrative Expenses Act of 1946, as amended (5 U.S.C. 73b-1), in connection with shipping his personal and household effects from Portland, Oregon, to Ankara, Turkey, during March 1960, incident to an official change of duty station.

SEC. 2. The Comptroller General of the United States, or his designee, shall relieve disbursing officers, including special disbursing agents, of the Army, Navy, and Air Force from accountability or responsibility for any payments described in section I of this Act, and shall allow credits in the settlement of the accounts of these officers or agents for payments which are found to be free from fraud and collusion.

SEC. 3. The Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to the said William C. Jessup, the sum of any amounts received or withheld from him on account of the indebtedness referred to in section I of this Act.

No part of the amount appropriated in this Act shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this Act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendment:

Page 2, line 15, add: "No part of the amount appropriated in this Act shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this Act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

MRS. MARY E. O'ROURKE

The Clerk called the bill (H.R. 2743) for the relief of Mrs. Mary E. O'Rourke.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of the Act of August 12, 1955, entitled "An Act to provide for settlement of claims resulting from the disaster which occurred at Texas City, Texas, on April 16 and 17, 1947" (69 Stat. 707) and the 1959 Amendment to the Texas City Disaster Relief Act (73 Stat. 706), the claim of Mrs. Mary E. O'Rourke (formerly Mrs. James V. Pharr) for personal injuries to her former husband shall be deemed to have been filed with the Secretary of the Army before February 9, 1956.

With the following committee amendment:

Strike all after the enacting clause and insert: "That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $12,500 to Mrs. Mary E. O'Rourke of New York, New York, in full settlement of her claims against the United States for an award under the Texas City Disaster Relief Act, as amended (69 Stat. 707, as amended), due her under the laws of the State of Texas based upon the injuries sustained by her former husband, James V. Pharr, in the Texas City disaster on April 17, 1947: *Provided,* That no part of the amount appropriated in this Act shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this Act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

MR. AND MRS. HARLEY BREWER

The Clerk called the bill (H.R. 2772) for the relief of Mr. and Mrs. Harley Brewer.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Mr. and Mrs. Harley Brewer, of San Ildefonso Pueblo, New Mexico, the sum of $9,000. The payment of such sum shall be in full satisfaction of all their claims against the United States for compensation for losses sustained by them when they were forced to abandon a house which they had constructed on Pueblo Indian land in the State of New Mexico without having first obtained the approval of the Secretary of the Interior as required by section 17 of the Act of June 7, 1924 (43 Stat. 636): *Provided,* That no part of the amount appropriated in this Act shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this Act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

MRS. HELEN VESELENAK

The Clerk called the bill (H.R. 2798) for the relief of Mrs. Helen Veselenak.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the requirements relating to time in section 202(h)(1)(B) and 202(p) of the Social Security Act that proof of support be filed by the dependent parent of an insured individual within a specified period after the date of such individual's death in order to qualify for parent's insurance benefits on the basis of such individual's wages and self-employment income shall not apply with respect to the application of Mrs. Helen Veselenak, Byesville, Ohio, for parent's insurance benefits under section 202(h) of such Act on the basis of the wages and self-employment income of her son Joseph Veselenak, Junior (social security account numbered 275-16-7991), if she files such application, together with such proof of support, within the six-month period beginning on the date of the enactment of this Act.

With the following committee amendment:

Page 1, line 3, after the word "requirements" insert "relating to time".

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

GENE H. KING

The Clerk called the bill (H.R. 3022) for the relief of Gene H. King.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Comptroller General of the United States be, and he is hereby, authorized and directed to relieve Gene H. King of all liability to refund to the United States the sum of $200. Such sum represents per diem paid him for the period April 27, 1956, to June 15, 1956, while he was stationed at Fort Devens, Massachusetts, as a second lieutenant in the United States Army.

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

MAJ. ARNOLD M. ANDERSON

The Clerk called the bill (H.R. 3029) for the relief of Maj. Arnold M. Anderson.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Major Arnold M. Anderson, United States Air Force (Air Force serial number AO590173), of Yuba City, California, the sum of $1,723.17. The payment of such sum shall be in full settlement of all claims of the said Major Arnold M. Anderson against the United States arising out of the destruction of his personal property while it was being transported from Middlesex, England, to Beale Air Force Base, California, in connection with his transfer as an officer in the United States Air Force from duty in the United Kingdom to duty at Beale Air Force Base, California: *Provided,* That no part of the amount appropriated in this Act shall be paid or delivered to or received by an agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this Act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

MRS. JOSEPHINE DUBINS

The Clerk called the bill (H.R. 3240) for the relief of Mrs. Josephine Dubins.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $500 to Mrs. Josephine Dubins of 7031½ North Sheridan Road, Chicago, Illinois, the widow of Sheldon Dubins, deceased, in full settlement of her claim against the United States for refund of the amount of a departure bond deposited by her deceased husband, Sheldon Dubins, on behalf of the alien, Edith Herse. Such bond was declared breached, and the amount thereof forfeited, because of the failure of alien Edith Herse to depart from the United States in accordance with the conditions of the bond: *Provided,* That no part of the amount appropriated in this Act in excess of 10 per centum thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this Act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

JOSEPHINE MARIA (BONACCORSO) BOWTELL

The Clerk called the bill (H.R. 3356) for the relief of Josephine Maria (Bonaccorso) Bowtell.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, Josephine Maria (Bonaccorso) Bowtell shall be deemed to be within the purview of section 354(5) of that Act.

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

MRS. ELIZABETH G. MASON

The Clerk called the bill (H.R. 3369) for the relief of Mrs. Elizabeth G. Mason.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the award of death compensation which the Veterans' Administration has held that Mrs. Elizabeth G. Mason, of Houlton, Maine, is entitled to receive as a result of its finding, because of the death of her late husband, Major Theodore P. Mason, who was killed in combat in Belgium on September 9, 1944, shall be held and considered to be effective as of the day following the said Theodore P. Mason's death on the basis of her original claim for such death compensation which she filed in March 1945, six months after her husband's death; and the Administrator of Veterans' Affairs is hereby authorized and directed to make retroactive payments in accordance with such entitlement.

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

HERBERT B. SHORTER, SR.

The Clerk called the bill (H.R. 3450) for the relief of Herbert B. Shorter, Sr.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That notwithstanding the limitations contained in the Act of October 9, 1940 (31 Stat. sec. 71a), or in any other limiting statute, the application made by Herbert B. Shorter, Senior, of Pompano Beach Florida, received by the General Accounting Office on April 29, 1957, for additional retainer pay for the period from February 1, 1940, to April 28, 1947, for United States Navy Fleet Reserve service shall be held and considered to have been timely filed and the Comptroller General of the United States is hereby authorized and directed to consider that claim and pay any amount found due the said Herbert B. Shorter, Senior, for the period covered by the claim.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MAJ. DONALD B. POWERS, U.S. AIR FORCE

The Clerk called the bill (H.R. 3624) for the relief of Maj. Donald B. Powers, U.S. Air Force.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Major Donald B. Powers, AO941107, United States Air Force, of Shaw Air Force Base, South Carolina, the sum of $688.81 in full satisfaction of his claim against the United States for reimbursement in addition to the amount he received under section 2732 of title 10, United States Code, for household goods and personal effects destroyed as a result of a fire of unknown origin on January 31, 1962, which razed his assigned Government quarters which he occupied at Shaw Air Force Base, South Carolina: *Provided,* That no part of the amount appropriated in this Act shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this Act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

MRS. MARGARET PATTERSON BARTLETT

The Clerk called the bill (H.R. 3662) for the relief of Mrs. Margaret Patterson Bartlett.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Mrs. Margaret Patterson Bartlett, of Greeneville, Tennessee, great-granddaughter of former President Andrew Johnson, the sum of $15,000, which shall not be subject to any Federal tax liability, in lieu of the living quarters which she understands were to have been provided for the use of herself and her mother (deceased) during their lifetimes as part payment for the property acquired from them for inclusion within the boundaries of Andrew Johnson National Monument in Greeneville, Tennessee.

With the following committee amendments:

Page 1, line 7, strike "$15,000" and insert "$10,000".

Page 1, line 8, after "liability," insert "in full settlement of her claims for compensation".

Page 1, line 13, after "Tennessee" insert: ": *Provided*, That no part of the amount appropriated in this Act shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this Act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000."

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

GLENDAL W. HANCOCK

The Clerk called the bill (H.R. 3755) for the relief of Glendal W. Hancock.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Glendal W. Hancock of Sacramento, Calif., is hereby relieved of all liability for repayment to the United States of the amount of $787.93 representing overpayments of active duty pay as a member of the United States Army and the United States Air Force for the period from September 29, 1942, through January 31, 1960, which he received as the result of an erroneous computation of creditable service for longevity purposes.

SEC. 2. The Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to the said Glendal W. Hancock, the sum of any amount received or withheld from him on account of the payments referred to in the first section of this bill.

With the following committee amendment:

Page 2, following line 4, add: "No part of the amount appropriated in this Act shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this Act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

STELLA REORGANIZED SCHOOLS R–I, MISSOURI

The Clerk called the bill (H.R. 4214) for the relief of the Stella Reorganized Schools R–I, Missouri.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to the Stella Reorganized Schools R–I, Missouri, the sum of $1,500, in full settlement of its claims against the United States for reimbursement of amounts paid by it to the United States for rental of space at Fort Crowder, Missouri, for educational use: *Provided*, That no part of the amount appropriated in this Act in excess of 10 per centum thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this Act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceding $1,000.

With the following committee amendment:

Page 1, lines 10 and 11, strike out "in excess of 10 per centum thereof".

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ROBERT O. NELSON AND HAROLD E. JOHNSON

The Clerk called the bill (H.R. 4349) for the relief of Robert O. Nelson and Harold E. Johnson.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the application of section 2 of the Act of July 31, 1894 (28 Stat. 205), as amended (5 U.S.C. 62) (pertaining to the concurrent holding of more than one Government office), is hereby waived with respect to the service performed, in good faith, by Retired Warrant Officer (Army of the United States) Robert O. Nelson as an employee of the Bureau of Old-Age and Survivors Insurance, Social Security Administration, from May 15, 1961, to February 16, 1962, inclusive; and with respect to the service performed, in good faith, by Retired Warrant Office (Army of the United States) Harold E. Johnson as an employee of the Public Health Service from September 18, 1961, to June 22, 1962, inclusive.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CERTAIN EMPLOYEES OF THE FOREIGN SERVICE OF THE UNITED STATES

The Clerk called the bill (H.R. 4965) for the relief of certain employees of the Foreign Service of the United States.

Mr. GROSS. Mr. Speaker, I ask unanimous consent that this bill may be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

SALE OF CERTAIN RESERVED MINERAL INTERESTS

The Clerk called the bill (H.R. 1492) to provide for the sale of certain reserved mineral interests of the United States in certain real property owned by Jack D. Wishart and Juanita H. Wishart.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior shall convey to Jack D. Wishart and Juanita H. Wishart of Marion County, Florida, all right, title, and interest of the United States in and to the real property described in section 2 of this Act, which right, title, and interest was reserved to the United States in the original deeds of conveyance executed by the United States, upon payment to the United States by the said Jack D. Wishart and Juanita H. Wishart of an amount equal to the fair market value of the interest of the United States conveyed under this Act, as determined by the Secretary of the Interior.

SEC. 2. The real property referred to in the first section of this Act is situated in Marion County, Florida, and is more particularly described as follows:

1. Northeast quarter of southwest quarter, northwest quarter of southeast quarter, southeast quarter of southwest quarter and west half of southwest quarter of southeast quarter of section 7, township 14 south, range 22 east, Tallahassee meridian, Florida.
2. East half of southwest quarter of southeast quarter and southeast quarter of southeast quarter of section 7, township 14 south, range 22 east, and the east half of northwest quarter of northeast quarter, east half of west half of northwest quarter of northeast quarter and northeast quarter of northeast quarter of section 18, township 14 south, range 22 east, Tallahassee meridian, Florida.

With the following committee amendment:

Page 2, line 3, change the period to a comma and insert "plus such sum as may be fixed by the Secretary of the Interior to reimburse the United States for the administrative costs of the conveyance."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

SALE OF RIGHT-OF-WAY AT LAUREL, MD.

The Clerk called the bill (H.R. 5081) to authorize the Commissioners of the District of Columbia to sell a right-of-way across a portion of the District Training School grounds at Laurel, Md., and for other purposes.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Commissioners of the District of Columbia are hereby authorized and empowered, in their discretion, on behalf of the United States, to sell and convey to the Baltimore Gas and Electric Company a right-of-way over approximately seven acres of the grounds of the District Training School, located in the Fourth Election District of Anne Arundel County at Laurel, Maryland. Any such sale shall be at fair market value, as determined by the said Commissioners, and subject to such conditions as they shall determine to be in the best interests of the United States and the District of Columbia, including, but not limited to, a requirement that the Baltimore Gas and Electric Company and its successors and assigns furnish any District of Columbia institution on such grounds with an alternate source of electric service and reserving to the United States and the District of Columbia an easement of access and travel over the right-of-way to be conveyed under the authority of this Act.

Sec. 2. The said Commissioners are further authorized to pay from the proceeds of such sale the reasonable and necessary expenses of the sale of the right-of-way sold pursuant to the provisions of this Act, and shall deposit the balance of the proceeds of the sale in the Treasury of the United States to the credit of the District of Columbia.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

Mr. McMillan. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the Record.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. McMILLAN. Mr. Speaker, the purpose of this bill is to enable the Board of Commissioners of the District of Columbia to sell to the Baltimore Gas & Electric Co. a right-of-way for the construction of towers for a high-voltage transmission line to cross a portion of the grounds of the District Training School at Laurel, Md. Congressional sanction for this sale is required because the property lies outside the boundaries of the District of Columbia.

A representative of the electric company has stated that there is an urgent need for a transmission line between the National Security Administration substation at Fort Meade and a proposed new substation in the vicinity of High Ridge in Howard County, in order to serve the public properly with electric power. Also, the company has agreed to furnish the District Training School with a much-needed alternate source of electric current as a part of this project. At present, extended periods of loss of service result when the single power source for the institution is inoperative.

The proposed right-of-way is 66 feet wide and comprises some 7½ acres. This land is sufficiently removed from probable areas of future building expansion that its sale would not represent any serious loss to the institution, and the proposed transmission line would present no danger to the mentally retarded patients who are housed more than a mile away on the other side of the grounds. The District would retain a right of access across the right-of-way.

The power company has offered $17,500 for this right-of-way, this figure being based upon an estimate of the value of the land made by an appraiser designated by the District, and has agreed to amend this offer to include any increase in value which the land may sustain at the time of actual sale.

The District Training School grounds, comprising some 827 acres, were acquired in the name of the United States but were placed under the jurisdiction of the District of Columbia Commissioners pursuant to a provision in the District of Columbia Appropriation Act approved February 28, 1923 (42 Stat. 1360).

At a public hearing held on April 9, 1963, the Commissioners recommended the enactment of this legislation on the grounds that the sale of this right-of-way at its fair market value to the Baltimore Gas & Electric Co. not only will aid the company in meeting its responsibility to provide the public with adequate power supply, but also will provide the District Training School with a badly needed alternate source of power.

The Bureau of the Budget has advised the Commissioners that it has no objection to this proposed legislation, and no opposition to its passage has been expressed.

The SPEAKER. This concludes the call of the Private Calendar.

DISTRICT OF COLUMBIA BUSINESS

The SPEAKER. This is District of Columbia Day. The Chair recognizes the gentleman from South Carolina [Mr. McMillan], chairman of the Committee on the District of Columbia.

THE MUTUAL-AID FIREFIGHTING AGREEMENTS FOR DISTRICT OF COLUMBIA, MARYLAND, AND VIRGINIA

Mr. McMILLAN. Mr. Speaker, I call up the bill (H.R. 5044) to amend the act entitled "An act to provide for a mutual-aid plan for fire protection by and for the District of Columbia and certain adjacent communities in Maryland and Virginia, and for other purposes," and ask unanimous consent that the bill be considered in the House as in Committee of the Whole.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 2 of the Act entitled "An Act to provide for a mutual-aid plan for fire protection by and for the District of Columbia and certain adjacent communities in Maryland and Virginia, and for other purposes", approved August 14, 1950 (64 Stat. 441, D.C. Code, sec. 4-414(b), 1961 edition), is amended (a) by inserting a colon and the subsection designation "(a)" between "shall" and "waive"; (b) by striking the period and inserting a semicolon in lieu thereof; and (c) by adding the following subsection:

"(b) indemnify and save harmless the other parties to such agreement from all claims by third parties for property damage or personal injury which may arise out of the activities of the other parties to such agreement outside their respective jurisdictions under such agreement."

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

Mr. McMILLAN. Mr. Speaker, the purpose of this bill is to require that all parties to mutual-aid firefighting agreements indemnify each other from all claims arising from the operations of firefighters outside their own jurisdictions.

Legislation authorizing the District of Columbia to enter into mutual-aid firefighting agreements with appropriate governmental units in Maryland and Virginia was enacted in 1950 (64 Stat. 441). This legislation provides that each of the parties to such an agreement shall waive all claims against the other parties thereto which may arise out of their activities outside their respective jurisdictions under the agreement.

Despite this legislative authority, however, no agreements have yet been entered into between the District of Columbia and any of the specified adjacent communities in Maryland and Virginia. The difficulty encountered in attempts to draft such agreements has been the question of liability of the various jurisdictions for damages resulting from the operations of the various fire companies outside of their own jurisdictions. It is questionable whether the District of Columbia might successfully invoke the defense of governmental function in cases of alleged negligence of District firemen while operating outside the District of Columbia; and similarly, adjacent communities might also be held liable for damages resulting from the operations of their fire companies in the District of Columbia.

At a public hearing conducted on April 9, 1963, the Board of Commissioners expressed its desire to enter into these agreements with adjacent communities for the mutual benefit of all concerned, and strongly recommended the enactment of this amending legislation which will remove the only existing impediment to such agreements. It is felt that this action by the Congress will undoubtedly spur similar legislation in Maryland and Virginia to authorize the specified adjacent communities to indemnify the District of Columbia from claims arising from the operations of District firefighters in coming to their aid in emergencies.

The Chief of the District of Columbia Fire Department also testified in favor of this bill, and no opposition to its passage was expressed. The Board of Commissioners has been advised by the Bureau of the Budget that they have no objection to this proposed legislation.

This committee was advised that the County Council of Montgomery County, Md., adopted a resolution urging the adoption of this legislation, at its meeting on October 30, 1962.

During the 2d session of the 87th Congress two bills similar to H.R. 5044 were introduced in the House of Representatives—H.R. 12796 and H.R. 12975—and one in the Senate—S. 3424.

UNIFORM COMMERCIAL CODE FOR THE DISTRICT OF COLUMBIA

Mr. McMILLAN. Mr. Speaker, at this time I yield to the gentleman from Alabama [Mr. Huddleston] for the purpose of calling up bills from the gentleman's subcommittee.

Mr. HUDDLESTON. Mr. Speaker, by direction of the Committee on the District of Columbia I call up the bill (H.R. 5338) to enact the Uniform Commercial Code for the District of Columbia, and for other purposes, and ask unanimous consent that the bill be considered in the House as in the Committee of the Whole.

The SPEAKER. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The Clerk read the bill.

The Clerk read the following committee amendments:

Page 133, line 19, strike out "part" and insert in lieu thereof "party".

Page 133, line 20, strike out "holders" and insert in lieu thereof "holder".

Page 235, line 11, strike out "on" and insert in lieu thereof "no".

Page 249, line 12, strike out "aginst" and insert in lieu thereof "against".

The committee amendments were agreed to.

The SPEAKER. The Clerk will report the next committee amendment.

The Clerk read as follows:

Page 259, line 9, strike out "nontification" and insert in lieu thereof "notification".

Mr. HUDDLESTON. Mr. Speaker, I offer an amendment to the committee amendment.

The Clerk read as follows:

On page 259, strike out lines 4 through 10, and insert in lieu thereof:

"(1) A transferee of a document, whether negotiable or nonnegotiable, to whom the document has been delivered but not duly negotiated, acquires the title and rights which his transferor had or had actual authority to convey.

"(2) In the case of a nonnegotiable document, until but not after the bailee receives notification of the transfer, the rights of the transferee may be defeated."

The amendment to the committee amendment was agreed to.

The committee amendment as amended was agreed to.

The SPEAKER. The Clerk will report the other committee amendments.

The Clerk read as follows:

Page 269, line 7, strike out "prices" and insert in lieu thereof "price".

Page 283, line 14, strike out "Delievery" and insert in lieu thereof "Delivery".

Page 299, immediately after line 10, insert:

"(3) If the eight-year period specified in this section expires prior to one year after the effective date of this subtitle, such period is extended to one year after such effective date."

Page 299, in line just above line 14, strike out "articles" and insert in lieu thereof, "article".

Page 299, delete lines 14, 15, and 16.

Page 307, line 9, strike out "obliged" and insert in lieu thereof "obligated".

Page 308, line 4, strike out "deaing" and insert in lieu thereof "dealing".

Page 308, line 18, strike out "28:2–102" and insert in lieu thereof "28:8–102".

Page 309, immediately after line 14, insert: "Filing Office. Section 28:9–401(1)".

Page 331, line 13, strike out "fixture" and insert in lieu thereof "fixtures".

Page 338, line 4, strike out "encumbrance" and insert in lieu thereof "encumbrancer".

Page 343, line 11, immediately after the period, insert: "In this article, 'filing officer' means said Recorder."

Page 347, line 9, strike out "security" and insert in lieu thereof "secured".

Page 350, line 22, through page 351, line 1, delete "mark the statement with the hour and date of filing and shall note the same upon the margin of the index of the filing of the financing statement." and insert in lieu thereof "attach the statement of release to the instrument to which it relates and shall enter on the released instrument and on the index record thereof the word "released", the date of filing of the statement of release, and a facsmile of his signature."

Page 351, line 23, delete "$0.50 per page." and insert in lieu thereof "$3.00 for the first two pages or less, and $1.00 for each additional page, plus $0.50 for certification."

Page 357, line 13, strike out "this state" and insert in lieu thereof "the District".

Page 359, line 12, strike out "this state" and insert in lieu thereof "the District".

Page 371, immediately after line 7, insert "sections 546–A and 546–B, as amended, of the code of law for the District of Columbia approved March 3, 1901 (chapter 854, 31 Stat. 1275), as so renumbered by the Act approved June 5, 1952, chapter 370, section 1, 66 Stat. 126 (D.C. Code, 1961 ed., secs. 42–101 and 42–103) or pursuant to".

Mr. GROSS. Mr. Speaker, I move to strike the requisite number of words.

Mr. Speaker, after listening to all of the amendments to this bill, and operating in the House as in the Committee of the Whole, I am wondering if the bill is being written here on the floor of the House.

Mr. HUDDLESTON. I will say to the gentleman that these amendments were adopted in the committee. This is from the committee.

Mr. GROSS. They may have been adopted in the committee, but it is unusual to have so many amendments.

I am not going to object to the bill——

Mr. HUDDLESTON. If the gentleman will yield, practically all of these amendments are technical changes in language and spelling, changing of plurals to singular, and singular to plural. So on a review of the size of this bill, 379 pages, I am sure the gentleman from Iowa would be very happy to notice that the Committee on the District of Columbia practices a little economy in the printing of bills around here.

Mr. GROSS. Mr. Speaker, I appreciate that fact but still I do not like to see bills practically written on the floor of the House.

Mr. SPRINGER. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I yield to the gentleman.

Mr. SPRINGER. Mr. Speaker, may I say in justification of the statement of the gentleman from Iowa [Mr. GROSS] that personally I am in agreement with him. But as to this particular bill I believe there was merit in doing it the way we did it. This would have cost several thousand dollars to have a reprinting job done. There were errors made by the printer himself in the first printing. This is a little unusual situation. I know the gentleman from Iowa is very much for economy. The committee felt this was the wise way to do it.

The SPEAKER. The question is on the committee amendments.

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

Mr. HUDDLESTON. Mr. Speaker, the primary purpose of this bill is the adoption for the District of Columbia of the Uniform Commercial Code.

In general, this code would replace the District of Columbia uniform acts on negotiable instruments, warehouse receipts, sales and stock transfers, as well as District of Columbia statutory provisions dealing with bulk sales and several District of Columbia Code provisions relating to bank checks.

This code would not replace the District of Columbia Code sections relating to pawnbrokers, money lenders, liens on motor vehicles, and installment sales of motor vehicles.

A number of the uniform acts have been enacted in the District of Columbia with few, if any, modifications. The experience with these acts has been highly satisfactory. The Uniform Commercial Code is actually just another uniform act which, however, is more comprehensive and more thoroughly developed than any of the other uniform acts.

The Uniform Commercial Code does not represent an abrupt change in commercial law concepts. It codifies commercial law in its present stage of development, filling many gaps and settling a number of questions raised by conflicting judicial decisions.

Although uniformity with the statute law of other jurisdictions should not be the sole criterion, nevertheless, it is extremely important in this age of quick transportation and communication when every commercial lawyer is constantly coming into contact with transactions involving the law of one or more other jurisdictions. The adoption of the Uniform Commercial Code in the District of Columbia would certainly tend to minimize conflict of laws problems in situations involving the District and other "code" jurisdictions. Moreover, with the relative paucity of judicial decisions on commercial law matters in the District of Columbia, the feature of uniformity would make more pertinent the more numerous decisions of other jurisdictions and assist District of Columbia lawyers in their interpretations of the Uniform Commercial Code.

The comprehensiveness of the Uniform Commercial Code should prove extremely helpful to the practicing lawyers and the people they represent. At the present time, a District lawyer faced with a commercial law problem often finds a complete void in both the District of Columbia Code and the reported District of Columbia opinions. He is then forced to resort to standard texts on the subject, to law review articles, legal encyclopedias or digests, and then to follow the references to judicial opinions of other jurisdictions. At the conclusion of extensive and time-consuming research he is often still in doubt. On the other hand, the Uniform Commercial Code with its reasonably good coverage of the whole field will by itself answer many of the questions.

This committee has concurred in the recommendations of the Bar Association of the District of Columbia that there should be at least 1 year between the enactment date and the effective date, in order to give all interested members of the District of Columbia community ample time to become thoroughly familiar with the code and to make the necessary adjustments.

At the public hearing held on this bill, its enactment was urged by the Recorder of Deeds for the District of Columbia, the Bar Association for the District of Columbia, the Metropolitan Washington Board of Trade and the District of Columbia Bankers Association. No expression in opposition to the substance of the bill has been presented to the committee.

BACKGROUND

Drafting of the Uniform Commercial Code and revisions thereof are under the joint sponsorship of the National Conference of Commissioners on Uniform State Laws and the American Law Institute. Work was begun on this code in 1942 and completed in 1952, in which latter year it was approved by the House of Delegates of the American Bar Association. The reported bill, to become the District of Columbia Uniform Commercial Code, is based upon the latest official revision of the Uniform Commercial Code.

As of the present time 23 States have adopted the Uniform Commercial Code as follows: Alaska, Arkansas, Connecticut, Georgia, Illinois, Indiana, Kentucky, Maryland, Massachusetts, Michigan, Montana, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, Tennessee, West Virginia, and Wyoming.

Your committee is also informed that the Uniform Commercial Code is also still pending—as of March 13, 1963—before the legislatures of 10 other States; namely, California, Hawaii, Maine, Minnesota, Missouri, Nebraska, Texas, Vermont, Washington, and Wisconsin.

SECTION-BY-SECTION ANALYSIS OF THE BILL

Section 1 of H.R. 5338 provides for the adoption of the Uniform Commercial Code as subtitle I of title 28 of the District of Columbia Code. The following is a brief review of the 10 articles of the Uniform Commercial Code—hereinafter referred to as UCC:

Article 1: This article deals with matters of general application, and contains general definitions and principles of interpretation.

Article 2: This article would completely supersede the Uniform Sales Act as contained in chapters 11 through 16 of title 28 of the District of Columbia Code. The Uniform Sales Act has been completely rewritten and much new material added to conform to present day commercial practices.

Article 3: This article would replace the Uniform Negotiable Instruments Act—NIL—as contained in chapters 1 through 10 of title 28 of the District of Columbia Code.

The law pertaining to commercial paper of the short-term type, like checks, drafts, certificates of deposit, and promissory notes, has been completely rewritten in modern commercial language, conforming to the remainder of the UCC. Numerous conflicting judicial interpretations, which have developed concerning provisions of NIL over the last 65 years, have been eliminated in the drafting of article 3. The parts of NIL dealing with negotiation of securities have been transferred to article 8 on "Investment Securities."

Article 4: This article, dealing with bank deposits and collections, does not replace any uniform act, and covers a branch of commercial law for which there is virtually no statutory counterpart in the District of Columbia aside from several relatively small sections of the District of Columbia Code.

Article 4, which is of tremendous importance to banks and all customers of banks, codifies in relatively simplified form the law pertaining to the handling of the vast number of collection items which are processed daily by banks and to the relations between a customer and his bank. Article 4 is, of course, integrated with article 3 dealing with negotiable instruments and article 8 dealing with investment securities.

Article 5: This article puts in statutory form the basic legal principles relating to letters of credit, and should prove of great assistance to any attorney who becomes involved in a letter of credit situation.

Section 28-5-102(1), however, differs from the official text in that the former makes it absolutely clear that issuers of letters of credit are entitled, if they so desire, to operate under the Uniform Customs and Practice for Commercial Documentary Credits, instead of under the UCC. In view of the substantial national and international acceptance of the Uniform Customs and Practice, it is considered that the right to continue under them should be expressly reserved.

Article 6: This article relates to bulk sales, and would replace chapter 17 of title 28 of the District of Columbia Code.

Article 6 continues the basic policy of protecting creditors of a merchant who sells in bulk by permitting such creditors to treat the sale as ineffective. Article 6, however, is more detailed and less ambiguous than the existing District of Columbia law enacted in 1904.

Article 7: This article, dealing with warehouse receipts, bills of lading, and other documents of title would replace the Uniform Warehouse Receipts Act as contained in chapters 18 through 22 of title 28 of the District of Columbia Code.

Article 7 combines as an integrated unit of legislation the Uniform Warehouse Receipts Act, the Uniform Bills of Lading Act, and those sections of the Uniform Sales Act dealing with the negotiation and transfer of documents of title. It is subject to any treaty or statute of the United States or District of Columbia regulatory statute or tariff, classification or regulation filed or issued pursuant thereto. Accordingly, the Federal Bills of Lading Act, 49 U.S.C. secs. 81-124, would continue to control interstate shipments and foreign exports, and the Carriage of Goods by Sea Act, 46 U.S.C. secs. 1300-1315, would continue to control ocean bills of lading covering both exports and imports.

Article 8: This article, dealing with investment securities, would replace the Uniform Stock Transfer Act as contained in chapter 29 of title 28 of the District of Columbia Code. In addition, it deals with bonds now covered by the Uniform Negotiable Instruments Act.

As stated in the 1958 official text with comments of the Uniform Commercial Code, article 8 is neither a "blue sky" law nor a corporation code. It may be likened rather to a negotiable instruments law dealing with securities. In general, it covers investment securities like stocks and bonds in both bearer and registered form.

Article 9: This article, dealing with the field of secured transactions, would replace little of the District of Columbia Code while making great advances in that field. In general, it applies to all transactions which are intended to create a security interest in personal property as well as to sales of accounts receivable contract rights, and chattel paper. Although it does not use the terms "mortgage," "conditional sale," and the like, existing security devices are not abolished and may continue to be used. Article 9, however, does abolish formal distinctions between existing security devices, and deals with the interests which the secured creditor may obtain under the code by the same designation, namely, a "security interest" defind in section 1-201(38), as an interest in personal property or fixtures which secures payment or performance of an obligation, which includes any interest of a buyer of accounts, chattel paper, or contract rights. In general, the term "chattel paper" refers to instruments—like notes and chattel mortgages—used by the owner thereof, like a dealer, to secure his own financing.

The security interest under article 9, to be enforceable, must either be a possessory interest—like a pledge—with the secured party in actual possession or be in a writing referred to in the article as a security agreement. The only requirements of a security agreement are that it be signed by the debtor and contain—section 9-203(1)(b)—"a description of the collateral and in addition, when the security interest covers crops or oil, gas or minerals to be extracted or timber to be cut, a description of the land concerned." However, a security agreement may contain the usual provisions now included in existing instruments, like chattel mortgages and chattel deeds of trust, and other agreements of the parties, except a few types of provisions expressly prohibited by the UCC.

With several exceptions—section 9-302—in order to perfect a security interest that would create a lien effective against third parties, the creditor must have possession of the collateral in case of a possessory interest—like a pledge—for the debtor must, in addition to entering into a security agreement, file a financing statement in the appropriate office, which in the District of Columbia would be the Recorder of Deeds—section 9-303. A financing statement may be a very simple document, being legally sufficient—section 9-402—"if it is signed by the debtor and the secured party, gives an address of the secured party from which information concerning the security interest may be obtained, gives a mailing address of the debtor and contains a statement indicating the types, or describing the items, of collateral."

Article 10: This article deals briefly with the matter of the construction of UCC with other laws.

Sections 2 to 14 of H.R. 5338 make appropriate changes in existing statutory law to conform it to the UCC.

Section 15 of the bill provides for, first, repeal of superseded statutes; and second, continued validity of transactions entered into prior to the effective date of the bill.

Section 16 states that the bill will become effective January 1, 1965.

DISTRICT OF COLUMBIA BUSINESS CORPORATION ACT AMENDMENTS OF 1963

Mr. HUDDLESTON. Mr. Speaker, by direction of the Committee on the District of Columbia, I call up the bill (H.R. 4330) to amend the District of Columbia Business Corporation Act, and ask unanimous consent that the bill be considered in the House as in Committee of the Whole.

The SPEAKER. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted by the Senator and House of Representatives of the United States of America in Congress assembled, That the District of Columbia Business Corporation Act, approved June 8, 1954 (68 Stat. 179; D.C. Code 29-901), is amended as follows:

(1) Section 4 of such Act is amended by adding at the end of subsection (h) the following new sentence: "No corporation formed hereunder shall plead any statutes against usury in any action."

(2) Section 11 of such Act is amended by adding the following subsections at the end thereof:

"(e) The registered agent of one or more domestic corporations may change the address of the registered office of such domestic corporation or corporations by filing with the Commissioners a statement setting forth:

"(1) the name of the registered agent;

"(2) the present address, including street and number, if any, of such registered agent;

"(3) the names of the corporation or corporations represented by such registered agent at such address;

"(4) the address, including street and number, if any, to which the office of such registered agent is to be changed; and

"(5) the date upon which such change will take place.

"(f) Such statement shall be executed in duplicate by such registered agent in his individual name, but if such agent is a corporation, domestic or foreign, such statement shall be executed by such corporation by its president or vice president and the corporate seal shall be thereto affixed, attested by its secretary or an assistant secretary and delivered to the Commissioners. If the Commissioners find that such statement conforms to law, they shall, when all fees and charges have been paid as prescribed in this Act:

"(1) endorse on each of such duplicate originals the word 'Filed' and the month, day, and year of the filing thereof;

"(2) file one of such duplicate originals in their office; and

"(3) return the other duplicate original to the registered agent.

"(g) The change of address of such registered agent as to the domestic corporation or corporations named in such statement shall become effective upon the filing of such statement by the Commissioners or on the date set forth in such statement as the date on which such change of location of such registered office will take place, whichever is later."

(3) Subsection (b) of section 12 of such Act is amended to read as follows:

"(b) Whenever a corporation shall fail to appoint or maintain a registered agent in the District, or whenever any such registered agent cannot with reasonable diligence be found at the registered office of such corporation in the District, or whenever the articles of incorporation of any domestic corporation shall be revoked, then the Commissioners shall be an agent of such corporation upon whom any process against such corporation may be served and upon whom any notice or demand required or permitted by law to be served upon such corporation may be served. Service on the Commissioners of any such process, notice, or demand shall be made by delivering to and leaving with the Commissioners, or with any clerk having charge of their office duplicate copies of such process, notice, or demand. In the event any such process, notice, or demand is so served, the Commissioners shall immediately cause one of such copies thereof to be forwarded by registered or certified mail, addressed to the corporation at its registered office."

(4) Section 32 of such Act is amended by adding the following sentence at the end thereof: "Unless otherwise provided in the articles of incorporation or bylaws, the board of directors, by the affirmative vote of a majority of the directors then in office, and irrespective of any personal interest of any director, shall have authority to establish reasonable compensation of all directors for services to the corporation as directors, officers, or otherwise."

(5) Section 99 of such Act is amended by striking out subsection (b) and inserting in lieu thereof the following new subsections:

"(b) Without excluding other activities which may not constitute transacting business in the District, a foreign corporation shall not be considered to be transacting business in the District for the purposes of this Act by reason of carrying on any one or more of the following activities in the District:

"(1) maintaining or defending any action or suit or any administrative or arbitration proceeding, or effecting the settlement thereof of the settlement of claims or disputes;

"(2) collecting its debts, taking security for the same, or enforcing any rights in property securing the same;

"(3) appointing or maintaining an agent for the solicitation of business not to be transacted in the District.

"(4) selling personal property to the United States within the District unless a contract for such sale is accepted by the seller within the District or such property is delivered from the stock of the seller within the District for use within the District;

"(5) holding meetings of its directors or shareholders or carrying on other activities concerning its internal affairs;

"(6) voting the stock of any corporation;

"(7) maintaining bank accounts;

"(8) maintaining offices or agencies for the transfer, exchange, and registration of its securities; or appointing and maintaining trustees or depositaries with relation to its securities;

"(9) effecting sales through independent contractors;

"(10) conducting an isolated transaction completed within a period of thirty days and not in the course of a number of repeated transactions of like nature.

"(c) Nothing in subsection (b) of this section shall be construed as affecting the amenability of any foreign corporation to the service of any process, notice, or demand to which such corporation would be amenable without reference to the provisions of such subsection (b)."

(6) Section 3 of such Act is amended by striking therefrom the following: ": *Provided further,* That no corporation may be organized under this Act unless the place where it conducts its principal business is located within the District of Columbia."

(7) Section 71(b) of such Act is amended (1) by striking out "and" in paragraph (2), (2) by striking out the period at the end of paragraph (3) and inserting in lieu thereof a semicolon and "and", and (3) by adding at the end thereof the following new paragraph:

"(4) a post office address to which the Commissioners may mail a copy of any process against the corporation that may be served on them."

(8) Section 107 of such Act is amended by adding the following subsections at the end thereof:

"(f) A registered agent of one or more foreign corporations may change the address of the registered office of such foreign corporation or corporations by filing with the Commissioners a statement setting forth:

"(1) the name of the registered agent;

"(2) the present address, including street and number, if any, of such registered agent;

"(3) the names of the corporation or corporations represented by such registered agent at such address;

"(4) the address, including street and number, if any, to which the office of such registered agent is to be changed; and

"(5) the date upon which such change will take place."

"(g) Such statement shall be executed in duplicate by such registered agent in his individual name but if such agent is a corporation, domestic or foreign, such statement shall be executed by such corporation by its president or a vice president and the corporate seal shall be thereto affixed, attested by its secretary or an assistant secretary, and delivered to the Commissioners. If the Commissioners find that such statement conforms to law, they shall, when all fees and charges have been paid as in this Act prescribed:

"(1) endorse on each of such duplicate originals the word 'Filed' and the month, day, and year of the filing thereof;

"(2) file one of such duplicate originals in their office; and

"(3) return the other duplicate original to the registered agent.

"(h) The change of address of such registered agent as to each corporation named in such statement shall become effective upon the filing of such statement by the Commissioners or on the date set forth in such statement as the date on which such change of location of such registered office will take place, whichever is later."

(9) Section 108 of such Act is amended to read as follows:

"SERVICE OF PROCESS ON FOREIGN CORPORATION

"SEC. 108. (a) The registered agent so appointed by a foreign corporation authorized to transact business in the District shall be an agent of such foreign corporation upon whom process against such corporation may be served, and upon whom any notice or demand required or permitted by law to be served upon such corporation may be served. Service of any process, notice, or demand upon a corporate agent, as such agent, may be had by delivering a copy of such process, notice, or demand to the president, vice president, the secretary, or an assistant secretary of such corporate agent.

"(b) Whenever a foreign corporation authorized to transact business in the District shall fail to appoint or maintain a reigstered agent in the District, or whenever any such registered agent cannot with reasonable diligence be found at the registered office of such corporation in the District, or whenever the certificate of authority of a foreign corporation shall be revoked, then the Commissioners shall be an agent of such foreign corporation upon whom any process against such corporation may be served and upon whom any notice or demand required or permitted by law to be served upon such corporation may be served. Service on the Commissioners of any such process, notice, or demand shall be made by delivering to and leaving with the Commissioners, or with any clerk having charge of their office, duplicate copies of such process, notice, or demand. In the event any such process, notice, or demand is served on the Commissioners, they shall immediately cause one of such copies thereof to be forwarded by registered or certified mail, addressed to such corporation at its principal office in the State under the laws of which it is organized as the same appears in the records of the Commissioners.

"(c) If any foreign corporation shall transact business in the District without a certificate of authority, it shall, by transacting such business, be deemed to have thereby appointed the Commissioners its agent and representatives upon whom any process, notice, or demand may be served. Service shall be made by delivering to and leaving with the Commissioners, or with any clerk having charge of their office, duplicate copies of such process, notice, or demand, together with an affidavit giving the latest known post office address of such corporation and such service shall be sufficient if notice thereof and a copy of the process, notice, or demand are forwarded by registered mail or certified mail addressed to such corporation at the address given in such affidavit.

"(d) The Commissioners shall keep a record of all processes, notices, and demands served upon them under this section, and shall record therein the time of such service and their action with reference thereto.

"(e) Nothing herein contained shall limit or affect the right to serve any process, notice, or demand required or permitted by law to be served upon a foreign corporation in any other manner now or hereafter permitted by law."

(10) Section 116 of such Act is hereby amended by adding the following new subsection:

"(c) A foreign corporation whose certificate of authority has been revoked shall, upon reentering the District, comply with all of the requirements of law applicable to an original application for a certificate of authority including the payment of the filing fee for filing an application for a certificate of authority, but it need not file again a copy of its articles of incorporation or any amendment thereof that is then on file with the Commissioners. After the revocation of the certificate of authority of a foreign corporation, the Commissioners shall retain the articles of incorporation and amendments theretofore filed and the original application for a certificate of authority for a period of ten years."

(11) Subsection (b) of section 121 of such Act is amended (1) by striking out the period at the end thereof and inserting in lieu thereof a semicolon, and (2) by adding at the end thereof the following:

"(20) filing by a registered agent of corporations of a statement of change of address of such registered agent, $5, plus $1 for each corporation, domestic or foreign, listed in such statement; and

"(21) for furnishing a certificate as to the status of a corporation, domestic or foreign, or as to the existence or nonexistence of facts relating to corporations, domestic or foreign, $1."

(12) Section 127 of such Act is amended to read as follows:

"REINSTATEMENT OF PROCLAIMED CORPORATIONS

"SEC. 127. (a) A domestic corporation, the articles of incorporation of which have been revoked by proclamation, may at any time after the date of the issuance of the proclamation of revocation deliver to the Commissioners a petition for reinstatement, in duplicate, accompanied by the delinquent annual report or reports, or payment of delinquent annual report fee or fees in full, or both, as the case may be, plus interest thereon as provided by this Act, together with any penalties imposed by this Act.

"(b) If the petition for reinstatement of a proclaimed corporation is delivered to the Commissioners after the period for reservation of the name has expired and if they find that the name is not available for corporate use pursuant to the provisions of this Act, then, in addition to complying with the provisions of the preceding paragraph, the proclaimed corporation shall set forth in its petition for reinstatement its name at the time of issuance of the proclamation of revocation and the new name by which the corporation will thereafter be known, which shall be a name available for corporate use pursuant to the provisions of this Act.

"(c) If the Commissioners find that all such documents conform to law, and that the period for reservation of the name has not expired, or if such period has expired, that the name is available for corporate use pursuant to the provisions of this Act, they shall, when all fees, charges, interest, and penalties have been paid as in this Act prescribed—

"(1) endorse on each of such duplicate originals and any such annual report or reports the word 'Filed' and the month, day, and year of the filing thereof;

"(2) file one of such duplicate originals and any such annual report or reports in their office;

"(3) issue a certificate of reinstatement to which they shall affix the other duplicate original;

"(4) deliver such certificate of reinstatement and other duplicate original to the corporation or its representative.

"(d) Upon the issuance of the certificate of reinstatement, the revocation proceedings theretofore taken as to such corporation by proclamation shall be deemed to be annulled, and such corporation shall have such powers, rights, duties, and obligations as it had at the time of the issuance of the proclamation with the same force and effect as to such corporation as if the proclamation had not been issued."

(13) Section 128 of such Act is amended by striking out "$25" and inserting in lieu thereof "$10".

(14) Subsection (a) of section 130 of such Act is amended by adding at the end thereof the following: "Nothing in this section shall prevent the filing, without the payment of all such fees, charges and penalties, of a written notice of resignation by a registered agent of a corporation, domestic or foreign."

(15) Section 136 of such Act is amended to read as follows:

"ACTION WITHOUT A MEETING

"SEC. 136. Any action required or permitted to be taken at a meeting of the shareholders of a corporation or of the board of directors or of any committee thereof may be taken without a meeting if a consent in writing setting forth the action so taken shall be signed by all of the shareholders entitled to vote with respect to the subject matter thereof, or by all of the members of the board or of such committee as the case may be, and such written consent is filed with the minutes of proceedings of the shareholders or the board or the committee. Such consent shall have the same force and effect as a unanimous vote of the shareholders or the board or the committee, as the case may be, and may be stated as such in any article or document filed with the Commissioners under this Act."

(16) Such Act is amended by adding at the end thereof the following new section:

"VERIFICATION NO LONGER REQUIRED

"SEC. 151. A requirement in this Act that any instrument be verified by oath need not be complied with after the effective date of the District of Columbia Business Corporation Act Amendments of 1962. A person who signs any instrument delivered to the Commissioners pursuant to this Act knowing it to contain a misstatement of fact shall be guilty of a misdemeanor and upon conviction thereof shall be punished by a fine not exceeding $500, or by imprisonment not exceeding one year, or both, in the discretion of the court."

SEC. 2. This Act may be cited as the "District of Columbia Business Corporation Act Amendments of 1962".

With the following committee amendments:

Page 6, line 10, strike out "."" and insert in lieu thereof ", or as affecting the liabilities, duties, or obligations of any foreign corporation under any Act of Congress (other than this Act) or any regulation in force in the District of Columbia."

Page 10, beginning line 23, delete through page 11, line 12.

Page 11, line 13, strike out "(11)" and insert in lieu thereof "(10)".

Page 12, line 1, strike out "(12)" and insert in lieu thereof "(11)".

Page 12, line 4, strike out "domestic".

Page 12, line 5, immediately after "incorporation", insert "or certificate of authority".

Page 1, line 21, strike out the word "the".

The committee amendments were agreed to.

Mr. HUDDLESTON. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HUDDLESTON: Page 12, line 23, immediately after "and" insert "its".

The amendment was agreed to.

The SPEAKER. The Clerk will report the remaining committee amendments.

The Clerk read as follows:

Page 12, line 21, strike out "by which the corporation will thereafter be known".

Page 13, delete lines 24 and 25.

Page 14, line 1, strike out "(14)" and insert in lieu thereof "(12)".

Page 14, line 7, strike out "(15)" and insert in lieu thereof "(13)".

Page 14, line 24, strike out "(16)" and insert in lieu thereof "(14)".

Page 15, line 5, strike out "1962" and insert in lieu thereof "1963".

Page 15, line 13, strike out "1962" and insert in lieu thereof "1962".

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

Mr. HUDDLESTON. Mr. Speaker, the purpose of H.R. 4330 is to amend the District of Columbia Business Corporation Act (June 8, 1954, 68 Stat. 179), as amended, to correct inaccuracies, improve the language of the act, and to make substantive changes to keep the act current and similar to the Model Business Corporation Act prepared by the American Bar Association, and with the statutes of the States.

At hearings held by a subcommittee of the House Committee on the District of

Columbia, testimony was received from the Assistant Corporation Counsel for the District of Columbia who represented the Commissioner, from the Superintendent of Corporations, from the Recorder of Deeds, and from the District of Columbia Bar Association Committee on Corporate Law.

This testimony indicated general approval of the provisions of the bill with recommendation to the committee that consideration be given to amendments presented to some sections of the bill. The bill as amended and reported by the committee incorporates many of the suggested amendments.

SECTION-BY-SECTION ANALYSIS

Section 1 of the bill amends section 4(h) of the act by providing expressly that corporations organized under the act may not plead usury. This defines more clearly the intent of the present statute which provides that corporations may borrow money "without regard to the restrictions of any usury law."

Section 2 of the bill adds new subsections to section 11 of the act to provide that the registered agent of a domestic corporation, for his own purposes, may change the address of the registered office of the corporation by filing required statements.

Section 3 of the bill amends section 12(b) of the act to provide that the Commissioners shall be an agent of a domestic corporation upon whom process against such corporation may be served in the additional instances whenever, one, after reasonable diligence, the registered agent of the corporation cannot be found at the registered address of the corporation; and, two, the articles of incorporation of any domestic corporation shall be revoked. The subsection as rewritten eliminates the last sentence of the present subsection which provides that such service had on the Commissioners "shall be returnable in not less than 30 days", since the Federal Rules of Civil Procedure, applicable in the courts of the District of Columbia, govern the service of process on corporations.

Section 4 of the bill adds a new sentence to section 32 of the act providing that absent any restriction in the articles of incorporation or bylaws, the directors of a corporation by affirmative majority vote may establish compensation for directors for services to the corporation.

Section 5 of the bill amends section 99 of the act by striking subsection (b) and adding new subsections (b) and (c). Subsections (b), as written, contains a more complete enumeration of activities by foreign corporations which are not to be considered as "transacting business" in the District of Columbia for purposes of the act. Except for paragraph 4, the provisions in the amended section are comparable to those appearing in section 99 of the Model Business Corporation Act of the American Bar Association. The new subsection (c) provides that nothing in subsection (b) affects the amenability of foreign corporations to the service of process or affects the liabilities, duties, or obligations of any foreign corporation under any other act of Congress or any regulation in force in the District of Columbia.

Section 6 of the bill amends section 3 of the act by striking out the proviso that "no corporation may be organized under the act unless the place where it conducts its principal business is located within the District of Columbia."

Section 7 of the bill amends section 71(b) of the act so as to require that if a corporation, which results from a merger or a consolidation of a foreign or domestic corporation, is governed by the laws of some other State then it must advise the Commissioners of a post office address to which the Commissioners may mail a copy of any process against the corporation that is served upon them.

Section 8 of the bill amends section 107 of the act to permit the registered agent of a foreign corporation to change the address of the registered office in the same manner as a resident agent of a domestic corporation may do under section 2 of this bill.

Section 9 of the bill amends section 108 of the act so that the wording of the section relating to service of process on foreign corporations conforms as nearly as possible with the provisions of section 12 of the act relating to service of process on domestic corporations. Also, the last sentence of subsection (a)—providing that "Any services so had on the Commissioners shall be returnable in not less than 30 days: *Provided however*, That, if a period of less than or greater than 30 days is prescribed by law or by rules of a court in the District or the rules or regulations of any agency of the United States or of the District, such prescribed period shall govern"—is eliminated inasmuch as the Federal Rules of Civil Procedure are applicable in the District of Columbia.

Section 10 of the bill amends section 121(b) of the act so as to authorize two additional changes; namely, first, a charge upon a resident agent who files a statement of change of address of a foreign or domestic corporation, in the amount of $5 plus $1 for each corporation listed in the statement, and, second, a charge of $1 for the furnishing by the Commissioners of a certificate as to the status of a corporation, or as to the existence or nonexistence of a fact relating to a corporation.

Section 11 of the bill would amend section 127 of the act, first, by changing the language in order to make the provisions relative to the filing of petitions for reinstating proclaimed corporations conform to the provisions relating to the filing of other corporate papers.

Section 12 of the bill would amend section 130(a) of the act so as to permit a resident agent to resign despite the fact that the corporation may not have paid all fees, charges, and penalties which the corporation is required to pay.

Section 13 of the bill would amend section 136 of the act so as to permit action to be taken by a board of directors or committee thereof, by unanimous written consent without the requirement of a meeting, in the same manner that stockholders are presently permitted by section 136 to act without a formal meeting. This amendment will bring the section into conformity with other State corporation statutes.

Section 14 of the bill will add a new provision to the act which will eliminate the necessity of verifying documents under oath, but will impose penalties upon any person who signs any instrument delivered to the Commissioners knowing it to contain a misstatement of fact.

Section 2 of the bill provides that it may be cited as the District of Columbia Business Corporation Act Amendments of 1962.

"FOUR OVER" TRUSTS IN THE DISTRICT OF COLUMBIA

Mr. DOWDY. Mr. Speaker, by direction of the Committee on the District of Columbia, I call up the bill (H.R. 3190) to amend the act of March 3, 1901, relating to devices and bequests by will.

The Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That "An Act to establish a code of law for the District of Columbia", approved March 3, 1901, as amended (D.C. Code, title 19, chapter 2), is amended by adding the following new section (D.C. Code, sec. 19–206).

"SEC. 2. (a) BEQUESTS OR DEVISES TO TRUSTEE UNDER, OR IN ACCORDANCE WITH TERMS OF, EXISTING TRUSTS.—A devise or bequest may be made in a will or codicil, otherwise valid, in form or substance to the trustee or trustees under, or in accordance with the terms of, a written inter vivos trust (including an unfunded life insurance trust, although the settlor has reserved any or all rights of ownership in the insurance contracts) which has been executed and is in existence prior to or contemporaneously with the execution of such will or codicil and is identified in such will or codicil, without regard to the size or character of the corpus of such trust, or whether the settlor is the testator or a third person.

"Such devise or bequest shall not be invalid because the trust is subject to amendment or modification or may be terminated or revoked after the will or codicil is executed (whether by the settlor or any other person or persons), nor because the trust instrument or any amendment thereto was not executed in the manner required by law for wills or codicils.

"Unless the will or codicil otherwise provides—

"(1) such devise or bequest shall not be invalid because the trust was amended or modified after the will or codicil was executed and such devise or bequest shall be given effect in accordance with the terms of the trust as they appear in writing on the date of death of the testator, including any such amendment or modification;

"(2) property passing under such devise or bequest shall be deemed to pass directly to the trustee or trustees of the inter vivos trust and shall become a part of the assets of such trust, and shall not be deemed held under a separate testamentary trust;

"(3) an entire revocation of the trust prior to the death of the testator shall invalidate the devise or bequest even though such revocation was not effected in the manner provided by law for the revocation of wills and codicils;

"(4) a termination of the trust, except by way of revocation, in accordance with the terms of said trust or by its exhaustion or by operation of law or otherwise shall not invalidate the devise or bequest.

"(b) BEQUESTS OR DEVISES TO TRUSTEE UNDER, OR IN ACCORDANCE WITH TERMS OF, TESTAMENTARY TRUSTS.—A devise or bequest may be made in a will or codicil, otherwise valid, in form or substance to the trustee or trustees, under, or in accordance with the terms of, a testamentary trust established under another valid will or codicil. Such devise or bequest shall not be invalid because the testamentary trust or the will or codicil establishing such testamentary trust was not in existence when the will or codicil containing such devise or bequest was executed, if the testator of the will or codicil establishing such testamentary trust predeceases the testator of the will or codicil containing such devise or bequest, and such will or codicil establishing such testamentary trust had been or is subsequently admitted to probate.

"Unless the will otherwise provides—

"(1) property passing under such devise or bequest shall be deemed to pass directly to the trustee or trustees of the testamentary trust and shall become a part of the assets of such trust, and shall not be deemed held under a separate testamentary trust;

"(2) a termination of the trust in accordance with the terms of said trust or by its exhaustion or by operation of law or otherwise shall not invalidate the devise or bequest.

"The provisions of this section shall apply to any devise or bequest made by a testator living on the effective date of this Act or born subsequent thereto, without regard to the date of execution of the will or codicil containing such devise or bequest or of the trust instrument, or any amendment thereto: *Provided, however*, That the provisions of this Act shall not be construed as casting any doubt upon the validity as heretofore existing of (a) any devise or bequest made by a testator who shall have died prior to the effective date hereof, or (b) any devise or bequest which does not come within the provisions of this Act."

SEC. 3. Any provision of law inconsistent with the provisions of this Act is hereby repealed.

SEC. 4. This Act shall become effective upon the date of enactment of this Act.

With the following committee amendments:

1. Page 1, line 4, strike out "(D.C.".
2. Page 1, line 5, strike out "Code, title 19, chapter 2)".
3. Page 1, line 6, immediately after the word "section" insert the words "after section 1628 thereof".
4. Page 1, line 6, strike out "(D.C. Code, sec. 19-206)".
5. Page 1, line 7, strike out "2" and insert in lieu thereof "1628a".
6. Page 3, line 6, strike out "affected" and insert in lieu thereof "effected".
7. Page 3, line 10, immediately after the word "revocation" insert ",".
8. Page 5, line 1, strike out "Sec. 3" and insert in lieu thereof "Sec. 2".
9. Page 5, line 3, strike out "Sec. 4" and insert in lieu thereof "Sec. 3".

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

Mr. DOWDY. Mr. Speaker, the purpose of the bill is explicitly to authorize a testator, by the terms of his will, to "pour over" or add properties passing under his will to existing inter vivos trusts or testamentary trusts, and gives increased flexibility in the distribution of funds by a testator. The effect of the legislation is to stratify into statutory form the existing common law of the District of Columbia which it is believed already permits such transfers to be made.

The bill is considered necessary, however, because of the lack of statutory provisions or existing court decisions on the subject in the District of Columbia. It is desirable because in permitting the testator to add to existing trusts property passing under his will it thus allows him to avoid duplicating existing specific trust provisions in the body of his will. In effect, it incorporates into the will, by reference, the provisions of existing trusts to which the testator adds his property.

The proposed legislation follows closely the Maryland statute on the subject, since the District of Columbia has drawn most of its testamentary law from the State of Maryland. The similar Maryland provisions are to be found in article 93, sections 350A and 350B, of the Maryland code adopted by L. 1959, chapter 612.

This legislation carries the endorsement of the Board of Commissioners of the District of Columbia, the Register of Wills of the District of Columbia, the Bar Association of the District of Columbia, the District of Columbia Bankers Association, and the Metropolitan Washington Board of Trade. At the public hearing on the measure, no objection was expressed to the bill, and no adverse comments have been received thereon.

Similar legislation validating "pour over" trusts has already been adopted by 36 States, as follows: Alabama, Arizona, Colorado, Connecticut, Delaware, Florida, Idaho, Illinois, Indiana, Maine, Maryland, Michigan, Minnesota, Mississippi, Montana, Nebraska, New Hampshire, New Jersey, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, and Wyoming.

The favorable report of the Board of Commissioners is as follows:

GOVERNMENT OF THE
DISTRICT OF COLUMBIA,
EXECUTIVE OFFICE,
Washington, D.C., April 11, 1963.

Hon. JOHN L. MCMILLAN,
Chairman, Committee on the District of Columbia, U.S. House of Representatives, Washington, D.C.

MY DEAR MR. MCMILLAN: The Commissioners of the District of Columbia have been asked to report on H.R. 3190, 88th Congress, a bill to amend the act of March 3, 1901, relating to devises and bequests by will.

The purpose of the bill is to provide clear statutory authority to permit testators in the District of Columbia to transfer additional properties to existing inter vivos and testamentary trusts by way of testamentary devises or bequests.

The Commissioners have been informed that these so-called pour-over trusts are being established by testamentary devises and bequests at the present time despite the lack of specific statutory authority. It appears that some attorneys in the probate field believe the common law in the District does permit such testamentary devises and bequests; but there also appears to be a widespread feeling that enactment of H.R. 3190 is desirable in order to erase any doubts as to the validity of the "pour over" testamentary devise. In brief, the bill provides that a devise or bequest may be made in a will or codicil to pass properties to the trustee or trustees of an existing inter vivos trust or to the trustee or trustees of a testamentary trust established under another valid will or codicil.

It is understood by the Commissioners that a committee of the Bar Association of the District of Columbia has studied the matter and has reported favorably with respect to the bill. Mr. Theodore Cogswell, Register of Wills for the District of Columbia, also has informed the Commissioners of his approval of the bill.

Accordingly, the Commissioners offer no objection to the enactment of H.R. 3190.

However, it is suggested that in paragraph (3) of subsection (a) of the proposed section 2 that the word "affected" be amended to "effected" and in paragraph (4) a comma be inserted following the word "revocation."

Very sincerely yours,
WALTER N. TOBRINER,
President, Board of Commissioners.

SECTION-BY-SECTION ANALYSIS OF THE BILL

The first section of the bill adds a new section to the act of March 3, 1901, as amended, which new section will become section 1628a.

Paragraph (a) provides that a devise or bequest may be made by a testator to an inter vivos trust which is in existence at the time the testator executes his will. It further provides that the testator need not be the person who established the trust, the trust may be an unfunded life insurance trust (the corpus of which consists solely of the trustee being designated the beneficiary of certain life insurance policies on the life of the grantor of the trust), the trust may be subject to modification or termination at any time, and the trust need not be executed in the manner required by law for the execution of wills.

Subsection (1) of paragraph (a) provides further that, in the absence of contrary provisions in the will, the devise or bequest shall not be invalid even if the trust is amended after the will is executed, except that amendments occurring after the testator's death shall be ineffective as to the devise or bequest.

Subsection (2) of paragraph (a) provides that the property passing under the devise or bequest shall become part of the assets of the trust and shall not be held as a separate trust.

Subsection (3) of paragraph (a) provides that if the trust is revoked before the testator's death, the devise or bequest shall be invalid.

Subsection (4) of paragraph (a) provides that if the trust should terminate for some reason other than its revocation, the devise or bequest shall not be invalid. The effect of this provision is to permit the distribution of the property covered by the devise or bequest to the persons who were entitled to distribution of the trust corpus at its termination, in the event that the testator neglected to change his will after termination of the trust.

Paragraph (b) of section (1) provides that a devise or bequest may be made by a testator to a trust under the will of another person, if the other person dies before the testator's death and if the other person's will, which establishes a trust, is admitted to probate.

Subsection (1) of said paragraph (b) provides that, in the absence of contrary provisions in the testator's will, the property passing under the devise or bequest shall become part of the assets of the testamentary trust and shall not be held as a separate trust.

The concluding paragraph of section 1 provides that it shall apply to any devise or bequest made by testator living on the effective date of the act, or born thereafter, without regard to the date to the execution of his will or of an inter vivos trust, and provides further that the provisions of the proposed legislation shall not cast doubt upon the validity of the use of the pour-over device by testators who died before the effective date of the proposed legislation or any devise or bequest which does not come within the legislative provisions.

Section 2 of the bill repeals inconsistent law.

Section 3 of the bill provides that the act shall become effective upon the date of its enactment.

ELEANOR ROOSEVELT MEMORIAL FOUNDATION

Mr. SMITH of Virginia. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 317 and ask for its immediate consideration.

The Clerk read the resolution as follows:

> *Resolved,* That immediately upon the adoption of this resolution the bill H.R. 4715, with the Senate amendments thereto, be, and the same hereby is, taken from the Speaker's table, to the end that the Senate amendments be, and the same are hereby, agreed to.

Mr. SMITH of Virginia. Mr. Speaker, may I ask the gentleman from California if he desires to consume any time?

Mr. SMITH of California. I have some requests on this side. I understand we will have to handle this in the time limit provided for the discussion of the rule, because once the rule is adopted the amendments are agreed to and we do not have any further time. So I do have requests for time from some individuals who desire to ask questions, I may say to the gentleman.

Mr. SMITH of Virginia. Mr. Speaker, this resolution pertains to the bill recently passed by the House providing for the Eleanor Roosevelt Memorial Foundation, to be privately financed. It carries no burden for the Federal Treasury. The bill passed the House I believe with substantial unanimity. It went to the Senate, and there there were some amendments. When the bill came back to the House and the request for unanimous consent was made to take it from the Speaker's table and agree to the Senate amendments, there was objection, which under the rules required a rule to bring it to the floor of the House for consideration.

As the gentleman from California has stated, the adoption of the rule is the adoption of the Senate amendments and the final action on the bill. There will be no further discussion on the bill except under this rule, because as the rule reads:

> *Resolved,* That immediately upon the adoption of this resolution the bill H.R. 4715, with the Senate amendments thereto, be, and the same hereby is, taken from the Speaker's table, to the end that the Senate amendments be, and the same are hereby, agreed to.

I had not been aware of any controversy particularly about it.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. SMITH of Virginia. I yield to the gentleman from Iowa.

Mr. GROSS. The wording of the resolution from the Committee on Rules forecloses any further amendments to the bill, is that correct?

Mr. SMITH of Virginia. Yes. The adoption of this rule is the end of the bill. It completes the legislation.

Mr. Speaker, I now yield to the gentleman from California [Mr. SMITH].

Mr. SMITH of California. Mr. Speaker, I agree with what the gentleman from Virginia has said about the rule. That is precisely as I understand the situation. If we adopt this resolution, then the Senate amendments to H.R. 4715 are approved. The only alternative is that if it is voted down the bill then, it is my understanding, would go to conference, where the members of the committee of conference from the House and Senate would consider the amendments added to the bill.

The only question I and some of the other Members on this side of the aisle have is as to the language the Senate added starting on page 3 on line 17, where the words "and the furtherance of international good will" are added. Some Members have asked me specifically what this means. To be very frank, I am not certain what the Senate may have had in mind in adding this particular language. So inasmuch as we have just the half hour's time on this side, if there are any Members who at this time desire to ask any questions on this particular resolution, speak now or forever hold your peace.

Does anybody have any questions they wish to ask?

Mr. HALL. Mr. Speaker, will the gentleman yield?

Mr. SMITH of California. I yield to the gentleman.

Mr. HALL. As the gentleman from California knows, I did object to this the other day so far as final passage by unanimous consent was concerned. My reason for objecting was that I thought some of these very points that you and the gentleman from Virginia have brought out should, perhaps have been brought out and perfected and discussed and explained on the floor of this House by the Committee on the Judiciary to which it was referred.

Furthermore, I felt it should go through the "due process" of conference and/or further discussion on the floor. There is considerable question in my mind about the cost as set forth on pages 4 and 5, in the language that was added to this bill by the other body, for example, wherein it says, "to take by lease, gift, purchase, grant, or otherwise from any public body." It just happens that on the same day that we had this up on the floor of the House, and I objected to it, we also had a supplemental or a so-called deficiency appropriation bill before the House which involved several thousands of dollars for the Franklin D. Roosevelt Memorial Foundation, and even for the Woodrow Wilson Memorial Foundation. It seems obvious then that this will thereby, under these terms of new language reference, eventually cost the taxpayers a considerable amount of money. I would like to hear from the committee or from the proponents of the bill such explanation as they have. I do have a serious question about the meaning of the term that has been added "international good will."

Furthermore on page 3 of the bill it sets forth specifically that additional persons may be appointed by the President at any time and, finally, on page 10 it says that the report shall not be printed as a public document—and this pertains to an audit. I would like to see, if we are going to give our blessings to this type of memorial foundation, as worthy as it may be as far as the individual memorialized is concerned, that we have "due process" and authority for audits and reports back to the Congress concerning the foundation. I wonder if the gentleman would yield to someone who can explain these items for us? It was my understanding that that might be available today—if, indeed, this did not go to conference?

Mr. SMITH of California. I wonder if the gentleman from New York [Mr. CELLER] would answer the gentleman's inquiry.

Mr. SMITH of Virginia. Mr. Speaker, will the gentleman yield to me at this time?

Mr. SMITH of California. I am happy to yield to the gentleman.

Mr. SMITH of Virginia. I just wanted to resume control of the time for a moment in order to yield to the chairman of the Committee on the Judiciary, the gentleman from New York [Mr. CELLER].

Mr. Speaker, I yield such time as he may consume to the gentleman from New York [Mr. CELLER], the chairman of the Committee on the Judiciary.

Mr. CELLER. Mr. Speaker, answering the questions that have been propounded, I would say that the language inserted by the other body concerning the taking by lease, gift, purchase, grant, and so forth is proverbial boilerplate. We use that language in all Federal incorporations—allowing those in charge of the incorporation to accept gifts in this manner. Without such language, there might be some legal difficulties and entanglements. Therefore, this language has always appeared in incorporations of this sort.

Secondly, there was some query as to whether or not we have the right to check on finances. There is a clause in this bill requiring the books to be audited annually and for a report of that audit to be made to the President of the United States and the Congress.

Mr. HALL. Will the gentleman state where it is in the bill?

Mr. CELLER. On page 9, line 20; section 14 deals with audit of financial transaction; and then in subdivision (b) page 10, line 10, we have the language as follows:

> A report of such audit shall be made by the Corporation to the President of the United States and to the Congress not later than 6 months following the close of the fiscal year for which the audit is made.

As for publication of the report as a public document——

Mr. HALL. Before the gentleman goes further, if the gentleman will yield——

Mr. CELLER. I yield.

Mr. HALL. Speaking of the language the gentleman referred to as boilerplate, would that allow the Congress subsequently to contribute to this memorial foundation or, indeed, maybe lead us to expect that it might contribute to it?

Mr. CELLER. This says nothing about the Congress appropriating any funds. Congress would have the right, of course, to do that, but there is nothing in here suggesting it or encouraging it.

Mr. GROSS. If the gentleman will yield, what does the gentleman think about the prospects of Congress being called upon to appropriate for this organization?

Mr. CELLER. I do not think Congress will ever be called upon for that purpose, because of the language here which indicates that the moneys necessary for the maintenance of the Foundation are to be raised by private subscription.

Mr. GROSS. Would the gentleman be opposed at some later time to Congress appropriating for this purpose?

Mr. CELLER. I think I would be opposed to it, because of the history that would be established concerning this Foundation.

Mr. GROSS. If the gentleman will yield, that is exactly what we are trying to establish here and now, some history with respect to the intent of Congress, what is proposed to be done in the future.

Will the gentleman now tell me the meaning of the phrase "furtherance of international good will"? What would the gentleman think this would mean?

Mr. CELLER. May I first indicate that the member of our committee who was in charge, the gentleman from Georgia, Mr. FORRESTER, is unfortunately ill. He is in favor of that proposal. The subcommittee over which he presided likewise was in favor of those amendments added to the bill by the Senate, the amendments to which the gentleman has referred. You may recall, sir, I will say to the gentleman from Iowa, that on the last occasion when we considered this bill I read to this body a communication received from the distinguished junior Senator from New York, the Honorable KENNETH KEATING, Republican, who stated that the Senate Judiciary Committee put that clause in the bill because it comported with one of the missions of Eleanor Roosevelt, and he hoped that that provision would be accepted by the House.

The language to which the gentleman has referred appears in quite a number of incorporations. If the gentleman will bear with me I will just make this statement. I draw the attention of the House to the language in other incorporations which are no narrower than the language here proposed.

In the charter of the American Red Cross we find the words:

> And to continue and carry on a system of national and international relief in time of peace.

In Big Brothers of America, the language reads, in part:

> To aid and assist boys throughout the United States of America and Canada in the solution of their social and economic problems.

The federally chartered Military Chaplains Association of the United States carries the language:

> To promote justice, peace, and good will.

The federally incorporated American Society of International Law has among its purposes:

> To promote the establishment and maintenance of international relations on the basis of law and justice.

This charter, therefore, makes no history, establishes no precedent. Permit me to read from the report of the House which naturally would have to be somewhat of a guide for further interpretations of the act itself. The report of the House reads as follows:

> The bill provides that the corporation is to devote itself to continuing certain major interests with which Mrs. Roosevelt was deeply concerned, the relief of the poor and distressed and underprivileged, the promotion of economic welfare, and of public health.

Then the foundation, of course, is to be financed from private sources. I do not think, therefore, that the language is of such nature as to cause us any disquiet; it is general in tone. I do not think there is anything to cause us any worry or perturbation of mind or spirit whatsoever.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. CELLER. I yield to the gentleman from Iowa.

Mr. GROSS. I see no comparison between the charter for this foundation, or approval of this foundation, and the American Red Cross.

I note on pages 1 and 2 of the bill what appears to be a blue ribbon roster of the Americans for Democratic Action. I do not recall that the Red Cross was organized by the ADA, or any group of that nature.

Are we in the business of approving, from an international standpoint, another organization similar to the Red Cross?

Mr. CELLER. Only a few days ago in the interest of international good will and further cementing the relations between Great Britain and the United States, we bestowed upon a citizen of Great Britain the title of "Honorary Citizen of the United States."

Mr. GROSS. Yes, and I think that was a great mistake.

Mr. CELLER. Of course the gentleman is entitled to his opinion, but the House did overwhelmingly pass that bill. In concrete fashion similarly we seek to honor a great First Lady of America. By granting this charter to the Eleanor Roosevelt Foundation, it is proposed to continue the wide and humanitarian interests of the great First Lady of our land. I think international good will at this stage of our civilization is something that should attract all of us, it is something that we should all try to further, because we need greater international good will.

Mr. SMITH of California. Mr. Speaker, I yield 1 minute to the gentleman from Maryland [Mr. MATHIAS].

Mr. MATHIAS. Mr. Speaker, on the question raised by the gentleman from Iowa, we discussed in the subcommittee very carefully the implication of the addition by the Senate of the words "international good will." At that time the gentleman from California [Mr. ROOSEVELT] was present. We discussed it and he explained what was intended, according to his understanding. He further explained his understanding was relevant because he felt he would be a trustee. So that the act of international good will, which would be pursued by the Foundation, would be of a private or eleemosynary nature, such as international fellowships and cancer research.

He undertook to say within his ability that that understanding of the nature of the international functions would be conveyed to the trustees that might be appointed by the President under the bill. As the distinguished chairman of the Committee on the Judiciary stated, I think it was the complete understanding both in subcommittee and here on the floor when the matter was last discussed that this was not the kind of international good will to which the Foundation would be limited.

Mr. SMITH of Virginia. Mr. Speaker, I yield to the gentleman from Iowa, [Mr. GROSS].

Mr. GROSS. Mr. Speaker, I am unable to understand why this bill takes the route it does when it comes back to the House. It should come back as a conference report. It went to the Rules Committee.

Now, why was this necessary?

Mr. SMITH of Virginia. It is the simple and ordinary process of getting a bill from the Speaker's table. When the bill comes back from the Senate and lays on the Speaker's table it can only be taken up either by the rule or by unanimous consent, or it can be taken up to go to conference. Any of these forms may be objected to by any Member of the House, in which case the only way to move the bill from the Speaker's table is to apply to the Rules Committee for a rule, which is normally granted as a matter of course. I see nothing in the difference in the Senate bill that would arouse any particular controversy, and I had assumed it was one of the usual matters. And, I assure the gentleman that it is the customary way in which all of these matters are handled in a parliamentary way.

Mr. GROSS. With the restrictive language contained in this resolution?

Mr. SMITH of Virginia. Restrictive language?

Mr. GROSS. Yes.

Mr. SMITH of Virginia. No. It is the usual language that we use in the Committee on Rules to take a bill and send it to conference or to take a bill and agree to Senate amendments.

Mr. ALBERT. Mr. Speaker, will the gentleman yield?

Mr. SMITH of Virginia. I yield to the gentleman from Oklahoma.

Mr. ALBERT. This is identically the same thing we do when we send a bill to conference. This procedure is very seldom used, but it is the identical sort of thing.

Mr. SMITH of Virginia. I just explained that to the gentleman.

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that the gentleman from California [Mr. ROOSEVELT] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. ROOSEVELT. Mr. Speaker, in accordance with the privilege granted me by the House to insert remarks at this point in the RECORD, I wish to say that I most sincerely regret I cannot be present in the Chamber today. Strange as it may seem, I am forced to be in bed with a case of the mumps, and cannot personally thank all those who worked so hard for passage of the Eleanor Roosevelt Memorial Foundation bill. I am certain the Foundation will live up to its very fine stated purposes, and that it will be a credit to those who are pledged to work for it to carry out the purposes for which mother worked so hard all her life.

Mr. SMITH of Virginia. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

The resolution was agreed to.

A motion to reconsider was laid on the table.

INTERNATIONAL COTTON CONFERENCE

Mr. SMITH of Virginia. Mr. Speaker, I call up House Resolution 318 and ask for its immediate consideration.

The Clerk read as follows:

Resolved, That, notwithstanding the provisions of H. Res. 38, Eighty-eighth Congress, the Committee on Agriculture is hereby authorized to send two of its members to India in late April and early May, 1963, to attend the meeting of The International Cotton Advisory Committee.

Notwithstanding section 1754 of title 22, United States Code, or any other provisions of law, local currencies owned by the United States shall be made available to the committee and employees engaged in carrying out their official duties under section 190(d) of title 2, United States Code: *Provided*, (1) That no member or employee of said committee shall receive or expend local currencies or appropriated funds for subsistence in an amount in excess of the maximum per diem rates approved for oversea travel as set forth in the Standardized Government Travel Regulations, as revised and amended by the Bureau of the Budget; (2) that no member or employee of said committee shall receive or expend an amount for transportation in excess of actual transportation costs; (3) no appropriated funds shall be expended for the purpose of defraying expenses of members of said committee or its employees in any country where counterpart funds are available for this purpose.

That each member or employee of said committee shall make to the chairman of said committee an itemized report showing the number of days visited in each country whose local currencies were spent, the amount of per diem furnished and the cost of transportation if furnished by public carrier, or if such transportation is furnished by an agency of the United States Government, the identification of the agency. All such individual reports shall be filed by the chairman with the Committee on House Administration and shall be open to public inspection.

Mr. SMITH of Virginia. Mr. Speaker, there is an International Cotton Conference taking place in India within the next few days. We have a very substantial interest, as the House knows, in the question of cotton, and in order that we may have a voice at that international conference, this rule provides that the Committee on Agriculture may send two members to that conference which convenes sometime in the latter part of this weekend. I think that is about all I need to say on the subject.

Mr. KYL. Mr. Speaker, will the gentleman yield?

Mr. SMITH of Virginia. I yield to the gentleman from Iowa.

Mr. KYL. The Bureau of the Budget has revised figures on travel allowance. Can the gentleman tell us what this figure is for the nation of India?

Mr. SMITH of Virginia. No, I do not know anything about what changes may have been made by some agency of the Government with respect to travel allowance. I can say to the gentleman, as the gentleman probably knows, that at the beginning of this session the Committee on Rules held hearings and gave very thorough consideration to this matter of foreign travel, and under the rule which we reported and which the House approved, I think practically unanimously, we restricted very much the question of foreign travel by committees of the House, and in restricting it we laid down some very careful rules about spending.

The thing is very much restricted. We have followed in this resolution and the one which is to follow those restrictions that we laid down in the first instance, and it is in conformity with the policy which I stated on the floor at the time the original resolution was passed, that if it were the desire of any committee to send delegates to any international affair that seemed to have merit and where we should be represented, the Committee on Rules would be agreeable to hearing any further resolution for specific instances where in the opinion of the House it might be merited.

We merely report this to you as one instance in which we think a certain relaxation of the rules is in conformity with the public interest.

Mr. KYL. If the gentleman will yield further, I will say that the sole purpose for bringing up this subject at this time is the fact that these figures, which are the stipulated expenditure allowances for foreign countries, are in most instances ridiculous. They are indeed so low that unless other provision is made there will be a means found to circumvent that procedure, because these people traveling abroad in foreign countries on the budget allowances of the Bureau of the Budget just will not be able to subsist on the amount which is permitted.

Mr. SMITH of Virginia. Well, of course, that is a matter over which the Committee on Rules has no jurisdiction.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. SMITH of Virginia. I yield to the gentleman from Iowa.

Mr. GROSS. I trust that the restrictions laid down by the Committee on Rules apply to Puerto Rico as well as more distant foreign countries?

Mr. SMITH of Virginia. This does not deal with Puerto Rico.

Mr. GROSS. I know, but I am talking about the action previously taken by the Committee on Rules with respect to other requests for travel.

Mr. SMITH of Virginia. But I am dealing with this matter and am not dealing with Puerto Rico or the situation which exists in Puerto Rico at this time.

Mr. Speaker, I yield 30 minutes to the gentleman from California [Mr. SMITH].

Mr. SMITH of California. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, may I simply say that it was my understanding when the Committee on Rules brought certain language down here to the floor of the House—and I so made the statement on the floor of the House—that in restricting these various committees from traveling abroad, if they did come in before the Rules Committee and justified the purpose of sending members abroad we would consider those matters and would consider them in every way we possibly could.

Mr. Speaker, members of the Committee on Agriculture have come before the Committee on Rules and in my opinion they have justified the reason for this particular travel, and so far as I am concerned I am in support of the resolution and think it is the proper manner in which to handle this matter.

Mr. SMITH of Virginia. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

The resolution was agreed to.

A motion to reconsider was laid on the table.

GRANTING ADDITIONAL TRAVEL AUTHORITY TO THE COMMITTEE ON THE JUDICIARY

Mr. SMITH of Virginia. Mr. Speaker, I call up House Resolution 319 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That, notwithstanding the provisions of H. Res. 36, Eighty-eighth Congress, the Committee on the Judiciary is hereby authorized to send two of its Members and one staff assistant to Geneva, Switzerland, to attend the meeting of Intergovernmental Committee for European Migration on April 29, 1963, and to Frankfurt, Germany, and London, England, on matters concerning immigration, the duration of the trip to be from April 26, 1963, to May 8, 1963, inclusive.

Notwithstanding section 1754 of title 22, United States Code, or any other provisions of law, local currencies owned by the United States shall be made available to the committee and employees engaged in carrying out their official duties under section 190(d) of title 2, United States Code: *Provided*, (1) That no member or employee of said committee shall receive or expend local currencies or appropriated funds for subsistence in an amount in excess of the maximum per diem rates approved for oversea travel as set forth in the Standardized Government Travel Regulations, as revised and amended by the Bureau of the Budget; (2) that no member or employee of said committee shall receive or expend an amount for transportation in excess of actual transportation costs; (3) no appropriated fund shall be expended for the purpose of defraying expenses of members of said committee or its employees in any country where counterpart funds are available for this purpose.

That each member or employee of said committee shall make to the chairman of said committee an itemized report showing the number of days visited in each country whose local currencies were spent, the amount of per diem furnished, and the cost of transportation if furnished by public carrier, or if such transportation is furnished by an agency of the United States Government, the identification of the agency. All such individual reports shall be filed by the chairman with the Committee on House Administration and shall be open to public inspection.

Mr. SMITH of Virginia. Mr. Speaker, I yield 30 minutes of my time to the gentleman from California [Mr. SMITH] and pending that, yield myself such time as I may require.

Mr. Speaker, this resolution is similar to the one just adopted and has reference to the Committee on the Judiciary of the House. As you know, that committee has jurisdiction over immigration matters. It is a very complicated subject involving a great deal of work and a great deal of international contact. There is a meeting in Geneva in the next few days on this subject.

This resolution is in conformity with the policy laid down by the House in adopting the original resolutions and authorizes the Committee on the Judiciary to send two of its members and one staff member to this meeting in Geneva concerning international matters of immigration.

Mr. SMITH of California. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, I concur completely in the remarks of the gentleman from Virginia [Mr. SMITH]. I think the Committee on the Judiciary has done an excellent job over the years in connection with their work on the Intergovernmental Committee on European Migration. I think it is extremely important that they make this trip. I should like to make one or two comments with reference to what the gentleman from Iowa mentioned. I had the opportunity on two different occasions of going with the distinguished gentleman from Pennsylvania [Mr. WALTER] to Geneva. I can say that you might be able to do your work, but you just cannot live in a hotel room and pay your other expenses on $15 per day. The time will come when this regulation will give us difficulty. I hope that it will not be necessary to do as the gentleman from Iowa suggested might be necessary, to try to circumvent this regulation to handle the matter in some other way. The Committee on Rules has been trying to do the best it can on these particular difficulties that have been presented to the House.

Mr. Speaker, I support this resolution and ask for its passage.

Mr. KYL. Mr. Speaker, will the gentleman yield?

Mr. SMITH of California. I yield to the gentleman.

Mr. KYL. Suppose we have this situation arise at Geneva. Members from the U.S. House of Representatives are attending such a meeting and it comes the turn of this American group to take a foreign group out to dinner. Under the rules governing foreign travel such an amount must appear on some individual Congressman's expense account, is that correct?

Mr. SMITH of California. That is my understanding.

Mr. KYL. And when the press reports the expenditures, as printed in the CONGRESSIONAL RECORD, of Members of the House traveling abroad, that amount does reflect totals that have to be spent on entertainment; is that not correct?

Mr. SMITH of California. That is correct. I did say that that presents one of the problems because, after all, one of the individuals has to pick up that check out of counterpart funds.

Mr. CELLER. Mr. Speaker, will the gentleman yield?

Mr. SMITH of California. I yield to the gentleman from New York.

Mr. CELLER. Under the wording of the resolution the allowance per diem at Geneva would be $16 and at Frankfurt would be $14. It would be impossible to take anybody out to dinner under that sort of allowance.

Mr. KYL. The sole point in bringing this up is not to try to get away from the regulations on travel, but is an effort to set up the kind of reasonable regulations which would improve and help to promote an honest reporting system instead of promoting circumvention of the rules passed by the House.

Mr. SMITH of California. Mr. Speaker, I have no further requests for time.

Mr. SMITH of Virginia. Mr. Speaker, I move the previous question.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

SIGNING OF ENROLLED BILLS AND JOINT RESOLUTIONS

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that notwithstanding the adjournment of the House until tomorrow, the Clerk be authorized to receive messages from the Senate and that the Speaker be authorized to sign any enrolled bills and joint resolutions duly passed by the two Houses and found truly enrolled.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

COMMITTEE ON BANKING AND CURRENCY

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that the Committee on Banking and Currency may be permitted to sit during general debate on tomorrow, April 23, 1963.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

BALTIC INDEPENDENCE: A NECESSITY FOR OUR TIMES

Mr. LANKFORD. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Maryland?

There was no objection.

Mr. LANKFORD. Mr. Speaker, the resolution I am introducing today calls on the United Nations to bring about the independence of the Baltic States of Latvia, Lithuania, and Estonia.

In making this proposal I seek but one goal: To give the Baltic peoples an opportunity to determine for themselves through free elections supervised by the U.N. the course they wish their own national life to take. There is no doubt that the avenue they would choose would be that of freedom and democracy.

The right of self-determination is a natural right of mankind. This right was taken from the Baltic peoples in 1940 and again after the second Soviet conquest in 1944–45.

What I ask through this resolution, Mr. Speaker, is nothing more than the fulfillment of the pledges set forth in the constitution of the Soviet Union. In this document, as in the laws of all the Soviet peoples, the right of self-determination is an established guarantee.

On many occasions Soviet leaders have reasserted this solemn Leninist right that they claim is due all Soviet peoples.

A traditional claim to independence and nationhood is the existence of a distinct community of peoples called a nation. In this regard, the Baltic peoples fulfill the requirement. The Baltic peoples are not Russians; they are Latvians, Lithuanians, and Estonians. They are a people separated from the Russians, ethnically, linguistically, and culturally. They share no common religious tradition. By and large, the Baltic peoples are imbued with the traditions of Lutheran and Roman Catholic Christianity. They are not orthodox. In every sense, they are a unique people whose historic past is marked by centuries of independence and grandeur. It is also a past marked regrettably by the conquest of Russian power.

During the interwar period of the 1920's and 1930's the Baltic peoples demonstrated beyond question their capacity for independence and nationhood. Neither then nor now could their independent status be seriously regarded as a threat to the Soviet Union.

Mr. Speaker, the Soviet Union could gain a great deal by agreeing to free elections which would surely mean the institution of a genuine democratic system in the Baltic states. In the first place, I do not doubt that such an action would contribute to a further easing of tensions in international relations. Moreover, the Soviet propaganda image would be improved so that Soviet credibility in world affairs would be enhanced. And finally a free Baltic people would be an economically productive people, for it is an axiom of life itself that the freeman is the most productive man. Geographic proximity would predetermine a close economic as well as a political orientation toward the Soviet Union. Thus, in the long run the Soviets would gain economically.

It is with this range of considerations in mind, Mr. Speaker, that I present this resolution today. Let it be adopted by the House of Representatives as a hopeful first step in freeing a truly courageous and heroic people, the people of Lithuania, Latvia, and Estonia.

THE PUBLIC EDUCATION IMPROVEMENT ACT OF 1963

Mr. PERKINS. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD and include tables.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

Mr. PERKINS. Mr. Speaker, on April 1 I introduced H.R. 5344, the Public Education Improvement Act of 1963. I did so to express my deep commitment to the imperative necessity of improving America's public schools. No matter what the pessimists may say about the prospects of enacting sound legislation in the field of general aid for elementary and secondary education, we must strive to further the conviction that the Nation can only be as strong and as prosperous as the health of our public schools permits.

I have been heartened in recent days by a steady flow of correspondence commenting favorably upon H.R. 5344 and, above all, urging me to continue my efforts in behalf of this legislation. This I pledge to do unequivocally and without reservation.

In response to requests from my colleagues as to the financial provisions of the Public Education Improvement Act, I would like to include in the RECORD at this time two charts showing estimated State allotments under the provisions of my bill.

Table I indicates the distribution of the $6 million authorized in title I—Surveys of Educational Needs by the States. These funds would be used by State educational agencies to establish and to describe educational priorities within the respective States. Among other things these funds would help the Congress to learn more than we now know about:

First. The adequacy of the curriculum and the quality of instruction in our schools, particularly in such basic subjects as English, history, government, science, mathematics, modern foreign languages, and vocational education.

Second. Particular problems of education for special groups in our schools—the retarded, mentally or physically handicapped, prospective dropouts, underachieving pupils, the gifted.

Third. The status of guidance and other personnel services for all pupils.

Fourth. The needs for vocational and technical education in our revolutionary society.

Fifth. The condition of our school plants and the relative financial ability of local education agencies to afford modern, safe, and healthy school facilities.

Sixth. The need for additional funds in selecting school districts to relieve overcrowding, to upgrade teacher preparation, to provide adequate libraries, equipment, teaching aids, or library services.

Seventh. The relative cost of current operation per pupil in average daily attendance and the relative economic ability of local education agencies to finance the rising cost of public education.

TABLE I.—*Estimated distribution of $6 million, on basis of school-age (5-17) population, Apr. 1, 1960, under the provisions of H.R. 5344*

[*Estimated State amount*]

Aggregate United States	$6,000,000
50 States	5,825,000
Alabama	118,855
Alaska	20,000
Arizona	46,302
Arkansas	62,674
California	489,324
Colorado	58,136
Connecticut	76,923
Delaware	20,000
Florida	150,637
Georgia	140,209
Hawaii	22,454
Idaho	24,536
Illinois	305,024
Indiana	152,783
Iowa	89,847
Kansas	69,418
Kentucky	105,387
Louisiana	117,933
Maine	31,759
Maryland	101,671
Massachusetts	153,306
Michigan	262,859
Minnesota	114,596
Mississippi	82,741
Missouri	131,241
Montana	23,425
Nebraska	44,880
Nevada	20,000
New Hampshire	20,000
New Jersey	180,731
New Mexico	36,075
New York	481,603
North Carolina	164,898
North Dakota	22,736
Ohio	312,945
Oklahoma	75,623
Oregon	58,815
Pennsylvania	347,085
Rhode Island	25,310
South Carolina	92,161
South Dakota	23,654
Tennessee	121,626
Texas	327,209
Utah	33,806
Vermont	20,000
Virginia	132,966
Washington	94,025
West Virginia	66,858
Wisconsin	129,954
Wyoming	20,000
District of Columbia and outlying parts	175,000

Table II indicates the distribution of funds according to the formula in title II of H.R. 5344. This title provides general assistance grants for the maintenance and improvement of State and local financial mechanisms for the support of our public school system.

TABLE II.—*Estimated State allotments under the provisions of H.R. 5344, "Title II: General Assistance"*

	Total estimated State allotments	Estimated allotment based on—	
		Estimated expenditures, 1962-63 [1]	Per capita income, 1960-61
Aggregate, United States	$974,801,816	$387,316,980	$587,484,836
50 States and District of Columbia	966,637,653	385,625,220	581,012,433
Alabama	17,023,639	4,117,500	12,906,139
Alaska	1,255,160	686,000	569,160
Arizona	10,920,309	3,620,000	7,300,309
Arkansas	11,536,044	2,731,860	8,804,184
California	82,371,712	49,600,000	32,771,712
Colorado	10,859,900	4,620,880	6,239,020
Connecticut	8,538,014	5,930,000	2,608,014
Delaware	1,512,835	1,247,000	265,835
Florida	29,429,572	9,122,620	20,306,952
Georgia	23,614,114	6,160,900	17,453.214
Hawaii	2,947,554	1,240,000	1,707,554
Idaho	4,520,058	1,280,680	3,239,378
Illinois	40.820,540	21,850,900	18,969,640
Indiana	27,929,671	10,157,500	17,772,171
Iowa	17,091,351	5,852,000	11,239,351
Kansas	14,583,347	5,043,000	9,540,347
Kentucky	15,438,340	3,980,000	11,458,340
Louisiana	23,417,597	6,040,040	17,377,557
Maine	5,584,924	1,614,000	3,970,924
Maryland	16,770,328	7,446,000	9,324,328
Massachusetts	18,167,363	9,037,500	9,129,863
Michigan	50,433,482	19.102,000	31,331,482
Minnesota	24,359,648	8,480,000	15,897,648
Mississippi	14,178,434	3,056,000	11,122,434
Missouri	19,871,794	7,440,000	12.431,794
Montana	5,277,559	1,634,000	3,643,559
Nebraska	7,339,879	2,588,000	4,751,879
Nevada	1,217,098	987,600	229,498
New Hampshire	3,129,937	1,075,920	2,054,017
New Jersey	25,614,015	14,330,000	11,284,015
New Mexico	8,288,778	2,349,760	5,939,018
New York	68,236,340	44,596,000	23,640,340
North Carolina	28,732,160	7.470,000	21,262,160
North Dakota	5,400,000	1,350,000	4,050,000
Ohio	52,791,864	20,908,000	31,883,864
Oklahoma	14,494,456	4,298,500	10,195,956
Oregon	11,783,149	4,472,700	7,310,449

Mr. Speaker, I hope that every Member of this House will dedicate a few moments of his busy schedule to consider the health of our public schools. In this connection I believe that he will find H.R. 5344 has much to commend it.

THE VOCATIONAL EDUCATION ACT OF 1963

Mr. PERKINS. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD and include tables.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

Mr. PERKINS. Mr. Speaker, on March 18 I introduced H.R. 4955, the Vocational Education Act of 1963. As I indicated at the time, 8 out of 10 of our youngsters now in elementary schools will not complete 4 years of college. In our changing world of work unskilled and semiskilled jobs are rapidly decreasing. More and more, our society demands highly skilled and well-trained individuals. If our public schools are to meet this challenge, our long established vocational education programs must be expanded and improved and increased Federal aid must be authorized by the Congress.

Under H.R. 4955, 5 percent of the sums appropriated would be used by the Commissioner of Education to make grants to pay part of the cost of experimental, development, or pilot programs developed by such agencies and designed to meet the special vocational education needs of youths, particularly youths in economically depressed communities, who have academic, socioeconomic, or other handicaps.

The remaining $69,350,000 in fiscal 1964 would be allotted among the States as indicated in the following table. Also shown are the total State allotments during their first 4 years of operation of the Vocational Education Act of 1963:

Estimated distribution of $69,350,000 for fiscal year 1964 and of $796,100,000 for fiscal year 1964 through fiscal year 1967, under the provisions of H.R. 4955, "Title I: Vocational Education"

	Estimated State amounts	
	Fiscal year 1964	Fiscal years 1964–67
Aggregate, United States	$69, 350, 000	$796, 100, 000
50 States and District of Columbia	67, 626, 922	776, 320, 008
Alabama	1, 789, 413	20, 541, 481
Alaska	99, 727	1, 144, 811
Arizona	553, 078	6, 349, 032
Arkansas	973, 433	11, 174, 477
California	4, 439, 800	50, 966, 471
Colorado	638, 629	7, 331, 111
Connecticut	635, 588	7, 296, 202
Delaware	103, 531	1, 188, 479
Florida	1, 965, 153	22, 558, 880
Georgia	2, 074, 037	23, 808, 808
Hawaii	268, 726	3, 084, 827
Idaho	311, 892	3, 580, 349
Illinois	2, 920, 185	33, 522, 124
Indiana	1, 777, 754	20, 407, 642
Iowa	1, 083, 112	12, 433, 532
Kansas	855, 865	9, 824, 861
Kentucky	1, 587, 231	18, 220, 542
Louisiana	1, 624, 021	18, 642, 871
Maine	432, 714	4, 967, 320
Maryland	1, 059, 586	12, 163, 467
Massachusetts	1, 604, 546	18, 419, 309
Michigan	2, 758, 675	31, 668, 077
Minnesota	1, 327, 448	15, 238, 376
Mississippi	1, 327, 127	15, 234, 691
Missouri	1, 577, 103	18, 104, 278
Montana	275, 876	3, 166, 905
Nebraska	535, 763	6, 150, 266
Nevada	74, 594	856, 298

New Jersey	1, 668, 667	19, 155, 383
New Mexico	451, 461	5, 182, 525
New York	4, 329, 954	49, 705, 499
North Carolina	2, 534, 309	29, 092, 479
North Dakota	313, 671	3, 600, 771
Ohio	3, 325, 452	38, 174, 367
Oklahoma	1, 064, 930	12, 224, 813
Oregon	638, 397	7, 328, 448
Pennsylvania	4, 016, 728	46, 109, 837
Rhode Island	328, 399	3, 769, 841
South Carolina	1, 464, 247	16, 808, 753
South Dakota	306, 615	3, 519, 772
Tennessee	1, 879, 958	21, 580, 888
Texas	4, 201, 464	48, 230, 504
Utah	414, 049	4, 753, 056
Vermont	175, 368	2, 013, 129
Virginia	1, 905, 238	21, 871, 088
Washington	1, 011, 744	11, 614, 267
West Virginia	$919, 421	$10, 554, 449
Wisconsin	1, 458, 642	16, 744, 411
Wyoming	120, 325	1, 381, 265
District of Columbia	186, 411	2, 139, 896
American Samoa	14, 123	162, 124
Canal Zone		
Guam	42, 813	491, 470
Puerto Rico	1, 645, 605	18, 890, 644
Virgin Islands	20, 537	235, 754

NOTE.—State distributions are based on the product of (1) the Federal allotment percentages, based on average per capita income for 1959, 1960, and 1961 and (2) the State population, as of Apr. 1, 1960, (*a*) aged 15–19, (*b*) aged 20–24, (*c*) aged 25–64, plus a distribution on the basis of the total amount received by the State under (*a*), (*b*), and (*c*), above. The Federal allotment percentage is 50 percent for Alaska and 75 percent for American Samoa, Guam, Puerto Rico, and the Virgin Islands.

MR. Y. FRANK FREEMAN—MR. HOLLYWOOD

Mr. SMITH of California. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. SMITH of California. Mr. Speaker, it has become hackneyed and trite, I know, to speak of some person being honored as Mr. This or Mr. That. Overuse has made this cliche almost threadbare and meaningless.

But, Mr. Speaker, I shall use it today. For, in my mind, there is no way more adequate or more genuine to describe a man who is being honored by his colleagues at a testimonial dinner in California this coming Sunday evening.

He is Mr. Y. Frank Freeman. And he is, indeed, Mr. Hollywood.

For a quarter of a century Frank Freeman, whom I am privileged to call my friend, has stood for all that is good, for all that is best, in the American motion picture and in the film capital of the world—Hollywood.

There was never a worthy call that Mr. Freeman has not answered. There was never a constructive cause that Mr. Freeman has not assisted. There was never an enterprise for the benefit of the community that has not had behind it the immeasurable talents of Frank Freeman.

So, I feel it is wonderfully fitting that both the motion picture community and the Los Angeles community should be joining in this dinner to celebrate Mr. Freeman's 25 years in Hollywood.

He went to California in 1938 as vice president in charge of production of Paramount Studios. It is a tribute to his talents that many of the pictures produced at this studio will long be remembered for their contributions to the advancement of the cinematographic art.

As is true of other gifted men, Frank Freeman's talents were ample enough to spread to many other activities. Just a bare listing will give you an idea of scope and magnitude of his interests.

He served for 5 years as president of the Association of Motion Picture Producers, and has been chairman of its board since 1947. He has also contributed importantly to these organizations: Los Angeles Chamber of Commerce; Los Angeles Welfare Federation and Community Chest; Los Angeles chapter, American Red Cross; Greater Los Angeles Building Fund; and the Los Angeles World Affairs Council.

From 1954 through 1961, he was deputy chairman of the board of the Federal Reserve Bank in San Francisco, and from 1943 to 1950 was chairman of the Los Angeles branch of the bank.

He is a trustee of the Vniversity of Southern California, and for my friends from Georgia, I want to recall that he was born there and was graduated from Georgia Tech.

I could go on and on listing his accomplishments but I want to turn now to say a word about Frank Freeman as a human being, for that is the true mark of a man—how he measures up as an individual.

It is difficult to do more than suggest the depth and the breadth and the fervor of feeling that Frank Freeman kindles. But this feeling will be understood by anyone who knows him.

I have said that Frank Freeman is a shining symbol of the best in Hollywood. To me, he is more than that. He symbolizes what is good in mankind. Words such as "honorable" and "dependable," "charitable" and "faithful," inevitably pop into mind when you think of Frank Freeman.

Are these not the human qualities that make the world we know, our world of freedom and democracy, better beyond compare than the world where these qualities are scorned and expunged?

There is a proverb that comes to mind as I think of Mr. Freeman. It goes: "Life is not a vessel to be drained, but a cup to be filled."

Certainly, this captures the guiding spirit of Frank Freeman's inspiring career.

BLIND-AID PROGRAMS

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that the gentleman from Nevada [Mr. BARING] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. BARING. Mr. Speaker, I am introducing today, for appropriate reference, a bill to prohibit residence requirements in State programs of aid to the blind supported by Federal participating funds.

My sponsorship of this measure is neither a courtesy gesture, nor a casual action on my part. Rather, it is a reflection of my firmly held conviction that residence laws in blind-aid programs retard rehabilitative opportunities of blind persons. They deny to blind persons, I believe, the chance to seek for a livelihood and a better life throughout the entire Nation.

Over the past several years, it has been my privilege to become acquainted with a considerable number of blind men and women. Therefore, in speaking about these people and their problems and needs, I am speaking from personal knowledge when I state with all the emphasis at my command, that there is no other group of our fellow citizens who are doing more to help themselves than are our fellow citizens who are without their sight.

Learning of their aspirations, becoming aware of their courageous efforts, I have worked with these people to the best of my ability to help them. I have not worked for them, I have worked with them, to help them as they have worked and tried to help themselves.

I have introduced and worked for the adoption by Congress, of bills to guarantee to blind persons their right to organize, to protect them in their right to join organizations of their own choosing.

I have introduced and worked for the adoption by Congress of measures to give statutory minimum wage protection, not alone to blind workers in sheltered workshops, but to all physically handicapped people employed in such places.

The bill I am introducing today is but another effort by me to help blind persons realize the goals and hopes they have so often expressed to me—the chance to live on the basis of equality with others, to work as others do, in jobs for which they are qualified by ability and training; to earn a decent living, not in a sheltered, protected environment, but as full and equal competitors in the open labor market of our economy—supporting themselves, paying their family bills from their labors.

These are the goals, I believe, for the vast majority of blind persons—and I am sure you will agree with me, Mr. Speaker, that these goals are worthy of every help that we can give that they may be fulfilled.

My bill would be such a help—it would serve to remove laws which act as barriers to block the way of blind men and women who would seek employment for their talents, but are unable to find such employment in their home State.

If such a person is a blind-aid recipient, however, it is very difficult, in fact, it is almost impossible for him to look for work in another State.

Unable, under the laws of many States, to qualify for assistance if he is unsuccessful in finding a job, he risks possible starvation by going to a new State, by venturing to improve his lot. So, many of them stay where they are, probably on the welfare rolls for the rest of their lives.

This is the problem: A blind-aid recipient, receiving a monthly subsistence grant of aid, hardly enough to keep body and soul together, is not able to save sufficient money to live on for several weeks, or even several months, in another State while he remains there looking for work.

In most of the States, he would not be able to apply for and receive public aid to live on during this time because of his inability to meet the residence requirements.

If he does risk it, if he does go to another State and somehow manage to live while seeking work, and then, unsuccessful and discouraged, goes back to his home State—he may then find, if he applies for blind-aid in his home State, that he no longer meets the residence requirements in his home State, that he has forfeited his claim upon the State by leaving it, and remaining away, even though briefly.

What are these blind people to do, Mr. Speaker, what would you do under these circumstances? The answer, of course—many of these people stay in their home States, remain on relief the rest of their lives, when they could be working, when they could be gainfuly employed, paying their own way, paying taxes.

I believe that State residence laws in blind-aid programs are obstacles to rehabilitation and because of this, they should be prohibited.

Time and time again Congress has expressed its determination that programs of public assistance should be more than subsistence programs, meeting the basic needs of people in want; they should also serve to promote the restoration of aid recipients to lives of economic independence and self-sufficiency.

This, I think, was made very clear in the 1956 amendments to the Social Security Act when self-care and self-support were made purposes of the federally supported State programs of aid.

Again, in the public welfare amendments adopted by Congress last year, vigorous endorsement to rehabilitation in public welfare was given, and specific statutory steps were taken to implement the earlier asserted self-care and self-support purposes.

In conclusion, Mr. Speaker, the proposal I am offering today to prohibit State residence laws in blind-aid programs would, I believe, encourage and assist many blind people, now aid recipients, to gain employment and independence.

These laws now act as restraints upon the ambitious and energetic.

As they make their valiant struggle to achieve full and equal citizenship in our Nation's life, these residence laws act as insurmountable roadblocks in their way.

I believe they should be removed.

My bill, enacted into law, would remove them.

PACEM IN TERRIS—THE COMPLETE TEXT OF THE ENCYCLICAL DELIVERED BY POPE JOHN XXIII

Mr. PUCINSKI. Mr. Speaker, I ask unanimous consent to address the House for 1 minute, to revise and extend my remarks, and to include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. PUCINSKI. Mr. Speaker, Life magazine in its April 26 edition stated, in an editorial entitled "The Future Is Ours—Pope John," as follows:

> The most amazing new force in world affairs is that simple, friendly, unpretentious man, the Pope of Rome, age 81. In 1958 John XXIII set in train a series of events which have since moved that huge old galleon, the Roman Catholic Church, back into the mainstream of world history and have profoundly altered the silhouette it presents to mankind. One culmination of these events is the Ecumenical Council. Another is the encyclical "Pacem in Terris" which the Pope issued just before Easter. He chose Maundy Thursday because it was the day on which Christ said to His disciples, "Love one another." The Pope seeks nothing less than the "unity in charity" of the whole human family, Christian and non-Christian, everybody in the world.
>
> "Pacem in Terris" was the first encyclical ever addressed to everybody in the world. And it had an impact on all the capitals of the world, including Moscow. It behooves Americans of all faiths and no faith to understand John's reverberating message. "Pacem in Terris" is a prodigious effort to relate the beliefs of an authoritarian church, whose faith is based on events of nearly 2,000 years ago, to the realities of modern industrial society and the intellectual currents of a scientific age.

President Kennedy, in his inspiring message at Boston College over the weekend, praised the encyclical. Likewise, Mr. Speaker, editorial writers throughout the world have been praising this courageous statement by His Holiness Pope John as setting the tone for a new approach toward the solution of the world's problems.

I join in praising this profound statement by Pope John as indeed being a document which men of all faiths and all political philosophies can use as a basis toward seeking a new solution to the problems which beset our mid-20th century world.

Because I know scholars all over the world would want to have the opportunity to read this inspiring message in its entirety and because I believe this encyclical should become a permanent record of our deliberations on this subject, I am today asking unanimous consent to include at the conclusion of my own remarks the entire encyclical of His Holiness John XXIII by Divine Providence Pope.

I should like to take this opportunity to express my deep appreciation to the apostolic delegation for providing me with the official English language text of his holiness' pronouncement.

Mr. Speaker, the encyclical follows:

ENCYCLICAL LETTER OF HIS HOLINESS JOHN XXIII, BY DIVINE PROVIDENCE, POPE TO THE VENERABLE BROTHERS, THE PATRIARCHS, PRIMATES, ARCHBISHOPS, BISHOPS, AND OTHER LOCAL ORDINARIES IN PEACE AND COMMUNION WITH THE APOSTOLIC SEE, TO THE CLERGY AND FAITHFUL OF THE WHOLE WORLD AND TO ALL MEN OF GOOD WILL, ON ESTABLISHING UNIVERSAL PEACE IN TRUTH, JUSTICE, CHARITY, AND LIBERTY

INTRODUCTION

Order in the Universe

Peace on earth, which men of every era have most eagerly yearned for, can be firmly established only if the order laid down by God be dutifully observed. The progress of learning and the inventions of technology clearly show that, both in living things and in the forces of nature, an astonishing order reigns, and they also bear witness to the greatness of man, who can understand that order and create suitable instruments to harness those forces of nature and use them to his benefit.

But the progress of science and the inventions of technology show above all the infinite greatness of God, who created the universe and man himself. He created all things out of nothing, pouring into them the abundance of His wisdom and goodness, so that the holy psalmist praises God in these words: "O Lord our Master, the majesty of Thy name fills all the earth.[1] Elsewhere he says: "What diversity, Lord, in Thy creatures! What wisdom has designed them all!"[2] God also created man in His own "image and likeness,"[3] endowed him with intelligence and freedom, and made him lord of creation, as the same psalmist declares in the words: "Thou has placed him only a little below the angels, crowning him with glory and honor and bidding him rule over the works of Thy hands. Thou hast put all under his dominion."[4]

Order in human beings

How strongly does the turmoil of individual men and peoples contrast with the perfect order of the universe. It is as if the relationships which bind them together could be controlled only by force. But the Creator of the world has imprinted in man's heart an order which his conscience reveals to him and enjoins him to obey: This shows that the obligations of the law are written in their hearts; their conscience utters its own testimony.[5] And how could it be otherwise? For whatever God has made shows forth His infinite wisdom, and it is manifested more clearly in the things which have greater perfection.[6]

But fickleness of opinion often produces this error, that many think that the relationships between men and states can be governed by the same laws as the forces and irrational elements of the universe, whereas the laws governing them are of quite a different kind and are to be sought elsewhere; namely, where the Father of all things wrote them; that is, in the nature of man. By these laws men are most admirably taught, first of all how they should conduct their mutual dealings among themselves, then how the relationships between the citizens and the public authorities of each state should be regulated, then how states should deal with one another, and finally how, on the one hand individual men and states, and on the other hand the community of all peoples, should act toward each other, the establishment of such a world community of peoples being urgently demanded today by the requirements of universal common good.

PART I—ORDER BETWEEN MEN

Every man is a person with rights and duties

First of all, it is necessary to speak of the order which should exist between men. Any human society, if it is to be well-ordered and productive, must lay down as a foundation this principle, namely, that every human being is a person, that is, his nature is endowed with intelligence and free will. By virtue of this, he has rights and duties of his own, flowing directly and simultaneously from his very nature, which are therefore universal, inviolable, and inalienable.[7]

If we look upon the dignity of the human person in the light of divinely revealed truth, we cannot help but esteem it far more highly; for men are redeemed by the blood of Jesus Christ, they are by grace the children and friends of God and heirs of eternal glory.

Rights

The Right to Life and a Worthy Standard of Living

Beginning our discussion of the rights of man, we see that every man has the right to life, to bodily integrity, and to the means which are necessary and suitable for the proper development of life; these are primarily food, clothing, shelter, rest, medical care, and finally the necessary social services. Therefore a human being also has the right to security in cases of sickness, inability to work, widowhood, old age, unemployment, or in any other case in which he is deprived of the means of subsistence through no fault of his own.[8]

Rights Pertaining To Moral and Cultural Values

By the natural law every human being has the right to respect for his person, to his good reputation; the right to freedom in searching for truth and in expressing and communicating his opinions, and in pursuit of art, within the limits laid down by the moral order and the common good; and he has the right to be informed truthfully about public events.

The natural law also gives man the right to share in the benefits of culture, and therefore the right to a basic education and to technical and professional training in keeping with the stage of educational development in the country to which he belongs. Every effort should be made to insure that persons be enabled, on the basis of merit, to go on to higher studies, so that, as far as possible, they may occupy posts and take on responsibilities in human society in accordance with their natural gifts and the skills they have acquired.[9]

The Right To Worship God According to One's Conscience

Every human being has the right to honor God according to the dictates of an upright conscience, and therefore the right to worship God privately and publicly. For, as Lactantius so clearly taught: "We were created for the purpose of showing to the God who bore us the submission we owe Him, of recognizing Him alone, and of serving Him. We are obliged and bound by this duty to God; from this religion itself receives its name."[10] And on this point our predecessor of immortal memory, Leo XIII, declared: "This genuine, this honorable freedom of the sons of God, which most nobly protects the dignity of the human person, is greater than any violence or injustice; it has always been sought by the church, and always most dear to her. This was the freedom which the apostles claimed with intrepid constancy, which the apologists defended with their writings, and which the martyrs in such numbers consecrated with their blood."[11]

The Right To Choose Freely One's State of Life

Human beings have the right to choose freely the state of life which they prefer, and therefore the right to set up a family, with equal rights and duties for man and woman, and also the right to follow a vocation to the priesthood or the religious life.[12]

The family, grounded on marriage freely contracted, monogamous and indissoluble, is and must be considered the first and essential cell of human society. To it must be given every consideration of an economic, social, cultural and moral nature which will strengthen its stability and facilitate the fulfillment of its specific mission.

Parents, however, have a prior right in the support and education of their children.[13]

Economic Rights

Human beings have the natural right to free initiative in the economic field, and the right to work.[14]

Indissolubly linked with those rights is the right to working conditions in which physical health is not endangered, morals are safeguarded, and young people's normal development is not impaired. Women have the right to working conditions in accordance with their requirements and their duties as wives and mothers.[15]

From the dignity of the human person, there also arises the right to carry on economic activities according to the degree of responsibility of which one is capable.[16] Furthermore—and this must be specially emphasized—there is the right to a working wage, determined according to criterions of justice, and sufficient, therefore, in proportion to the available resources, to give the worker and his family a standard of living in keeping with the dignity of the human person. In this regard, our predecessor Pius XII said: "To the personal duty to work imposed by nature, there corresponds and follows the natural right of each individual to make of his work the means to provide for his own life and the lives of his children; so profoundly is the empire of nature ordained for the preservation of man."[17] The right to private property, even of productive goods, also derives from the nature of man. This right, as we have elsewhere declared, is a suitable means for safeguarding the dignity of the human person and for the exercise of responsibility in all fields; it strengthens and gives serenity to family life, thereby increasing the peace and prosperity of the state.[18]

However, it is opportune to point out that there is a social duty essentially inherent in the right of private property.[19]

The Right of Meeting and Association

From the fact that human beings are by nature social, there arises the right of assembly and association. They have also the right to give the societies of which they are members the form they consider most suitable for the aim they have in view, and to act within such societies on their own initiative and on their responsibility in order to achieve their desired objectives.[20]

We ourselves stated in the encyclical "mater et Magistra" that, for the achievement of ends which individual human beings cannot attain except by association, it is necessary and indispensable to set up a great variety of such intermediate groups and societies in order to guarantee for the human person a sufficient sphere of freedom and responsibility.[21]

The Right To Emigrate and Immigrate

Every human being has the right to freedom of movement and of residence within the confines of his own country; and, when there are just reasons for it, the right to emigrate to other countries and take up residence there.[22] The fact that one is a citizen of a particular State does not detract in any way from his membership of the human family as a whole, nor from his citizenship of the world community.

Political Rights

The dignity of the human person involves the right to take an active part in public affairs and to contribute one's part to the common good of the citizens. For, as our predecessor of happy memory, Pius XII, pointed out: "The human individual, far from being an object and, as it were, a merely passive element in the social order, is in fact, must be and must continue to be, its subject, its foundation and its end."[23]

The human person is also entitled to a juridical protection of his rights, a protection that should be efficacious, impartial, and inspired by the true norms of justice.

As our predecessor Pius XII teaches: "That perpetual privilege proper to man, by which every individual has a claim to the protection of his rights, and by which there is assigned to each a definite and particular sphere of rights, immune from all arbitrary attacks, is the logical consequence of the order of justice willed by God."[24]

Duties

Rights and Duties Necessarily Linked in the One Person

The natural rights with which we have been dealing are, however, inseparably connected, in the very person who is their subject, with just as many respective duties; and rights as well as duties find their source, their sustenance and their inviolability in the natural law which grants or enjoins them.

For example, the right of every man to life is correlative with the duty to preserve it; his right to a decent standard of living with the duty of living it becomingly; and his right to investigate the truth freely, with the duty of seeking it and of possessing it ever more completely and profoundly.

Reciprocity of Rights and Duties Between Persons

Once this is admitted, it is also clear that in human society to one man's right there corresponds a duty in all other persons: the duty; namely, of acknowledging and respecting the right in question. For every fundamental human right draws its indestructible moral force from the natural law, which in granting it imposes a corresponding obligation. Those, therefore, who claim their own rights, yet altogether forget or neglect to carry out their respective duties, are people who build with one hand and destroy with the other.

Mutual Collaboration

Since men are social by nature they are meant to live with others and to work for one another's welfare. A well-ordered human society requires that men recognize and observe their mutual rights and duties. It also demands that each contribute generously to the establishment of a civic order in which rights and duties are progressively more sincerely and effectively acknowledged and fulfilled.

It is not enough, for example, to acknowledge and respect every man's right to the means of subsistence: one must also strive to obtain that he actually has enough in the way of food and nourishment.

The society of men must not only be organized but must also provide them with abundant resources. This certainly requires that they observe and recognize their mutual rights and duties; it also requires that they collaborate together in the many enterprises that modern civilization either allows or encourages or even demands.

An Attitude of Responsibility

The dignity of the human person also requires that every man enjoy the right to act freely and responsibly. For this reason, therefore, in social relations man should exercise his rights, fulfill his obligations and, in the countless forms of collaboration with others, act chiefly on his own responsibility and initiative. This is to be done in such a way that each one acts on his own decision, of set purpose and from a consciousness of his obligation, without being moved by force or pressure brought to bear on him externally. For any human society that is established on relations of force must be regarded as inhuman, inasmuch as the personality of its members is repressed or restricted, when in fact they should be provided with appropriate incentives and means for developing and perfecting themselves.

Social Life in Truth, Justice, Charity, and Freedom

A political society is to be considered well-ordered, beneficial and in keeping with human dignity if it is grounded on truth. As the Apostle Paul exhorts us: "Away with falsehood then; let everyone speak out the truth to his neighbour; membership of the body binds us to one another."[25] This demands that reciprocal rights and duties be sincerely recognized. Furthermore, human society will be such as we have just described it, if the citizens, guided by justice, apply themselves seriously to respecting the rights of others and discharging their own duties; if they are moved by such fervour of charity as to make their own the needs of others and share with others their own goods: if, finally, they work for a progressive closer fellowship in the world of spiritual values. Human society is realized in fredeom, that is to say, in ways and means in keeping with the dignity of its citizens, who accept the responsibility of their actions, precisely because they are by nature rational beings.

Human society, venerable brothers and beloved children, ought to be regarded above all as a spiritual reality: in which men communicate knowledge to each other in the light of truth; in which they can enjoy their rights and fulfill their duties, and are inspired to strive for moral good. Society should enable men to share in and enjoy every legitimate expression of beauty, and encourage them constantly to pass on to others all that is best in themselves, while they strive to make their own the spiritual achievements of others. These are the spiritual values which continually give life and basic orientation to cultural expressions, economic and social institutions, political movements and forms, laws, and all other structures by which society is outwardly established and constantly developed.

God and the Moral Order

The order which prevails in society is by nature moral. Grounded as it is in truth, it must function according to the norms of justice, it should be inspired and perfected by mutual love, and finally it should be brought to an evermore refined and human balance in freedom.

Now an order of this kind, whose principles are universal, absolute and unchangeable, has its ultimate source in the one true God, Who is personal and transcends human nature. Inasmuch as God is the first truth and the highest good, He alone is that deepest source from which human society can draw its vitality, if that society is to be well ordered, beneficial, and in keeping with human dignity.[26] As St. Thomas Aquinas says: "Human reason is the norm of the human will, according to which its goodness is measured, because reason derives from the eternal law which is the divine reason itself. It is evident then that the goodness of the human will depends much more on the eternal law than on human reason.[27]

Characteristics of the Present Day

Our age has three distinctive characteristics.

First of all, the working classes have gradually gained ground in economic and public affairs. They began by claiming their rights in the socioeconomic sphere; they extended their action then to claims on the political level; and finally applied themselves to the acquisition of the benefits of a more refined culture. Today, therefore, workers all over the world refuse to be treated as if they were irrational objects without freedom, to be used at the arbitrary disposition of others. They insist that they be always regarded as men with a share in every sector of human society: in the social and economic sphere, in the fields of learning and culture, and in public life.

Secondly, it is obvious to everyone that women are now taking a part in public life. This is happening more rapidly perhaps in nations of Christian civilization, and, more slowly but broadly, among peoples who have inherited other traditions or cultures. Since women are becoming ever more conscious of their human dignity, they will not tolerate being treated as mere material instruments, but demand rights befitting a human person both in domestic and in public life.

Finally, the modern world, as compared with the recent past, has taken on an entirely new appearance in the field of social and political life. For since all nations have either achieved or are on the way to achieving independence, there will soon no longer exist a world divided into nations that rule others and nations that are subject to others.

Men all over the world have today—or will soon have—the rank of citizens in independent nations. No one wants to feel subject to political powers located outside his own country or ethnical group. Thus, in very many human beings, the inferiority complex which endured for hundreds and thousands of years is disappearing, while in others there is an attenuation and gradual fading of the corresponding superiority complex which had its roots in social-economic privileges, sex, or political standing.

On the contrary, the conviction that all men are equal by reason of their natural dignity has been generally accepted. Hence racial discrimination can no longer be justified, at least doctrinally or in theory. And this is of fundamental importance and significance for the formation of human society according to those principles which we have outlined above. For, if a man becomes conscious of his rights, he must become equally aware of his duties. Thus he who possesses certain rights has likewise the duty to claim those rights as marks of his dignity, while all others have the obligation to acknowledge those rights and respect them.

When the relations of human society are expressed in terms of rights and duties, men become conscious of spiritual values, understand the meaning and significance of truth, justice, charity, and freedom, and become deeply aware that they belong to this world of values. Moreover, when moved by such concerns, they are brought to a better knowledge of the true God who is personal and transcendent, and thus they make the ties that bind them to God the solid foundations and supreme criterion of their lives, both of that life which they live interiorly in the depths of their own souls and of that in which they are united to other men in society.

PART II—RELATIONS BETWEEN INDIVIDUALS AND THE PUBLIC AUTHORITIES WITHIN A SINGLE STATE

Necessity and divine origin of authority

Human society can be neither well ordered nor prosperous unless it has some people invested with legitimate authority to preserve its institutions and to devote themselves as far as is necessary to work and care for the good of all. These however derive their authority from God, as St. Paul teaches in the words, "Authority comes from God alone."[28] These words of St. Paul are explained thus by St. John Chrysostom: "What are you saying? Is every ruler appointed by God? I do not say that, he replies, for I am not dealing now with individual rulers, but with authority itself. What I say is, that it is the divine wisdom and not mere chance, that has ordained that there should be government, that some should command and others obey."[29] Moreover, since God made men social by nature, and since no society can hold together unless some one be over all, directing all to strive earnestly for the common good, every civilized community must have a ruling authority, and this authority, no less than society itself, has its source in nature, and has, consequently, God for its author.[30]

But authority is not to be thought of as a force lacking all control. Indeed, since it is the power to command according to right reason, authority must derive its obligatory force from the moral order, which in turn has God for its first source and final end. Wherefore our predecessor of happy memory, Pius XII, said: "That same absolute order of beings and their ends which presents man as an autonomous person, that is, as the subject of inviolable duties and rights, and as at once the basis of society and the purpose for which it exists, also includes the state as a necessary society invested with the authority without which it could not come into being or live. * * * And since this absolute order, as we learn from sound reason, especially from the Christian faith, can have no origin save in a personal God who is our Creator, it follows that the dignity of the state's authority is due to its sharing to some extent in the authority of God Himself.[31]

Where the civil authority uses as its only or its chief means either threats and fear of punishment or promises of rewards, it cannot effectively move men to promote the common good of all. Even if it did so move them, this would be altogether opposed to their dignity as men, endowed with reason and free will. As authority is chiefly concerned with moral force, it follows that civil authority must appeal primarily to the conscience of individual citizens, that is, to each one's duty to collaborate readily for the common good of all. Since by nature all men are equal in human dignity, it follows that no one may be coerced to perform inferior acts. That is in the power of God alone, who sees and judges the hidden designs of men's hearts. Those therefore who have authority in the state may oblige men in conscience only if their authority is intrinsically related with the authority of God and shares in it.[32]

By this principle the dignity of the citizens is protected. When, in fact, men obey their rulers, it is not at all as men that they obey them, but through their obedience it is God, the provident Creator of all things, Whom they reverence, since He has decreed that men's dealings with one another should be regulated by an order which He Himself has established. Moreover, in showing this due reverence to God, men not only do not debase themselves but rather perfect and ennoble themselves. For "to serve God is to rule."[33]

Since the right to command is required by the moral order and has its source in God, it follows that, if civil authorities legislate for or allow anything that is contrary to that order and therefore contrary to the will of God, neither the laws made nor the authorizations granted can be binding on the consciences of the citizens, since God has more right to be obeyed than men.[34] Otherwise, authority breaks down completely and results in shameful abuse. As St. Thomas Aquinas teaches: "Human law has the true nature of law only insofar as it corresponds to right reason, and therefore is derived from the eternal law. Insofar as it falls short of right reason, a law is said to be a wicked law; and so on, lacking the true nature of law, it is rather a kind of violence."[35]

It must not be concluded, however, because authority comes from God, that therefore men have no right to choose those who are to rule the state, to decide the form of government, and to determine both the way in which authority is to be exercised and its limits. It is thus clear that the doctrine which we have set forth is fully consonant with any truly democratic regime.[36]

Attainment of the Common Good Is the Purpose of the Public Authority

Individual citizens and intermediate groups are obliged to make their specific contributions to the common welfare. One of the chief consequences of this is that they must bring their own interests into harmony with the needs of the community, and must dispose of their goods and their services as civil authorities have prescribed, in accord with the norms of justice, in due form, and within the limits of their competence. This they must do by means of formally perfect actions, the content of which must be morally good, or at least capable of being directed toward good.

Indeed since the whole reason for the existence of civil authorities is the realization of the common good, it is clearly necessary that, in pursuing this objective, they should respect its essential elements, and at the same time conform their laws to the needs of a given historical situation.[37]

Essentials of the Common Good

Assuredly, the ethnic characteristics of the various human groups are to be respected as constituent elements of the common good,[38] but these values and characteristics by no means exhaust the content of the common good. For the common good is intimately bound up with human nature. It can never exist fully and completely unless, its intimate good is intimately bound up with human nature and realization being what they are, the human person is taken into account.[39]

In the second place, the very nature of the common good requires that all members of the political community be entitled to share in it, although in different ways according to each one's tasks, merits and circumstances. For this reason, every civil authority must take pains to promote the common good of all, without preference for any single citizen or civic group. As our predecessor of immortal memory, Leo XIII, has said: "The civil power must not serve the advantage of any one individual, or of some few persons, inasmuch as it was established for the common good of all."[40] Considerations of justice and equity, however, can at times demand that those involved in civil government give more attention to the less fortunate members of the community, since they are less able to defend their rights and to assert their legitimate claims.[41]

In this context, we judge that attention should be called to the fact that the common good touches the whole man, the needs both of his body and of his soul. Hence it follows that the civil authorities must undertake to effect the common good by ways and means that are proper to them; that is, while respecting the hierarchy of values, they should promote simultaneously both the material and the spiritual welfare of the citizens.[42]

These principles are clearly contained in the doctrine stated in Our Encyclical, "Mater et Magistra," where we emphasized that the common good of all embraces the sum total of those condtions of social living whereby men are enabled to achieve their own integral perfection more fully and more easily.[43]

Men, however, composed as they are of bodies and immortal souls, can never in this mortal life succeed in satisfying all their needs or in attaining perfect happiness. Therefore all efforts made to promote the common good, far from endangering the eternal salvation of men, ought rather to serve to promote it.[44]

Responsibilities of the Public Authority, and Rights and Duties of Individuals

It is agreed that in our time the common good is chiefly guaranteed when personal rights and duties are maintained. The chief concern of civil authorities must therefore be to insure that these rights are acknowledged, respected, coordinated with other rights, defended and promoted, so that in this way each one may more easily carry out his duties. For "to safeguard the inviolable rights of the human person, and to facilitate the fulfillment of his duties, should be the essential office of every public authority." [45]

This means that, if any government does not acknowledge the rights of man or violates them, it not only fails in its duty, but its orders completely lack juridical force.[46]

Reconciliation and Protection of Rights and Duties of Individuals

One of the fundamental duties of civil authorities, therefore, is to coordinate social relations in such fashion that the exercise of one man's rights does not threaten others in the exercise of their own rights nor hinder them in the fulfillment of their duties. Finally, the rights of all should be effectively safeguarded and, if they have been violated, completely restored.[47]

Duty of Promoting the Rights of Individuals

It is also demanded by the common good that civil authorities should make earnest efforts to bring about a situation in which individual citizens can easily exercise their rights and fulfill their duties as well. For experience has taught us that, unless these authorities take suitable action with regard to economic, political, and cultural matters, inequalities between the citizens tend to become more and more widespread, especially in the modern world, and as a result human rights are rendered totally ineffective, and the fulfillment of duties is compromised.

It is therefore necessary that the administration give wholehearted and careful attention to the social as well as to the economic progress of the citizens, and to the development, in keeping with the development of the productive system, of such essential services as the building of roads, transportation, communications, water supply, housing, public health, education, facilitation of the practice of religion, and recreational facilities. It is necessary also that governments make efforts to see that insurance systems are made available to the citizens, so that, in case of misfortune or increased family responsibilities, no person will be without the necessary means to maintain a decent standard of living. The government should make similarly effective efforts to see that those who are able to work can find employment in keeping with their aptitudes, and that each worker receives a wage in keeping with the laws of justice and equity. It should be equally the concern of civil authorities to ensure that workers be allowed their proper responsibility in the work undertaken in industrial organization, and to facilitate the establishment of intermediate groups which will make social life richer and more effective. Finally, it should be possible for all the citizens to share as far as they are able in their country's cultural advantages.

Harmonious Relation Between Public Authority's Two Forms of Intervention

The common good requires that civil authorities maintain a careful balance between coordinating and protecting the rights of the citizens, on the one hand, and promoting them, on the other. It should not happen that certain individuals or social groups derive special advantage from the fact that their rights have received preferential protection. Nor should it happen that governments in seeking to protect these rights, become obstacles to their full expression and free use. For this principle must always be retained: that state activity in the economic field, no matter what its breadth or depth may be, ought not to be exercised in such a way as to curtail an individual's freedom of personal initiative. Rather it should work to expand that freedom as much as possible by the effective protection of the essential personal rights of each and every individual.[48]

The same principle should inspire the various steps which governments take in order to make it possible for the citizens more easily to exercise their rights and fulfill their duties in every sector of social life.

Structure and Operation of the Public Authority

It is impossible to determine, once and for all, what is the most suitable form of government, or how civil authorities can most effectively fulfill their respective functions, i.e., the legislative, judicial, and executive functions of the state. In determining the structure and operation of government which a state is to have, great weight has to be given to the historical background and circumstances of given political communities, circumstances which will vary at different times and in different places. We consider, however, that it is in keeping with the innate demands of human nature that the state should take a form which embodies the threefold division of powers corresponding to the three principal functions of public authority. In that type of state, not only the official functions of government but also the mutual relations between citizens and the public officials are set down according to law, which in itself affords protection to the citizens both in the enjoyment of their rights and in the fulfilment of their duties.

If, however, this political and juridical structure is to produce the advantages which may be expected of it, public officials must strive to meet the problems which arise in a way that conforms both to the complexities of the situation and the proper exercise of their function. This requires that, in constantly changing conditions, legislators never forget the norms of morality, or constitutional provisions, or the objective requirements of the common good. Moreover, executive authorities must coordinate the activities of society with discretion, with a full knowledge of the law and after a careful consideration of circumstances, and the courts must administer justice impartially and without being influenced by favouritism or pressure. The good order of society also demands that individual citizens and intermediate organizations should be effectively protected by law whenever they have rights to be exercised or obligations to be fulfilled. This protection should be granted to citizens both in their dealings with each other and in their relations with government agencies.[49]

Law and Conscience

It is unquestionable that a legal structure in conformity with the moral order and corresponding to the level of development of the political community is of great advantage to achievement of the common good.

And yet, social life in the modern world is so varied, complex and dynamic that even a juridical structure which has been prudently and thoughtfully established is always inadequate for the needs of society.

It is also true that the relations of the citizens with each other, of citizens and intermediate groups with public authorities, and finally of the public authorities with one another, are often so complex and so sensitive that they cannot be regulated by inflexible legal provisions. Such a situation therefore demands that the civil authorities have clear ideas about the nature and extent of their official duties if they wish to maintain the existing juridical structure in its basic elements and principles, and at the same time meet the exigencies of social life, adapting their legislation to the changing social scene and solving new problems. They must be men of great equilibrium and integrity, competent and courageous enough to see at once what the situation requires and to take necessary action quickly and effectively.[50]

Citizens' Participation in Public Life

It is in keeping with their dignity as persons that human beings should take an active part in government, although the manner in which they share in it will depend on the level of development of the political community to which they belong.

Men will find new and extensive advantages in the fact that they are allowed to participate in government. In this situation, those who administer the government come into frequent contact with the citizens, and it is thus easier for them to learn what is really needed for the common good. The fact too that ministers of government hold office only for a limited time keeps them from growing stale and allows for their replacement in accordance with the demands of social progress.[51]

Characteristics of the Present Day

In modern times, where there is question of organizing political communities juridically, there is observable first of all the tendency to write in concise and limpid phraseology a charter of fundamental human rights, which is, as often as not, inserted in the state constitutions, or is an integral part of them.

Second, there is also an inclination to determine, by the compilation of a document called the constitution, the procedures through which the governing powers are to be created, along with their mutual relations, the spheres of their competence, the forms and systems they are obliged to follow in the performance of their office.

The relations between the government and the governed are then set forth in terms of rights and duties; and it is clearly laid down that the paramount task assigned to government officials is that of recognizing, respecting, reconciling, protecting and promoting the rights and duties of citizens.

It is of course impossible to accept the theory which professes to find the original and single source of civic rights and duties, of the binding force of the constitution, and of a government's right to command, in the mere will of human beings, individually or collectively.[52]

The tendencies to which we have referred, however do clearly show that the men of our time have become increasingly conscious of their dignity as human persons. This awareness prompts them to claim a share in the public administration of their country, while it also accounts for the demand that their own inalienable and inviolable rights be protected by law. It also requires, that government officials be chosen in conformity with constitutional procedures, and perform their specific functions within the limits of law.

PART III—RELATIONS BETWEEN STATES

Subjects of rights and duties

Our predecessors have constantly maintained, and we join them in reasserting, that political communities are reciprocally subjects of rights and duties. This means that their relationships also must be harmonized in truth, in justice, in a working solidarity, in liberty. The same moral law, which governs relations between individual human beings, serves also to regulate the relations of political communities with one another.

This will be readily understood when one reflects that the individual representatives of political communities cannot put aside their personal dignity while they are acting in the name and interest of their countries; and that they cannot therefore violate the very law of their being, which is the moral law.

It would be absurd, moreover, even to imagine that men could surrender their own human attributes, or be compelled to do so, by the very fact of their appointment to public office, whereas they have been given that noble assignment precisely because the wealth of their human endowments has earned them their reputation as outstanding members of the body politic. Furthermore, authority is a necessary requirement of the moral order in human society. It may not therefore be used against that order; and the very instant such an attempt were made, it would cease to be authority, as the Lord has warned us: "A word, then, for the king's ears to hear, king's hearts to heed: a message for you, rulers, wherever you be! Listen well, all you that have multitudes at your command, foreign hordes to do your bidding. Power is none but comes to you from the Lord, nor any royalty but from One who is above all. He it is that will call you to account for your doings with a scrutiny that reads your inmost thoughts."[53]

Lastly it is to be borne in mind that also in the regulating of relations between political communities, authority is to be exercised for the achievement of the common good, which constitutes the reason for its existence.

But a fundamental factor of the common good is acknowledgment of the moral order and respect for its prescriptions. "Order between the political communities must be built upon the unshakable and unchangeable rock of the moral law, made manifest in the order of nature by the Creator Himself and by Him engraved on the hearts of men with letters that may never be effaced. * * * Like the rays of a gleaming beacon, its principles must guide the plans and policies of men and nations. These are the signals—of warning, safety, and smooth sailing—they will have to heed, if they would not see all their laborious efforts to establish a new order condemned to tempest and shipwreck."[54]

In truth

First among the rules governing the relations between states is that of truth. This calls, above all, for the elimination of every trace of racism, and the consequent recognition of the principle that all states are by nature equal in dignity. Each of them accordingly is vested with the right to existence, to self-development, to the means fitting to its attainment, and to be the one primarily responsible for this self-development. Add to that the right of each to its good name, and to the respect which is its due. Very often, experience has taught us, individuals will be found to differ considerably, in knowledge, virtue, talent, and wealth. Yet these inequalities must never be held to excuse any man's attempt to lord it over his neighbors unjustly. They constitute rather a source of greater responsibility in the contribution which each and everyone must make toward mutual improvement.

Similarly, political communities may have reached different levels of culture, civilization, or economic development. Neither is that a sufficient reason for some to take unjust advantage of their superiority over others; rather should they see in it an added motive for more serious commitment to the common cause of social progress.

It is not true that some human beings are by nature superior, and others inferior. All men are equal in their natural dignity. Consequently there are no political communities which are superior by nature and none which are inferior by nature. All political communities are of equal natural dignity, since they are bodies whose membership is made up of these same human beings. Nor must it be forgotten, in this connection, that peoples can be highly sensitive, and with good reason, in matters touching their dignity and honor.

Truth further demands that the various media of social communications made available by modern progress, which enable the nations to know each other better, be used with serene objectivity. That need not, of course, rule out any legitimate emphasis on the positive aspects of their way of life. But methods of information which fall short of the truth, and by the same token impair the reputation of this people or that, must be discarded.[55]

Relations between political communities are to be further regulated by justice. This implies, over and above recognition of their mutual rights, the fulfillment of their respective duties.

In justice

Political communities have the right to existence, to self-development and to the means necessary for this. They have the right to play the leading part in the process of their own development and the right to their good name and due honors. From which it follows as a simultaneous consequence that they have also the corresponding duty of respecting these rights in others and of avoiding any act of violation. Just as an individual man may not pursue his own interests to the detriment of other men, so, on the international level, one state may not develop itself by restricting or oppressing other states. St. Augustine rightly says, What are kingdoms without justice but bands of robbers?[56]

Not only can it happen, but it actually does happen that the advantages and conveniences which nations strive to acquire for themselves become objects of contention; nevertheless, the resulting disagreements must be settled, not by force, nor by deceit or trickery, but rather in the only manner which is worthy of the dignity of man, i.e., by a mutual assessment of the reasons on both sides of the dispute, by a mature and objective investigation of the situation, and by an equitable reconciliation of differences of opinion.

The treatment of minorities

From the 19th century there has been a rather widespread tendency in historical evolution that political communities equate themselves to national communities. However, for various reasons, it has not always been possible to make geographical boundaries coincide with ethnic ones; this gives rise to the phenomenon of minorities and to the relative complex problems.

In the first place, it must be made clear that justice is seriously violated by whatever is done to limit the strength and numerical increase of these lesser peoples; the injustice is even more serious if such sinful projects are aimed at the very extinction of these groups.

On the other hand, the demands of justice are admirably observed by those civil authorities who promote the natural betterment of those citizens belonging to a smaller ethnic group, particularly when that betterment concerns their language, the development of their natural gifts, their ancestral customs, and their accomplishments and endeavors in the economic order.[57]

It should be noted, however, that these minority groups, either because of a reaction to their present situation or because of their historical difficulties are often inclined to exalt beyond due measure anything proper to their own people, so as to place them even above human values, as if that which is proper to humanity were to be at the service of that which is proper to the nation. Reason rather demands that these very people recognize also the advantages that accrue to them from their peculiar circumstances; for instance, no small contribution is made toward the development of their particular talents and spirit by their daily dealings with people who have grown up in a different culture. This, however, will be true only if they will know how to act as a bridge, which facilitates the circulation of life in its various expressions among different traditions or civilizations, and not a zone of discord which can cause great damage and choke natural development.

Active solidarity

Certainly relations between states must be regulated by the norms of truth and justice, but they also derive great benefits from active solidarity, through mutual cooperation on various levels, such as, in our own times, has already taken place with laudable results in the economic, social, political, educational, health and sport spheres. We must remember that, of its very nature, civil authority exists, not to confine its people within the boundaries of their nation, but rather to protect, above all else, the common good of that particular civil society, which certainly cannot be divorced from the common good of the entire human family.

This entails not only that civil societies should pursue their particular interests without hurting others, but also that they should join forces and plans whenever the efforts of an individual government cannot achieve its desired goals; but in the execution of such common efforts, great care must be taken lest what helps some nations should injure others.

Furthermore, the universal common good requires that in every nation friendly relations be fostered in all fields between the citizens and their intermediate societies.

There are groupings of people of more or less different racial backgrounds. However, the elements which characterize an ethnic group must not be transformed into a watertight compartment in which human beings are prevented from communicating with their fellowmen belonging to different ethnic groups. That would contrast with our contemporary situation, in which the distances separating peoples have been almost wiped out. Nor can one overlook the fact that, even though human beings differ from one another by virtue of their ethnic peculiarities, they all possess certain essential common elements, and are inclined by nature to meet each other in the world of spiritual values, whose progressive assimilation opens to them the possibility of perfection without limits. They have the right and duty therefore to live in communion with one another.

The proper balance between population, land, and capital

As everybody knows, there are countries with an abundance of arable land and a scarcity of manpower, while in other countries there is no proportion between natural resources and the capital available. This demands that peoples should set up relationships of mutual collaboration, facilitating the circulation from one to the other of capital, goods, and manpower.[58]

Here we deem it opportune to remark that, whenever possible, the work to be done should be taken to the workers, not vice versa.

In this way a possibility of a better future is offered to many persons without being forced to leave their own environment in order to seek residence elsewhere, which almost always entails the heartache of separation and difficult periods of adjustment and social integration.

The problem of political refugees

The sentiment of universal fatherhood which the Lord has placed in our heart makes us feel profound sadness in considering the phenomenon of political refugees: a phenomenon which has assumed large proportions and which always hides numberless and acute sufferings.

Such expatriations show that there are some political regimes which do not guarantee for individual citizens a sufficient sphere of freedom within which their souls are allowed to breathe humanly; in fact, under those regimes even the lawful existence of such a sphere of freedom is either called into question or denied. This undoubtedly is a radical inversion of the order of human society, because the reason for the existence of public authority is to promote the common good, a fundamental element of which is the recognition of that sphere of freedom and the safeguarding of it.

At this point it will not be superfluous to recall that such exiles are persons, and that all their rights as persons must be recognized, since they do not lose those rights on losing the citizenship of the states of which they are former members.

Now among the rights of a human person there must be included that by which a man may enter a political community where he hopes he can more fittingly provide a future for himself and his dependents. Wherefore, as far as the common good rightly understood permits, it is the duty of that state to accept such immigrants and to help to integrate them into itself as new members.

Wherefore, on this occasion, we publicly approve and commend every undertaking, founded on the principles of human solidarity and Christian charity, which aims at making migration of persons from one country to another less painful.

And we will be permitted to signal for the attention and gratitude of all right-minded persons the manifold work which specialized international agencies are carrying out in this very delicate field.

Disarmament

On the other hand, it is with deep sorrow that we note the enormous stocks of armaments that have been and still are being made in more economically developed countries, with a vast outlay of intellectual and economic resources. And so it happens that, while the people of these countries are loaded with heavy burdens, other countries as a result are deprived of the collaboration they need in order to make economic and social progress.

The production of arms is allegedly justified on the grounds that in present-day conditions peace cannot be preserved without an equal balance of armaments. And so, if one country increases its armaments, others feel the need to do the same; and if one country is equipped with nuclear weapons, other countries must produce their own equally destructive.

Consequently, people live in constant fear lest the storm that every moment threatens should break upon them with dreadful violence. And with good reason, for the arms of war are ready at hand. Even though it is difficult to believe that anyone would deliberately take the responsibility for the appalling destruction and sorrow that war would bring in its train, it cannot be denied that the conflagration may be set off by some incontrollable and unexpected chance. And one must bear in mind that, even though the monstrous power of modern weapons acts as a deterrent, it is to be feared that the mere continuance of nuclear tests, undertaken with war in mind, will have fatal consequences for life on the earth.

Justice, then, right, reason and humanity urgently demand that the arms race should cease; that the stockpiles which exist in various countries should be reduced equally and simultaneously by the parties concerned; that nuclear weapons should be banned; and that a general agreement should eventually be reached about progressive disarmament and an effective method of control. In the words of Pius XII, our predecessor of happy memory: "The calamity of a world war, with the economic and social ruin and the moral excesses and dissolution that accompany it, must not be permitted to envelop the human race for a third time."[59]

All must realize that there is no hope of putting an end to the building up of armaments, nor of reducing the present stocks, nor, still less, of abolishing them altogether, unless the process is complete and thorough and unless it proceeds from inner conviction: unless; that is, everyone sincerely cooperates to banish the fear and anxious expectation of war with which men are oppressed. If this is to come about, the fundamental principle on which our present peace depends must be replaced by another, which declares that the true and solid peace of nations consists not in equality of arms but in mutual trust alone. We believe that this can be brought to pass, and we consider that it is something which reason requires, that it is eminently desirable in itself and that it will prove to be the source of many benefits.

In the first place, it is an objective demanded by reason. There can be, or at least there should be, no doubt that relations between states, as between individuals, should be regulated not by the force of arms but by the light of reason, by the rule; that is, of truth, of justice and of active and sincere cooperation.

Secondly, we say that it is an objective earnestly to be desired in itself. Is there anyone who does not ardently yearn to see war banished, to see peace preserved and daily more firmly established?

And finally, it is an objective which will be a fruitful source of many benefits, for its advantages will be felt everywhere, by individuals, by families, by nations, by the whole human family. The warning of Pius XII still rings in our ears: "Nothing is lost by peace; everything may be lost by war."[60]

Since this is so, we, the vicar on earth of Jesus Christ, Saviour of the world and Author of Peace, and as interpreter of the very profound longing of the entire human family, following the impulse of our heart, seized by anxiety for the good of all, we feel it our duty to beseech men, especially those who have the responsibility of public affairs, to spare no labor in order to insure that world events follow a reasonable and human course.

In the highest and most authoritative assemblies, let men give serious thought to the problem of a peaceful adjustment of relations between political communities on a world level: an adjustment founded on mutual trust, on sincerity in negotiations, on faithful fulfillment of obligations assumed. Let them study the problem until they find that point of agreement from which it will be possible to commence to go forward toward accords that will be sincere, lasting, and fruitful.

We, for our part, will not cease to pray God to bless these labors so that they may lead to fruitful results.

In liberty

It has also to be borne in mind that relations between states should be based on freedom; that is to say, that no country may unjustly oppress others or unduly meddle in their affairs. On the contrary, all should help to develop in others a sense of responsibility, a spirit of enterprise, and an earnest desire to be the first to promote their own advancement in every field.

The evolution of economically underdeveloped countries

Because all men are joined together by reason of their common origin, their redemption by Christ, and their supernatural destiny, and are called to form one single family, we appealed in the Encyclical Mater et Magistra to economically developed nations to come to the aid of those which were in the process of development.[61]

We are greatly consoled to see how widely that appeal has been favorably received; and we are confident that even more so in the future it will contribute to the end that the poorer countries, in as short a time as possible, will arrive at that degree of economic development which will enable every citizen to live in conditions in keeping with his human dignity.

But it is never sufficiently repeated that the cooperation, to which reference has been made, should be effected with the greatest respect for the liberty of the countries being developed, for these must realize that they are primarily responsible, and that they are the principal artisans in the promotion of their own economic development and social progress.

Our predecessor Pius XII already proclaimed that "in the field of a new order founded on moral principles, there is no room for violation of freedom, integrity and security of other nations, no matter what may be their territorial extension or their capacity for defense. It is inevitable that the powerful states, by reason of their greater potential and their power, should pave the way in the establishment of economic groups comprising not only themselves but also smaller and weaker states as well. It is nevertheless indispensable that in the interests of the common good they, as all others, should respect the rights of those smaller states to political freedom, to economic development and to the adequate protection, in the case of conflicts between nations, of that neutrality which is theirs according to the natural, as well as international, law. In this way, and in this way only, will they be able to obtain a fitting share of the common good, and assure the material and spiritual welfare of their people.[62]

It is vitally important, therefore, that the wealthier states, in providing varied forms of assistance to the poorer, should respect the moral values and ethnic characteristics peculiar to each, and also that they should avoid any intention of political domination. If this is done, "a precious contribution will be made towards the formation of a world community, a community in which each member, whilst conscious of its own individual right and duties, will work in a relationship of equality towards the attainment of the universal common good."[63]

Signs of the times

Men are becoming more and more convinced that disputes which arise between states should not be resolved by recourse to arms, but rather by negotiation.

It is true that on historical grounds this conviction is based chiefly on the terrible destructive force of modern arms; and it is nourished by the horror aroused in the mind by the very thought of the cruel destruction and the immense suffering which the use of those armaments would bring to the human family; and for this reason it is hardly possible to imagine that in the atomic era war could be used as an instrument of justice.

Nevertheless, unfortunately, the law of fear still reigns among peoples, and it forces them to spend fabulous sums for armaments: not for aggression, they affirm—and there is no reason for not believing them—but to dissuade others from aggression.

There is reason to hope, however, that by meeting and negotiating, men may come to discover better the bonds that unite them together, deriving from the human nature which they have in common; and that they may also come to discover that one of the most profound requirements of their common nature is this: that between them and their respective peoples it is not fear which should reign but love, a love which tends to express itself in a collaboration that is loyal, manifold in form and productive of many benefits.

PART IV—RELATIONSHIP OF MEN AND OF POLITICAL COMMUNITIES WITH THE WORLD COMMUNITY

Interdependence between political communities

Recent progress of science and technology has profoundly affected human beings and influenced men to work together and live as one family. There has been a great increase in the circulation of ideas, of persons and of goods from one country to another, so that relations have become closer between individuals, families, and intermediate associations belonging to different political communities, and between the public authorities of those communities. At the same time the interdependence of national economies has grown deeper, one becoming progressively more closely related to the other, so that they become, as it were, integral parts of the one world economy. Likewise the social progress, order, security, and peace of each country are necessarily connected with the social progress, order, security, and peace of all other countries.

At the present day no political community is able to pursue its own interests and develop itself in isolation, because the degree of its prosperity and development is a reflection and a component part of the degree of prosperity and development of all the other political communities.

Insufficiency of modern states to insure the universal common good

The unity of the human family has always existed, because its members were human beings all equal by virtue of their natural dignity. Hence there will always exist the objective need to promote, in sufficient measure, the universal common good, that is, the common good of the entire human family.

In times past, one would be justified in feeling that the public authorities of the different political communities might be in a position to provide for the universal common good, either through normal diplomatic channels or through top-level meetings, by making use of juridical instruments such as conventions and treaties, for example: juridical instruments suggested by the natural law and regulated by the law of nations and international law.

As a result of the far-reaching changes which have taken place in the relations between the human family, the universal common good gives rise to problems which are complex, very grave, and extremely urgent, especially as regards security and world peace. On the other hand, the public authorities of the individual political communities—placed as they are on a footing of equality one with the other—no matter how much they multiply their meetings or sharpen their wits in efforts to draw up new juridical instruments, they are no longer capable of facing the task of finding an adequate solution to the problems mentioned above. And this is not due to a lack of goodwill or of a spirit of enterprise, but because of a structural defect which hinders them.

It can be said, therefore, that at this historical moment the present system of organization and the way its principle of authority operates on a world basis no longer correspond to the objective requirements of the universal common good.

Connection between the common good and political authority

There exists an intrinsic connection between the common good on the one hand and the structure and function of public authority on the other. The moral order, which needs public authority in order to promote the common good in human society, requires also that the authority be effective in attaining that end. This demands that the organs through which the authority is formed, becomes operative and pursues its ends, must be composed and act in such a manner as to be capable of bringing to realization the new meaning which the common good is taking on in the historical evolution of the human family.

Today the universal common good poses problems of worldwide dimensions, which cannot be adequately tackled or solved except by the efforts of public authorities endowed with a wideness of powers, structure and means of the same proportions: that is, of public authorities which are in a position to operate in an effective manner on a worldwide basis. The moral order itself, therefore, demands that such a form of public authority be established.

Public authority instituted by common consent and not imposed by force

A public authority, having worldwide power and endowed with the proper means for the efficacious pursuit of its objective, which is the universal common good in concrete form, must be set up by common accord and not imposed by force. The reason is that such an authority must be in a position to operate effectively; yet, at the same time, its action must be inspired by sincere and real impartiality; in other words, it must be an action aimed at satisfying the objective requirements of the universal common good. The difficulty is that there would be reason to fear that a supernational or worldwide public authority, imposed by force by the more powerful political communities, might be or might become an instrument of one-sided interests; and even should this not happen, it would be difficult for it to avoid all suspicion of partiality in its actions, and this would take from the efficaciousness of its activity.

Even though there may be pronounced differences between political communities as regards the degree of their economic development and their military power, they are all very sensitive as regards their juridical equality and their moral dignity. For that reason, they are right in not easily yielding in obedience to an authority imposed by force, or to an authority in whose creation they had no part, or to which they themselves did not decide to submit by conscious and free choice.

The universal common good and personal rights

Like the common good of individual political communities, so too the universal common good cannot be determined except by having regard to the human person. Therefore, the public authority of the world community, too, must have as its fundamental objective the recognition, respect, safeguarding and promotion of the rights of the human person; this can be done by direct action when required, or by creating on a world scale an environment in which the public authorities of the individual political communities can more easily carry out their specific functions.

The principle of subsidiarity

Just as within each political community the relations between individuals, families, intermediate associations and public authority are governed by the principle of subsidiarity, so too the relations between the public authority of each political community and the public authority of the world community must be regulated by the light of the same principle. This means that the public authority of the world community must tackle and solve problems of an economic, social, political or cultural character which are posed by the universal common good. For, because of the vastness, complexity, and urgency of these problems, the public authorities of the individual states are not in a position to tackle them with any hope of a positive solution.

The public authority of the world community is not intended to limit the sphere of action of the public authority of the individual political community, much less to take its place. On the contrary, its purpose is to create, on a world basis, an environment in which the public authorities of each political community, its citizens and intermediate associations, can carry out their tasks, fulfill their duties and exercise their rights with greater security.[64]

Modern developments

As is known, the United Nations Organization (UNO) was established on June 26, 1945, and to it there were subsequently added intergovernmental agencies with extensive international tasks in the economic, social, cultural, educational, and health fields. The United Nations Organization had as its essential purpose the maintenance and consolidation of peace between peoples, fostering between them friendly relations, based on the principles of equality, mutual respect, and varied forms of cooperation in every sector of human society.

An act of the highest importance performed by the United Nations Organization was the Universal Declaration of Human

---

[63] Ioannis XXIII Litt. Encycl. Mater et Magistra, A.A.S. LIII, 1961, p. 443.

[64] Cf. Pii XII Allocutio ad iuvenes ab Actione Catholica ex Italiae dioecesibus Romae coadunatos, habita die 12 mensis Septembris anno 1948 A.A.S. XL, p. 412.

Rights, approved in the General Assembly of December 10, 1948. In the preamble of that declaration, the recognition and respect of those rights and respective liberties is proclaimed as an ideal to be pursued by all peoples and all countries.

Some objections and reservations were raised regarding certain points in the declaration. There is no doubt, however, that the document represents an important step on the path toward the juridical-political organization of the world community. For in it, in most solemn form, the dignity of a person is acknowledged to all human beings; and as a consequence there is proclaimed, as a fundamental right, the right of free movement in the search for truth and in the attainment of moral good and of justice, and also the right to a dignified life, while other rights connected with those mentioned are likewise proclaimed.

It is our earnest wish that the United Nations Organization—in its structure and in its means—may become ever more equal to the magnitude and nobility of its tasks, and that the day may come when every human being will find therein an effective safeguard for the rights which derive directly from his dignity as a person, and which are therefore universal, inviolable and inalienable rights. This is all the more to be hoped for since all human beings, as they take an ever more active part in the public life of their own political communities, are showing an increasing interest in the affairs of all peoples, and are becoming more consciously aware that they are living members of a world community.

PART V—PASTORAL EXHORTATIONS

Duty of taking part in public life

Once again we deem it opportune to remind our children of their duty to take an active part in public life, and to contribute toward the attainment of the common good the entire human family as well as to that of their own political community. They should endeavor, therefore, in the light of the faith and with the strength of love, to insure that the various institutions—whether economic, social, cultural, or political in purpose—should be such as not to create obstacles, but rather to facilitate or render less arduous man's perfectioning of himself both in the natural order as well as in the supernatural.

Scientific competence, technical capacity, and professional experience

Nevertheless, in order to imbue civilization with sound principles and enliven it with the spirit of the gospel, it is not enough to be illumined with the gift of faith and enkindled with the desire of forwarding a good cause. For this end it is necessary to take an active part in the various organizations and influence them from within. And since our present age is of outstanding scientific and technical progress and excellence, one will not be able to enter these organizations and work effectively from within unless he is scientifically competent, technically capable, and skilled in the practice of his own profession.

Apostolate of a trained laity

We desire to call attention to the fact that scientific competence, technical capacity, and professional experience, although necessary, are not of themselves sufficient to elevate the relationships of society to an order that is genuinely human: that is, to an order whose foundation is truth, whose measure and objective is justice, whose driving force is love, and whose method of attainment is freedom.

For this end it is certainly necessary that human beings carry on their own temporal activities in accordance with the laws governing them and following the methods corresponding to their nature. But at the same time it is also necessary that they should carry on those activities as acts within the moral order: therefore, as the exercise or vindication of a right, as the fulfilment of a duty or the performance of a service, as a positive answer to the providential design of God directed to our salvation. In other words, it is necessary that human beings, in the intimacy of their own consciences, should so live and act in their temporal lives as to create a synthesis between scientific, technical, and professional elements on the one hand, and spiritual values on the other.

Integration of faith and action

It is no less clear that today, in traditionally Christian nations, secular institutions, although demonstrating a high degree of scientific and technical perfection, and efficiency in achieving their respective ends, not infrequently are but slightly affected by Christian motivation or inspiration.

It is beyond question that in the creation of those institutions many contributed and continue to contribute who were believed to be and who consider themselves Christians; and without doubt, in part at least, they were and are. How does one explain this? It is our opinion that the explanation is to be found in an inconsistency in their minds between religious belief and their action in the temporal sphere. It is necessary, therefore, that their interior unity be reestablished, and that in their temporal activity faith should be present as a beacon to give light, and charity as a force to give life.

Integral education

It is our opinion, too, that the above-mentioned inconsistency between the religious faith, in those who believe, and their activities in the temporal sphere, results—in great part if not entirely—from the lack of a solid Christian education. Indeed, it happens in many quarters and too often that there is no proportion between scientific training and religious instruction: the former continues and is extended until it reaches higher degrees, while the latter remains at elementary level. It is indispensable, therefore, that in the training of youth, education should be complete and without interruption: namely, that in the minds of the young, religious values should be cultivated and the moral conscience refined, in a manner to keep pace with the continuous and ever more abundant assimilation of scientific and technical knowledge. And it is indispensable too that they be instructed regarding the proper way to carry out their actual tasks.[65]

Constant endeavor

We deem it opportune to point out how difficult it is to understand clearly the relation between the objective requirements of justice and concrete situations; namely, to perceive the degrees and forms in which doctrinal principles and directives ought to be applied to reality.

And the perception of those degrees and forms is all the more difficult in our times, which are marked by a pronounced dynamism. For this reason, the problem of bringing social reality into line with the objective requirements of justice is a problem which will never admit of a definitive solution. Meanwhile, our children must watch over themselves lest they relax and feel satisfied with objectives already achieved.

In fact, all human beings ought rather to reckon that what has been accomplished is but little in comparison with what remains to be done: because organs of production, trade unions, associations, professional organizations, insurance systems, legal systems, political regimes, institutions for cultural, health, recreational, or sporting purposes—these must all be adjusted to the era of the atom and of the conquest of space: an era which the human family has already entered, wherein it has commenced its new advance toward limitless horizons.

Relations between Catholics and non-Catholics in social and economic affairs

The doctrinal principles outlined in this document derive from or are suggested by requirements inherent in human nature itself, and are, for the most part, dictates of the natural law. They provide Catholics, therefore, with a vast field in which they can meet and come to an understanding both with Christians separated from this apostolic see, and also with human beings who are not enlightened by faith in Jesus Christ, but who are endowed with the light of reason and with a natural and operative honesty. In such relations let the faithful be careful to be always consistent in their actions, so that they may never come to any compromise in matters of religion and morals. At the same time, however, let them be, and show themselves to be, animated by a spirit of understanding and detachment, and disposed to work loyally in the pursuit of objectives which are of their nature good, or conducive to good.[66]

However, one must never confuse error and the person who errs, not even when there is question of error or inadequate knowledge of truth in the moral or religious field. The person who errs is always and above all a human being, and he retains in every case his dignity as a human person; and he must be always regarded and treated in accordance with that lofty dignity. Besides, in every human being, there is a need that is congenital to his nature and never becomes extinguished, compelling him to break through the web of error and open his mind to the knowledge of truth. And God will never fail to act on his interior being, with the result that a person, who at a given moment of his life lacks the clarity of faith or even adheres to erroneous doctrines, can at a future date be enlightened and believe the truth. Meetings and agreements, in the various sectors of daily life, between believers and those who do not believe or believe insufficiently because they adhere to error, can be occasions for discovering truth and paying homage to it.

It must be borne in mind, furthermore, that neither can false philosophical teachings regarding the nature, origin, and destiny of the universe and of man, be identified with historical movements that have economic, social, cultural or political ends, not even when these movements have originated from those teachings and have drawn and still draw inspiration therefrom. Because the teachings, once they are drawn up and defined, remain always the same, while the movements, working on historical situations in constant evolution, cannot but be influenced by these latter and cannot avoid, therefore, being subject to changes, even of a profound nature. Besides, who can deny that those movements, insofar as they conform to the dictates of right reason and are interpreters of the lawful aspirations of the human person, contain elements that are positive and deserving of approval?

It can happen, then, that a drawing nearer together or a meeting for the attainment of some practical end, which was formerly deemed inopportune or unproductive, might now or in the future be considered opportune and useful. But to decide whether this moment has arrived, and also to lay down the ways and degrees in which work in common might be possible for the achievement of economic, social, cultural, and political ends which are honorable and useful: there are the problems which can only be solved with the virtue of prudence, which is the guiding light of the virtues that regulate the moral life, both individual and social. Therefore, as far as Catholics are concerned, this decision rests primarily with those who live and work in the specific sectors of human society in which those problems arise, always, however, in accordance with the principles of the natural law, with the social doctrine of the church, and with the directives of ecclesiastical authority. For it must not be forgotten that the church has the right and the duty not only to safeguard the principles of ethics and religion, but also to intervene authoritatively with her children in the temporal sphere, when there is a question of judging about the application of those principles to concrete cases.[67]

[66] Ibid., p. 456.

Little by Little

There are some souls, particularly endowed with generosity, who, on finding situations where the requirements of justice are not satisfied or not satisfied in full, feel enkindled with the desire to change the state of things, as if they wished to have recourse to something like a revolution.

It must be borne in mind that to proceed gradually is the law of life in all its expressions; therefore in human institutions, too, it is not possible to renovate for the better except by working from within them, gradually. Pius XII proclaimed: "Salvation and justice are not to be found in revolution, but in evolution through concord. Violence has always achieved only destruction, not construction; the kindling of passions, not their pacification; the accumulation of hate and ruin, not the reconciliation of the contending parties. And it has reduced men and parties to the difficult task of rebuilding, after sad experience, on the ruins of discord.[68]

An Immense Task

There is an immense task incumbent on all men of good will, namely, the task of restoring the relations of the human family in truth, in justice, in love and in freedom: the relations between individual human beings; between citizens and their respective political communities; between political communities themselves; between individuals, families, intermediate associations and political communities on the one hand, and the world community on the other. This is a most exalted task, for it is the task of bringing about true peace in the order established by God.

Admittedly, those who are endeavoring to restore the relations of social life according to the criterions mentioned above, are not many; to them we express our paternal appreciation, and we earnestly invite them to persevere in their work with ever greater zeal. And we are comforted by the hope that their number will increase, especially among those who believe. For it is an imperative of duty; it is a requirement of love. Every believer in this world of ours must be a spark of light, a center of love, a vivifying leaven amidst his fellow men: and he will be this all the more perfectly the more closely he lives in communion with God and in the intimacy of his own soul.

In fact, there can be no peace between men unless there is peace within each one of them: unless, that is each one builds up within himself the order wished by God. Hence St. Augustine asks: "Does your soul desire to overcome your lower inclinations? Let it be subject to Him who is on high and it will conquer the lower self: there will be peace in you; true, secure and well-ordered peace. In what does that order consist? God commands the soul; the soul commands the body; and there is nothing more orderly than this."[69]

The Prince of Peace

These words of ours which we have wished to dedicate to the problems that most beset the human family today and on the just solution of which the ordered progress of society depends, are dictated by a profound asipration which we know is shared by all men of good will: the consolidation of peace in the world.

As the humble and unworthy Vicar of Him Whom the prophet announced as the "Prince of Peace,"[70] we have the duty to expend all our energies in an effort to protect and strengthen this gift. However, peace will be but an empty-sounding word unless it is founded on the order which this present document has outlined in confident hope: an order founded on truth, built according to justice, vivified and integrated by charity, and put into practice in freedom.

This is such a noble and elevated task that human resources, even though inspired by the most praiseworthy good will, cannot bring it to realization alone. In order that human society may reflect as faithfully as possible the Kingdom of God, help from on high is necessary. For this reason, during these sacred days our supplication is raised with greater fervor toward Him who by His painful passion and death overcame sin—the root of discord and the source of sorrows and inequalities—and by His blood reconciled mankind to the Eternal Father; for He himself is our peace, He it is that hath made both one * * * and coming He announced the good tidings of peace to you who were afar off, and of peace to those who were near.[71]

And in the liturgy of these days we hear the announcement: Our Lord Jesus Christ, after His resurrection, stood in the midst of His disciples and said "Peace be to you", alleluia: the disciples rejoiced seeing the Lord.[72]

He leaves us peace, He brings us peace; "Peace I leave with you, my peace I give to you; not as the world gives do I give to you."[73] This is the peace which we implore of Him with the ardent yearning of our prayer.

May He banish from the hearts of men whatever might endanger peace, may He transform them into witnesses of truth, justice and brotherly love. May He enlighten the rulers of peoples so that in addition to their solicitude for the proper welfare of their citizens, they may guarantee and defend the great gift of peace; may He enkindle the wills of all, so that they may overcome the barriers that divide, cherish the bonds of mutual charity, understand others, and pardon those who have done them wrong; by virtue of His action, may all peoples of the earth become as brothers, and may the most longed-for peace blossom forth and reign always between them.

As a pledge of this peace, and with the ardent wish that it may shine forth on the Christian communities entrusted to your care, especially for the benefit of those who are most lowly and in the greatest need of help and defense, we are glad to impart to you, venerable brothers, to the priests both secular and religious, to the religious men and women and to the faithful of your dioceses, particularly to those who make every effort to put these exhortations of ours into practice, our apostolic blessing in propitiation of heavenly favors. Finally, upon all men of good will, to whom this encyclical letter is also addressed, we implore from Almight God health and prosperity.

Given at Rome at St. Peter's on Holy Thursday, the 11th day of April, in the year 1963, the fifth of our pontificate.

JOHN XXIII.

LIKE THE WORD OR NOT, THE RESULT IS APPEASEMENT

Mr. GOODLING. Mr. Speaker, I ask unanimous consent that the gentleman from Texas [Mr. ALGER] may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. ALGER. Mr. Speaker, some of the newspapers and the Kennedy apologists have been annoyed during the past week because the administration has been charged with appeasing the Communists. Well, we can only reach a decision as to what the President is doing by the results achieved. Whether or not we like to use the word appeasement, the result of Kennedy policies in Cuba, Laos, the nuclear test ban negotiations, is closely akin to appeasement.

It is time for the American people and Congress to face the facts of what is happening because of our confused, or total lack of a workable foreign policy. Looking at the record of the past 2 years we find that the Kennedy administration has been consistent in its failures. Under Kennedy policies Cuba has been lost and is now a solid beachead for communism in the Western Hemisphere. Kennedy policies have resulted in turmoil and confusion in every country in Latin America with Cuban-inspired subversion putting every government to the south of us in dire peril.

Following Kennedy policies we are fighting a war, which we refuse to call a war, in South Vietnam and American boys are dying there. A neutral Laos has been lost through a Kennedy program of insisting upon the establishment of a coalition government with the Communists. The Kennedy policy of backing down on demands for proper inspection in any test ban treaty has merely led Khrushchev to get tougher and to insist on even more unreasonable conditions.

In short the Kennedy administration cannot point to any notable success in its foreign policy. The one bright moment when we might have snatched a victory was following the President's brave sounding speech of last fall on Cuba, but once the election was over, our policy returned to one of drift and indecision and the advantage we held momentarially was lost.

Mr. Speaker, the tragic story of the Communist doublecross in Laos is just another in the long list of failures of the Kennedy administration. Evidently the President lacks total understanding of communism, its objectives, and its history.

[71] Eph. 2, 14–17.

[72] Resp. and Mat., in feria VI infra oct. Paschae.

[73] Io. 14, 27.

The President continues to try to make deals with Khrushchev in the interest of peace. Almost daily we are told of suggested compromises in order to win over the Russians—our protection of Castro from patriotic Cubans fighting to regain their freedom, our backdown on on-site inspections in the nuclear test ban talks, and the forcing of a coalition government on the freedom-loving people of Laos.

The President's backdown on Cuba is strengthening the Communist beachhead in the Western Hemisphere and threatening other Communist takeovers in Latin America. Our weak position in regard to on-site inspections in any nuclear ban treaty has resulted, even as late as this weekend, in further blustering demands by Khrushchev. Finally, our abandoning of a free Laos in favor of a coalition with the Communists has resulted in the usual classic doublecross by the Communists who ignore another treaty, establish a firm hold on another country and do it all on the money of the taxpayers of the United States.

Where are we headed as a result of the zigging and zagging of the Kennedy administration? Wherein lies the responsibility for continuing to follow a course which consistently results in failure? These are questions demanding an answer from the President.

The strange, unrealistic course of the Kennedy administration is ably discussed in an article from Barron's, issue of April 15, 1963, called "From Cuba to Laos," and I include it as a part of these remarks at this point.

The strange, unrealistic course of the Kennedy administration is set forth in three articles I would like to include as a part of these remarks at this point and to urge their careful study by every Member of this body. First, "A Doublecross for the United States in Laos" from the U.S. News & World Report of April 22. Second an article, "From Cuba to Laos" from Barron's, issue of April 15. Finally, an excerpt from the current, April 29 issue of U.S. News & World Report on the dangers threatening freedom and our security in the Caribbean because of the failure of the Kennedy administration to stop Communist aggression in Cuba.

A Doublecross for the United States in Laos

Communists have got things going their way in Laos. Spring flareup of fighting in a key area is only one of the signs.

It's a familiar Communist strategy: Make a deal, welch on it before the ink is dry, then turn it to their own advantage.

By agreeing to neutralize Laos, Reds kept what they had, added gains, and cut the ground out from under the United States.

Signs are increasing that the United States, trying to do business with the Communists, is being doublecrossed once again.

This time the doublecross is taking place in Laos. It has come barely 9 months after a formal agreement with the Communists to set up a neutral coalition Government—free of outside influence—in this highly strategic area of southeast Asia.

From the first, the Communists have violated that agreement.

In early April, fighting flared again when Communist forces attacked the town of Xiengkhouang in a move to tighten their hold on the crucial Plaines des Jarres in central Laos. Even before that flare-up occurred, however, the Reds—aided by North Vietnamese Communists in violation of last year's agreement—already had sealed off a big chunk of the country.

STRATEGIC POSITION

They are now in position to send forces and equipment along a Communist-held corridor in Laos to their guerrillas in South Vietnam, where the United States is heavily involved. Also, Communist infiltrators from Laos can move freely into Thailand at scores of points along the border to carry out subversion, and to arm and recruit agents.

It is becoming clear that, the longer the neutral coalition of government of Communists, anti-Communists, and neutralists exists, the stronger the Communist military forces become.

The coalition itself came about through a sharp switch in U.S. policy.

Early in his administration, President Kennedy threatened to use force to stop the Communist inroads in Laos. On March 15, 1961, he said, "We are determined to support the Government and the people of Laos in resisting" the Reds. Then, 8 days later, he told a news conference this:

"If there is to be a peaceful solution, there must be a cessation of the present armed attacks by externally supported Communists. If these attacks do not stop, those who support a truly neutral Laos will have to consider their response."

NOT SO EASY

It soon became evident, however, that the promise to check the Communists was easier to make than to fulfill. A cease-fire was announced in May of that year, but the Communist pressure continued.

In April of 1962, fighting broke out on a considerable scale. In May, the Communists—aided by thousands of troops from North Vietnam—engulfed whole areas of the country and chased thousands of Laotian Government troops across the border into Thailand.

The United States, as a countermove, sent American marines into Thailand. Hints were dropped of a direct attack on Communist North Vietnam if agression did not stop.

In the negotiations that followed, however, the United States seemed to change directions. Financial aid was withheld from the anti-Communist government of Laos to try to pressure it into a coalition with the Communists.

Averell Harriman, as chief diplomatic strategist for the United States advocated neutralizing Laos by getting the warring factions together in a government that included Communists in the cabinet. An agreement for such a government was signed in Geneva on July 23, 1962—and it quickly developed that the Communists had gotten exactly what they wanted: a voice in the central government and a firm grip on key areas.

BACK IN THE FRAY

On April 8, 1963, Mr. Harriman was sworn in as U.S. Under Secretary of State for Political Affairs. On that same date, the Communists renewed their offensive in Laos.

But long before that they had made it a practice to ignore any part of the peace agreement that got in their way.

The United States, for example, withdrew its troops from Thailand and halted military assistance to Laos. But the Communists disregarded the agreement and left thousands of North Vietnamese troops in the country. Russian promises to get them out have not been lived up to.

An international commission, set up to guarantee the neutrality of Laos, has been unable to function. Its members cannot get into many Communist-held areas.

There has been a series of political assassinations carried out by the Communists to weaken the neutralists, and thus strengthen Communist influence.

In November 1962, and again in January 1963, unarmed American supply planes were shot down while trying to fly relief supplies to non-Communists bottled up in Red-held territory.

Now the danger is that the Communists will be able to infiltrate formerly anti-Communist areas along the Mekong River while keeping their own zone tightly locked up.

What Western forces face is the collapse of the Laos formula for neutrality. Vietnamese and Laotian Communists actually have improved their position over what it was when the deal to neutralize the country was agreed to.

Despite sporadic fighting, political assassinations, and other harassing tactics, most experts on Asian affairs doubt that the Reds will launch an all-out military campaign at this juncture.

The reason: A military takeover would end the U.S. economic assistance on which the coalition depends. Also, it might bring American forces back into Thailand and result in stepped-up U.S. activity against the Communist guerrillas fighting in South Vietnam.

According to this theory, the Communists would gain little they don't have already by an all-out military assault.

Turncoat neutralists are being trained by Communist instructors from North Vietnam who stayed in Laos after the truce came. The anti-Communist forces, on the other hand, no longer are receiving U.S. training and equipment. The military muscle and spirit are eroding as their enemies grow stronger.

When Communist forces made their move in early April, the United States and other members of the Southeast Asia Treaty Organization decided on a show of strength. On April 9, they ordered extensive military maneuvers in Thailand and naval exercises in southeast Asian waters.

This decision obviously was intended to impress the Communists with the armed power that could be unleashed against them. But, in Asia, no one really expects the United States to intervene militarily if serious civil war should erupt again in Laos. As of now, it would be impossible for the United States to generate any substantial support inside the country.

One westerner long experienced in southeast Asia expressed it this way: "When the United States abandoned the anti-Communists and forced them into a coalition with the Reds it gave up all of its high cards. Now its only hope is to try to maintain a precarious neutrality and keep the coalition Government operating."

Western allies of the United States are beginning to have some second thoughts about the deal with the Communists to "neutralize" Laos.

British observers concede, for example, that over the long pull the Communists still are bent on taking all southeast Asia, and they see little prospect of checking them, the way things are going.

French sources are inclined to the view that the United States must be willing to take major risks to save what's left of southeast Asia. Otherwise, the Communists will go right on using subversion and guerrilla operations to rot away the foundations of non-Communist and anti-Communist government in the area.

In Laos itself, most western observers feel that the neutralists are finished as a military force. If the coalition holds together, the Reds will have a bigger voice in the Government from now on, and anti-Communist power gradually will be whittled away.

Once again, the Reds have used a deal with the West as a tool for doublecrossing the West. Strategic Laos, which stood up for years against Communist attackers with U.S. backing, now seems to be sliding into the Communist camp.

Landlocked Laos is "the stopper in the jug." If it goes, beyond its borders lie Burma, Thailand, Cambodia, South Vietnam—the whole of southeast Asia.

From Cuba to Laos: U.S. Foreign Policy Smacks of Appeasement

The Kennedy administration, as its most ardent critics must admit, has consistently displayed admirable skill in the use of words. Last week the President himself was in rare rhetorical form. After keeping the Nation in mounting suspense for 36 hours, Mr. Kennedy on Thursday snapped the tension—and sent the stock market skyrocketing—with one of the most adroitly phrased political pronouncements on record. While remaining firmly opposed to "across-the-board" increases in steel price, he stated, the powers that be are willing to accept "selective adjustments up or down, as prompted by changes in supply and demand." The day before the steel crisis, at a ceremony conferring honorary American citizenship upon Sir Winston Churchill, the Chief Executive rose to the occasion no less nobly. In a glowing tribute to his new compatriot, the President said in part: "In the dark days and darker nights when England stood alone, he mobilized the English language and sent it into battle. Whenever and wherever tyranny threatened, he has always championed liberty."

In saluting the verbal prowess of Sir Winston, the President was speaking not merely as head of state but also as one professional to another. Since taking office John F. Kennedy more than once has sought to rally his countrymen with stirring calls to arms; at times he has succeeded in sounding almost Churchillian. Unfortunately, however, the resemblance ends right there. For in translating words into deeds, the Kennedy administration has acted not with the boldness of the great Prime Minister, but with the irresolution and timdity of his inglorious predecessor. In Latin America, southeast Asia, and in the heart of Europe, the White House, despite an occasional flash of spirit, has been pursuing a policy of appeasement. Day-by-day and step-by-step, in consequence, the Communist tyranny has gained ground; the forces of freedom, contrariwise, have been in steady retreat. In a desperate quest for "peace in our time," as the author of "Why England Slept" must know, Neville Chamberlain unwittingly paved the way for World War II. To prevent history from writing a catastrophic sequel, the President and his official family would do well to learn from it.

A prerequisite to learning, of course, is the willingness to face facts. On this score the White House and its advisers have proved sadly deficient. A case in point is Walt W. Rostow, a man whose global knowledge of economic and political affairs is matched only by his apparent lack of insight. In a far-ranging speech in Philadelphia recently on the cold war, Professor Rostow—who serves as counselor and chairman of the Policy Planning Council, Department of State—reported progress on all fronts. To be sure, he conceded, "none of the crises on the national agenda as of January 1961 has been finally and satisfactorily settled. The treaty arrangements in Laos remain precarious, still violated by the continued presence in that country of Vietminh units under the control of Hanoi. West Berlin stands firm, confident and prosperous, but the threat to its future remains. And evidently the crisis over Cuba is not at an end." Nonetheless, in a stunning nonsequitur he proceeded to conclude: "We have achieved something substantial in these 26 months: the momentum of Khrushchev's postsputnik offensive has been halted, and in the vast areas which have been threatened by it freemen breathe easier."

More dangerous nonsense would be hard to come by these days. Under the hapless leadership of the New Frontier, as even its stanch supporters now concede, the free world has suffered a dreary succession of defeats. Regarding Cuba, for example, William V. Shannon, Washington columnist for the leftwing New York Post, recently pulled no punches. "Two years ago," he observed last week, "a brave and active underground movement against Castro was spreading. Exiles in Florida were alive with hope for his early overthrow." Since then, however, their hopes have been dashed by one betrayal after another, from the Bay of Pigs to the incredible blockade imposed by the U.S. Coast Guard, not against the Communist regime in Havana, but against its mortal foes. Such perfidy now has led to the rupture of friendly ties between Washington and the Cubans in exile, a denouncement which, wrote Mr. Shannon scathingly, "Brings to a close a cycle of defeat, political ignorance and moral confusion. Everything has now been surrendered, including honor * * *."

In Laos, too, the once firm U.S. posture has developed a perilous sag. Until 1961 this country actively supported a regime in Vientiane which, despite its defects, was pro-Western and willing to resist the thrust of Communist aggression, launched years before by native Reds aided and abetted by North Vietnam and Red China. However, in the ill-founded hope of restoring peace to the embattled land, the Kennedy administration, through its roving Ambassador, W. Averell Harriman, began urging—and finally pressuring—its Laotian allies to form a coalition government with a neutralist group and the local Communist Pathet Lao. Last summer at an international conference the three factions signed an agreement which established such a troika government and demanded the withdrawal of all foreign forces from Laotian soil.

Describing the settlement as a calculated risk—Barron's chose at the time to call it a witless gamble—Washington promptly complied. The Reds did not. On the contrary they quickly set about demonstrating once again that every treaty with a Communist is an open invitation to trouble. The Pathet Lao first tried assassination—one of the trusted lieutenants of Kong Le, the misguided neutralist who originally launched the revolt, was murdered a few weeks ago. Next came subversion, a tactic revealed last month when a loyal Laotian soldier shot the Foreign Minister and denounced him as a traitor. Finally, in early April the Pathet Lao launched an unprovoked attack against the neutralist forces on the Plaine des Jarres, capturing several strongholds and other strategic real estate.

To the latest outburst of naked Communist aggression, the New Frontier reacted with its customary vigor. Even as his diplomatic handiwork was collapsing, Averell Harriman was promoted to Under Secretary of State. His boss, Dean Rusk, appealed for a cease-fire. And the SEATO Alliance, at U.S. behest, announced plans to stage an impressive show of force, not in Laos, where the shooting happens to be, but in neighboring Thailand, where freemen, Mr. Rostow to the contrary notwithstanding, today surely breathe easier.

"Don't worry, they're still 90 miles away," proclaims a satiric Republican car sticker. Evidently Washington hasn't gotten the message. Even as fighting broke out afresh in Laos, the White House was recording its elation over another dubious diplomatic stroke, the tentative agreement to set up a direct line to the Kremlin. Even as President Kennedy was eloquently hailing a now retired champion of freedom, the cause of freedom was suffering. Appeasement is an ugly word, and one which even Nelson Rockefeller, who sounds more like a party standard-bearer every day, backed away from last week. History has no such qualms. Unless the current disastrous course of events is reversed, there will be only one place in history for the Kennedy administration. And it won't be among the profiles in courage.

The Caribbean Area—Threatening Security

Watch the Caribbean area. Three more "Cubas" are a real threat there.

Danger signals are flying in Haiti, Dominican Republic, British Guiana.

Situations are very different in all three countries.

Net result could be the same—a race between Reds, anti-Reds for control.

In Haiti the dictatorship of Dr. François Duvalier faces the prospect of a sudden and violent end. Duvalier has virtually had to disarm Haiti's United States-trained army, source of several plots against him. The weapons have gone to Duvalier's militia and a motley crowd of gangsters called the Ton-ton Macoute.

The country is in frightful shape. Haiti has less trade now than it did in 1789. Tourist trade has collapsed. Business is dying off. Ninety percent of Haiti's people live in misery, squalor, and hunger.

Pro-Castro Communists work in Haiti's confused underground. Castro's Cuba is just 50 miles away across the Windward Passage. In the race to be touched off if Duvalier quits or is assassinated, Castro may start out ahead.

The Dominican Republic, after 30 years of the Trujillo dictatorship, is still in confusion. In the middle is Juan Bosch, the elected President in office since February. Bosch has cut the government budget, slashed government salaries. Question is whether Bosch will get the time to push through reforms.

Rivals aplenty are after Bosch's job. Police boss is Brig. Gen. Antonio Imbert, an ambitious national hero who helped assassinate Trujillo. Dominican Army leaders, also ambitious, distrust Bosch as an ex-Communist. Communists are working underground or train in Cuba, backed by Castro.

There is a tradition of rule by force in the Dominican Republic. There is every expectation of more tries by would-be dictators sooner or later. Then, as when the Trujillos fell, Castro's Communists will push for power.

British Guiana appears to be splitting wide open along racial lines.

Premier Cheddi Jagan is a Communist. He leads Guiana's East Indians, brought in by the British as plantation workers.

In the opposition, Forbes Burnham leads Guiana's Negroes, mainly industrial workers. He is a Socialist and anti-Communist. Peter D'Aguiar, a right wing anti-Communist, leads Guiana's Europeans, mainly Portuguese.

It's a witches' brew of trouble. Jagan's Indians are outbreeding whites and blacks. The opposition riots to keep Britain from granting independence. Only a handful of British troops prevent a race war, a takeover by Reds.

In London, among British officials who once urged the United States to "try the neutralist solution" to save Laos, this is the grim look of southeast Asia:

Only U.S. armed force can save Laos now. Only alternative is to admit the collapse of the neutralist regime under Communist attack, to talk again.

Next deal with the Communists might mean the end of Laos, the slow collapse of Cambodia, then Thailand, finally South Vietnam.

Impression you get from the British these days is that it's really all gone anyhow, that, unless the United States is willing to go to war, there's not much that can be saved in

> southeast Asia. As for the British themselves, they appear to be willing to fight for nothing in southeast Asia north of Malaya, still a member of the British Commonwealth and rich in tin and rubber.

THE ADMINISTRATION OPPOSES EXPENDITURE REFORM

Mr. GOODLING. Mr. Speaker, I ask unanimous consent that the gentleman from Missouri [Mr. CURTIS] may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. CURTIS. Mr. Speaker, there has been a growing tendency on the part of administrative spokesmen in recent weeks to charge that those who seek some reduction in next year's budget are advocating a policy which would impair our national security, retard our space program, bring on a recession and, in general, cause hardship and suffering for our people.

It is regrettable, indeed, that the national economic debate on how best to strengthen our economy and provide jobs for the growing labor force should be reduced to an emotional and, in some cases, a demagogic level.

One of the most important leaders of the Democratic Party in Congress was quoted in the Washington Post of March 6 as asking whether Republicans plan to cut funds for veterans benefits, education, youth, "and mothers." The Democratic spokesman added, "if Republicans plan to come out against people, that is their privilege. They've done it before."

The President, himself, has aided and abetted the campaign. Those who question the wisdom of tax cuts, higher spending, and deeper budget deficits have been made to appear without human feeling and reckless with the Nation's security. In his press conference of March 6, President Kennedy said he wanted to know "whose life is going to be adversely affected" by the reductions in spending which had been suggested. Referring to the school lunch and the aid to dependent children programs, he asked:

> Are you going to cut those kind of programs which are essential to a better life for our people?

Continuing in the same manner, the President asked whether those who suggest budget cuts are going to take action which would make the United States "permanently second-best" in space and in national security.

The President also is in the forefront of those who claim that any cut in new spending authority or budget expenditures for fiscal 1964 would cause a recession. In a speech on March 13, he clearly said that a budget cut today would ultimately lead to another recession. According to the President, if the budget is cut, those who have honest doubts about the administration's unique and experimental fiscal policies will have to take the blame for any recession which might occur.

What a striking contrast there is between the President's attitude toward reductions in spending today and his attitude when he was a candidate for election. The day before the last Presidential election, he told a television audience—with pride—that—

> The fact of the matter is that the Democratic Congress, of which I am a member, in the last 6 years cut $12 billion off of the President's request.

In President Kennedy's eyes, a large reduction in the budget requests of the last administration was an act of wisdom and patriotism; today, attempts to reduce his own administration's rapidly rising level of spending, impairs the Nation's security and hurts people.

Mr. Speaker, there are many able and humanitarian men who are particularly well-informed in their special areas of competence who believe that the budget can be prudently trimmed. Many of them foresee advantages to the Nation from prudent and selective reductions in spending.

Basil O'Connor, former president of the American Red Cross and now President of the March of Dimes, has said that the Nation's medical research program is threatened by an over-abundance of Government grant money that is being spent wastefully and often on unsound projects. "The plethora of funds actually constitutes a positive threat to excellence," he said.

David E. Lilienthal, former Director of the Tennessee Valley Authority and the first Chairman of the Atomic Energy Commission, has called upon the Government to abandon its support of atomic power development and reduce substantially its support of basic atomic research.

The Chairman of the Joint Economic Committee, Senator DOUGLAS, has said in a committee press release of March 21 that over $3.4 billion annually can be saved in the Department of Defense alone. He said:

> All responsible studies in this area since our hearings in January 1960 (including 207 reports by the Government Accounting Office) show the possibilities of economies without hurting defense through better organization and management, such as Secretary McNamara is now instituting.

An American Farm Bureau Federation spokesman told the House Ways and Means Committee recently that his organization would recommend that $1 billion be cut from the funds the administration is requesting for farm price support operations and payments to farmers. While campaigning on television on November 7, 1960, President Kennedy said that $1 billion to $1.5 billion could be cut from expenditures for agriculture. At that time they were less than $6 billion, but in fiscal 1963, they will total $7.5 billion.

The Clay Committee, which was appointed by the President and which was composed of some of the Nation's most eminent and able men, said in its report on our foreign aid programs that "we are trying to do too much for too many too soon, that we are overextended in resources and undercompensated in results, and that no end of foreign aid is either in sight or in mind." The Committee said that if its program criteria were now in effect, "present programs would be reduced by approximately $500 million, and there would be additional reductions in the following years."

In his column of March 26, Walter Lippmann has termed the Clay committee's assessment of foreign aid "quite true," and has suggested that we should not try to give aid to the 95 countries and territories which are now receiving it and that we should instead focus our aid so that it is enough to do the job in key countries.

Even some of the administration's top spokesmen have recognized the need and the feasibility to cut back on some programs that have outlived their usefulness. Thus, Secretary of Commerce Hodges, before the Joint Economic Committee on January 30, in answer to a question as to whether there were older programs that could be cut back, answered, "I think this is a problem with all governments, and this included." He also said that if he had the discretion to make cuts in his Department where he wanted to make them, he could reduce the number of his employees by 10 percent without impairing the national interest.

Walter Heller, Chairman of the Council of Economic Advisers, told the Joint Economic Committee on January 28 that "obviously there are points where Government spending is less efficient than some other points. We always have to be on the lookout for reallocation." While Dr. Heller went on to claim that this is what the administration has been doing, he left the clear impression—and I think the right one—that still more could be done.

A Democratic member of the Joint Economic Committee, Senator PROXMIRE of Wisconsin, has also put himself on record as to the possibility and the desirability of reducing spending in the areas of defense and space, which, he said at the committee's hearings on January 29, have become "sacred cows." He added, "they could all be reduced and I think we could make a stronger case in defense than in any other area and also make a very strong case in space."

Mr. Speaker, other statements of this kind by responsible people who care about their fellowmen and this Nation's security as much as anyone does could be cited. The desire to bring the rapidly rising level of Federal spending under better control is not a question of who is or is not humanitarian or who is or is not concerned with the Nation's security or space effect. Neither is it a partisan matter. Thoughtful individuals on both sides of the political fence agree on the need and the feasibility of expenditure control.

Recognizing this, the Republican members of the Joint Economic Committee are seeking an objective and nonpartisan examination of Federal Expenditure policy. In our minority views to the Joint Economic Committee's 1963 Annual Report and in a letter to President Kennedy dated March 19, we urged the immediate establishment of a Presidential Advisory Commission on Federal Expenditures. We set forth clearly the objectives we believe such a Commission should seek. Combined with several other aproaches to expenditure control I believe that such a Commission could be most useful.

I ask unanimous consent that a number of newspaper clippings and other items relating to the quotations which I have cited above, as well as a copy of the letter to President Kennedy sent by the minority members of the Joint Economic Committee, be inserted in the Record at this point.

[From the Washington Post, Jan. 17, 1963]

NIH Called Too Affluent by O'Connor

(By Harry Nelson)

La Jolla, Calif.—The Nation's medical research program is threatened by an overabundance of Government grant money that is being spent wastefully, often on unsound projects, the president of the March of Dimes charged tonight.

Basil O'Connor told a group of scientists that the uncritical generosity of Congress in appropriating enormous funds to the National Institutes of Health (NIH) promises to create a kind of nationalization of science.

He told the scientists, most of whom are recipients of Government grants, that they must make a realistic appraisal of the problem lest the "forced feeding" of medical research lead to a dependence on money instead of intelligence.

O'Connor spoke at a dinner held in conjunction with the third International Symposium on Immunopathology sponsored by the March of Dimes and the Atomic Energy Commission.

Stating that more than money is needed to promote genuine progress in scientific research and education, O'Connor said that logrolling and sheer waste which accompany ill-advised, massive Government appropriations could undermine public confidence in science.

He charged that NIH, the granting agency, more than once has had to "beat the bushes" to find researchers willing to accept huge amounts so that the money would not revert to the general fund at the end of the year.

Because there is so much money, he said, NIH has a less rigorous system for evaluating applications.

"The plethora of funds actually constitutes a positive threat to excellence," O'Connor said. "While in the past both thought and money were scarce, only thought is now scarce and the result is a tendency to spend rather than think."

[From the Washington Daily News, Mar. 12, 1963]

Lilienthal and the Atom

Lately we have been reading some lectures delivered at Princeton University by David E. Lilienthal, First Chairman of the Atomic Energy Commission.

Mr. Lilienthal thinks the Government should take a new look at this agency, now spending about $2.5 billion a year. AEC efforts to develop atomic energy—at low cost—for industrial use are not likely to succeed soon, are costly, and not necessary now—and when need for this energy does come he is sure private capital will meet the need.

He suggests that the "atoms for peace" program, involving research reactor equipment for "underdeveloped" countries is an "expensive showpiece" but meaningless and wasteful. These peoples much more need doctors, plows, seed, and "elementary" scientific instruction.

Mr. Lilienthal proposes a drastic reevaluation of the "peaceful" atom, based on "realistic" prospects for the immediate future.

What we take from the Lilienthal lectures is the necessity for our Government to review constantly its priorities—in the light of current events and knowledge. The atomic outlook of 1946 no longer is valid.

The taxpayers now are burdened with the staggering costs of defense and space exploration, both steadily on the rise—and any other programs which do not match these undertakings in importance well may be put aside, at least for the time being.

The general attitude here in Washington, when cuts in spending are proposed, is that you can't touch this, and you can't touch that. But every program can't be a sacred cow—and none, regardless of its priority, should be immune from the supreme test: Is it essential, in the light of everything else, to spend this dollar; and will it be well spent?

Mr. Lilienthal has lived with the atom a long time. His credentials for counsel are blue ribbon. He has taken a broad, visionary analysis of the problem; not the narrower view natural to a bureaucracy. He is at least logical, if not right—and Congress, looking for ways to balance the biggest budget of all time, ought to take advantage of his thinking.

[From the Washington Post, Mar. 21, 1963]

Lilienthal Asks Halt in Atomic Power Plans

(By Howard Simons)

A call by David Lilienthal for the Government to abandon its support of atomic power development and to reduce substantially its support of basic atomic research has prompted a congressional committee to ask the Atomic Energy Commission to answer its critic.

Lilienthal, the first Chairman of the Atomic Energy Commission, challenged the AEC last month in a series of lectures at Princeton University. The theme of his lectures was that "the facts of the world of 1963 are in conflict with the way in which we think and deal with the atom, we should jettison and junk those outmoded ideas."

Lilienthal urged the Government to put "the atom into the mainstream of men's affairs" and not keep it artificially separate and apart, as Lilienthal views the present role of the atom in U.S. activities. To do this, Lilienthal suggested that the AEC, itself, might need drastic modification.

What aroused the interest of the Joint Congressional Committee on Atomic Energy even more than these comments were Lilienthal's suggestions about continued Government support for civilian nuclear power and basic science as it relates to the atom.

The Joint Committee has championed Government support of both these programs.

As regards atomic power development, Lilienthal suggested the following as premises for 1963:

Energy from the atom is not now needed for civilian purposes.

At the time and place where it is needed it will be forthcoming without governmental prodding. If there is a real need it will be met by the utility and manufacturing industries, as it has been with the automobile, the diesel engine, the telephone, and so on, in response to proved economic need.

There is now no urgent fuel or power crisis and no prospect of one in the foreseeable future; when such a shortage develops, it will be taken care of by the atom if that is then the best alternative.

"Moreover," said Lilienthal, who resigned as Chairman of the AEC on February 15, 1950, the Government "should stop trying to force-feed atomic energy."

"Throw away the present discredited timetable." Don't abandon the hope for competitive power, he advised, but deal with it realistically.

The same approach, Lilienthal argued, should apply to the atom in basic science, in medicine, and agriculture, and industry. Funds and scientific manpower should be freed for other "starved" areas of research and development, such as biochemistry.

In effect, Lilienthal was saying just the opposite of what the AEC had reported to President Kennedy in November 1962, and what AEC officials told the Joint Committee in late February.

This was essentially that nuclear energy can and should make a vital contribution toward meeting the Nation's long-term energy requirements and that the proper role for the Government is to develop and to demonstrate the technology that will lead to a self-sustaining and growing nuclear power industry.

In short, where Lilienthal wants the AEC to get out of the nuclear power business, the AEC not only wants to remain in the atomic power business, but to increase its support of the Nation's nuclear power efforts.

Citing such "variances" between the AEC and Lilienthal, the Joint Committee, in an unpublished letter, has asked the AEC for its comments. The Joint Committee further asked the AEC to make its views of Lilienthal's views known before the resumption of its annual hearings on the state of the Nation's atomic energy industry.

These hearings continuing those held in February, will begin on April 2 and will be devoted largely to non-Government witnesses.

[From the Washington Post, Mar. 21, 1963]

Cut Budget Before Tax, Farm Group Demands

The Nation's biggest farm organization said yesterday it would oppose a tax cut this year unless Congress makes a deeper cut in President Kennedy's spending plans than even Republicans are talking about.

The American Farm Bureau Federation told Congress it would favor cutting income taxes "if and when" the lawmakers slash $13.6 billion from the $107.9 billion in new spending authority sought by Mr. Kennedy.

The economy target set by House GOP leaders calls for a reduction of $10 billion in the new funds sought by the President.

The views of the farm federation were outlined by its secretary-treasurer, Roger Flemming, for the House Ways and Means Committee.

He said his organization would recommend that $1 billion be cut from the funds Mr. Kennedy wants for farm-price support operations and payments to farmers.

Flemming said "tax reduction is needed to improve the climate for economic growth" but "our past record of fiscal management in the Federal Government has not earned us a tax cut * * * the Federal Government has spent more than its revenue in 26 of the past 32 years."

Meanwhile, Postmaster General J. Edward Day joined the chorus of Cabinet officers calling for enactment of the President's tax proposals without offsetting budget cuts.

Day spoke out for the first time on the administration tax program before the traffic club here. He attacked "those who have been yelling loudest for budget cutting" while they "ask for large increases for some particular pet purposes."

Senator Douglas Announces Hearings of Subcommittee on Defense Procurement

Senator Paul H. Douglas, Democrat, of Illinois, chairman of the Joint Economic Committee, announced today that hearings will be held by the Subcommittee on Defense Procurement to review the progress that has been made since its last hearings. The committee is concerned both with improving the efficiency of defense procurement and service activities and their effect on the economy.

The Senator commented that "recent statements by the President, the Budget Director, Secretary McNamara, and others indicate that a cost reduction program of major proportions is underway that will ultimately save over $3.4 billion annually in the Department of Defense alone. These savings will stem from the success of the Defense Supply Agency, more competitive procurement, reducing gold-plating, reducing inventories, standardizing items, and streamlining other operations covered by previous hearings and reports of the subcommittee."

"Many of us have for years considered that savings of magnitude are possible and attainable," said Senator DOUGLAS. "This is especially true when one considers that Defense Department expenditures for fiscal year 1963 will be close to $50 billion and that it has property holdings of $165 billion, including $128 billion personal property of which $41 billion represents unissued stores inventory.

"Furthermore, all responsible studies in this area since our hearings in January 1960 (including 207 reports by the General Accounting Office) show the possibilities for economies without hurting defense through better organization and management such as Secretary McNamara is now instituting."

Senator DOUGLAS again emphasized that the subcommittee is interested in procurement, supply, and related service activities which consume such a large portion of the budget and have such a heavy impact upon the national and local economies and not with questions of military strategy, weapons, size of force, etc.

Members of the Subcommittee on Defense Procurement are: Senator PAUL H. DOUGLAS, Democrat, of Illinois, chairman; Senators JOHN SPARKMAN, Democrat, of Alabama, WILLIAM PROXMIRE, Democrat, of Wisconsin, and JACOB K. JAVITS, Republican, of New York; and Representative WRIGHT PATMAN, Democrat, of Texas; MARTHA W. GRIFFITHS, Democrat, of Michigan; THOMAS B. CURTIS, Republican, of Missouri; and WILLIAM B. WIDNALL, Republican, of New Jersey.

[From the Washington Post, Mar. 26, 1963]

THE CLAY REPORT

(By Walter Lippmann)

The Clay report on foreign aid deals with an immense subject in a few pages. For that reason alone it will not furnish the general public, which includes most Members of Congress, with enough material for that serious reappraisal which has become so necessary.

The report mentions most of the questions which have to be asked, but what it gives are its answers and not the facts and the reasoning by which its conclusions were reached. As a result, the ordinary reader receives little more than a bundle of declarations as to what ought and ought not to be done. He gets little help toward an enlightened debate.

There is an explanation for this. The Committee which consists of 10 eminent men was appointed last December "to advise the President, the Secretary of State, the Secretary of Defense, and the Administrator of the Agency for International Development." Quite evidently, that is exactly what it has done, and done, it appears, with profit to the administration. The report is not really a public document meant to clarify a public discussion. It is, so to speak, an interoffice memorandum for the insiders of the administration, and is no doubt highly significant and intelligible to those who have taken part in the conferences which are not reported in the report.

Because it is the kind of document it is, it will, I am afraid, provoke unfortunate reactions abroad. It is peppered with criticism which, because it is anonymous and not specific, could apply to some or all of the recipients of foreign aid. No country would be able to tell whether it is or is not being criticized. Furthermore, the report contains a sweeping criticism of all our allies, including Canada, for what they do or do not do in foreign aid.

I am sure that this was not the intention. But I do not think it is merely charitable to say that the Committee was so intensely concerned with advising the administration insiders that it did not realize what its report would sound like to the vast world of the outsiders.

If the report was to be a public document, and of course it had to be, it should not have declared only its conclusions. It should have argued them persuasively. In my view, this was entirely practicable since the main theme is sound.

Thus, it is quite true that "we are trying to do too much for too many too soon, that we are overextended in resources and under compensated in results, and that no end of foreign aid is either in sight or in mind." It follows, rightly enough, that we should not try to give aid to the 95 countries and territories which are now receiving it, and that we should, instead, focus our aid so that it is enough to do the job in key countries. We must find a way to stop diluting and diffusing it all over the globe. Let the bridges we have to build be fewer but let all of them cross the river.

The Committee is quite right, I believe, in advising the administration to let ex-colonial Africa depend chiefly on Europe for aid. And if I read between the lines correctly, it is asking the administration to concentrate aid for Asia, apart from the military subsidies, on India and Pakistan.

When it comes to Latin America the report shows little evidence of a serious knowledge of the actual problem of inducing the Latin peoples to emerge from their primitive past into the modern age. In fact there is a considerable ideological confusion in that the report seems to say that the only alternative to communism is the American form of private enterprise.

That is not true. There are many forms of a mixed economy—some of them very successful in Europe—which are quite different both from Soviet communism and American capitalism. Whether we like it or not, most Latin American countries are pointed toward one form or another of a mixed economy, and we should not give them the impression that we are incapable of understanding why they are pointing that way.

I feel I must say also that the report itself exemplifies one of the principal reasons why, though since 1946 this country has spent some $100 billion in foreign aid, it is so much disliked in so many places. A persistent theme is that we should be giving and withholding favors, which mean so much in human terms, in our own interest. There is in this an assumption of superiority which is abrasive in the kind of world we are living in—for the most part very poor and for the most part of some other color than white.

With our great wealth and power there should go humility, not pride. Thirty years ago this country had not only the respect and the trust but also the affection of the under-developed world. Yet it had no foreign aid program. Why? Because 30 years ago the country was struggling with its own desperate economic problems and with the rising menace of fascism. Because we had grave problems of our own, we were not proud and self-satisfied, and we gave the effect of being in the same boat with the rest of mankind. That was when we had friends all over the world.

We shall not have them again until this country becomes possessed once again, as it surely will when the political seasons change, in the high enterprise of making a good society.

EXCERPTS FROM JANUARY 1963 ECONOMIC REPORT OF THE PRESIDENT—HEARINGS BEFORE THE JOINT ECONOMIC COMMITTEE, JANUARY 30, 1963

Senator PROXMIRE. Are there any older programs that could be cut back?

Secretary HODGES. You put your finger on one of my favorite subjects that I probably won't need to discuss today. I think that is a problem with all governments, and this included. You never cut back old ones. That includes the Congress. But you always add new ones.

Senator PROXMIRE. Parkinson's law.

Chairman DOUGLAS. Mr. Secretary, there is a sort of an impish desire which takes hold of me at this moment. I have a vague memory that once you declared that you felt that the Department of Commerce could operate more effectively with 10 percent fewer employees. Is my memory at fault?

Secretary HODGES. No; you have the basic idea right. The exact quotation is not correct. I made the statement before an Appropriations Commitee. I have done it on several occasions. If the Congress will say, which they will not do, after asking them time and time again, will allow flexibility of appropriations where you could take old programs, tired blood, Mr. CURTIS, and cut them down or eliminate them or what not, and take that money and put it into things that are more modern and up to date such as civilian technology, the whole science of technology, that you could save 10 percent. I said that.

U.S. CONGRESS,
JOINT ECONOMIC COMMITTEE,
Washington, D.C., March 19, 1963.

The PRESIDENT,
The White House,
Washington, D.C.

MR. PRESIDENT: In response to your recent invitation for a continuing dialog on the major economic issues before the Nation, we should like to set forth some of our observations on your proposed 1963 tax program and to offer a suggestion for expenditure control which we believe would contribute to sound and stable long-term economic growth.

While we recognize that knowledge of the sources of economic growth and the means of accelerating it are limited, it seems clear that well-conceived incentive tax reduction and reform is a major and necessary step toward improving upon our Nation's rate of economic growth. We have long supported tax reduction and reform as a high priority objective of our economic policy. However, it is also clear that such a program will involve costs as well as benefits. These costs must be weighed and, if possible, offset.

One cost will be budget deficits higher than those which would have been incurred without the tax cut. These would follow 3 years of steadily mounting deficits which have totaled more than $19 billion, or more than the net deficits of the previous 7 fiscal years combined. Some opinion holds that budget deficits need not concern us. We do not share this view.

The experience of the past suggests that it would be reckless to ignore the inflationary dangers posed by persistent and increasing deficits. The state of economic learning is neither so advanced nor so precise as to safely admit any other conclusion as a guide to policymaking. Sound long-term economic growth cannot be based upon a foundation of budget deficits. Furthermore, we cannot ignore the adverse effects such deficits could have on our continuing balance-of-payments problem and on the entire free world trade and payments system.

Recognition of the potential dangers of chronic budget deficits is implicit in your proposed tax program. As one of its objectives, the program seeks to bring the budget into balance by stimulating economic activity and thus increasing revenues.

We should not, however, pin all of our hopes for ending our chronic deficits on the possibility of rapidly rising tax revenues. It is clear that hard thought must be given to the other side of the ledger—to controlling rapidly increasing Federal expenditures.

We do not suggest an across-the-board cut in Federal spending. In view of the Nation's domestic needs and international and security commitments, such an approach would be self-defeating. What we should seek, however, is a reform of Federal expenditure policy so as to effect important savings without impairing the national interest or retarding economic growth. Indeed, thoughtful and selective control of Federal expenditures can increase our national security and stimulate our economic growth.

In view of these considerations, we believe that Federal expenditure policy requires thorough, objective, and nonpartisan examination. Support for the principle of tighter control and more effective use of Federal expenditures is virtually unanimous; support for specific suggestions for achieving it is more difficult to attain. The difficulty of the task, however, should not deter us from making the attempt.

In our separate minority and additional views to the Joint Economic Committee's 1963 Annual Report, we made several specific suggestions which we believe offer a sound basis for a reform of Federal expenditure policy. At this time, we wish to call one of these recommendations to your attention and ask that you give it your serious consideration.

As an essential step to a reform of Federal expenditure policy, we suggest that you appoint a Presidential Advisory Commission on Federal Expenditures, composed of private citizens from business, labor, education, the professions and Members of Congress equally from both parties. The work of this Commission, assisted by a staff, should parallel the 3-year period over which your tax program is scheduled to take effect. During this period, the Commission should conduct studies and periodically make public its recommendations in the following areas:

(a) Establishment of spending priorities among Federal programs, separating the desirable from those that are essential in order to serve as a guide to the administration in drawing up the budget, particularly in years of expected deficits.

(b) Appraisal of Federal activities in order to identify those programs which tend to retard economic growth and for which expenditures should be reduced or eliminated.

(c) Improvement of the Federal budgeting and appropriations process in order to increase the effective control of expenditures.

(d) Examination of responsibilities and functions which are now assumed by the Federal Government, but which could be better performed and with superior effectiveness by the private economy.

(e) Review of Federal responsibility and functions in order to determine which could be better performed at the State and local levels.

(f) Improvement of Government organization and procedures in order to increase efficiency and promote savings, including a review of the recommendations of the Hoover Commission in order to determine how those already implemented have worked out in practice and whether those not yet implemented should be given further consideration.

(g) Determination of policies with regard to the level of user charges and fees to be made for special services furnished to members of the public by the Government.

The recommendations of an objective and nonpartisan Commission of this kind described should command widespread support among the public and within the Congress. Its proposals would offer a sound basis upon which to begin the reform of Federal expenditure policy.

In view of the relevance which expenditure control has for the success of a tax reduction and reform program, we earnestly hope you will give this recommendation your early and favorable consideration.

Respectfully yours,

Thomas B. Curtis.
Clarence E. Kilburn.
William B. Widnall.
Jacob K. Javits.
Jack R. Miller.
Len B. Jordan.

FEDERAL INCOME TAX

Mr. GOODLING. Mr. Speaker, I ask unanimous consent that the gentleman from North Carolina [Mr. Broyhill] may extend his remarks at this point in the Record and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. BROYHILL of North Carolina. Mr. Speaker, during the Easter recess I spent the entire time touring the 11 counties of the 9th District of North Carolina, talking to the people and finding out what they think about the problems facing our Government. I believe it is the duty and the responsibility of a Congressman to go to the people he is representing and not sit back and wait for them to come to him.

The people gave freely of their opinions and of their views concerning legislation and governmental affairs. Perhaps it was because it was around April 15, the Federal income tax deadline that I received such a volume of comments about the huge cost of Federal Government and the need for more fiscal responsibility in Washington. I found that the people of my district, regardless of political affiliation, are demanding less spending and are worried about the future financial solvency of our country. They believe that money from Washington is not a free handout or manna from Heaven. They know its cost and are concerned about the huge national debt, deficit financing, and what this means to our children to whom we are leaving a tremendous burden of financial obligation.

Because I was visiting the district near the Federal tax deadline of April 15, people were naturally interested in the tax bill and were very aware of high Federal income tax. They are very aware that they work a good part of the year, not for themselves, but for the Federal Government. They are very conscious of the continued growth in Federal Government employment and are beginning to speak up and speak out against the continuing burden of huge Federal payrolls on the backs of the taxpayers.

I have read with interest an editorial by WRAL–TV, channel 5, Raleigh, N.C., the fact that Tax Freedom Day will begin at 1:05 p.m. today, Monday, April 22. The average American taxpayer has been working all year, not for himself and his family, but for the government—Federal, State, and local. All the money the average taxpayer has earned up until 1:05 p.m. today will be equivalent to the amount of money he will have to pay in taxes for the year 1963.

I commend this editorial to the membership of the House.

The withholding system of income taxations is, we suppose, with us forever now that it has been installed by both the Federal and State governments. It would be next to impossible to reverse in either case. Just the same, citizens ought not to be misled by its deceptiveness.

We noticed a few months ago an interesting experiment in psychology conducted, as we recall, by an employer out in Missouri. For several months he had been paying his employees in cash all of their salaries. He deducted nothing for taxes. Instead, he required each employee to step immediately to the next window and pay the taxes that normally would have been withheld.

By the time the second payday had rolled around, he noticed a remarkable increase in the interest shown by his employees in governmental affairs, especially Government spending. By the end of the second month, he said, his employees were writing to their Congressman and Senators, demanding that Government spending be cut.

This is more than just a dramatic lesson in practical civics. It is a demonstration that most citizens are inclined to overlook the huge tax bite that is regularly taken from their paychecks.

Some time later we ran across an item describing how another employer had accomplished the same purpose in a different way. Instead of making regular weekly deductions, he paid all of his employees their full salaries for the first 3 weeks of each month. Then, at the end of the fourth week, he deducted the taxes for all 4 weeks. This meant, of course, that most of the employees received, at most, only a few dollars for their week's work. Some did not come out even that well—they owed the company.

These employees also developed a healthy interest in governmental affairs.

We wish that all employers would adopt one of these systems, just to see what the effect would be. At the very least, we wish that all citizens could somehow be made aware of a nationwide observance of what is called "Tax Freedom Day." The observance is coming later each year because of the increasing burden of taxation.

This year, Tax Freedom Day will begin at 1:05 p.m. on Monday, April 22. That should be easy to remember because it is 1 week after the filing deadline for income tax returns. As of 1:05 p.m. on April 22 the average American taxpayer will begin, for the first time in 1963, to work for himself and his family. Ever since January 1, he has been working for the government—Federal, State, and local. All the money the average taxpayer has earned up until 1:05 p.m. on April 22 will be equivalent to the amount of money he will have to pay in taxes for the year 1963.

According to statistical surveys, the first 2 hours and 26 minutes of your 8-hour workday is spent to earn money to pay your taxes. This is 2 hours and 26 minutes, every workday, all year long.

This brings to mind again the fact that the Federal income tax law is just 50 years old. Prior to 1913, there was no such thing as an income tax. In 1894, the Congress passed an income tax law, but the Supreme Court knocked it down as unconstitutional. A member of the Supreme

Court, Mr. Justice Stephen J. Field, warned against giving the Government such a power to tax the income of its people. Said Mr. Justice Field: "It will be but the steppingstone to other governmental powers, larger and more sweeping, until our political contests will become a war of who can spend and tax the most; a war constantly growing in intensity and bitterness."

Who will deny that Mr. Justice Field's prophecy has come true? And, by the way, the income tax that the Supreme Court killed in 1894 was a mere 2 percent levy on all income over $4,000 per year, without any graduated increase at all. Nobody foresaw top rates like those now in effect—91 percent on personal income and 52 percent on corporations.

Cuts in taxation cannot be made sensibly without cuts in Government spending. The spending is the key. Every citizen owes it to himself to take note of Tax Freedom Day which begins at 1:05 o'clock on the afternoon of April 22.

TIMBER INDUSTRY IN NORTH CAROLINA

Mr. GOODLING. Mr. Speaker, I ask unanimous consent that the gentleman from North Carolina [Mr. Broyhill] may extend his remarks at this point in the Record and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. BROYHILL of North Carolina. Mr. Speaker, the timber industry in North Carolina and the South has made tremendous strides. The South in former years was an underdeveloped area of our country, but in the last few years great changes have been taking place. It is significant that the great timber resources in the South have played an important role in the development of new industry and increased income for our local citizens.

In addition, private industry has taken the lead in promoting conservation and planting programs and have been ever conscious that these important forest resources should be not only utilized but that landowners should be encouraged to do even more to increase the supply of these resources.

Up until this time, timber landowners have been given additional incentive under the Internal Revenue Code by being able to apply capital gains tax treatment on certain sales of timber, but now the Secretary of Treasury proposes to change these tax laws and in effect breaking faith with those who have participated in reforestation and conservation projects.

The North Carolina General Assembly recently passed a joint resolution petitioning the Congress of the United States to defeat and reject the extreme and harmful changes in timber taxation proposed by the Secretary of the Treasury.

I wish to call to the attention of the House the resolution as follows:

Joint Resolution Petitioning the Congress of the United States To Defeat and Reject the Extreme and Harmful Changes in Timber Taxation Proposed by the Secretary of the Treasury

Whereas capital gains tax treatment of timber under the Internal Revenue Code has been the major factor responsible for the vast progress of North Carolina in forest management and the growth of forest resources during the past half century; and

Whereas the substantial elimination of capital gains treatment for the owners of forest lands would constitute the most severe setback in this generation to the growth of forest products; and

Whereas the jobs of thousands of employees and many hundreds of communities are affected by the forest industries of North Carolina and are jeopardized by the proposed elimination of capital gains treatment of timber; and

Whereas there have been large sums of private and public money invested in reforestation for timber production and soil and water conservation; and

Whereas the proposed change in the income tax law would break faith with those participating in such programs: Now, therefore, be it

Resolved by the senate, the house of representatives concurring:

Section 1. That the legislators of the State of North Carolina petition the Congress of the United States to defeat and reject the extreme and harmful changes in timber taxation proposed by Secretary of the Treasury Dillon to the Ways and Means Committee of the House of Representatives on February 6, 1963.

Sec. 2. This resolution shall become effective upon its adoption.

In the general assembly read three times and ratified, this the 12th day of April 1963.

T. Clarence Stone,
President of the Senate.
H. Clifton Blue,
Speaker of the House of Representatives.

NATIONAL LIBRARY WEEK

Mr. GOODLING. Mr. Speaker, I ask unanimous consent that the gentleman from Massachusetts [Mr. Conte] may extend his remarks at this point in the Record and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. CONTE. Mr. Speaker, as you know, yesterday marked the beginning of another National Library Week. I would like to say a few words this afternoon on this topic about which enough can never be said. I refer to the wonderful world of books and the continuing growth of the mind through the free use of libraries in the United States.

Libraries all over the country will this week display various exhibitions and stress the great importance of reading. The freedom-to-read, Mr. Speaker, is one of the great freedoms the human being possesses. On this week particularly, I recall the many great libraries that exist in the First District of Massachusetts, one of the Nation's great areas of academic accomplishment. From the beautiful Berkshire hills of Pittsfield to the great urban city of Holyoke, citizens of my district daily take advantage of our great libraries. In a city like Northampton, for example, the Calvin Coolidge Room attracts visitors from all over the Nation at the great Forbes library. In Amherst, at the Jones library, we have the finest collection of Robert Frost material extant and on and on.

I could name libraries for almost every community. I have visited most of them and have been greatly impressed. This week then, Mr. Speaker, is a great historic week not only in my district but in the entire Nation. I want to take this opportunity to salute National Library Week and hope that we will continue to be a Nation of readers every week of every year.

INTRODUCTION OF H.R. 5733, ADMINISTRATION BILL TO AUTHORIZE FUNDS FOR NATIONWIDE FOOD STAMP PROGRAM

The SPEAKER pro tempore (Mr. Libonati). Under previous order of the House, the gentlewoman from Missouri [Mrs. Sullivan] is recognized for 30 minutes.

Mrs. SULLIVAN. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and to include extraneous material and the text of H.R. 5733.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Missouri?

There was no objection.

Mrs. SULLIVAN. Mr. Speaker, I have today introduced H.R. 5733, the Kennedy administration bill to authorize funds for a nationwide food stamp program similar to the program now in operation on a pilot basis in 31 of our cities and counties.

I have battled for such a nationwide program for 9 years, since introducing my first bill on this subject in the second session, my first term in Congress. The issue came to a vote several times; and in 1959, Congress, for the first time, agreed to the idea of a food stamp plan. I shall never forget the help I received at that time from so many of the Members of the House, including the present Speaker, and including particularly, the chairman of the House Committee on Agriculture, the gentleman from North Carolina, Harold D. Cooley.

Thus, I was deeply touched and most grateful when the gentleman from North Carolina, Chairman Cooley, deferred to me in the matter of sponsorship of this administration measure, which normally would carry his name as the chairman of the committee which will consider it. It is one of the most flattering things which has ever occurred to me in the House—that a committee chairman would so gallantly step aside to allow a Member not even on his committee to introduce what I am sure will be one of the most popular of the Kennedy administration measures to be acted upon in this Congress.

WHY A NEW BILL IS NEEDED

Let me explain why a bill is necessary. The legislation we passed in 1959 would have provided authority for only 2 years for a program which consisted of distributing only those foods found by the Secretary of Agriculture to be in surplus in any 1 month. This authority was never used by the previous administration.

The Kennedy administration is operating the present pilot food stamp projects, which include all domestic foods sold in grocery stores, under the general authority of section 32, of Public Law 320, 74th Congress, using money earmarked from customs receipts for removal from the market of surplus agricultural commodities. If the food stamp plan were to be permanently limited in scope only to a size which could be financed entirely by section 32 money, there would be no need for additional fund authorizations.

But to extend the plan nationally would take all of the money now provided for each year under section 32—money used now for a variety of surplus removal programs. There would then be no section 32 funds left over for school lunch purposes, or removal of surplus perishables on an emergency basis.

Thus, new enabling legislation is necessary to authorize appropriation of the full amount of funds needed to extend the food stamp plan nationally. This is estimated to cost about $360 million a year, although much of this cost would be offset by savings elsewhere in the Department budget. If this bill becomes law, funds would then be appropriated in the regular departmental appropriation bill each year for the food stamp plan rather than be drawn, as now, out of section 32 money.

SUPERIORITY OVER DIRECT DISTRIBUTION SYSTEM

Over a period of years, I tried to persuade the Eisenhower administration to adopt the food stamp method of distribution of surplus food to the needy, through the regular grocery stores, in preference to the direct method of distribution which resulted in so much expense to local communities participating, so little help to the needy, and so many opportunities for abuse. But the previous administration insisted the food stamp approach was terribly wrong, and less efficient, and more costly, and not nearly as effective as the direct method of distribution. The former Secretary of Agriculture flatly refused to consider a food stamp method of distribution, even after Congress, in 1959, passed my bill as an amendment to Public Law 480, authorizing, for 2 years, a limited program which would have been restricted to just those foods determined by the Secretary to be in surplus in any month.

Mr. Speaker, I am proud as a member of President Kennedy's party that his first Executive order on becoming President was to order a better method of distribution of surplus foods to the needy, and addition of a greater variety of foodstuffs to the distribution list each month—more of the foods which would have been included under the food stamp program passed by Congress. Shortly thereafter he agreed to ask the Secretary of Agriculture to institute a series of pilot food stamp operations to determine if a food stamp plan were feasible and more effective than the direct distribution programs.

The success of the pilot plan operations has been outstanding. It is true that in every new area where the plan has been instituted—including my own city of St. Louis—many problems arose in connection with the certification of eligibles, and the requirements instituted by the Secretary of Agriculture for purchase by recipients of food stamps equal in value to their normal expenditures for food, in order to receive additional stamps free.

Many of those eligible for participation complained that the requirements on stamp purchases were far too rigid, and did not take into consideration unusually high costs for individual families, such as rent, medical expenses, and so on. I am pleased to report that these problems are being worked out—I hope satisfactorily for all concerned—and if there is still too much rigidity in the regulations, they can be further improved and amended.

NOT A DISGUISED INCREASE IN INCOME

The food stamp plan has come as something of an unhappy development for those who had hoped it would make available to them more money out of their limited incomes to spend on things other than food. As the Department of Agriculture has tried to make clear, the plan is, by law, a method of increasing food consumption among those families not enjoying an adequate diet, and cannot be used as a device for enabling welfare recipients to use for other purposes some of the money they would normally spend for food. I think the welfare allowances in many areas of the country, including Missouri, are far too low to permit families to maintain even minimum standards, but this problem cannot be solved through a food stamp plan, or even by providing free food.

On the other hand, since we have these simply huge surpluses of food items which overhang the agricultural economy and depress prices, and which cost the Government as much as a billion dollars a year to store and billions of dollars in price supports each year, it is simply indefensible to have any of this food go to waste while we have underfed and undernourished Americans. Every American deserves a decent diet. This plan enables our needy to obtain good, balanced diets.

The food stamp plan has been a tremendous success in every area of the country where it has been in effect long enough for local problems to be worked out and special adjustments made. And, as Secretary of Agriculture has reported, in a letter to the Speaker which I am including as part of my remarks today, this plan on a national basis would not only raise standards of nutrition, and improve diets, and sell more food—aiding every level of the food industry—but would, to a large extent, pay for itself in reducing costs which the Government now must sustain in food storage, and in the direct distribution program.

COMMUNITIES ACTIVELY SEEKING PLAN'S EXTENSION

I am also submitting, as part of my remarks, Mr. Speaker, a list of the 31 areas where pilot food stamp programs are now in operation; and another list—9 pages long—of the counties and local communities which are actively seeking to have the food stamp program extended to their areas. This is perhaps the best evidence of all the superiority of the food stamp plan over the direct distribution method.

Many areas of the country, which are not depressed areas and do not have sufficiently large numbers of unemployed to justify the expenses of participating in the direct distribution system, nevertheless do have many needy people who need help in obtaining an adequate diet, and who could be included at little local expense if there were a food stamp plan in operation. The food stamp plan can reach needy Americans wherever they live—in their home communities. The direct distribution system cannot and does not.

EVERYONE BENEFITS UNDER A STAMP PLAN

Hence, the way to assure the sharing of our abundance of food to all needy Americans is through such a plan, operating through the neighborhood grocery store, and open to any and all Americans who can qualify under the income limitations, and who are willing to do their part by voluntarily earmarking a reasonable part of their own budgets for food purchases, in order to qualify for the extra stamps which will assure them a well-rounded, nourishing, and attractive variety of foods.

The farmer will benefit both by selling more food, and by having more of the section 32 money available for surplus removal emergencies; the Government will save on farm price support and food storage costs, our municipalities will save substantially in the costs they now must underwrite for surplus food distribution, and the recipients, who will benefit most, will be able to obtain all of their food needs in the nearby stores, rather than have to go miles to a central depot for bulky gift packages of the few items available once each month.

I urge prompt action by the Committee on Agriculture on this bill.

LETTER FROM SECRETARY OF AGRICULTURE FREEMAN

Mr. Speaker, I now submit as part of my remarks a copy of the letter sent by Secretary of Agriculture Orville L. Freeman to our Speaker, in forwarding to the House of Representatives the draft of proposed legislation which I have now introduced as H.R. 5733. The Secretary's letter to the Speaker is as follows:

DEPARTMENT OF AGRICULTURE,
Washington, April 17, 1963.

Hon. JOHN W. MCCORMACK,
Speaker of the House of Representatives,
Washington, D.C.

DEAR MR. SPEAKER: Enclosed for the consideration of the Congress is a draft of a proposed bill which authorizes the operation of a food stamp program.

The submission of this proposed bill is a result of experience gained by this Department in the operation of a series of pilot food stamp programs. These pilot operations were inaugurated in mid-1961 at the request of the President and were conducted under the authority of Section 32 of Public Law 320, 74th Congress, as amended. Currently, the program is being further tested in a total of 31 separate areas under a wide variety of operating conditions. Additional areas have been designated for inclusion later this fiscal year. A series of studies designed to determine the impact of the program on family food purchases have been made or are underway. Furthermore, administrative and operating techniques are being tested and evaluated so as to provide the Department with the experience necessary to effectively operate the type of program provided in the proposed bill.

The Department recommends favorable action on this proposed bill.

The food stamp program is designed to strengthen the agricultural economy, help achieve a fuller and more effective use of food abundance, and to improve levels of nutrition among those households in economic need. These purposes are achieved by increasing the limited food buying ability of such households. The program will be operated through normal channels of trade.

Under such a program, needy households are provided with an opportunity to purchase—at a charge that is equivalent to the amounts of money they could normally be expected to spend for food—an allotment of coupons of higher monetary value. The Federal Government finances the cost of the coupons which are provided free of charge. The purchase of coupons by participating households is designed to insure that the additional coupons provided free of charge to such households actually results in increased food purchases through normal trade channels.

Coupons issued to participating households may be used by them only to purchase food out of regular commercial supplies at retail food stores. Coupons accepted by such stores are redeemed through wholesale food concerns or directly through banks. The proposed bill also provides for the undertaking of an educational program to encourage participating households to purchase foods available in abundant supply and those most needed in diets.

Studies conducted by this Department during the pilot program indicate that a food stamp program is practicable in terms of its administrative and operating aspects and is effective in expanding food markets and in improving the diets of participating households.

A survey conducted in a sample of retail food stores in the eight original pilot programs showed that the dollar volume of food sales increased by 8 percent after the inauguration of the food stamp program. The stores included in this survey represented an estimated 50 to 85 percent of total retail food store sales in all of the original eight pilot areas except Detroit. There, the survey stores were drawn from low-income areas of the city. Meats, produce, and other grocery items shared in the increase in food sales and the smaller retail stores were able to attract a reasonable proportion of the coupon business.

A second survey undertaken in two of the original pilot areas showed that households participating in the pilot food stamp program made significant increases in food purchases and in the total value of food used after they started to participate in the pilot food stamp program. This information was collected through a detailed investigation of food consumption among a representative sample of households in April–May of 1961, before the inauguration of the pilot food stamp program, and in September–October of that year when the pilot program had been in operation for some time.

Animal products—such as meat, poultry, fish, milk, and eggs—and fruits and vegetables accounted for more than 80 percent of these gains in the value of food used. These are the foods most needed for dietary improvement and a shift of more of our agricultural resources into the production of such foods would help to strengthen the agricultural economy.

This survey also showed that a food stamp program is especially effective in providing assurance that the Federal contribution (in the form of the coupons provided free of charge to eligible households) actually resulted in an increase in food purchases by participating households. A special analysis of the data derived from this survey showed that approximately 85 to 95 percent of the Federal contribution to participating households was reflected in increased food purchases in retail stores. This level of effectiveness is considered to be about the maximum to be expected under any program designed to expand markets for food.

These two household food consumption surveys also showed that there was a substantial improvement in the quality of diets among households participating in the program. From nearly two-fifths to almost one-half of these households had good diets in September-October under the food stamp program. Only slightly more than one-fourth of these households had good diets in April-May before the food stamp program was inaugurated.

It is clear that farmers have a definite stake in any program which expands markets and results in increased food sales, even though no one program can be relied upon to strengthen our agricultural economy. A food stamp program appears to be an effective way of increasing total food consumption by economically needy households and in concentrating these increases in animal products and fruits and vegetables. Increases in markets for these foods will help to relieve the general problem of overcapacity in agriculture. Particularly, increased markets for animal products would use more feed grains and, thus, a food stamp program could make an important contribution to the total effort to bring our feed grain supplies into balance with demand.

The proposed bill to authorize a food stamp program would provide for the gradual extension of such a program to those political subdivisions in which the various States wish to conduct such a program. The distribution of federally owned foods to needy households would be discontinued in those subdivisions participating in the food stamp program but such distribution would continue to be made to eligible schools and institutions in those areas.

It is not contemplated that the food stamp program would be restricted to designated areas of economic distress because it is designed to improve diets of needy households wherever they may reside. However, as indicated by our experience under the donation of federally owned foods to needy families, we anticipate that many political subdivisions would not feel the need to participate in the program. Therefore, we estimate that, with a continuation of current economic conditions, the program could be reaching approximately 4 million needy persons within a period of 5 years following the passage of this bill. By that time, it is also estimated that the cost of the food stamp program would be approximately $360 million a year, exclusive of Federal administrative expenses. Such costs would be offset in substantial part by the discontinuance of Federal food donations to needy households in political subdivisions participating in the food stamp program and would tend to reduce the total nationwide cost of this direct distribution program. Also, in accordance with the requirements of Public Law 801, 84th Congress, there is enclosed a table showing estimates of man-years of civilian employment, expenditures for personal services, and expenditures for all other purposes.

Recommendations for the implementation of this program would be made within the framework of the annual budget and fiscal policies of the President.

There is also enclosed a detailed section-by-section analysis of the proposed bill which describes the type of program to be operated and the manner in which it will be conducted.

The Bureau of the Budget advises that the enactment of this proposed legislation would be in accord with the President's program.

A similar letter is being sent to the President of the Senate.

Sincerely yours,

ORVILLE L. FREEMAN,
Secretary.

TEXT OF H.R. 5733

Mr. Speaker, following is the text of H.R. 5733, the provisions of which are referred to in the Secretary's letter above:

[88th Cong., 1st sess.]

H.R. 5733

(In the House of Representatives, April 22, 1963; Mrs. SULLIVAN introduced the following bill; which was referred to the Committee on Agriculture.)

A bill to strengthen the agricultural economy; to help to achieve a fuller and more effective use of food abundances; to provide for improved levels of nutrition among economically needy households through a program of food assistance to be operated through normal channels of trade; and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as "The Food Stamp Act of 1963."

DECLARATION OF POLICY

SEC. 2. It is hereby declared to be the policy of Congress, in order to promote the general welfare, that the Nation's abundance of food should be utilized to the maximum extent practicable to safeguard the health and well-being of the Nation's population and raise levels of nutrition among economically needy households. The Congress hereby finds that increased utilization of foods in establishing and maintaining adequate national levels of nutrition will tend to cause the distribution in a beneficial manner of our agricultural abundances and will strengthen our agricultural economy, as well as result in more orderly marketing and distribution of food. To effectuate the policy of Congress and the purposes of this Act, a food stamp program, which will permit those households in economic need to receive a greater share of the Nation's food abundance, is herein authorized.

DEFINITIONS

SEC. 3. As used in this Act—

(a) The term "Secretary" means the Secretary of Agriculture.

(b) The term "food" means any food or food product for human consumption other than alcoholic beverages and tobacco.

(c) The term "coupon" means any coupon, stamp, or type of certificate issued pursuant to the provisions of this Act.

(d) The term "coupon allotment" means the total value of coupons to be issued to a household during each month or other time period.

(e) The term "household" shall mean a group of related or nonrelated individuals, who are not residents of an institution or boarding house, but are living as one economic unit sharing common cooking facilities and for whom food is customarily purchased in common. The term "household" shall also mean a single individual living alone who has cooking facilities and who purchases and prepares food for home consumption.

(f) The term "retail food store" means an establishment, including a recognized department thereof, or a house-to-house trade route which sells food to households for home consumption.

(g) The term "wholesale food concern" means an establishment which sells food to retail food stores for resale to households.

(h) The term "State agency" means the agency of the State government which has responsibility for the administration of the Federally-aided public assistance programs.

(i) The term "bank" means member or nonmember banks of the Federal Reserve System.

(j) The term "State" means the fifty States and the District of Columbia.

(k) The term "food stamp program" means any program promulgated pursuant to the provisions of this Act.

ESTABLISHMENT OF THE FOOD STAMP PROGRAM

Sec. 4. (a) The Secretary shall formulate and administer a food stamp program under which eligible households shall be provided with an opportunity more nearly to obtain a nutritionally adequate diet through the issuance to them of a coupon allotment which shall have a greater monetary value than their normal expenditures for food as determined by the Secretary. The coupons so received by such households shall be used only to purchase food from retail food stores which have been approved for participation in the food stamp program. Coupons issued and used as provided in this Act shall be redeemable at face value by the Secretary through the facilities of the Treasury of the United States.

(b) The Secretary shall, from time to time, issue such regulations, not inconsistent with this Act, as he deems necessary or appropriate for the effective and efficient administration of the food stamp program.

ELIGIBLE HOUSEHOLDS

Sec. 5. (a) Households eligible to participate in the food stamp program shall be those whose economic status is such as to be a substantial limiting factor in the attainment of a nutritionally adequate diet.

(b) Each State shall establish standards to determine the eligibility of applicant households which standards, among other things, shall take into account such of the factors used by each State in granting assistance under the federally aided public assistance programs as the Secretary determines will tend to effectuate the purposes of the food stamp program. The standards of eligibility to be used by each State for the food stamp program shall be subject to the approval of the Secretary.

ISSUANCE AND USE OF COUPONS

Sec. 6. (a) The Secretary shall cause coupons to be printed in such denominations as he may determine, and shall make provision for their issuance only to households which have been duly certified as eligible to participate in the food stamp program.

(b) Coupons issued to eligible households shall be used by them only to purchase food in retail food stores which have been approved for participation in the food stamp program.

VALUE OF THE COUPON ALLOTMENT AND CHARGES TO BE MADE

Sec. 7. (a) The face value of the coupon allotment which the Secretary shall authorize State agencies to issue to households certified as eligible to participate in the food stamp program shall be in such amount as will provide such households with an opportunity more nearly to obtain a nutritionally adequate diet.

(b) Households shall be charged such portion of the face value of the coupon allotment issued to them as the Secretary determines is equivalent to their normal expenditures for food.

(c) The value of the coupon allotment provided to any eligible household which is in excess of the amount charged such households for such allotment shall not be considered to be income or resources for any purpose under any Federal or State laws including but not limited to, laws relating to taxation, welfare, and public assistance programs.

(d) Funds derived from the charges made for the coupon allotment shall be promptly deposited in a manner prescribed by the Secretary in the regulations issued pursuant to this Act, in a separate account maintained in the Treasury of the United States for such purpose. Such deposits shall be available, without limitation to fiscal years, for the redemption of coupons.

APPROVAL OF RETAIL FOOD STORES AND WHOLESALE FOOD CONCERNS

Sec. 8. (a) The Secretary shall provide in the regulations issued pursuant to this Act for the submission of applications for approval by retail food stores and wholesale food concerns which desire to participate in the food stamp program and shall approve those applicants whose participation he determines will effectuate the purposes of the food stamp program. In determining the qualifications of applicants the Secretary shall consider, among such other factors as he may deem appropriate, the following: (1) the nature and extent of the retail or wholesale food business conducted by the applicant; (2) the volume of coupon business which may reasonably be expected to be conducted by the applicant retail food store or wholesale food concern; and (3) the business integrity and reputation of the applicant. Approval of an applicant shall be evidenced by the issuance to such applicant of a nontransferable certificate of approval.

(b) The Secretary shall in the regulations issued pursuant to this Act, require an applicant retail food store or wholesale food concern to submit information which will enable him to determine whether such applicant qualifies, or continues to qualify, for approval under the provisions of this Act or the regulations issued pursuant to this Act. The Secretary shall provide in the regulations issued pursuant to this Act for safeguards which restrict the use or disclosure of information obtained under the authority granted by this subsection to purposes directly connected with administration and enforcement of the provisions of this Act or the regulations issued pursuant to this Act.

(c) Any retail food store or wholesale food concern which has failed upon application to receive the approval of the Secretary to participate in the food stamp program may obtain a hearing on such refusal as provided in section 13 of this Act.

REDEMPTION OF COUPONS

Sec. 9. In the regulations issued pursuant to this Act, the Secretary shall provide for the redemption of coupons accepted by retail food stores through approved wholesale food concerns or through banks, with the cooperation of the Treasury Department.

ADMINISTRATION

Sec. 10. (a) In the formulation and administration of the food stamp program, the Secretary is authorized to enlist the cooperation of existing Federal, State, local or private agencies and may utilize such agencies in the undertaking of an educational program to encourage the purchase of foods available in abundant supply or those most needed in diets, and to improve nutritional knowledge of households participating in the program.

(b) The Secretary may exercise any power, duty, or discretion vested in him under this Act through such person or persons as he may designate.

(c) The State agency of each participating State shall assume responsibility for the certification of applicant households and for the issuance of coupons: *Provided*, That the State agency may, subject to approval by the Secretary, delegate its responsibility in connection with the issuance of coupons to another agency of the State government. There shall be kept such records as the Secretary may determine are necessary for him to ascertain whether the program is being conducted in compliance with the provisions of this Act and the regulations issued pursuant to this Act. Such records shall be available for inspection and audit by the Secretary at any reasonable time and shall be preserved for such period of time, not in excess of three years, as the Secretary determines is necessary or appropriate.

(d) In the administration of the food stamp program the State agency shall not discriminate against any household by reason of race, religious creed, national origin or political beliefs.

(e) Participating States or participating political subdivisions thereof shall not decrease welfare grants or other similar aid extended to any person or persons as a consequence of such person's or persons' participation in benefits made available under the provisions of this Act or the regulations issued pursuant to this Act.

(f) The State agency of each State desiring to participate in the food stamp program shall submit for the approval of the Secretary a plan of operation specifying the manner in which such program will be conducted within the State, the political subdivisions within the State in which the State desires to conduct the program, and the effective dates of participation by each such political subdivision. In addition, such plan of operation shall provide, among such other provisions as the Secretary may by regulation require, the following: (1) the specific standards to be used in determining the eligibility of applicant household; (2) that the State agency shall undertake the certifications of applicant households in accordance with the general procedures and personnel standards used by them in the certification of applicants for benefits under the federally aided public assistance programs; (3) safeguards which restrict the use or disclosure of information obtained from applicant households to persons directly connected with the administration or enforcement of the provisions of this Act or the regulations issued pursuant to this Act; and (4) for the submission of such reports and other information as the Secretary may from time to time require.

(a) If the Secretary determines that in the administration of the program there is a failure by a State agency to comply substantially with the provisions of this Act, or with the regulations issued pursuant to this Act, or with the State plan of operation, the Secretary shall inform such State agency of such failure and shall allow the State agency a reasonable period of time for the correction of such failure. Upon the expiration of such period, the Secretary may require that there be no further issuance of coupons in the political subdivisions where such failure has occurred until such time as corrective action satisfactory to the Secretary has been taken.

DISQUALIFICATION OF RETAIL FOOD STORES AND WHOLESALE FOOD CONCERNS

Sec. 11. Any approved retail food store or wholesale food concern may be disqualified from further participation in the food stamp program, on a finding by the Secretary that such store or concern has violated any of the provisions of this Act, or of the regulations issued pursuant to this Act. Such disqualification shall be for such period of time as the Secretary may determine. The action of disqualification shall be subject to review as provided in section 13 of this Act. *Provided*, That, notwithstanding any of the other provisions of this section or of section 13 of this Act, if the Secretary has reason to believe that a serious or flagrant violation of this Act or of the regulations issued pursuant to this Act, has occurred or that there are facts or circumstances of a nature which indicate a lack of ability or willingness on the part of such store or concern to carry out properly the provisions of the program, he may suspend such store or concern without advance notice or hearing for such period, not in excess of 90 days, as may be required to complete an investigation and take such administrative action as may be found appropriate by the Secretary. Such suspension action shall not constitute a final determination for the purpose of section 13 of this Act.

DETERMINATION AND DISPOSITION OF CLAIMS

SEC. 12. The Secretary shall have the power to determine the amount of and settle and adjust any claim and to compromise or deny all or part of any such claim or claims arising under the provisions of this Act or the regulations issued pursuant to this Act.

ADMINISTRATIVE AND JUDICIAL REVIEW

SEC. 13. Whenever the Secretary (a) determines that a retail food store or a wholesale food concern should not be approved to participate in the food stamp program, (b) disqualifies a retail food store or a wholesale food concern under the provisions of section 11 of this Act, or (c) directs the denial, under the provisions of section 12 of this Act, of all or part of any claim of a retail food store or wholesale food concern, he shall cause notice of such administrative action to be issued to the retail food store or wholesale food concern involved. Such notice shall be delivered by certified mail or personal service. If such store or concern is aggrieved by the action of the Secretary, it may, in accordance with regulations promulgated by the Secretary, within ten days of the date of delivery of such notice, file a written request for an opportunity to submit information in support of its position to such person or persons as the Secretary may designate. If such a request is not made or if such store or concern fails to submit information in support of its position after filing a request, the administrative determination of the Secretary shall be final. If such a request is made by such store or concern, such information as may be submitted by the store or concern, as well as such other information as may be available to the Secretary, shall be reviewed by the person or persons designated by the Secretary, who shall, subject to the right of judicial review hereinafter provided, make a determination which shall be final. If the store or concern feels aggrieved by such final determination of the person or persons designated by the Secretary he may obtain judicial review thereof, without regard to the amount in controversy, by filing a complaint against the United States in the United States District Court for the District in which he resides or is engaged in business within thirty days after the date of delivery or service of the final notice of determination upon him, requesting the court to set aside such determination. Service of process in such action shall be made in accordance with the rules for the service of process upon the United States as prescribed by the Rules of Civil Procedure for the United States District Courts. The copy of the summons and complaint required to be delivered to the official or agency whose order is being attached shall be sent to the Secretary or such person or persons as he may designate to receive service of process. The action in the United States District Court shall be a trial de novo by the Court without a jury, in which the Court shall determine the validity of the questioned administrative action in issue. If the Court determines that such administrative action is invalid it shall enter such judgment or order as it determines is in accordance with the law and the evidence. During the pendency of such judicial review, or any appeal therefrom, the administrative action under review shall be and remain in full force and effect, unless on application to the Court on not less than 10 days notice, and after hearing thereon and a showing of irreparable injury, the Court temporarily stays such administrative action pending disposition of such trial or appeal.

VIOLATIONS AND ENFORCEMENT

SEC. 14. (a) Notwithstanding any other provisions of this Act, the Secretary may provide for the issuance or presentment for redemption of coupons to such person or persons, and at such times and in such manner, as he deems necessary or appropriate to protect the interests of the United States or to insure enforcement of the provisions of this Act or the regulations issued pursuant to this Act.

(b) In addition to the jurisdiction vested in the United States District Courts by section 13 of this Act, such courts are hereby severally vested with jurisdiction specifically to enforce, and to prevent and restrain any person from violating, the provisions of this Act or the regulations issued pursuant to this Act. If and when the Secretary shall so request, it shall be the duty of the several United States Attorneys in their respective districts, acting under the direction of the Attorney General, to institute proceedings to enforce the remedies provided for in this Act or the regulations issued pursuant to this Act, to represent the United States in any action for judicial review of any final administrative determination made under the provisions of section 13 of this Act, or to effect collection of any claims or indebtedness determined to be due the United States by the Secretary under the provisions of this Act or the regulations issued pursuant to this Act.

(c) Whoever knowingly uses, transfers, acquires or possesses coupons in any manner not authorized by this Act or the regulations issued pursuant to this Act shall, if such coupons are of the value of $100 or more, be guilty of a felony and shall, upon conviction thereof, be fined not more than $10,000 or imprisoned for not more than five years, or both, or, if such coupons are of a value of less than $100, shall be guilty of a misdemeanor and shall, upon conviction thereof, be fined not more than $5,000 or imprisoned for not more than one year, or both.

(d) Whoever presents, or causes to be presented, coupons for payment or redemption of the value of $100 or more, knowing the same to have been received, transferred or used in any manner in violation of the provisions of this Act or the regulations issued pursuant to this Act shall be guilty of a felony and shall, upon conviction thereof, be fined not more than $10,000 or imprisoned not more than five years, or both, or, if such coupons are of a value of less than $100, shall be guilty of a misdemeanor and shall, upon conviction thereof, be fined not more than $5,000 or imprisoned for not more than one year, or both.

(e) Coupons issued pursuant to this Act shall be deemed to be obligations of the United States within the meaning of title 18, United States Code, section 8.

PAYMENTS TO STATE AGENCIES

SEC. 15. The Secretary is authorized, in accordance with the formula specified in this section, to make payments to State agencies for the purpose of reimbursing such agencies for part of the costs incurred in the certification of those households which are not receiving benefits under the federally aided public assistance programs. The amount of such payment to any one State agency shall be 50 per centum of the sum of: (1) the direct salary costs (including the cost of such fringe benefits as are normally paid to its personnel by the State agency) of the personnel used to make such interviews and such postinterview field investigations as are necessary to certify the eligibility of such households, and of the immediate supervisor of such personnel, for such periods of time as they are employed in certifying the eligibility of such households; (2) travel and related costs incurred by such personnel in postinterview field investigations of such households; and (3) an amount not to exceed 25 per centum of the costs computed under (1) and (2) above.

APPROPRIATIONS

SEC. 16. (a) There are hereby authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act. Such portion of any such appropriation as may be required to pay for the value of the coupon allotments issued to eligible households which is in excess of the charges paid by such households for such allotments shall be transferred to and made a part of the separate account created under section 7(d) of this Act.

(b) In any fiscal year, the Secretary shall limit the value of those coupons issued which is in excess of the value of coupons for which households are charged, to an amount which is not in excess of the portion of the appropriation for such fiscal year which is transferred to the separate account under the provisions of subsection (a) of this section.

(c) If the Secretary determines that any of the funds in the separate account created under section 7(d) of this Act are no longer required to carry out the provisions of this Act, such portion of such funds shall be paid into the miscellaneous receipts of the Treasury.

SECTION-BY-SECTION ANALYSIS OF H.R. 5733

Mr. Speaker, in his letter above, the Secretary of Agriculture referred to the section-by-section analysis of a draft of legislation he was submitting for introduction in the House to authorize funds for a nationwide food stamp program. The analysis referred to is as follows:

SECTION-BY-SECTION ANALYSIS OF PROPOSED BILL, THE FOOD STAMP ACT OF 1963

SECTION 2

This section declares it to be the policy of Congress to make maximum use of our abundance of food to improve the health and well-being of the Nation's population. It finds that the operation of a stamp program, as one part of our national food and agricultural program, will help maintain adequate levels of nutrition, strengthen our agricultural economy, and result in a more orderly marketing of food.

SECTION 3

This section of the proposed bill provides definitions for the purposes of a Food Stamp Act.

For purposes of such an act, food would be defined as any food for human consumption and all such foods would be eligible for purchase with food coupons (subsec. b). To avoid any misunderstanding as to intent, however, the wording of the subsection specifically excludes alcoholic beverages and tobacco as coming within the meaning of this definition of food.

The section defines the term "State agency" as the agency of the State government which has responsibility for the administration of the federally aided public assistance programs. The term "State agency" is intended to include the State and local offices of that agency or, in those States where the federally aided public assistance programs are administered on a decentralized basis, the counterpart county or local agencies which have responsibility for the administration of such assistance programs. Under section 10 of the bill, these States agencies are required to assume responsibility for the certification of households making application for the program.

Subsection (j) of this section defines "State" as the 50 States and the District of Columbia. In view of the intent to provide for a gradual expansion of the food stamp program over a period of years, it is recommended that action authorizing the possible operation of the program in any of the territories or possessions be held for later review and decision by the Congress.

SECTION 4

A general description of the type of food stamp program authorized by this bill is included in section 4. The type of stamp program described is the type which has been tested on a pilot basis by the Department of Agriculture since mid-1961 under the authority of section 32 of the act of August 24, 1935, as amended.

This section also would authorize the Secretary of Agriculture to issue regulations governing the operation of a food stamp program.

SECTION 5

This section of the bill limits eligibility for the program to economically needy households, i.e., those households whose economic status is a substantial limiting factor in their ability to attain an adequate diet.

The section further provides that States shall establish specific eligibility standards which will measure the economic need of applicant households, taking into account the general standards and other factors they use in providing welfare assistance to needy persons and households. However, all such standards must be approved by the Secretary of Agriculture to insure they will effectuate the purposes of the food stamp program.

SECTION 6

Under the authority of this section, the Secretary of Agriculture would provide for the printing of food coupons and their issuance to eligible households. Under the pilot food stamp program, coupons have been printed by the Bureau of Engraving and Printing of the Treasury Department and it is intended that this arrangement be continued if this enabling legislation is authorized by the Congress.

This section also limits the use of coupons to the purchase of food in retail food stores which have been approved to accept such coupons.

SECTION 7

Section 7 of the bill specifically provides that eligible households shall be charged for a portion of the coupons provided to them. Such charges shall be based upon the household's normal expenditures for food. In return, the household will receive some coupons free of charge and in this manner, they are able to buy more food.

The stamp program is specifically designed as a food program. It is not intended to act as a general income supplement to low-income households. Its purpose is to permit these needy households to buy more food and to improve the nutritional quality of their diets rather than to help them to save on their food expenditures. It is for this reason that participating households are required to exchange the amount of money they normally could be expected to spend for food for coupons of equal value before they are provided with additional coupons free of charge.

This section also provides that the coupons provided free of charge are not to be considered to be income to the households for purposes of the Social Security Act and other Federal and State statutes. This provision is deemed necessary to make certain that additional food purchasing power provided to needy households under a stamp program does not automatically result in a reduction in benefits under programs where income determines the availability or amount of such benefits. Likewise, the value of free coupons would not be subject to income taxes.

A separate food stamp account would be established in the Treasury of the United States. All sums collected from participating households would be deposited in this separate account and would be available to redeem the coupons accepted by retail food stores. Section 16 of the bill would authorize a transfer of funds, out of each annual appropriation for the program, to this same account to provide funds for the redemption of those coupons which are issued free of charge to participating households.

SECTION 8

This section of the bill specifies the procedures and conditions under which retail food stores and wholesale food concerns would make application to the Department of Agriculture for approval to accept food coupons. Approved retailers would obtain such coupons in payment for food purchased by participating households. These retailers could redeem coupons through the commercial banking system or they could redeem coupons through the approved wholesale food concerns.

Any information which the retailer or wholesaler would be required to provide the Department on the volume of his business could be utilized by the Department only for purposes directly connected with the administration and enforcement of this act and regulations. Administrative and judicial review is provided in the event that the Department fails to approve the application of any retailer or wholesaler.

SECTION 9

This section of the bill specifically authorizes the use of the commercial banking system to redeem food coupons.

It is the intent of this section of the bill to provide for the same system of coupon redemption that is currently being used under the pilot food stamp program. Authorized retailers and wholesalers redeem coupons through commercial banks. These banks then redeem the coupons through Federal Reserve banks, which, under the provisions of section 15 of the Federal Reserve Act, are acting as fiscal agents of the Department of Agriculture. Federal Reserve banks examine coupons for genuineness, destroy the coupons, and call upon funds in a Treasury account to reimburse them for the value of coupons received from commercial banks.

SECTION 10

This section of the bill is concerned with legislative provisions for the administration of a food stamp program. Under it, the State agency responsible for the administration of the federally aided public assistance programs would assume responsibility for the certification of applicant households. That same agency would assume responsibility for the sale and issuance of food coupons, unless it was mutually agreed that coupon issuance responsibilities could be more effectively carried out by another agency of the State government. In either event, it would be possible for the State agency to contract with local government agencies, or with banks, for the actual sale and issuance of the food coupons.

The general administrative arrangement between the Department of Agriculture and the State public assistance agency would be the same as that used in the operation of the pilot food stamp program, which was patterned after that authorized in the Social Security Act. State agencies would submit for approval a plan of operation which would commit them to observe the requirements of the enabling legislation and the provisions of the Federal food stamp regulations. As well, the plans would specify the manner in which each State would carry out its certification and issuance responsibilities.

This section would further require that the State public assistance agency carry out its certification responsibilities under the same general procedures and merit system personnel standards as are required of such agencies by the Department of Health, Education, and Welfare in the administration of the federally aided public assistance programs. Within political subdivisions within each State, the certification responsibility would be carried out by the local offices of the State public assistance agency, or in those States where the federally aided public assistance programs are operated on a decentralized basis, by the counterpart local assistance agencies which now administer such federally aided programs.

While this section provides that the State public assistance agency assume full responsibility for the certification of applicant households, it is not the intent to preclude the possible use of casework information and records on the economic status of households which has been developed by other public agencies that are responsible for the granting of general assistance or relief.

This section further provides that, where necessary, the Secretary of Agriculture shall provide a State agency with reasonable opportunity to institute any necessary program or administrative corrective measures to bring its food stamp operations into compliance with Federal requirements, before the benefits of the food stamp program are withheld from eligible needy households within the State.

SECTION 11

Under this section of the bill, the Department of Agriculture has authority to disqualify from further participation in the program those retailers and wholesalers who have been found to be in violation of program requirements. Such disqualifications are subject to both administrative and judicial review under the provisions of section 13 of the bill.

SECTION 12

This section provides the Secretary of Agriculture with the power to settle claims arising out of the operation of a food stamp program.

SECTION 13

Section 13 specifies the administrative and judicial reviews available to a retail food store or a wholesale food concern in the event (a) the store or concern has failed to receive the approval of the Department to accept food coupons; (b) it is disqualified from further participation under the provisions of section 11 of this bill; or (c) it is denied a payment of a claim under the provisions of section 12.

Judicial review can be obtained through U.S. district courts.

SECTION 14

This section of the proposed legislation permits the Secretary to incorporate appropriate provisions in the Federal program regulations for the issuance or redemption of coupons at such times and in such manner as he may find necessary to protect the interest of the United States, and to facilitate enforcement of the provisions of the proposed Act and the Federal regulations.

Jurisdiction is conferred on the U.S. district courts to enforce the proposed act or the program regulations. The U.S. attorneys, acting under the direction of the Attorney General, are authorized to represent the Government, at the request of the Secretary, in any legal proceedings instituted in the several district courts under the proposed act.

Subsections (c) and (d) of this section impose criminal sanctions for violations of the proposed act and the Federal program regulations. The section also provides that coupons shall be deemed to be obligations of the United States within the meaning of title 18, United States Code, section 8, thus making applicable to food coupons all existing statutes relating to offenses involving obligations of the United States.

SECTION 15

To insure careful and effective certification of the eligibility of those households which are not receiving benefits under the federally aided public assistance programs, it is deemed necessary and in the interest of the Federal Government to assist State agencies in meeting a part of the cost of certifying such households for the food stamp program.

The amount of such payments will be computed under a formula which is prescribed in this section of the bill. The formula provides for arbitrarily computing the payment by taking 50 percent of the sum of (1) the salary costs of those caseworkers who are employed in the certification of nonassistance households and of the immediate supervisors of such caseworkers; (2) the travel costs incurred by these employees in field investigations of applicant households; and (3) an amount equal to 25 percent of the costs incurred in (1) and (2) above.

SECTION 16

This section of the bill authorizes an annual appropriation to carry out the provisions of the bill. The annual appropriation would be used to cover (1) all program costs, such as the value of coupons issued free of charge to households, related costs in the printing and shipment of coupons, and the payments to States authorized by section 15 of this bill; and (2) Federal administrative expenses.

Additionally, this section gives clear direction to the Secretary that the annual appropriation for the program is the basic factor which determines its size and scope and determines the rate at which it can be extended to those areas where the inauguration of such a program is warranted and requested by State agencies. Further, this section authorizes the Secretary of Agriculture to terminate the separate food stamp account maintained in the Treasury of the United States if such action is deemed necessary and appropriate at some future date.

U.S. DEPARTMENT OF AGRICULTURE, AGRICULTURAL MARKETING SERVICE—FOOD STAMP PROGRAM

Estimated maximum average annual positions of civilian employment and fund requirements

	Fiscal year—				
	1964	1965	1966	1967	1968
A. Average annual positions of civilian employment:					
1. Administrative support	19.7	48.7	71.3	88.3	97.1
2. Executive direction [1]	.1	.5	.5	.5	.5
3. Program functions	135.2	405.8	663.2	836.2	887.4
4. Total, average annual positions	[2] 155.0	455.0	[3] 735.0	[3] 925.0	[3] 985.0
B. Obligations:					
1. Personnel compensation	$1,050,000	$3,500,000	[3] $5,670,000	[3] $7,140,000	[3] $7,560,000
2. All other items	50,450,000	126,500,000	227,430,000	303,060,000	363,240,000
3. Total obligations	[2] 51,500,000	130,000,000	233,100,000	310,200,000	370,800,000

[1] Reflects portion of the time of those now performing this function that would be applied to this program.

[2] Reflects estimated cost for the pilot areas expected to be in operation by July 1, 1963, for which the 1964 budget proposes financing from sec. 32 funds until a direct appropriation is available.

[3] Would be offset in part through some reduction in direct distribution program.

AREAS WHICH NOW HAVE, WILL SOON HAVE, OR ACTIVELY SEEK TO HAVE FOOD STAMP PROGRAMS ESTABLISHED

Mr. Speaker, in preparing H.R. 5733 for introduction, I asked the Department for a full list of all of those areas of the country where the food stamp plan is in operation, or soon to be in operation, or where the States, counties, or municipalities have requested it. This list is as follows:

FOOD STAMP PROGRAM AREAS

ORIGINAL PILOT AREAS

County and State and date of opening

Franklin County, Ill., July 10, 1961.
Floyd County, Ky., June 1, 1961.
City of Detroit, Mich., July 5, 1961.
Parts of St. Louis and Itasca Counties, Minn., June 5, 1961, June 7, 1961.
Silver Bow County, Mont., June 1, 1961.
San Miguel County, N. Mex., June 5, 1961.
Fayette County, Pa., June 1, 1961.
McDowell County, W. Va., May 29, 1961.

ADDITIONAL AREAS DESIGNATED AND NOW OPERATING

County and State and date of opening

Jefferson County, Ala., March 11, 1963.
Independence County, Ark., April 2, 1963.
Humboldt County, Calif., March 1, 1963.
Vanderburgh County, Ind., April 1, 1963.
Knott County, Ky., December 3, 1962.
Perry County, Ky., March 4, 1963.
Avoyelles Parish, La., March 1, 1963.
Evangeline Parish, La., January 7, 1963.
Carlton County, Minn., March 4, 1963.
Remainder of St. Louis and Itasca Counties, Minn., November 1962.
City of St. Louis, Mo., January 2, 1963.
Nash County, N.C., November 1962.

LOCAL REQUESTS, FOOD STAMP PROGRAM

Source of request and specific area requested

Alabama

Judge Cargile; Fayette County.
C. H. Jackson, manager, Chamber of Commerce, Florence, Ala.; Lauderdale County.
William F. Baker, O. K. Wholesale Grocery Co., Montgomery, Ala.; Lauderdale County.
Milton Durrett, Alabama Food Council, Montgomery, Ala.; Lauderdale County.
J. I. Burnett; Etowah County.
B. H. Hall, chamber of commerce; Covington County.
J. L. Channell, mayor, city of Opp, Ala.; Covington County.
Clarence Weeks, national sales manager, Sessions Co., Inc., Enterprise, Ala.; statewide.

Arkansas

Sam Corder, Forrest City, Ark.; St. Francis County.
Walter E. Webb., secretary, Helena-West Chamber of Commerce, Helena, Ark.; statewide.

Colorado

Fred Sawaya; Castilla County, Huerfano County, Las Animas County.

District of Columbia

District of Columbia Commissioners, Rogers-Wilkins Milling Co., Washington, D.C.; District.

Georgia

Wholesale Grocers Association; statewide.
Ellsworth Hall, county attorney, Macon, Ga.; Bibb County.
William F. Pendleton, A. S. Pendleton Co., Valdosta, Ga.; Lowndes, County.
Emmett Snellgroye, county clerk, Bibb County.

Illinois

Gale Williams, State representative, Illinois State General Assembly; Alexander, Pulaski, Union, Jackman, Monroe, Randolph Counties.
Ralph Bradley, office of Gov. Otto Korner; city of Chicago.

Indiana

Robert P. Butler, Indiana Labor Commission; St. Joseph County.

Kentucky

Judge A. M. Bell; Owsley County.
C. A. Wolfe; Martin County.
Judge Cam Smith, Harlan, Ky.; Harlan County.
Judge Tom Carter, Grayson, Ky.; Carter County.
Judge Clyde Sayer; Magoffin County.
Judge Charles Porter; Elliott County.
Judge James E. Phipps; Morgan County.
Judge James M. Caudill; Letcher County.
Judge Sam P. Deaton; Breathitt County.
Judge W. C. Flannery; Rowan County.
Judge Jess Slusher; Bell County.
Judge Acey Cornett; Harlan County.

Louisiana

Iberia Parish police jury; Iberia Parish.
Lafayette Parish Chamber of Commerce, Lafayette Parish police jury; Lafayette Parish.
Franklin Parish police jury; Franklin Parish.
Jackson Parish police jury; Jackson Parish.
Vernon Parish police jury, Civitan Club; Vernon Parish.
Calcasieu Parish jury; Calcasieu Parish.
Jefferson Davis Parish police jury; Jefferson Davis Parish.
Livingston Parish police jury; Livingston Parish.
St. Landry Parish police jury; St. Landry Parish.
St. Mary Parish police jury; St. Mary Parish.
St. James Parish police jury; St. James Parish.

Maine

Stanley J. Bernard, Portland; Cumberland County.
Mr. Barron, director, public welfare department; Cumberland County.

Maryland

Gov. J. Millard Tawes; statewide.
W. F. Strong, AFL–CIO; statewide.
Robert Baker, administrative assistant, commission, Somerset County; Somerset County.
Oliver W. Singleton, regional director, AFL–CIO (western Maryland); Allegany County.

Michigan

Clarence Minkin, AFL–CIO; Gogebic County.
Joseph Snyder, councilman; Macomb County.

Minnesota

John H. Zimmer, secretary, Association of Food Dealers; statewide.

Director, department of public welfare; Pine County.

Director, department of public welfare; Lake County.

Frank Borig; statewide.

George Teller, United Steel Workers; statewide.

Wayne Alsop, county auditor; Beltrami County.

R. J. McMullen, director, department of public welfare; Clay County.

L. H. Furcht, director, department of public welfare; Lake of the Woods County.

Becker County Welfare Department; Becker County.

R. J. Nelson, chairman, county department of public welfare; Becker County.

Roger Headley, director, department of public welfare; Beltrami County.

John S. Brazzell, director, department of public welfare; Cass County.

James Steck, director, department of public welfare; Clearwater-Mahnomen Counties.

Mr. Charles E. Henstead; Crow Wing County.

Director, department of public welfare; Hubbard County.

Harry Hoehne, director, department of public welfare; Lake County.

Mississippi

F. A. Jackson, president, county board of commissioners, Charleston, Miss.; Tallahatchie County.

Robert G. Geoffrey, manager, chamber of commerce, Vicksburg; Warren County.

Missouri

Sam L. Hunter, president, chamber of commerce, New Madrid; New Madrid County.

Harold James, court clerk, Pemiscot County court, Caruthersville, Mo.; Pemiscot County.

Evans Baker, president, New Madrid Merchants Association; New Madrid.

New Jersey

Hon. Arthus J. Holland, mayor, city of Trenton, Trenton, N.J.; city of Trenton.

New York

Harold Kearnye; Kings County.

William J. O'Brien, assistant to commissioner, department of public welfare, White Plains, N.Y.; Westchester County.

North Carolina

Dr. Ellen Winston, commissioner, State board of public welfare, Raleigh, N.C.; statewide.

Hon. Terry Sanford, Governor, State of North Carolina, Raleigh, N.C.; Mecklenberg County.

Melvin Holmes, county accountant, Northampton County, Jackson, N.C.; Northampton County.

O. L. Moore, Jr., Laurenburg newspaper; Scotland County.

North Dakota

Arco Josephson, Bismarck-Mandan Trades and Labor, Assembly, AFL–CIO, Bismarck, N. Dak.

Gottfried J. Kuhn, Benson County Board of Commissioners, Minnewauken, N. Dak.; Benson County.

O. A. Parks, secretary, Bottineau Chamber of Commerce; Bottineau.

Ohio

George W. Lawrence, director, Huron Public Welfare Department, Norwalk, Ohio; Huron.

Nelson Smith, director, Pike County Department of Welfare; Pike County.

Bernard Ribley, president, local No. 1211, UAW–CIO, Lima, Ohio; statewide.

Verne O. Woolf, secretary, local 105, UAW, Wapakoneta, Ohio; statewide.

Arthur K. Fagan, local 128, UAW, Troy, Ohio; statewide.

Dennis R. Ulita, local UAW, Lima, Ohio; statewide.

Southwest Ohio Food Dealers; Hamilton County.

Oklahoma

Jack Thompson; Okmulgee County.

Oregon

Harold E. Carlson, Independent Retail Grocers Association; statewide.

Claude Ballard, vice president, International Woodworkers of America; statewide.

W. R. Litzenberger; Coos County.

Mrs. Betty M. Hall, administrator, county public welfare committee; Lincoln County.

Miss Jeane Jewett, State welfare commission, Portland, Oreg.; Multnomah County.

Ray E. Doerner, county commissioner; Douglas County.

Pennsylvania

Andrew S. Romito, city solicitor, Arnold, Pa.; Westmoreland County.

Fred W. Lamberton, chairman, Erie County commissioner; Erie County.

Fred Rhoads, chairman, Clearfield County Board of Commissioners; Clearfield County.

R. N. Cary, manager, Economy Wholesale Grocery; Centre County.

Walter A. Sanker, Altoona Association; Centre County, Blair County.

John W. Gardner, chief clerk, board of county commissioners; Blair County.

Tennessee

Mr. Walter R. Johnson, Nashville, Tenn.; statewide.

Cohen Turner Williams, president, Martha White Mills, Inc., Nashville, Tenn.; Davidson County (Nashville).

George Burke, Dixie Savings Stores; Hamilton County.

R. S. Horner, Brownsville, Tenn.; Haywood County.

Malcolm Dixon, Brownsville, Tenn.; Haywood County.

R. E. Sharp, Knox County.

Terry Williams; Shelby County.

Judge Beverly Briley; Davidson County.

Texas

Judge James C. Alvis; Haskell County.

Frank Ferres, Harlingen, Tex.; Cameron County.

Judge Davey; Cameron County.

Vermont

Cornwin E. Elwell, town manager, Brattleboro; Windham County.

Washington

R. A. Campbell, executive director, Washington State Food Dealers Association; Yakima County.

Hon. S. R. Holcomb, chief clerk, House of Representatives, Olympia, Wash.; statewide.

West Virginia

State Representative Halliday; Fayette County.

J. Flint Greene; statewide.

Earl Miller; Boone County.

Paul E. Hampton, Huntington; Cabell County.

John P. Broderick, president, Martha White Mills, Inc., Huntington, W. Va.; Cabell County.

J. D. Cutlip, Webster Springs; Webster County.

Retail grocers, Elkins; Randolph County.

Wisconsin

John S. Patton, director, welfare department; Douglas County.

John R. Lynch, director, county board of supervisors; Douglas County.

Chairman, board, department of public welfare; Ashland County.

County officials; Dane County.

J. E. Baldwin, director, Milwaukee County Department of Public Welfare; Milwaukee County.

Glen E. Ehle, director, Price County Department of Public Welfare; Price County.

John H. Lubbers, director, Waupaca County Department of Public Welfare; Waupaca County.

Leo T. Jelinkke, director, County Department of Public Welfare; Shawano County.

Eugene Raddatz, department of public welfare; Menominee County.

HOW THE FOOD STAMP PLAN HAS OPERATED—AND WHAT IT HAS MEANT IN TERMS OF BETTER NUTRITION AND INCREASED FOOD PURCHASES

Mr. Speaker, there have been several studies made of the effects of the food stamp program in pilot plan areas where it went into effect midway in the first year of the Kennedy administration. These studies show that the participants buy more—and better—foods, and enjoy a much higher level of nutrition under the plan than previously, when they were receiving monthly quotas of just a few food items under the direct distribution system. Furthermore, these studies have demonstrated that the participating stores have substantially increased their sales and have benefited from the program.

The Department, a year ago, issued a report in detail on the before-and-after aspects of the plan's operations in two widely different types of communities—the rural areas of Fayette County, Pa., and the highly industrialized urban area of Detroit, Mich. This report, entitled "Food Consumption and Dietary Levels Under the Pilot Food Stamp Program," shows us what the food stamp plan can accomplish for the needy people throughout this Nation, in terms of better diets.

As part of my remarks, Mr. Speaker, I submit this report, by Robert B. Reese and Sadye F. Adelson of the Agricultural Research Service, as follows:

Food Consumption and Dietary Levels Under the Pilot Food Stamp Program, Detroit, Mich., and Fayette County, Pa.

(By Robert B. Reese, agricultural economist, Marketing Economics Division, Economic Research Service; and Sadye F. Adelson, nutrition analyst, Consumer and Food Economics Division, Agricultural Research Service)

PREFACE

An Executive order of the President, issued January 21, 1961, directed the U.S. Department of Agriculture to take immediate steps to expand and improve its program of food assistance to needy families. As a first step, the Department increased the variety and value of federally owned foods being made available to States for donation to needy families. In his message to the Congress of February 2, 1961, the President requested the Department to inaugurate a series of pilot food stamp programs to determine the effectiveness of such an approach in providing better nutrition for needy families and in paving the way for a substantial improvement in use of our food production capacity.

Pilot food stamp programs were inaugurated in eight economically depressed areas of the country in mid-1961. Each of these areas had been participating in the food donation program but that program was terminated when the food stamp program was placed in operation in each pilot area. At the same time, research agencies of the Department undertook a series of special studies to determine attitudes about the program and to measure its economic and dietary effects.

This report presents the preliminary findings from research in two of the eight pilot areas as to the effect of a food stamp program on food consumption by needy families and on the nutritional adequacy of their diets. The findings should help public administrators and others concerned with providing food to needy families. Related research—not reported here—included surveys of sales in retail food stores and of attitudes and opinions of low-income families, members of the food industry, welfare workers, and others.

This research represents the joint efforts of a team of the Department's market development specialists in the Marketing Economics Division, Economic Research Service, and nutrition specialists in the Consumer and Food Economics Division, Agricultural Research Service. Special guidance was given by Robert M. Walsh and William S. Hoofnagle, Economic Research Service, and Faith Clark, Janet H. Murray, and Evelyn Grossman of the Agricultural Research Service. Field operations in Detroit, Mich., were supervised by Thomas M. Brooks, ERS, and Lillian Fincher, ARS; and in Fayette County, Pa., by Ennis Blake, ARS; Kenneth E. Anderson, ERS, and Beatrice Evans, ARS. Elizabeth M. Davenport, ARS, coordinated automatic processing of the data.

The Department has recently published two other reports about the program: "The Food Stamp Program, an Initial Evaluation of the Pilot Project," AMS-472, and "Effect of the Pilot Food Stamp Program on Retail Food Store Sales," Agricultural Economic Report No. 8, both dated April 1962.

HIGHLIGHTS

The dual objectives of the food stamp program as stated are to expand markets for agricultural products and to improve diets by increasing the ability of needy families to purchase more and better foods. Preliminary findings from surveys of food consumption by low-income families in 2 pilot areas in which studies were made indicate that the program has made substantial progress in attaining both objectives.

The market for food was expanded among needy families. Program participants consumed food that was greater in quantity and money value in the program period than previously. During September and October 1961, urban recipients of food coupons in Detroit consumed foods with a money value 34 percent higher than during April and May, the preprogram period. Among rural recipients in Fayette County, Pa., an increase of 9 percent was found.

This market expansion appears to be related primarily to operation of the pilot food stamp program. Retail prices of foods used by families not qualified for the pilot food stamp program declined 2 percent in Detroit and 6 percent in rural Fayette County between the periods. Also, during September-October qualified nonparticipants were consuming food of somewhat less value in both Detroit (−1 percent) and rural Fayette County (−7 percent)—changes comparable to the seasonal price variation found for nonqualifying families with slightly higher incomes.

More than 80 percent of the increased consumption (money value) by food coupon recipients in both areas was for animal products (such as meat, poultry, fish, milk, and eggs) and fruits and vegetables. In Detroit, expanded use of meats constituted more than one-third of the net increase. In rural Fayette County, however, meats accounted for a limited part of the increase in money value of foods consumed by participants.

Efficient use of the Federal subsidy in expanding the market for food was indicated by comparisons of increases in expenditures for food and the amount of free coupons made available to participants. Among the households surveyed, it appears that expanded food purchases may have accounted for the total subsidy in Detroit and more than 80 percent of the subsidy in rural Fayette County. Thus, a very high percentage of each dollar spent by the Government for food coupons in both areas accomplished the intended expansion of the commercial market for agricultural products.

The pilot food stamp programs in both Detroit and Fayette County drew participation primarily from families with incomes well below the maximum permitted. Among participating families interviewed, about 9 out of 10 had incomes at least 25 percent below the maximum allowable in the program. Also, most of the participants were in the larger and younger family groups.

The food stamp program helped to improve the diets of needy families in the two pilot areas. In April–May just under 30 percent of the families who were later to participate in the program had diets fully meeting the allowances recommended by the National Research Council for eight nutrients. During the test period, nearly 50 percent of the participants in Detroit and nearly 40 percent of those in rural Fayette County had diets meeting the recommendations.

April–May diets of participants were especially short in calcium and ascorbic acid. Diets were also in need of improvement in vitamin A value and riboflavin. In September–October, diets were improved in ascorbic acid and vitamin A value, reflecting increased use of fruits and vegetables.

Calcium and riboflavin levels rose in Detroit but not in Fayette County. The improved levels in Detroit were due to increased use of meat, poultry, fish, vegetables, and grain products in the later period.

BACKGROUND

The Federal food stamp program is a dual-purpose effort to expand utilization of agriculture's abundant resources and to improve the nutrition of needy families. The program is designed to enlarge the market for foods by increasing the food-purchasing ability of low-income families.

Under the program, food-purchasing power is increased by giving needy families an opportunity to exchange the amount of money they would normally spend for food for an allotment of coupons of higher monetary value. These coupons are used by participants for the purchase of domestic foods from retail food stores at prevailing prices. Retailers then exchange the coupons for cash at banks.

During June and July 1961, the pilot food stamp program was initiated in eight economically depressed areas across the country.[1] This program was aimed to test the effectiveness of a food stamp program under actual operating conditions. In the eight areas the food stamp program replaced the direct distribution program under which needy families had been receiving federally donated foods.

To determine the effect of the food stamp program upon purchasing practices and consumption by low-income families, and the adequacy of their diets, household food consumption surveys were conducted in Detroit, Mich., and rural areas of Fayette County, Pa., during April–May and September–October 1961, before and after initiation of the program in these areas.[2] The two places, one a metropolitan area and the other a rural area in the bituminous coal mining section, both having chronic unemployment, permitted tests of the program under widely varying conditions.

HOUSEHOLD FOOD CONSUMPTION SURVEYS

The household food consumption surveys were based upon area probability sampling of residences in predominantly low-income areas. In Detroit a sample of 1,268 residences was drawn from all census tracts in which 5 percent or more of the families were receiving public assistance. In Fayette County a sample of 837 residences was developed from all dwellings located in the rural portions of townships comprising approximately two-thirds of the county. Local officials designated these townships as primary rural hardship areas of the county.

During April–May, specially instructed interviewers obtained detailed information from all housekeeping families[3] with a current family income of less than $5,000 annually (after income taxes). Data were obtained concerning consumption of foods during the past 7 days by source (purchase, home production, Federal donation, gift, or other); also concerning food purchasing practices, income, and family characteristics. During September–October 1961, the same residences were revisited and comparable information obtained.

The basic analysis of shifts in food consumption and dietary levels was developed from comparisons of matched households in the two survey periods. Matched households were those residing at the same address during both survey periods, whose eligibility status for participation in the program (either qualified or not qualified) remained the same. With few exceptions, the matched households were in fact the same families.

The matched households were divided into three categories based on their characteristics in September–October. They were (1) participants in the pilot food stamp program, (2) nonparticipants whose family incomes were within qualifying range for participation in the program, and (3) nonparticipants who did not qualify for participation, since family income exceeded the maximum specified under the program. This breakdown provided comparisons of food consumption patterns and dietary levels during the two survey periods for recipients of food coupons, families choosing not to participate, and neighboring families with moderately higher incomes. The participant and qualifying nonparticipant groups were separated further by whether the family had been receiving federally donated foods during April–May (table 1).

PARTICIPATION IN FOOD STAMP PROGRAM

The food stamp program was based on voluntary participation by families certified as needy by State and local welfare agencies, with a single exception. Families receiving assistance from the city of Detroit were enrolled in the Program Qualifications for participation in each State were essentially the same as those used in the direct distribution program. All households receiving federally aided public assistance or State-sponsored general assistance were eligible for participation in the food stamp program, as well as other low-income households having less than specified levels of income and liquid assets established for each family size. Income qualifications for households not receiving other types of assistance bear a direct relationship to the income standards used by each State in the administration of its welfare assistance programs.

Among the States, Michigan and Pennsylvania have relatively high monetary levels of welfare assistance. Family income standards for participation in the food stamp program by nonrecipients of welfare assistance are about the same in Michigan and Pennsylvania. For example, the maximum gross monthly income for a participating four-person household was $265 in Michigan, and $245 in Pennsylvania. Liquid assets in the possession of a four-person household could not exceed $795 in Michigan and $735 in Pennsylvania.

---

[1] The eight pilot areas were Franklin County, Ill., Floyd County, Ky., Detroit, Mich., the Virginia-Hibbing-Nashwauk area of Minnesota, Silver Bow County, Mont., San Miguel County, N. Mex., Fayette County, Pa., and McDowell County, W. Va.

[2] A survey also was conducted in urban areas of Fayette County. The findings are in process of tabulation.

[3] Families having at least 1 member eating 10 or more meals at home during the week preceding the interview.

TABLE 1.—*Matched households in survey of pilot food stamp program, Detroit, Mich., and rural Fayette County, Pa., April–May and September–October 1961* [1]

Location and status of households in September–October	Number of households		
	Received federally donated foods in April–May	Did not receive federally donated foods	Total
Detroit:			
Participants in food stamp program	71	16	87
Qualified nonparticipants [2]	102	81	183
Not qualified			78
Total			348
Rural Fayette County:			
Participants in food stamp program	66	5	71
Qualified nonparticipants [2]	55	54	109
Not qualified			111
Total			291

[1] Matched households are those occupying the same address and having the same eligibility qualifications in September–October as in April–May.

[2] Based on family incomes reported.

After being certified by the responsible local or State welfare agency, the qualified household can participate in the food stamp program. Current income and family size determine the ratio of bonus to purchased coupons. The amount of money the family pays for coupons increases with income. The value of bonus or free coupons diminishes as the income level increases. Selected standards for four-member households in Fayette County, Pa., are shown in table 2.

Upon receipt of food coupons, semimonthly or monthly, recipients use them to purchase domestically produced foods in approved retail food stores at regular prices. Coupons may not be used to purchase coffee, tea, cocoa (as such), bananas, or any packaged food identified as imported. These imported foods, however, constitute only 6 or 7 percent of the value of all foods consumed by the low-income families interviewed.[4]

TABLE 2.—*Monthly payments for food coupons and value of free coupons received by 4-member households with various incomes, Fayette County, Pa., 1961*

Gross monthly income (selected intervals)	Amount family pays for coupons	Value of free coupons	Total value of coupons received
$55 to $64.99	$22	$40	$62
$105 to $114.99	48	32	80
$155 to $174.99	64	26	90
$215 to $245	76	20	96

Food coupons were printed by the U.S. Treasury Department in 25-cent and $1 denominations. They are issued to participating families in booklets containing $2, $3, or $10 worth of coupons. Since the coupons do not have printed expiration dates, expenditures may be deferred. However, the rate of coupon redemption at banks indicates that nearly all food coupons are used soon after they are issued.

CHARACTERISTICS OF PARTICIPANTS

The food stamp program in both Detroit and rural Fayette County drew participants primarily from families in the lowest levels of income (figs. 1 and 2, not printed in RECORD). In most of these families (80 percent), the head of the household was unemployed and incomes had been at their current low levels for a year or more. Over 60 percent of these families reported that their incomes in September–October 1961 were the same or more than they had been in 1960. Of those reporting reduced incomes, many had had prior incomes that were only slightly higher, and would have qualified for participation if the food stamp program had been operating during 1960.

Among participating families interviewed in Detroit and rural Fayette County, about 9 out of 10 had incomes at least 25 percent below the maximum permissible under the program. Many had incomes more than 50 percent below qualifying standards.

Participating and qualified nonparticipating families were separated into low, middle, and upper levels of qualifying incomes (figs. 1 and 2, not printed in RECORD). These are equivalent to less than 50 percent, 50 to 74 percent, and 75 to 100 percent of the maximum family incomes permitted under the food stamp program.

Since families with lowest incomes received the largest subsidization (free food coupons), most of the participants were in the higher subsidization levels. Not many qualified families with incomes near the maximum chose to participate in the program. According to program sources, bonus or free coupons have accounted for about 36 percent of the total coupons issued in Detroit and 39 percent in Fayette County. Participants have paid for more than 60 percent of the food coupons in both areas.

Families already receiving aid under public and general assistance programs constituted about 25 percent of the participants in the food stamp program in Detroit and 45 percent in rural Fayette County. Thus, although many unemployable needy (aged, blind, disabled; also dependent children) received food coupons, most of the recipients were employable but jobless or doing unskilled and part-time work, with incomes low enough to qualify them for the food stamp program. The employable needy included families receiving cash assistance from local public and private agencies, and families receiving no outside assistance.

The food stamp program had greatest appeal to large families. Over two-thirds of the participating households had four or more family members. Relatively few one-member households were participating in either Detroit or Fayette County.

The program is serving many families in which the homemaker has a limited formal education. In approximately 40 percent of the participating families in Detroit, and 60 percent in rural portions of Fayette County, the homemaker had only a primary school (8 years) education or less.

The program also appeals most to young or middle-aged families. In more than 75 percent of the participating households interviewed, the homemaker was less than 50 years of age. In contrast, homemakers were under 50 in only 55 percent of households qualified but not participating in the program.

A comparison of participating families and qualified nonparticipants (figs. 1 and 2, not printed in RECORD) indicates that the program had been effective in serving families in the lowest economic levels, and large families. It has been somewhat less effective in obtaining participation from the older and smaller family units. Further study may indicate the need for adjustments in coupon purchase and bonus requirements for certain classes of qualified households.

CHANGES IN FOOD CONSUMPTION

Money value of foods consumed

Needy families participating in the food stamp program have substantially increased their consumption of food, in terms of dollar value, since initiation of the program. In Detroit, the money value of foods consumed during September–October was 34 percent greater than during the preprogram survey period. In rural Fayette County, an increase of 9 percent was found (table 3).

TABLE 3.—*Retail value of food consumed in a week per member of participating families, before and after initiation of Federal food stamp program, Detroit, Mich., and rural Fayette County, Pa., 1961* [1]

Food	Detroit			Rural Fayette County		
	April–May	September–October	Difference (percent)	April–May	September–October	Difference (percent)
Meat	$1.26	$1.86	48	$1.21	$1.31	8
Poultry	.30	.40	33	.12	.18	50

[1] Before adjustment for seasonal changes in price and foods consumed. In September–October, prices paid by low-income families were less than in April–May (2.3 percent less in Detroit and 6.3 percent less in rural Fayette County). Includes money value for home-produced, gift, and federally donated foods.

[2] Less than 0.01.

---

[4] In the food stamp program, schedules of family payments and issuance of food coupons make allowance for usual purchases of excluded food items.

In contrast, qualifying nonparticipants were using foods during September–October with less money value than during April–May—1 percent less in Detroit and 7 percent less in rural Fayette County. This reduction is attributable in part to seasonal changes in food consumption and prices. An index of retail food prices was constructed from the prices paid and quantities of foods used by the nonqualifying low-income families. It showed a reduction of 2 percent in Detroit and 6 percent in rural Fayette County.

On a per capita basis, the average money value of foods consumed in a week by food coupon recipients in Detroit during September–October was $1.68 more than in April–May. Among participating families in rural Fayette County, food consumption was up $0.49 per person per week.

Approximately 82 percent of the participating families in Detroit and 93 percent of those in rural Fayette County were obtaining donated commodities in April–May through the direct distribution program. Values in table 3 for consumption during April–May include estimated retail prices for federally donated foods received. Thus, increases in dollar value of foods consumed during September–October represent actual increases in consumption of foods from all sources, and not merely in expenditures.

Meats and other animal products (excluding eggs), and fruits and vegetables, were the main groups of food which increased in money value in the program period (table 3). Prepared bakery products also increased in value.

Participating families in both areas had considerably more fresh fruits and vegetables and fresh and processed juices in September–October. Although lower seasonal prices for fresh produce may have contributed to the increase, it was found that the value of produce used by qualified nonparticipating families in both areas remained relatively unchanged from the April–May level.

The combined money value of meats, poultry, fish, milk, and eggs, as a group, increased 40 percent in Detroit and only 9 percent in rural Fayette County. In Detroit, meats alone accounted for over one-third of the net increase in the dollar value of foods consumed by participating families. This increase resulted from a rise of about 1 pound per capita in meat consumption rather than from a shift to more expensive meats. The average price of meats consumed rose only from $0.46 to $0.48 per pound between the survey periods.

The combined money value of milk, cream, ice cream, and cheese rose in both Detroit (43 percent) and rural Fayette County (22 percent). These increases, however, reflected partial substitution of fluid whole milk for the less expensive nonfat dry milk solids previously made available through the direct distribution program.

Eggs were the only food which had a lower money value in September–October in both areas. An important element in consumption during April and May was the receipt of federally donated dried eggs by most of these families. Reductions in egg consumption during September and October were also observed among the other low-income groups—both qualified and nonqualified nonparticipating families. Price information obtained from the surveys indicates also that these low-income families were paying more for shell eggs in September–October than in April–May.

Limited increases in money value of beverages and miscellaneous foods occurred in both areas. Increases were equivalent to $0.12 per person in Detroit and $0.03 per person in rural Fayette County.

No major rise in money value of food usually considered luxury items was found in either pilot area. Money value of all foods consumed by participants in the food stamp program gained, relative to that of families with comparable incomes who did not participate. Program participants narrowed the gap between the money value of their food and that of families in the same areas with higher incomes. The money value of meats and other animal products, fruits and vegetables, beverages, and miscellaneous foods consumed by food coupon users, however, continued to be less than that of families with incomes above the needy level.

Quantities and prices of foods consumed

Quantities of most major groups of foods used by participants increased in the program period (table 4). Variations in quantities were generally similar to the changes found in money value. However, a comparison of pound and dollar measures shows important shifts to items of higher or lower average price within several groups of foods.

In September and October 1961, participants in both areas were consuming foods of higher average price than in April–May in the following categories: Fish, fluid milk and milk products (excluding butter), bakery products, and fruit and vegetable juices. The fats and oils, fresh vegetables, and miscellaneous items they consumed were of lower average price. The price per pound was slightly changed for meat and poultry, for frozen, canned, and dried fruits and vegetables, and for beverages. Divergent patterns were found in the two areas for prices of sugars and sweets, flour and cereals, fresh fruits, and potatoes.

Some of the major shifts in average prices may be explained by cancellation of donated commodities. Substitution of fluid whole milk and other more expensive milk products for the donated nonfat dry milk solids would account for a part of the increase in the average value per pound of fluid milk and dairy products (excluding butter). Among Detroit participants, quantities of milk and dairy products consumed rose only 1 percent, whereas the money value rose more than 40 percent. Rural Fayette County participants were consuming 17 percent less of these products but 22 percent more in money value in September–October than in April–May.

Increases in average price of bakery products consumed also may reflect cancellation of commodity donations. The direct distribution program provided the primary ingredients for home baking of many products.

Elimination of federally donated butter may account for much of the reduction in average money value per pound for fats and oils. Similar reductions in money value were found in both areas.

Seasonal changes in prices and availability of fresh foods also contributed to variations in average money value of several foods consumed. During the September–October period, for example, the quantity of fresh vegetables participants used in Detroit was 125 percent more than during the spring survey. The money value, in contrast, increased by 46 percent. In rural Fayette County, 171 percent more fresh vegetables were used but their money value was only 67 percent above the April–May level.

As consumption data for individual commodities or products become available, the type and extent of shifts in consumption will be easier to see. Most of the needy families participating in the food stamp program consumed relatively few kinds of foods. In the April–May survey, for example, the average family in both Detroit and Fayette County was using less than 45 different foods. Approximately 150 foods accounted for as much as 95 percent of the total food consumption by these low-income families. Therefore shifts in consumption, in quantity or money value, may involve a limited number of food items.

TABLE 4.—*Quantities of specified foods consumed in a week per member of participating families, before and after initiation of Federal food stamp program, Detroit, Mich., and rural Fayette County, Pa., 1961* [1]

Food	Detroit			Rural Fayette County		
	April–May	September–October	Difference	April–May	September–October	Difference
	Pounds	*Pounds*	*Percent*	*Pounds*	*Pounds*	*Percent*

[2] Fluid milk equivalent.

SOURCE OF FOOD

During the preprogram period, rural families in Fayette County were consuming foods from all sources (purchased and nonpurchased) of greater money value per capita than the families in Detroit. By September and October 1961, this situation was reversed (table 5).

TABLE 5.—*Participating families: Money value of food used per person in 1 week (21 meals), by source of foods, before and after initiation of the pilot food stamp program, Detroit, Mich., and rural Fayette County, Pa., 1961* [1]

Source of food	Detroit		Rural Fayette County	
	April-May	September-October	April-May	September-October
Purchased	$4.21	$6.43	$4.23	$5.45
Federally donated	.63	-----	1.00	-----
Home produced	.01	.01	.23	.36
Other [2]	.05	.14	.04	.18
All sources	4.09	6.58	5.50	5.99

[1] No adjustment for seasonal changes in foods used or prices.

[2] Primarily foods received as gifts or payment in kind. September-October figures also include minor amounts for federally donated foods still available to the household.

Before the pilot food stamp program was initiated, food expense for families in both areas was approximately the same. Differences in total money value arose from the greater money value of federally donated and home-produced foods used by rural families in Fayette County.

Increases in money value of foods consumed by food coupon recipients in September-October in Detroit resulted almost entirely from greater use of purchased foods. Although rural Fayette County families also used purchased foods of greater money value, they were using more foods produced at home or received as gifts or pay during September and October.

Home-produced foods constituted a negligible part of consumption by participants in Detroit. In contrast, almost one-half of the rural Fayette County families reported using home-produced foods during April and May—and two-thirds in September and October. The money value of home-produced foods used by most of these rural families was low. However, 15 to 20 percent of the families were using home-produced foods in a week valued at $2 or more.

Similarly, few participating families in Detroit received supplemental foods as gifts or pay. In contrast, nearly two-thirds of the rural families in Fayette County were using such foods during September and October.

Nearly all of the rural families in Fayette County were using nonpurchased foods—home-produced, gift, or pay. For 60 percent of these families the money value of nonpurchased foods consumed in a week during September and October was more than $1 per household. For almost 40 percent of the participating rural families, the value was greater than $2.

This difference in food sources available (purchased, home produced, gift, or pay) to urban and rural families partially explains variations in the effect of the pilot food stamp program in Detroit and rural Fayette County. Consumption in Detroit during September and October by food coupon recipients was based primarily on availability of foods for sale in the market. Consumption by rural families in Fayette County reflected availability of nonpurchased foods to a greater extent.

NEW FOOD PURCHASING POWER

A special analysis was undertaken to measure the efficiency of the food stamp program as a mechanism for expanding the market for food.

Basically, this efficiency is related to two factors: (1) The establishment of coupon purchase requirements at levels which closely represent the amounts participating families could be expected to spend for food in the absence of such a program; and (2) the degree of compliance obtained, on the part of both retailers and participants, with program regulations which limit the use of coupons to the purchase of eligible foods.

Amounts normally spent for food vary considerably even among families of the same size and approximately the same income. The variations are explained in part by the composition of the family, the importance the family places on food, fixed payments for rent, and unusual expenses, such as those for medical care. It was not feasible under the pilot food stamp program to establish individual purchase requirements for each applicant family. Rather, the purchase requirements were average amounts, based upon data largely derived from the Department's 1955 household food consumption survey.

Thus, an individual family participating in the program might have been spending somewhat less, or somewhat more, for food than the purchase requirement established under the program. Among program participants included in the matched households, it is estimated that approximately 20 percent of the Detroit families and 25 percent of the rural Fayette County families were spending less for food in April-May than they were paying for coupons in September-October.[5] The remaining families appeared to have been spending as much or more for food in April-May than the established coupon purchase requirement.

It was anticipated, however, that the total amount of money collected from participants would closely approximate their total preprogram expenditures for food, despite differences on an individual family basis. If this were true, and if there was close compliance with regulations governing the use of the coupons, actual increases in food expenditures under the program should be close to the value of free coupons issued under the program.

This was found to be the case. Expanded use of purchased food by participating families appears to have accounted for the entire free coupon subsidy in Detroit and for more than 80 percent of the subsidy in rural Fayette County.

These findings for Detroit and rural Fayette County indicate that the food stamp program was an efficient method of using Government money to increase food consumption by needy participants. A very high percentage of the Federal subsidy was used to create a net expansion in the retail food market—the coupon purchase requirements tended to maintain preprogram levels of food expenditures by participating families. Thus, the Government's contribution was effective in meeting the dual objectives of supplementing food consumption by needy families and providing an expanded market for the output of the Nation's farms.

CHANGES IN DIETARY LEVELS

The effectiveness of the food stamp program in improving the nutritional quality of diets of needy families has been investigated. Comparison has been made of the dietary levels of participating families before and during the program in both Detroit and rural Fayette County. Dietary levels were evaluated in terms of the percentage of each group of families whose diets met the allowances recommended by the Food and Nutrition Board of the National Research Council for each of eight nutrients, and then summarized in terms of the percentage of each group whose diets met the allowances for all eight nutrients.

Individual nutrients

In comparison with recommended allowances, diets of the participating families in April-May were found to be shortest in calcium and ascorbic acid (table 6 and figure 3). Only about 40 percent of the Detroit diets met calcium allowances; about the same proportion of the rural Fayette County diets met ascorbic acid allowances. Many more diets provided allowances for other nutrients but for each nutrient some diets were below allowances. Roughly 60 percent to well over 70 percent met allowances for vitamin A value and riboflavin. At least 80 percent of the diets provided allowances for other nutrients.

In September-October, diets were considerably higher in ascorbic acid, close to 70 percent of the families having diets meeting allowances in this nutrient. Diets also were greater in vitamin A value, the percentages of families with diets meeting allowances increasing by at least 10 percentage points. Calcium and riboflavin levels rose markedly only in Detroit, bringing the diets meeting calcium allowances to 55 percent and those meeting riboflavin allowances to 84 percent.

Many families used their increased food-purchasing power in the program period for extra amounts of foods rich in the nutrients that were shortest in their family diets. Higher levels of ascorbic acid and vitamin A value were the result of more fruits and vegetables; families in Detroit consumed 50 percent more fruits and vegetables and rural families in Fayette County over 30 percent more. In rural Fayette County it seems clear that more home produce and lower food prices, particularly for fruits and vegetables in season, helped to improve diets since nonparticipants also had better diets in the later period (table 7). In Detroit there is no conclusive evidence that season was an important factor in dietary levels.

Calcium and riboflavin in Detroit diets were increased by use of about 50 percent more vegetables, about 35 percent more meat, poultry, and fish, and somewhat under 10 percent more grain products (flour equivalent). In rural Fayette County, however, changes in consumption of these three groups of food were about plus 5, plus 30, and minus 10 percent, respectively, and therefore in combination did not improve diets in calcium and riboflavin. The reduced consumption of grain products by participants in rural Fayette County was accompanied by a shift from flour, cereals, and meals (four such items were federally donated in April-May) to more expensive commercially baked goods.

---

[5] An adjustment was calculated for the foods not eligible for purchase with coupons.

TABLE 6.—*Percentages of diets meeting recommended allowances for 8 nutrients, average amounts per nutrition unit per day of these nutrients in food supplies, and average amounts of groups of food consumed per person per week, by participants in food-stamp program, matched families, Detroit, Mich., and rural Fayette County, Pa., 1961* [1]

[1] Matched families are defined in table 1, footnote 1.

[2] Statistically significant at the 5-percent level. Only the percentages of diets meeting recommended allowances have been tested for significance.

The major source of calcium and riboflavin in U.S. diets is milk and its products. In both places use of nonfat dry milk solids, federally donated in April–May, dropped considerably in September–October. The drop was fully balanced by increased use of fluid milk and other milk products in Detroit but not in rural Fayette County where milk (fluid equivalent) consumption decreased almost 20 percent. Total use of eggs, which furnish small amounts of riboflavin and most other nutrients, declined 20 percent in Detroit and 30 percent in rural Fayette County, apparently due to lack of federally donated dried eggs and seasonally higher prices for shell eggs.

Overall diet quality

Only slightly more participating families in Detroit (29 percent) than in rural Fayette County (26 percent) had diets that met the recommended allowances for all eight nutrients in April–May (table 6). In both places the number of families with such diets increased considerably in September–October, the percentages becoming 48 in Detroit and 39 in rural Fayette County. Thus, about two-thirds more participating families in Detroit and one-half more in rural Fayette County had diets meeting allowances in September–October than previously.

April–May dietary levels of qualified nonparticipants were similar to those of participants in both places (table 7). However, in September–October the percentages of participants with diets meeting allowances had increased 19 percentage points in Detroit and 13 in rural Fayette County, whereas proportions of qualified nonparticipants with such diets had increased negligibly (1 or 2 percentage points).

TABLE 7.—*Number of matched households and percentage with diets meeting recommended allowances for 8 nutrients, by qualification and participation of households in food stamp program, Detroit, Mich., and rural Fayette County, Pa., April–May and September–October 1961* [1]

Location and status of matched households	Number in survey	Households with diets meeting NRC allowances for 8 nutrients		
		April–May (before stamp program)	September–October (during stamp program)	Difference
	Households	*Percent*	*Percent*	*Percentage points*
Detroit:				
Qualified for food stamp program:				
Participants……	87	29	48	[2] 19
Nonparticipants……	183	27	28	1
Total……	270	28	34	6
Not qualified for food stamp program……	78	33	32	−1
Rural Fayette County:				
Qualified for food stamp program:				
Participants……	71	26	39	13
Nonparticipants……	109	26	28	2
Total……	180	26	32	6
Not qualified for food stamp program……	111	46	51	5

[1] Matched households are defined in table 1, footnote 1.

[2] Statistically significant at the 5-percent level.

In a nationwide survey of food consumption in 1955, about 50 percent of nonfarm households in the North with incomes under $4,000 had diets that met allowances for all 8 nutrients. The food stamp program helped needy families in Detroit in September-October 1961 to attain similar dietary levels. The program, however, had somewhat less effect on the diets of families in rural Fayette County.

Better selection of foods rather than more food is the key to much of the superior nutritional quality of family diets in Detroit compared with those in rural Fayette County, especially in September-October under the food stamp program. On a per person basis meat, poultry, and fish were the only major group of foods consumed in greater quantity during either period in Detroit than in rural Fayette County. But the Detroit families consumed more of such extra rich sources of nutrients as citrus fruit, dark leafy greens, deep yellow vegetables, and pork.

CIVIL RIGHTS

The SPEAKER pro tempore (Mr. LIBONATI). Under previous order of the House, the gentleman from New York [Mr. RYAN] is recognized for 15 minutes.

Mr. RYAN of New York. Mr. Speaker, today I am introducing a bill to provide "that notwithstanding any other provision of law, no financial or other assistance may be furnished under any law of the United States, directly or indirectly, to or for the benefit of any program or activity carried out in any State or possession of the United States or in the District of Columbia, in the course of which any individual is discriminated against on the ground of his race, religion, color, ancestry, or national origin."

The Federal Government should not contribute in any way to segregated programs. In the 87th Congress I urged antidiscrimination amendments to bills for Federal programs such as, the Housing Act of 1961 and the Hill-Burton Hospital program. The time has come for the Federal Government and the Congress unequivocally to oppose the use of Federal funds for segregated programs and to deny Federal funds to any program which discriminates against individuals because of race, creed, color, or national origin. Such action is consistent with the great foundation principles of our Nation and would be a major step in the enforcement of the Constitution.

Mississippi, a State which is receiving more Federal funds than it pays into the Treasury, is flagrantly disregarding the Constitution and the laws of the land. In an interim report the Civil Rights Commission suggested that Federal funds be denied to Mississippi. However, the restriction of Federal funds should be applied across the board, not just to Mississippi. Funds should be denied to any program administered by any State, locality or agency which discriminates against American citizens in violation of our great democratic principles and the Constitution.

When I introduced H.R. 4586 to deny funds to any educational institution which discriminates against students or prospective students on account of race, religion, color, ancestry, or national origin, I pointed out that the University of Mississippi received $73,688 in Federal funds from the summer of 1959 and through the academic year 1961–62. The University of Mississippi, however, is only one example of Federal funds being used in segregated programs. The bill I introduced today will cover all programs, whether in Mississippi or any other State in the Nation.

Mr. Speaker, at a time when American citizens are courageously struggling for their constitutional rights and are being shot, beaten, jailed, and harassed for doing so, it is imperative that the Congress and the administration take all possible steps to eliminate segregation.

Mr. Speaker, I ask unanimous consent to include at this point in the RECORD the interim report of the Civil Rights Commission which was issued on April 16 while the House was in recess.

The SPEAKER pro tempore (Mr. LIBONATI). Without objection, it is so ordered.

There was no objection.

The report referred to is, as follows:

INTERIM REPORT OF THE U.S. COMMISSION ON CIVIL RIGHTS

Pursuant to its statutory duty to submit reports to the President and to Congress at such times as either the Commission or the President shall deem desirable, the U.S. Commission on Civil Rights submits the following special report with respect to the status of equal protection of the laws in the State of Mississippi:

Since October 1962, the open and flagrant violation of constitutional guarantees in Mississippi has precipitated serious conflict which, on several occasions, has reached the point of crisis. The U.S. Commission on Civil Rights has become increasingly alarmed at this defiance of the Constitution. Each week brings fresh evidence of the danger of a complete breakdown of law and order.

Citizens of the United States have been shot, set upon by vicious dogs, beaten, and otherwise terrorized because they sought to vote. Since October, students have been fired upon, ministers have been assaulted, and the home of the vice chairman of the State advisory committee to this Commission has been bombed. Another member and his wife were jailed on trumped up charges after their home had been defiled. Even children, at the brink of starvation, have been deprived of assistance by the callous and discriminatory acts of Mississippi officials administering Federal funds.

All this affronts the conscience of the Nation.

The Commission is fully aware that the administration has followed developments in Mississippi closely, that it has taken strong and vigorous action in assuring that violators of Federal law are prosecuted, and that court orders are enforced. Despite the diligent and aggressive handling of each case as it has arisen, the Nation must be concerned that the pattern of unlawful activity shows no sign of abating. Moreover, 9 years after the Supreme Court unanimously decided that segregation in public elementary and secondary schools violates the equal protection clause of the Constitution, Mississippi has taken no step to comply with the law of the land.

Since its organization, the Commission has been deeply concerned with developments in Mississippi. Its hearing scheduled for October 1962 in that State was first postponed at the request of the Attorney General of the United States, and finally canceled. On March 26, the Attorney General, after referring to the Barnett case, stated that "while this case is pending, I continue to hold the view that a public hearing in Mississippi by the Civil Rights Commission would not be appropriate. In the meantime, I hope that the work of the Commission staff can continue as in the past on the question of the operation of Federal programs in Mississippi as elsewhere."

Since October the Commission has received more than 100 complaints from Mississippi alleging denials of constitutional rights. Investigation of these complaints, reports of our State advisory committee, and other evidence confirm the conclusion of the Commission that prompt and firm action is now required. The Commission has concluded unanimously that only further steps by the Federal Government can arrest the subversion of the Constitution in Mississippi.

The Commission notes the action taken by the President of the United States in employing the force necessary to assure compliance with the court decrees in the University of Mississippi case. It is mindful of the unequivocal public statements of the President expressing his belief that discriminatory practices are morally wrong. The Commission, nevertheless, believes that the President should, consistent with his constitutional and statutory authority, employ to the fullest the legal and moral powers of his office to the end that American citizenship will not continue to be degraded in Mississippi. We urgently request that (1) the President formally reiterate his concern over the Mississippi situation by requesting all persons in that State to join in protecting the rights of U.S. citizens, and, in accordance with his duty to take care that the laws be faithfully executed, by directing them to comply with the Constitution and laws of the United States; (2) the President continue and strengthen his administration's efforts to suppress existing lawlessness and provide Federal protection to citizens in the exercise of their basic constitutional rights; and (3) the Congress and the President consider seriously whether legislation is appropriate and desirable to assure that Federal funds contributed by citizens of all States not be made available to any State which continues to refuse to abide by the Constitution and laws of the United States; and, further, that the President explore the legal authority he possesses as Chief Executive to withhold Federal funds from the State of Mississippi, until the State of Mississippi demonstrates its compliance with the Constitution and laws of the United States.

The people of Mississippi and of the other States should know that according to information available to the Commission in fiscal year 1962, the Federal Government received from all sources in Mississippi $270 million. During the same period, payments from the Federal Government to the State, counties, municipalities and individuals exceeded $650 million for grant-in-aid programs, U.S. Corps of Engineers construction contracts, military prime contracts, and direct civilian and military payrolls. Examples of additional Federal programs benefiting Mississippi include area redevelopment loans and grants, small business loans, accelerated public works projects, and Federal Aviation Agency grants.

Massive assistance to the economy of Mississippi has continued past the time when the State placed itself in direct defiance of the Constitution and Federal court orders. For example, the National Aeronautics and Space Agency is proceeding with plans to build a $400 million moon rocket engine test center in Pearl River and Hancock Counties, Miss.

Taking into account the need to comply with statutory requirements which limit the discretion of the executive branch, and recognizing that the location of large Federal installations must reflect national needs, the Commission believes there is an overriding constitutional obligation to make certain that Federal funds are expended in a manner which will benefit all citizens without distinction. The Federal Aviation Agency failed to take cognizance of such an obligation when it granted $2,180,000 for the construction of a jet airport to serve Jackson, Miss., without questioning the airport's plan to build separate eating and restroom facilities.

The financial benefits accruing to Mississippi and its citizens as a result of Federal programs are necessarily financed by American citizens throughout the Nation. The Commission deems it appropriate and desirable that the legislative and executive branches of the Federal Government inquire into the moral and legal considerations arising out of a situation where, in large measure, the lawless conduct and defiance of the Constitution by certain elements in one State are being subsidized by the other States.

The Commission does not want the people of Mississippi, either Negro or white, to lose benefits available to citizens of other States. Rather, its goal is that all citizens in the United States be assured the full enjoyment of the rights guaranteed by the Constitution. It is upon adherence to that great charter with its powerful moral premises that our survival as a free society depends.

Respectfully submitted.

JOHN A. HANNAH,
Chairman.
ROBERT G. STOREY,
Vice Chairman.
Rev. THEODORE M. HESBURGH, C.S.C.
ROBERT S. RANKIN.
SPOTTSWOOD W. ROBINSON III.
ERWIN N. GRISWOLD.

APRIL 16, 1963.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. ROOSEVELT (at the request of Mr. MCFALL), for 10 days, on account of illness.

Mr. FORRESTER (at the request of Mr. ALBERT), for the remainder of the week, on account of illness.

H.J. Res. 234. Joint resolution to provide for the reappointment of John Nicholas Brown as Citizen Regent of the Board of Regents of the Smithsonian Institution.

ADJOURNMENT

Mr. ALBERT. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 1 o'clock and 31 minutes p.m.) the House adjourned until tomorrow, Tuesday, April 23, 1963, at 12 o'clock.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

680. A communication from the President of the United States, transmitting amendments to the budget for the fiscal year 1964 in the amount of $14,607,500 for the legislative branch and a decrease of $49,300,000 for the Atomic Energy Commission (H. Doc. No. 105); to the Committee on Appropriations and ordered to be printed.

681. A letter from the Comptroller General of the United States, transmitting a report on the audit of the Panama Canal Company and the Canal Zone Government for the fiscal year ended June 30, 1962 (H. Doc. No. 106); to the Committee on Government Operations and ordered to be printed.

682. A letter from the Secretary of Agriculture, transmitting a draft of a proposed bill to strengthen the agricultural economy; to help to achieve a fuller and more effective use of food abundances; to provide for improved levels of nutrition among economically needy households through a program of food assistance to be operated through normal channels of trade; and for other purposes; to the Committee on Agriculture.

683. A letter from the Secretary of the Air Force, transmitting a report of the Air Force military construction contracts awarded by the Department of the Air Force without formal advertising for the period July 1 to December 31, 1962, pursuant to Public Law 87-554; to the Committee on Armed Services.

684. A letter from the Assistant Secretary of the Air Force, transmitting a draft of a proposed bill to amend title 10, United States Code, to authorize the President to take possession and assume control of transportation systems in time of national emergency; to the Committee on Armed Services.

685. A letter from the Assistant Secretary of the Army (Research and Development), transmitting a report relating to Army research and development contracts for $50,000 or more which were awarded during the period July 1 to December 31, 1962, pursuant to Public Law 557, 82d Congress; to the Committee on Armed Services.

686. A letter from the Assistant Secretary of the Navy (Installation and Logistics), transmitting the semiannual report on military construction contracts awarded on other than a competitive bid basis to the lowest responsible bidder for the period July 1 through December 31, 1962, pursuant to Public Law 87-554; to the Committee on Armed Services.

687. A letter from the Secretary of Defense, transmitting a report setting forth the financial condition of working capital funds as of June 30, 1962, and the results of their operation for the fiscal year then ended, pursuant to the National Security Act of 1947, as amended (10 U.S.C. 2208); to the Committee on Armed Services.

688. A letter from the Secretary, Department of Health, Education, and Welfare, transmitting a report of actual procurement receipts for medical stockpile of civil defense emergency supplies and equipment purposes, for the quarter ending March 31, 1963, pursuant to the Federal Civil Defense Act of 1950, as amended; to the Committee on Armed Services.

689. A letter from the Secretary of the Treasury, transmitting a report of the audit of the exchange stabilization fund for the fiscal year ended June 30, 1962, pursuant to section 10 of the Gold Reserve Act of 1934, approved January 30, 1934, as amended; to the Committee on Banking and Currency.

690. A letter from the President, Board of Commissioners, District of Columbia, transmitting a draft of a proposed bill to amend the Healing Arts Practice Act, District of Columbia, 1928, as amended, to exempt from licensing thereunder physicians employed by the Commissioners of the District of Columbia; to the Committee on the District of Columbia.

691. A letter from the President, Board of Commissioners, District of Columbia, transmitting a draft of a proposed bill to amend section 13 of the District of Columbia Redevelopment Act of 1945, as amended; to the Committee on the District of Columbia.

692. A letter from the President, Board of Commissioners, District of Columbia, transmitting a draft of a proposed bill to amend the act entitled "An Act to provide for commitments to, maintenance in, and discharge from, the District Training School, and for other purposes," approved March 3, 1925, as amended; to the Committee on the District of Columbia.

693. A letter from the President, Board of Commissioners, District of Columbia, transmitting a draft of a proposed bill to amend the District of Columbia Unemployment Compensation Act, as amended; to the Committee on the District of Columbia.

694. A letter from the President, Board of Commissioners, District of Columbia, transmitting a draft of a proposed bill to promote safe driving, to eliminate the reckless and financially irresponsible driver from the highways, to provide for the indemnification of certain persons suffering injury or loss as a result of the operation of motor vehicles by uninsured motorists, and for other purposes; to the Committee on the District of Columbia.

695. A letter from the president, D.C. Transit System, Inc., transmitting additional material to a report covering operations of D.C. Transit System, Inc., for the year ended December 31, 1962, pursuant to Public Law 435, dated March 4, 1913; to the Committee on the District of Columbia.

696. A letter from the Secretary of State, transmitting a draft of a proposed bill to authorize one additional Assistant Secretary of State, and for other purposes; to the Committee on Foreign Affairs.

697. A letter from the Assistant Secretary of the Interior, transmitting a copy of the Annual Report of the Division of Coal Mine Inspection, Bureau of Mines, for the calendar year January 1 through December 31, 1962, pursuant to the Federal Coal Mine Safety Act (66 Stat., 30 U.S.C. 451–483); to the Committee on Education and Labor.

698. A letter from the Comptroller General of the United States, transmitting a report on the review of unnecessary costs incurred because of failure of the Army to store M–35 trucks in covered storage space; to the Committee on Government Operations.

699. A letter from the Comptroller General of the United States, transmitting a report on the review of selected automatic data processing facilities of the National Bureau of Standards, Department of Commerce; to the Committee on Government Operations.

700. A letter from the Comptroller General of the United States, transmitting a report on the review of the disposition of insurance premium refunds received under a New York State disability benefits insurance policy by Grumman Aircraft Engineering Corp., Bethpage, N.Y.; to the Committee on Goverment Operations.

701. A letter from the Comptroller General of the United States, transmitting a report on the review of causes of overpayments of military pay and allowances, Department of Defense; to the Committee on Government Operations.

702. A letter from the Comptroller General of the United States, transmitting a report on a followup review of supply management of selected radio communication sets within the Department of the Air Force; to the Committee on Government Operations.

703. A letter from the Comptroller General of the United States, transmitting a report on the review of the excessive costs of long-distance message communications in the armed services made primarily within the United States; to the Committee on Government Operations.

704. A letter from the assistant to the president, the American Academy of Arts and Letters, transmitting a report of its activities during the year ending December 31, 1962, pursuant to section 4 of the academy's charter; to the Committee on House Administration.

705. A letter from the Chairman, Federal Communications Commission, transmitting a draft of a proposed bill to amend section 4(b) of the Communications Act of 1934, as amended, with respect to the applicability of the conflict-of-interest provisions to persons serving in the Federal Communications Commission unit of the National Defense Executive Reserve; to the Committee on Interstate and Foreign Commerce.

706. A letter from the Chairman, Federal Communications Commission, transmitting a draft of a proposed bill to amend section 203(a) of the Communications Act of 1934, as amended, with respect to the filing of schedules of charges by connecting carriers; to the Committee on Interstate and Foreign Commerce.

707. A letter from the Assistant Secretary of the Interior, transmitting a draft of a proposed bill to amend section 8 of the Taylor Grazing Act of June 28, 1934 (43 U.S.C. 315g); to the Committee on Interior and Insular Affairs.

708. A letter from the Assistant Secretary of the Interior, transmitting copies of all laws enacted by the Legislature of the Virgin Islands in its 1962 regular and special sessions, pursuant to section 9(g) of the Revised Organic Act of the Virgin Islands of the United States; to the Committee on Interior and Insular Affairs.

709. A letter from the Secretary of Agriculture, transmitting a draft of a proposed bill to add certain lands to the Cache National Forest, Utah; to the Committee on Interior and Insular Affairs.

710. A letter from the national adjutant, Military Order of the Purple Heart of the United States of America, transmitting a copy of the audit of final transactions of the Military Order of the Purple Heart for the fiscal year ending July 31, 1962, pursuant to Public Law 85–761; to the Committee on the Judiciary.

711. A letter from the Chairman, U.S. Commission on Civil Rights, transmitting a special report with respect to the status of equal protection of the laws in the State of Mississippi, pursuant to its statutory duty; to the Committee on the Judiciary.

712. A letter from the Deputy Administrator, National Aeronautics and Space Administration, transmitting a report to the Committee on Science and Astronautics of the House of Representatives pursuant to section 3 of the National Aeronautics and Space Administration Authorization Act for the fiscal year 1963 (76 Stat. 383); to the Committee on Science and Astronautics.

By Mr. JOHNSON of California:

H.J. Res. 384. Joint resolution proposing an amendment to the Constitution of the United States relative to equal rights for men and women; to the Committee on the Judiciary.

By Mr. WESTLAND:

H.J. Res. 385. Joint resolution authorizing and requesting the President to proclaim November 19, 1963, as Gettysburg Address Centennial Day; to the Committee on the Judiciary.

By Mr. LANKFORD:

H. Con. Res. 138. Concurrent resolution requesting the President to instruct the U.S. mission to the United Nations to bring the Baltic States question before the United Nations with a view to the liberation of Lithuania, Latvia, and Estonia from Soviet occupation; to the Committee on Foreign Affairs.

By Mr. BENNETT of Florida:

H. Res. 322. A resolution creating in the House of Representatives a Committee on Grievances to study complaints concerning the conduct of Members of the House of Representatives and to make investigations and appropriate recommendations thereon; to the Committee on Rules.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

By the SPEAKER: A memorial of the Legislature of the State of Alaska memorializing the President and the Congress of the United States relative to the need for remedial action in connection with Alaska's air transportation problems; to the Committee on Interstate and Foreign Commerce.

Also, a memorial of the Legislature of the State of Alaska memorializing the President and the Congress of the United States relative to restoration of Federal medical care rights denied by administrative ruling for persons employed or engaged on vessels; to the Committee on Interstate and Foreign Commerce.

Also, a memorial of the Legislature of the State of Alaska memorializing the President and the Congress of the United States relative to supporting legislation relating to the safeguarding of homesteader rights through the establishment of an independent Board of Public Lands Appeals; to the Committee on Interior and Insular Affairs.

Also, a memorial of the Legislature of the State of Alaska memorializing the President and the Congress of the United States relative to legislation pending in Congress authorizing compensation to the Yakutat community of Tlingit Indians for the extinction of their original title; to the Committee on Interior and Insular Affairs.

Also, a memorial of the Legislature of the State of Alaska memorializing the President and the Congress of the United States relating to the completion of studies on the Rampart Dam project; to the Committee on Public Works.

Also, a memorial of the Legislature of the State of California memorializing the President and the Congress of the United States relative to the economic development of California tide and submerged lands; to the Committee on Interstate and Foreign Commerce.

Also, a memorial of the Legislature of the State of California memorializing the President and the Congress of the United States relative to legislation to authorize construction of the Auburn Dam and Folsom South Canal as part of the Central Valley project; to the Committee on Interior and Insular Affairs.

Also, a memorial of the Legislature of the State of California memorializing the President and the Congress of the United States relative to enacting legislation granting additional funds which will enable the States to establish a system of itinerant unemployment insurance benefit offices; to the Committee on Ways and Means.

Also, a memorial of the Legislature of the State of Colorado memorializing the President and the Congress of the United States relative to proposing a constitutional amendment to provide for the election of the President and Vice President in a manner fair and just to the people of the United States; to the Committee on the Judiciary.

Also, a memorial of the Legislature of the State of Colorado memorializing the President and the Congress of the United States not to enact the King-Anderson bill or other similar legislation, and expressing the opposition of the 44th General Assembly of the State of Colorado to such legislation; to the Committee on Ways and Means.

Also, a memorial of the Legislature of the State of Hawaii memorializing the President and the Congress of the United States relative to requesting the Congress to enact legislation providing for Federal aid to education; to the Committee on Education and Labor.

Also, a memorial of the Legislature of the State of Hawaii memorializing the President and the Congress of the United States relative to requesting the Congress to provide for a peacetime veterans education program; to the Committee on Veterans' Affairs.

Also, a memorial of the Legislature of the State of Washington memorializing the President and the Congress of the United States relative to considering the request to name a dam on the Columbia River after Judge Homer T. Bone during his lifetime; to the Committee on Public Works.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BENNETT of Florida:

H.R. 5743. A bill for the relief of Capt. Paul W. Oberdorfer; to the Committee on the Judiciary.

By Mr. DANIELS:

H.R. 5744. A bill for the relief of Mario Gvardiljan; to the Committee on the Judiciary.

By Mr. DOLE:

H.R. 5745. A bill for the relief of Rev. Loren B. Sutherland; to the Committee on the Judiciary.

H.R. 5746. A bill for the relief of Robert H. Bagby; to the Committee on the Judiciary.

By Mr. FARBSTEIN:

H.R. 5747. A bill for the relief of Kevork Kiristopuryan; to the Committee on the Judiciary.

By Mr. FINO:

H.R. 5748. A bill for the relief of Michal Wnuk; to the Committee on the Judiciary.

H.R. 5749. A bill for the relief of Maria Gabriella Ligniti; to the Committee on the Judiciary.

H.R. 5750. A bill for the relief of Salvatrice Maurello and Giuseppe Maurello; to the Committee on the Judiciary.

By Mr. FORD:

H.R. 5751. A bill for the relief of Tim L. Yen; to the Committee on the Judiciary.

By Mr. GALLAGHER:

H.R. 5752. A bill for the relief of Dr. Jose Castro Sicat; to the Committee on the Judiciary.

By Mr. GARMATZ:

H.R. 5753. A bill relating to the effective date of the qualification of the Steamship Trade Association of Baltimore-Waterfront Guard Association pension fund as a qualified trust under section 401(a) of the Internal Revenue Code of 1954; to the Committee on the Judiciary.

By Mr. GRAY:

H.R. 5754. A bill for the relief of Dr. Mahfouz Habib Rizk; to the Committee on the Judiciary.

By Mr. WALTER (by request):

H.R. 5755. A bill for the relief of Ednita Gonzaga; to the Committee on the Judiciary.

By Mr. PRICE:

H.R. 5756. A bill for the relief of Huseyin Duru; to the Committee on the Judiciary.

By Mr. RYAN of New York:

H.R. 5757. A bill for the relief of Mrs. Violette Boglio; to the Committee on the Judiciary.

H.R. 5758. A bill for the relief of Flora Lee (Shih-yu Li); to the Committee on the Judiciary.

By Mr. ST. ONGE:

H.R. 5759. A bill for the relief of Connecticut Beverage Co., Inc.; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

89. By Mrs. ST. GEORGE: Petition to preserve the Monroe Doctrine signed by Mrs. Robert H. Nelson and 48 others; to the Committee on Foreign Affairs.

90. By Mrs. ST. GEORGE: Resolution of Ulster County, N.Y., Board of Supervisors re the construction of the Appalachian Parkway, extending from the Shenandoah National Park through the Shawangunk-Kittatinny region northward; to the Committee on Interior and Insular Affairs.

91. By the SPEAKER: Petition of William S. Davis, commander of the American Legion Post No. 29, Miami, Fla., petitioning consideration of their resolution with reference to requesting enactment of legislation authorizing the naming of the new veterans hospital, to be built in Miami, Dade County, Fla., as the Joe H. Adams Memorial Hospital; to the Committee on Veterans' Affairs.

SENATE

Monday, April 22, 1963

The Senate met at 12 o'clock meridian, and was called to order by the Vice President.

The Chaplain, Rev. Frederick Brown Harris, D.D., offered the following prayer:

Almighty God, our Father, from whom all thoughts of truth and peace proceed, kindle, we pray Thee, in our hearts the true love of peace, and guide with Thy sure wisdom those who here take counsel for our Nation, and for the other nations of the earth.

In this opening moment of the new week's deliberations, help us to draw near to Thee in tranquillity, in humility, and in sincerity. Grant unto us, who at noontide seek Thy face, fervently to desire and obediently to fulfill all that is pleasing unto Thee. We would lay aside any selfish, partisan ambitions, so that with tallness of stature we may see—above the walls of our own prideful opinions—the common good.

As we play our part in days of destiny, with all mankind standing in the valley of decision, deliver us from all fear save that of failing Thee in Thy purpose for an earth redeemed from its sin and shame.

In the name and spirit of the Christ, we lift our prayer. Amen.

THE JOURNAL

On request of Mr. Mansfield, and by unanimous consent, the reading of the Journal of the proceedings of Thursday, April 18, 1963, was dispensed with.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States were communicated to the Senate by Mr. Miller, one of his secretaries.

REPORT OF U.S. SCIENCE EXHIBIT, SEATTLE WORLD'S FAIR—MESSAGE FROM THE PRESIDENT

The VICE PRESIDENT laid before the Senate the following message from the President of the United States, which, with the accompanying report, was referred to the Committee on Foreign Relations:

To the Congress of the United States:

Pursuant to the provisions of sec. 5(b), Public Law 85–880, approved September 2, 1958, I transmit herewith the final report of the U.S. Science Exhibit, Seattle World's Fair.

John F. Kennedy.

The White House, *April 22, 1963.*

EXECUTIVE MESSAGES REFERRED

As in executive session,

The VICE PRESIDENT laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the Committee on Armed Services.

(For nominations this day received, see the end of Senate proceedings.)

MESSAGE FROM THE HOUSE—ENROLLED BILLS AND JOINT RESOLUTION SIGNED

A message from the House of Representatives, by Mr. Hackney, one of its reading clerks, announced that the Speaker had affixed his signature to the following enrolled bills and joint resolution:

H.R. 277. An act to amend the act of April 22, 1960, relative to the transfer of certain public lands to the Colorado River Commission of Nevada;

H.R. 1087. An act to release the right, title, or interest, if any, of the United States in certain streets in the village of Heyburn, Idaho, and to repeal the reverter in patent for public reserve;

H.R. 1544. An act to authorize David H. Forman and Julia Forman to bring suit against the United States to determine title to certain lands in Maricopa County, Ariz.;

H.R. 2291. An act regarding a homestead entry of Lewis S. Cass;

H.R. 2294. An act to authorize the Secretary of the Interior to convey certain land situated in the vicinity of Unalakleet, Alaska, to Mrs. William E. Beltz;

H.R. 5067. An act to amend the Agricultural Adjustment Act of 1938, as amended; and

H.J. Res. 234. Joint resolution to provide for the reappointment of John Nicholas Brown as Citizen Regent of the Board of Regents of the Smithsonian Institution.

CALL OF LEGISLATIVE CALENDAR DISPENSED WITH

On request of Mr. Mansfield, and by unanimous consent, the call of the Legislative Calendar was dispensed with.

LIMITATION ON STATEMENTS DURING MORNING HOUR

On request of Mr. Mansfield, and by unanimous consent, statements during the morning hour were ordered limited to 3 minutes.

EXECUTIVE COMMUNICATIONS, ETC.

The VICE PRESIDENT laid before the Senate the following communication and letters, which were referred as indicated:

Proposed Supplemental Appropriation To Pay Claims and Judgments Rendered Against the United States (S. Doc. No. 14)

A communication from the President of the United States, transmitting a proposed supplemental appropriation to pay claims and judgments rendered against the United States, in the amount of $3,574,144 (with accompanying papers); to the Committee on Appropriations and ordered to be printed.

Report on Transfer of Funds by National Aeronautics and Space Administration

A letter from the Deputy Administrator, National Aeronautics and Space Administration, Washington, D.C., reporting, pursuant to law, on the transfer of funds from the Saturn V account of the research, development, and operation appropriation for the fiscal year 1963 to the construction of facilities appropriation; to the Committee on Aeronautical and Space Sciences.

A letter from the Deputy Administrator, National Aeronautics and Space Administration, Washington, D.C., reporting, pursuant to law, on the transfer of research, development, and operation funds for the fiscal year 1963 for the construction of an administration and service building at the Government-owned contractor-operated S–II stage final assembly facility, U.S. Naval Ammunition and Net Depot, Seal Beach, Calif.; to the Committee on Aeronautical and Space Sciences.

Report on Working Capital Funds of the Department of Defense

A letter from the Secretary of Defense, transmitting, pursuant to law, a report on working capital funds of that Department, dated June 30, 1962 (with an accompanying report); to the Committee on Armed Services.

Report of Department of Defense on Military Procurement Actions for Experimental, Developmental, or Research Work

A letter from the Assistant Secretary of Defense, Installations and Logistics, transmitting, pursuant to law, a report on military procurement actions for experimental, developmental or research work, for the 6-month period ended June 30, 1962 (with an accompanying report); to the Committee on Armed Services.

Report of Department of the Navy on Military Construction Contracts Awarded Without Competition

A letter from the Assistant Secretary of the Navy (Installations and Logistics), transmitting, pursuant to law, a report on military construction contracts awarded without competition, for the 6-month period ended December 31, 1962 (with an accompanying report); to the Committee on Armed Services.

Amendment of Act Relating to Establishment of a Register of Names in the Department of Commerce of Certain Motor Vehicle Drivers

A letter from the Secretary of Commerce, transmitting a draft of proposed legislation to amend the act approved July 14, 1960, 74 Stat. 526, as amended, relating to the establishment of a register of names in the Department of Commerce of certain motor vehicle drivers (with an accompanying paper); to the Committee on Commerce.

Amendment of Title 10, United States Code, Relating to Control of Transportation Systems by the President in Time of National Emergency

A letter from the Assistant Secretary of the Air Force, transmitting a draft of proposed legislation to amend title 10, United States Code, to authorize the President to take possession and assume control of transportation systems in time of national emergency (with an accompanying paper); to the Committee on Commerce.

Motor Vehicle Indemnification Fund Act of the District of Columbia

A letter from the President, Board of Commissioners, District of Columbia, transmitting a draft of proposed legislation to promote safe driving, to eliminate the reckless and financially irresponsible driver from the highways, to provide for the indemnification of certain persons suffering injury or loss as a result of the operation of motor vehicles by uninsured motorists, and for other purposes (with an accompanying paper); to the Committee on the District of Columbia.

Revised Statement of Income and Earned Surplus of D.C. Transit System, Inc.

A letter from the president, D.C. Transit System, Inc., Washington, D.C., transmitting, pursuant to law, a revised statement of income and earned surplus of that system, for the year 1962 (with an accompanying report); to the Committee on the District of Columbia.

AUDIT REPORT ON PANAMA CANAL COMPANY AND CANAL ZONE GOVERNMENT

A letter from the Comptroller General of the United States, transmitting, pursuant to law, an audit report on the Panama Canal Company and Canal Zone Government, fiscal year 1962 (with an accompanying report); to the Committee on Government Operations.

REPORT ON REVIEW OF UNNECESSARY COSTS INCURRED BECAUSE OF FAILURE OF THE ARMY TO STORE M35 TRUCKS IN COVERED STORAGE SPACE

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report on the review of unnecessary costs incurred because of failure of the Army to store M35 trucks in covered storage space, dated April 1963 (with an accompanying report); to the Committee on Government Operations.

REPORT ON REVIEW OF DISPOSITION OF CERTAIN INSURANCE PREMIUM REFUNDS

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report on the review of the disposition of insurance premium refunds received under a New York State disability benefits insurance policy by Grumman Aircraft Engineering Corp., Bethpage, N.Y., dated April 1963 (with an accompanying report); to the Committee on Government Operations.

REPORT ON REVIEW OF SELECTED AUTOMATIC DATA PROCESSING FACILITIES, NATIONAL BUREAU OF STANDARDS

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report on the review of selected automatic data processing facilities, National Bureau of Standards, Department of Commerce, dated April 1963 (with an accompanying report); to the Committee on Government Operations.

REPORT ON REVIEW OF THE EXCESSIVE COSTS OF LONG-DISTANCE MESSAGE COMMUNICATIONS IN THE ARMED SERVICES

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report on the review of the excessive costs of long-distance message communications in the armed services, dated April 1963 (with an accompanying report); to the Committee on Government Operations.

AMENDMENT OF SECTION 8 OF THE TAYLOR GRAZING ACT

A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation to amend section 8 of the Taylor Grazing Act of June 28, 1934 (43 U.S.C., sec. 315g) (with an accompanying paper); to the Committee on Interior and Insular Affairs.

LAWS ENACTED BY LEGISLATURE OF THE VIRGIN ISLANDS

A letter from the Assistant Secretary of the Interior, transmitting, pursuant to law, copies of laws enacted by the Legislature of the Virgin Islands in its 1962 regular and special sessions (with accompanying papers); to the Committee on Interior and Insular Affairs.

REPORTS ON PETITIONS TO CLASSIFY STATUS OF CERTAIN ALIENS FOR FIRST PREFERENCE

A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, reports concerning visa petitions according the beneficiaries of such petitions first preference classification (with accompanying papers); to the Committee on the Judiciary.

REPORT RELATING TO STATUS OF EQUAL PROTECTION OF THE LAWS IN THE STATE OF MISSISSIPPI

A letter from the Chairman, U.S. Commission on Civil Rights, Washington, D.C., transmitting, pursuant to law, a special report with respect to the status of equal protection of the laws in the State of Mississippi, dated April 16, 1963 (with an accompanying report); to the Committee on the Judiciary.

REPORT OF THE AMERICAN ACADEMY OF ARTS AND LETTERS

A letter from the assistant to the president, the American Academy of Arts and Letters, New York, N.Y., transmitting, pursuant to law, a report of that academy, for the year 1962 (with an accompanying report); to the Committee on the Judiciary.

PETITIONS AND MEMORIALS

Petitions, etc., were laid before the Senate, or presented, and referred as indicated:

By the VICE PRESIDENT:

A joint resolution of the Legislature of the State of Colorado; to the Committee on Finance:

"SENATE JOINT MEMORIAL 14

"Memorializing the Congress of the United States not to enact the King-Anderson bill or other similar legislation, and expressing the opposition of the 44th General Assembly of the State of Colorado to such legislation

"Whereas the State of Colorado has long been a leader in the field of State programs for medical assistance to the indigent aged, and as part of the expansion of such program, the people of this State adopted in 1956 a $10 million old-age pension health-care program; and

"Whereas this State financed and administered program has been ruled to qualify under the old-age assistance provision of the Kerr-Mills Act and has, subsequent to the passage of the Kerr-Mills Act, been receiving Federal funds for the implementation of the Act; and

"Whereas this general assembly has recognized the need for further investigation into the adequacy of medical care for the aged in Colorado by directing a study by the joint budget committee to determine ways and means for the further implementation of the Kerr-Mills Act: Now, therefore, be it

"*Resolved by the Senate of the 44th General Assembly of the State of Colorado (the House of Representatives concurring herein)*, That this general assembly hereby expresses strong opposition to the proposal now pending in Congress to amend the social security law, through the enactment of the Hospital Act of 1963, popularly known as the King-Anderson bill, and hereby memorializes the Congress of the United States not to enact such bill or any similar legislation, since such an approach is contrary to the efforts now being made by this State to meet this problem at the State level under the provisions of the Kerr-Mills Act; and be it further

"*Resolved*, That copies of this memorial be transmitted to the President of the United States, the Vice President of the United States, the Speaker of the House of Representatives of the United States, the Members of Congress from the State of Colorado, and the Governors of the other 49 States.

"ROBERT L. KNOUS,
"*President of the Senate.*
"MILDRED H. CRESSWELL,
"*Secretary of the Senate.*
"JOHN D. VANDERHOOF,
"*Speaker of the House of Representatives.*
"DONALD H. HENDERSON,
"*Chief Clerk of the House of Representatives.*"

A joint resolution of the Legislature of the State of Colorado; to the Committee on the Judiciary:

"HOUSE JOINT MEMORIAL 4

"Memorializing the Congress of the United States to call a convention for proposing an amendment to the Constitution of the United States, unless Congress shall sooner have submitted such an amendment, to provide for the election of the President and Vice President in a manner fair and just to the people of the United States

"Whereas under the Constitution of the United States, presidential and vice presidential electors in the several States are now elected on a statewide basis, each State being entitled to as many electors as it has Senators and Representatives in Congress; and

"Whereas the presidential and vice presidential electors who receive the plurality of the popular vote in a particular State become entitled to cast the total number of electoral votes allocated to that State irrespective of how many votes may have been cast for other elector candidates; and

"Whereas this method of electing the President and Vice President is unfair and unjust in that it does not reflect the minority votes cast; and

"Whereas the need for a change has been recognized by Members of Congress on numerous occasions through the introduction of various proposals for amending the Constitution: Now, therefore, be it

"*Resolved by the House of Representatives of the 44th General Assembly of the State of Colorado (the Senate concurring herein)*, That application is hereby made to Congress under article V of the Constitution of the United States for the calling of a convention to propose an article of amendment to the Constitution providing for a fair and just division of the electoral votes within the States in the election of the President and Vice President; and be it further

"*Resolved*, That if and when Congress shall have proposed such an article of amendment this application for a convention shall be deemed withdrawn and shall be no longer of any force and effect; and be it further

"*Resolved*, That a copy of this memorial be transmitted to the President of the United States, to the President of the U.S. Senate, to the Speaker of the U.S. House of Representatives, and to the Senators and Congressmen representing the State of Colorado in the Congress of the United States.

"ROBERT L. KNOUS,
"*President of the Senate.*
"MILDRED H. CRESSWELL,
"*Secretary of the Senate.*
"JOHN D. VANDERHOOF,
"*Speaker of the House of Representatives.*
"DONALD H. HENDERSON,
"*Chief Clerk of the House of Representatives.*"

A joint resolution of the Legislature of the State of Alaska; to the Committee on Appropriations:

"SENATE JOINT RESOLUTION 33

"Joint resolution relating to the completion of studies on the Rampart Dam project

"Whereas a sound and vigorous development of Alaska's resources is desirable, and indeed essential, not only from the standpoint of the people of Alaska but of the Nation whose great northernmost and westernmost outpost and underdeveloped dominion and potential is the State of Alaska; and

"Whereas as a diversification and enlargement of Alaska's economy is needed for the above declared objective; and

"Whereas the resources on which the people of Alaska depended when their numbers were far fewer in territorial days; namely, gold mining and fishing—both now diminished in quantity and in economic impact—will not suffice to create a vigorous, thriving, and expanding economy; and

"Whereas for years the Federal Government has developed the hydroelectric resources of the 48 older States with such projects as the Tennessee Valley Authority, Hoover Dam, Grand Coulee Dam, Bonneville Dam, Hungry Horse Dam, and others, and is now engaged in the continuance of this sound utilization of our water resources with Glen Canyon, Arkansas Frying-Pan, and other hydroelectric projects; and

"Whereas the greatest potential hydroelectric project on the North American Continent, and indeed in the free world, is available on the Yukon River in Alaska, which can generate power at 2 mills a kilowatt-hour, which would be the lowest cost power under the American flag; and

"Whereas studies by the Corps of Engineers of the U.S. Army have already established the engineering feasibility of the dam at Rampart on the Yukon; and

"Whereas the marketability of its low-cost power and the consequent attraction to Alaska of diverse industries and the utilization thereby of Alaska and other raw materials not practically exploitable without low-cost power has been suggested in a study by the Development and Resources Corp. of New York, a qualified, promotional agency retained by the Corps of Engineers for that purpose; and

"Whereas the United States, through its foreign aid program, is financing hydroelectric projects in many parts of the world among people to prevent their amalgamation with Communists bloc nations, but who pay no taxes to the United States, and the products derived from them will be competitive with our own U.S. products: Therefore be it

"*Resolved*, That the Alaska Legislature strongly urges Congress to appropriate sufficient funds to the Federal agencies involved to speed the completion of Rampart and other Yukon river studies, and to report promptly to the Congress, and make possible the early request by the Alaska delegation in Congress for legislation providing authorization and appropriation for the advanced planning of Rampart Canyon Dam; and be it further

"*Resolved*, That copies of this resolution be sent to the Honorable John F. Kennedy, President of the United States; the Honorable Lyndon B. Johnson, Vice President of the United States and President of the Senate; the Honorable Robert S. McNamara, Secretary of Defense; the Honorable Stewart L. Udall, Secretary of the Interior; the Honorable Cyrus R. Vance, Secretary of the Army; the Honorable Lt. General W. K. Wilson, Jr., Chief of the Corps of Engineers, U.S. Army; the Honorable John W. McCormack, Speaker of the House of Representatives; and to the Members of the Alaska delegation in Congress.

"Passed by the senate March 30, 1963.

"FRANK PERATROVICH,
"*President of the Senate*.

"Attest:

"EVELYN K. STEVENSON,
"*Secretary of the Senate*.

"Passed by the house April 9, 1963.

"BRUCE KENDALL,
"*Speaker of the House*.

"Attest:

"PATRICIA R. SLACK,
"*Chief Clerk of the House*.

"By the Governor:

"WILLIAM A. EGAN,
"*Governor of Alaska*."

A resolution of the General Assembly of the State of Rhode Island; to the Committee on Labor and Public Welfare:

"HOUSE RESOLUTION 1498

"Resolution of the General Assembly of the State of Rhode Island and Providence Plantations memorializing the Congress of the United States to enact legislation implementing the programs set forth in the President's special messages on mental illness and mental retardation; youth; and the elderly citizens of our Nation

"Whereas President Kennedy's special messages to the Congress on mental illness and mental retardation; youth; and the elderly citizens of our Nation call for sweeping and progressive programs affecting the well-being of all Americans; and

"Whereas dynamic social programs calling for Federal assistance and leadership in establishing community mental health centers; in working toward the prevention of mental retardation; in establishing wholesome and productive youth work training programs; and in providing hospital insurance for our elderly through social security will, if enacted, immeasurably strengthen the Nation's social and economic fiber and will further the physical and mental well-being of our people: Now, therefore, be it

"*Resolved*, That the General Assembly of the State of Rhode Island does hereby memorialize the Congress of the United States to enact legislation implementing the proposals set forth in the President's special messages to the Congress on mental illness and mental retardation; youth; and the elderly citizens of our Nation, directing the secretary of state to transmit duly certified copies of this resolution to the presiding officers of both Houses of the Congress, to His Excellency, the President of the United States, and to the Members of Congress from the State of Rhode Island and Providence Plantations."

A joint resolution of the Legislature of the State of Wisconsin; to the Committee on the Judiciary:

"JOINT RESOLUTION 4A

"Joint resolution ratifying an amendment to the Constitution of the United States, relating to the abolition of the poll tax and other taxes as a voting requirement in Federal elections

"Whereas both Houses of the 87th Congress of the United States of America, at the 2d session, by a constitutional majority of two-thirds, made the following proposition to amend the Constitution of the United States of America, in the following words, to wit:

"'Joint resolution proposing an amendment to the Constitution of the United States relating to the qualifications of electors

"'*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein)*, That the following article is hereby proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution when ratified by the legislatures of three-fourths of the several States:

"'"ARTICLE —

"'"SECTION 1. The right of citizens of the United States to vote in any primary or other election for President or Vice President, for electors for President or Vice President, or for Senator or Representative in Congress, shall not be denied or abridged by the United States or any State by reason of failure to pay any poll tax or other tax.

"'"SEC. 2. The Congress shall have power to enforce this article by appropriate legislation"': Therefore, be it

"*Resolved by the assembly (the senate concurring)*, That the said proposed amendment to the Constitution of the United States of America be and the same is hereby ratified by the legislature of the State of Wisconsin; and be it further

"*Resolved*, That copies of this joint resolution, certified by the Secretary of State be forwarded by the Governor to the General Services Administration of the Government of the United States in Washington, D.C., and to the Presiding Officer of each House of the Congress of the United States.

"JACK B. OLSON,
"*President of the Senate*.
"LAWRENCE R. LARSEN,
"*Chief Clerk of the Senate*.
"ROBERT S. HAASE,
"*Speaker of the Assembly*.
"KENNETH E. PRIEBE,
"*Chief Clerk of the Assembly*."

A resolution adopted by the Citizens' Study Club, of Oahu, Hawaii, favoring the enactment of Senate bill 747, to amend the Immigration and Nationality Act; to the Committee on the Judiciary.

By Mr. KENNEDY (for himself and Mr. SALTONSTALL):

A resolution of the General Court of the Commonwealth of Massachusetts; to the Committee on Armed Services:

"RESOLUTIONS MEMORIALIZING THE CONGRESS OF THE UNITED STATES TO ENACT LEGISLATION PROVIDING FOR CONTINUED MAXIMUM EMPLOYMENT AT THE FORE RIVER SHIPYARD

"Whereas, the Fore River shipyard in the city of Quincy has in the past made significant contributions to the defense of our country in time of peril; and

"Whereas a vast pool of skilled personnel employed at said shipyard will be lost unless sufficient work is found to insure maximum employment at said shipyard; and

"Whereas both the national defense and the economic welfare of our Commonwealth would be adversely affected by any curtailment of employment at said shipyard: Therefore be it

"*Resolved*, That the General Court of Massachusetts respectfully urges the Congress of the United States to enact such legislation as will enable the Fore River shipyard to receive a sufficient share of naval construction and repair work from the Federal Government to effect continued maximum employment at said shipyard; and be it further

"*Resolved*, That copies of these resolutions be transmitted forthwith by the secretary of the Commonwealth to the President of the United States, the Presiding Officer of each branch of the Congress, and to the Members thereof from the Commonwealth.

"Adopted by the house of representatives March 27, 1963.

"WILLIAM C. MAIERS,
"*Clerk*.

"Adopted by the senate, in concurrence, April 1, 1963.

"THOMAS A. CHADWICK,
"*Clerk*.

"Attest:

"KEVIN H. WHITE,
"*Secretary of the Commonwealth*."

(The VICE PRESIDENT laid before the Senate a resolution of the General Court of the Commonwealth of Massachusetts, identical with the foregoing, which was referred to the Committee on Armed Services.)

Two resolutions of the General Court of the Commonwealth of Massachusetts; to the Committee on Finance:

"RESOLUTION MEMORIALIZING THE CONGRESS OF THE UNITED STATES TO ENACT LEGISLATION REPEALING THE 10-PERCENT EXCISE ON TELEPHONE SERVICE

"Whereas as an emergency measure during time of war the United States levied a 10-

percent excise on telephone service in the nature of a luxury tax; and

"Whereas the state of emergency which gave rise to this tax has long since passed; and

"Whereas the telephone cannot even remotely be considered a luxury, but is instead a vital necessity in the home, office, factory and public institution; and

"Whereas it is grossly unfair and inequitable to continue to levy such a tax upon the citizens of this country: Therefore be it

"*Resolved*, That the General Court of Massachusetts respectfully urges the Congress of the United States to enact legislation repealing the excise on telephone service; and be it further

"*Resolved*, That copies of these resolutions be transmitted forthwith by the secretary of the Commonwealth to the President of the United States, to the Presiding Officer of each branch of the Congress, and to each Member thereof from the Commonwealth.

"Adopted by the senate, March 28, 1963.

"THOMAS A. CHADWICK,
"*Clerk*.

"Adopted by the house of representatives, in concurrence, April 4, 1963.

"WILLIAM C. MAIERS,
"*Clerk*.

"Attest:

"KEVIN H. WHITE,
"*Secretary of the Commonwealth*."

"RESOLUTION MEMORIALIZING THE CONGRESS TO ENACT LEGISLATION PROVIDING MEDICAL CARE FOR THE ELDERLY THROUGH SOCIAL SECURITY FINANCING

"Whereas a major problem facing a large number of the elderly citizens among us is how to meet the rising cost of medical care with fixed or declining income; and

"Whereas the social security system has enabled large numbers of our elderly citizens to maintain a way of life which preserves their dignity and their independence; and

"Whereas adding medical care would be a natural extension of the social security idea: Now, therefore be it

"*Resolved*, That the General Court of Massachusetts respectfully urges the Congress of the United States to enact legislation to provide medical care for the elderly through social security financing; and be it further

"*Resolved*, That the secretary of state transmit a copy of these resolutions to the Presiding Officer of each branch of the Congress and to each Member thereof from the Commonwealth.

"Adopted by the senate March 27, 1963.

"THOMAS A. CHADWICK,
"*Clerk*.

"Adopted by the house of representatives, in concurrence, April 1, 1963.

"WILLIAM C. MAIERS,
"*Clerk*.

"Attest:

"KEVIN H. WHITE,
"*Secretary of the Commonwealth*."

(The VICE PRESIDENT laid before the Senate two resolutions of the General Court of the Commonwealth of Massachusetts, identical with the foregoing which were referred to the Committee on Finance.)

A resolution of the General Court of the Commonwealth of Massachusetts; to the Committee on Public Works:

"RESOLUTIONS MEMORIALIZING THE CONGRESS OF THE UNITED STATES TO ENACT LEGISLATION EXTENDING FINANCIAL AID TO THE COMMONWEALTH OF MASSACHUSETTS FOR PURIFICATION OF THE WATERS OF THE MERRIMACK RIVER

"Whereas the pollution of the waters of the Merrimack River continues to be a danger to the health and welfare of all the inhabitants of the Merrimack River Valley; and

"Whereas the joint effort and financial assistance of the Federal and State Governments are required in order to accomplish the monumental task of purifying the Merrimack River: Now, therefore be it

"*Resolved*, That the General Court of Massachusetts respectfully urges the Congress of the United States to enact legislation extending financial aid to the Commonwealth of Massachusetts for the purification of the waters of the Merrimack River; and be it further

"*Resolved*, That copies of these resolutions be transmitted forthwith by the secretary of the Commonwealth to the President of the United States, to the Presiding Officer of each branch of the Congress, and to each Member thereof from the Commonwealth.

"Adopted by the Senate, March 28, 1963.

"THOMAS A. CHADWICK,
"*Clerk*.

"Adopted by the House of Representatives, in concurrence, April 4, 1963.

"WILLIAM C. MAIERS,
Clerk.

"Attest:

"KEVIN H. WHITE,
"*Secretary of the Commonwealth*."

(The VICE PRESIDENT laid before the Senate a resolution of the General Court of the Commonwealth of Massachusetts, identical with the foregoing, which was referred to the Committee on Public Works.)

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. MOSS:

S. 1338. A bill for the relief of Wong Chuck Ying; to the Committee on the Judiciary.

By Mr. SYMINGTON:

S. 1339. A bill for the relief of Lester W. Hein and Sadie Hein; to the Committee on the Judiciary.

By Mr. MORSE:

S. 1340. A bill to amend the Federal Employees' Health Benefits Act of 1959 so as to authorize certain teachers employed by the Board of Education of the District of Columbia to participate in a health benefits plan established pursuant to such act and to amend the Federal Employees' Group Life Insurance Act of 1954 so as to extend insurance coverage to such teachers; to the Committee on Post Office and Civil Service.

(See the remarks of Mr. MORSE when he introduced the above bill, which appear under a separate heading.)

By Mr. BEALL:

S. 1341. A bill for the relief of Gabriel Kerenyi; to the Committee on the Judiciary.

By Mr. HARTKE (for himself, Mr. SCOTT, and Mr. BEALL):

S. 1342. A bill to prohibit the introduction into interstate commerce of any shipping container manufactured in the United States from imported steel unless the container is marked so as to indicate the country of origin of the steel; to the Committee on Commerce.

(See the remarks of Mr. HARTKE when he introduced the above bill, which appear under a separate heading.)

INCLUSION OF DISTRICT OF COLUMBIA TEMPORARY TEACHERS IN HEALTH AND LIFE INSURANCE PROGRAMS

Mr. MORSE. Mr. President, temporary teachers employed by the District of Columbia Board of Education cannot participate, as matters stand, in the Health and Life Insurance programs available to permanent employees. I am informed that the reason for this situation is that the U.S. Civil Service Commission, by regulation, has excluded all employees in a temporary category.

I am informed that there is a high percentage of teachers employed by the Board of Education who are considered temporary even though they may have many years of service in the District of Columbia school system. In my judgment, it is desirable and equitable that remedial legislation designed to afford such employees an opportunity to participate in the health and life insurance programs open to other Federal and District of Columbia employees, be enacted.

Thus, I introduce for appropriate reference, a bill designed to include such temporary teachers employed by the Board of Education within the purview of the health and life insurance programs now available to permanent teachers employed by the District of Columbia Board of Education. This legislation has the endorsement of the District of Columbia Board of Commissioners. I ask unanimous consent that the bill be printed at this point in my remarks.

The VICE PRESIDENT. The bill will be received and appropriately referred; and, without objection, the bill will be printed at this point in the RECORD.

The bill (S. 1340) to amend the Federal Employees Health Benefits Act of 1959 so as to authorize certain teachers employed by the Board of Education of the District of Columbia to participate in a health-benefits plan established pursuant to such act and to amend the Federal Employees' Group Life Insurance Act of 1954 so as to extend insurance coverage to such teachers; introduced by Mr. MORSE, was received, read twice by its title, referred to the Committee on Post Office and Civil Service, and ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 3(a) of the Federal Employees Health Benefits Act of 1959 (73 Stat. 710; 5 U.S.C. 3002 (a)) is amended by striking out the period at the end thereof and inserting in lieu thereof the following: "*: Provided*, That no teacher in the employ of the Board of Education of the District of Columbia, whose salary is established by section 1 of the District of Columbia Teachers' Salary Act of 1955 (69 Stat. 521), as amended (sec. 31-1501, D.C. Code, 1961 edition), shall be excluded on the basis of the fact that such teacher is serving under a temporary appointment if such teacher has been so employed by such Board for a period or periods totaling not less than two school years."

SEC. 2. Section 2(a) of the Federal Employees' Group Life Insurance Act of 1954 (68 Stat. 736), as amended (5 U.S.C. 2091 (a)), is amended by striking out the period at the end thereof and inserting in lieu thereof the following: "and in no event shall any teacher in the employ of the Board of Education of the District of Columbia, whose salary is established by section 1 of the District of Columbia Teachers' Salary Act of 1955 (69 Stat. 521), as amended (sec.

31-1501, D.C. Code, 1961 edition), be excluded on the basis of the fact that such teacher is serving under a temporary appointment if such teacher has been so employed by such Board for a period or periods totaling not less than two school years."

Sec. 3. The amendments made by this Act shall take effect on the first day of the first month which begins not later than the sixtieth day after the date of its enactment.

STEEL SHIPPING CONTAINER IDENTIFICATION ACT, 1963

Mr. HARTKE. Mr. President, on behalf of myself and the Senator from Pennsylvania [Mr. Scott], I introduce, for appropriate reference, a bill intended to permit the buyers of steel shipping containers to know when steel is used in the manufacture of the containers and to promote the use of steel produced in this country.

The bill, to be known as the Steel Shipping Container Identification Act of 1963, is endorsed by the Steel Container Shipping Institute, who believe that such legislation will be of great benefit to the steel industry, to the steel shipping container industry, and to the general public.

U.S. customs laws require that a foreign product be plainly marked with the country of origin in which it is produced. The courts sustain the fact that the authority and jurisdiction of the Bureau of Customs ends when the product has been released from its custody. This, in turn, means that while the bundles or coils of sheet steel are marked with the country of origin upon arrival in this country, no agency of the United States under present regulations has any further jurisdiction over the marking or identification of products, such as drums, pails, and like containers, which are ultimately manufactured from the imported sheet steel.

The proposed bill, Mr. President, would require that drums, pails, and like containers, made of foreign steel be plainly marked with the country of origin of the steel and would place enforcement of the act under the jurisdiction of the Federal Trade Commission and would include their usual penalities for noncompliance.

This act is not otherwise punitive and does not ask special favors, increased duties or tariff protection. It only requires that containers made from foreign steel be so identified.

It is hoped, Mr. President, that with the practice of our own steel producers being beat competitively with the use of foreign steel in drums, pails, and like containers that these items should be marked so that the general buying public at least will know whether they are purchasing a product made with foreign steel or with domestic steel.

Mr. President, so that my distinguished colleagues may have the opportunity to join with me in sponsorship of this proposed legislation, I ask unanimous consent that the bill to lie on the table until Friday, April 26, 1963.

The VICE PRESIDENT. The bill will be received and appropriately referred; and, without objection, the bill will lie on the desk, as requested by the Senator from Indiana.

The bill (S. 1342) to prohibit the introduction into interstate commerce of any shipping container manufactured in the United States from imported steel unless the container is marked so as to indicate the country of origin of the steel, introduced by Mr. Hartke (for himself and Mr. Scott), was received, read twice by its title, and referred to the Committee on Commerce.

Mr. BEALL. Mr. President, will the Senator yield?

Mr. HARTKE. I yield.

Mr. BEALL. The Senator is putting forth a most commendable idea. It is very foresighted action on the part of the Senator to introduce the bill. I should like to join him in sponsoring it.

Mr. HARTKE. I thank the Senator from Maryland. He has always stood with me in these matters both in the Committee on Commerce and in the Committee on the District of Columbia.

ESTABLISHMENT OF WATER RESOURCES RESEARCH CENTERS—AMENDMENTS

Mr. LONG of Louisiana submitted amendments, intended to be proposed by him, to the bill (S. 2) to establish water resources research centers at land-grant colleges and State universities, to stimulate water research at other colleges, universities and centers of competence, and to promote a more adequate national program of water research, which were ordered to lie on the table and to be printed.

Mr. YARBOROUGH submitted an amendment, intended to be proposed by him, to Senate bill 2, supra, which was ordered to lie on the table and to be printed.

CANYONLANDS PARK—AMENDMENTS

Mr. MOSS. Mr. President, in this morning's Washington Post and Times Herald there appeared an editorial entitled "Canyonlands Park," which discusses the proposal which will be before the Committee on Interior and Insular Affairs this coming Thursday, for the creation of Canyonlands National Park in southeastern Utah. This editorial is a very clear exposition of the situation now existing, and I ask unanimous consent that it may be printed in the Record.

There being no objection, the editorial was ordered to be printed in the Record, as follows:

Canyonlands Park

The outlook for creation of another magnificent national park in the West has notably improved with the current agreement within the Utah congressional delegation and among State officials. The park would be located in what has come to be known as Canyonlands at the confluence of the Green and Colorado Rivers in southeastern Utah. This is one of the wildest and most inaccessible areas in the United States, and the proposed park is said to be a wonderland that cannot be matched by any American scenery now outside national park boundaries.

Canyonlands has found high favor with the National Parks Service, and National Parks Association, conservationists and outdoorsmen. Senator Frank E. Moss has sponsored a bill to authorize establishment of the proposed park, but in the last session of Congress there was sharp disagreement over the land to be included. Now a compromise has been reached between Gov. George Clyde and Senator Wallace F. Bennett, on one hand, and Senator Moss, on the other, to limit the area to a little more than 250,000 acres.

Agreement has also been reached on the phasing out of mineral and oil exploration in the area within 25 years. Mines and wells developed during that period could continue to operate. This is the most questionable aspect of the agreement but there is some precedent for such continued operations in areas that have become national parks. The most important thing is to set aside the finest scenic features of this area for park purposes. Additional land can be acquired later if that seems desirable. The reduced acreage would include the spectacular areas that have come to be known as Chesler Park, Virginia Park, Druid Arch, Angel Arch, Elephant Canyon, Upheaval Dome, the Needles, and the Basin of Standing Rocks.

Hearings on the new Moss bill will be held by the Senate's Public Lands Subcommittee on April 25, and it is to be hoped that similar action will be taken on the House side. The rapid growth of the country makes it especially desirable to conserve scenic areas of national park quality. If it is found feasible to link Canyonlands with the Zion, Bryce, and Grand Canyon National Parks, with the Glen Canyon Dam and the Arches and Natural Bridges National Monuments in the same general area, the combination would make a strong bid for first place among the country's scenic playgrounds.

Mr. MOSS. Mr. President, I also ask unanimous consent that I may be permitted to submit at this time two proposed amendments to S. 27, which is the Canyonlands National Park bill; and that these amendments may be printed, so as to be available at the time of the hearing on Thursday.

The VICE PRESIDENT. The amendments will be received, printed, and referred to the Committee on Interior and Insular Affairs.

AMENDMENT OF NATIONAL LABOR RELATIONS AND RAILWAY LABOR ACTS—RESCISSION OF ORDER FOR BILL TO LIE ON DESK

Mr. ALLOTT. Mr. President, previously the bill (S. 1330) to amend the National Labor Relations Act and the Railway Labor Act with respect to emergency labor disputes, was ordered to lie on the table. I ask unanimous consent that that order be rescinded, and that the bill be printed.

The VICE PRESIDENT. Without objection, it is so ordered.

UNITED NATIONS PEACE BONDS—ADDITIONAL COSPONSOR OF BILL

Mr. CLARK. Mr. President, I ask unanimous consent that when the bill (S. 1171), relating to the sale of United Nations bonds, is next printed, the name of the Senator from Oregon [Mrs. Neuberger] may be added as a cosponsor.

The VICE PRESIDENT. Without objection, it is so ordered.

ESTABLISHMENT OF A METRIC SYSTEM IN THE UNITED STATES—ADDITIONAL COSPONSOR OF BILL

Mr. PELL. Mr. President, I ask unanimous consent that the distinguished Senator from Oregon [Mrs. Neuberger] be allowed to become cosponsor with me of S. 1278, which I introduced on April 4. I ask that her name be included at the next printing of this bill. This bill, which would authorize the Bureau of Standards to study the feasibility of adopting the metric system in the United States, is of basic importance to the entire Nation; and I am immensely pleased and honored to have the Senator from Oregon associated with me in its passage.

The VICE PRESIDENT. Without objection, it is so ordered.

NATIONAL EMERGENCY LABOR DISPUTES ACT OF 1963—ADDITIONAL COSPONSOR OF BILL

Under authority of the orders of the Senate of April 18, 1963, and today April 22, 1963, the name of Mr. Aiken was added as a cosponsor of the bill (S. 1330) to amend the National Labor Relations Act and the Railway Labor Act with respect to emergency labor disputes, introduced by Mr. Javits on April 18, 1963.

PRESS RELEASE ON CERTAIN HEARINGS BEFORE COMMITTEE ON FOREIGN RELATIONS

Mr. FULBRIGHT. Mr. President, I ask unanimous consent to insert in the Record at this point the text of a press release issued on April 19 announcing hearings on S. 414 and other bills pending before the Committee on Foreign Relations which relate to the training of foreign affairs personnel.

There being no objection, the press release was ordered to be printed in the Record, as follows:

April 19, 1963.

U.S. Senate Committee on Foreign Relations

Senator J. W. Fulbright, chairman, announced today that on April 29 and May 1, the Committee on Foreign Relations would hold hearings on S. 414, a bill to create a Freedom Commission and Freedom Academy. S. 414 was introduced on January 22 by Senator Mundt, for himself and other Senators.

On April 4 and 5 of this year the committee held public hearings on S. 865, an administration bill to establish a National Academy of Foreign Affairs. S. 865 was introduced by Senator Symington, for himself and other Senators on February 20.

Also pending before the Committee are S. 32 and S. 99, bills to create a U.S. Foreign Service Academy. Both of these bills were introduced on January 14, S. 32 by Senator Smathers and S. 99 by Senator Dominick.

Anyone wishing to present testimony on any of the aforementioned bills during the course of the hearings announced today should contact without delay Mr. Darrell St. Claire, chief clerk, Committee on Foreign Relations.

NOTICE OF HEARING ON S. 63, TO PROVIDE FOR REPRESENTATION OF INDIGENT DEFENDANTS, AND S. 1057, TO PROMOTE THE CAUSE OF CRIMINAL JUSTICE BY PROVIDING FOR THE REPRESENTATION OF DEFENDANTS WHO ARE FINANCIALLY UNABLE TO OBTAIN AN ADEQUATE DEFENSE IN CRIMINAL CASES IN THE COURTS OF THE UNITED STATES

Mr. EASTLAND. Mr. President, on behalf of the Committee on the Judiciary, I desire to give notice that public hearings have been scheduled beginning Monday, May 6, 1963, at 10:30 a.m., in Room 2228, New Senate Office Building, on S. 63, a bill to provide for representation of indigent defendants, and S. 1057, a bill to promote the cause of criminal justice by providing for the representation of defendants who are financially unable to obtain an adequate defense in criminal cases in the courts of the United States.

At the indicated time and place all persons interested in the above bills may make such representation as may be pertinent.

NOTICE OF HEARING ON NOMINATION OF L. J. ANDOLSEK TO BE A CIVIL SERVICE COMMISSIONER

Mr. JOHNSTON. Mr. President, as chairman of the Post Office and Civil Service Committee, I wish to announce that a public hearing on the nomination of L. J. Andolsek to be a civil service commissioner will be held Wednesday, April 24, 1963, at 10:30 a.m., in room 6202 of the New Senate Office Building.

The hearing will be open to the public and will be held before the full committee.

ADDRESSES, EDITORIALS, ARTICLES, ETC., PRINTED IN THE RECORD

On request, and by unanimous consent, addresses, editorials, articles, etc., were ordered to be printed in the Record, as follows:

By Mr. HARTKE:

Address by Senator Bayh at Indiana Democratic Jefferson-Jackson Day dinner on April 6, 1963.

MEETINGS WITH SENATOR METCALF IN MONTANA

Mr. MANSFIELD. Mr. President, during the past several days, my colleague in this body, Senator Lee Metcalf, was in Montana, discussing vital issues with the people of the State. I know these discussions have been most helpful to him and to the groups with whom he talked. Typical of the reaction in the State was that expressed in an editorial on April 15 by the Billings Gazette. It lauded the high tone and frankness of a give-and-take discussion between Senator Metcalf and the Billings Chamber of Commerce, and expressed the hope that there be more such sessions in the future.

Mr. President, I heartily agree that such meetings between the public and its elected officials are both necessary and valuable. Much credit goes to the Billings Chamber of Commerce for scheduling the discussion, to Senator Metcalf for giving of his time, and to the Billings Gazette for recognizing the importance of these face-to-face encounters and bringing it to the attention of its readers.

Mr. President, I ask unanimous consent that the editorial be printed at this point in the Congressional Record.

There being no objection, the editorial was ordered to be printed in the Record, as follows:

A Model for Future Meetings

Lessons in conduct of informative meetings between persons with conflicting ideas, at least on how to best accomplish good government, could well be taken from a session the congressional action committee of the Billings Chamber of Commerce had with U.S. Senator Lee Metcalf, Democrat of Montana, the past week.

Question askers from Chairman Art Lorfling down through the media didn't stay away from controversial questions. In fact, they plunged into them. It was the manner in which the questions were put and the way Metcalf handled the answers that set the high-level tone for the meeting.

Metcalf helped set the stage when he informed his questioners that "I have strong convictions and was elected on a program I intend to carry out." But at the same time, he let it be known that he is seeking information on those subjects as well as many others pertaining to Montana business and people.

The veteran Congressman now in his first term as Senator described the congressional job as one to "winnow a little wheat from all the chaff and pass legislation that is not too harmful."

Congress is confronted with the cold war, international relations, special farm problems, tax reforms and reductions, continuing unemployment, slackening national growth, and health insurance as major issues.

"What comes out may not be the way I want it or you want it but it will be worked out the American way," Metcalf declared.

In advising he wanted constituent opinions from persons interested, concerned, and informed, Metcalf said mimeographed letters, duplicate telegrams, and petitions carry little weight.

Metcalf's candor in answering questions also brought legislative process enlightenment as to why westerners should stand together on all mineral depletion allowances.

Metcalf's answers to the question have been carried in the news columns. For those who attended, the predominate factor was the tone of the meeting—an exchange of information, not name calling or out-of-place vituperativeness that could turn such a session into senseless generalities.

The chamber is to be commended for scheduling such a session. Let's have more of them.

FUTURE UNITED STATES-CANADIAN CONFERENCES

Mr. MANSFIELD. Mr. President, in the Edmonton Journal of Saturday, April 6, 1963, appears an article entitled "The Publisher's Notebook," written by Mr. Basil Dean, vice president and publisher of that newspaper. I believe that what Mr. Dean said will be of interest to the Senate and to all the people of the United

States. I feel, also, that now that the Canadian elections are over and the issue there is settled, it is time to say to our Canadian friends that both of us should do our utmost to keep alive and to encourage the warmth and friendship which we have for one another.

I should like to quote one paragraph of Mr. Dean's article:

> The fact is that all Americans are proud of their relationship with Canada, of the long undefended frontier, of the sense of common purpose which usually distinguishes our joint affairs.

Mr. President, let me say that, in my opinion, neither Canada nor the United States should take one another for granted. We are the closest of neighbors and the best of friends. As a Senator who represents the State with the longest border with Canada—it extends over 700 miles, and includes the southern borders of British Columbia, Alberta, and Saskatchewan—I wish to state that we look upon our Canadian neighbors from these Provinces almost as blood relatives. We are close to one another economically, socially, and otherwise; and we hope we make contributions to their betterment and welfare, through our friendship, as we are proud to admit they have made similar contributions to the welfare of my State and our country.

Now that the election has been settled and Mr. Pearson has taken over the office of Prime Minister, I hope that to cement these relations the distinguished senior Senator from Vermont, Mr. AIKEN, the chairman of the Canada-United States interparliamentary group, will confer with his Canadian counterparts, to the end that these meetings may once again be resumed, and that any differences which confront us can be considered across the conference table.

I hope Senator AIKEN and the heads of the Canadian delegation, as well as the chairman of the delegation from the House of Representatives, will also seriously consider the possibility of holding some future meetings outside the respective capitals of the two countries. I have in mind places such as Vancouver, Victoria, Calgary, Edmonton, and Regina, to mention a few on the Canadian side; and, on the U.S. side, cities such as Seattle, Spokane, Great Falls, Montana, Montpelier, Vermont, and the twin cities of St. Paul and Minneapolis, among many others.

Mr. President, I ask unanimous consent to have printed at this point in the RECORD "The Publisher's Notebook," signed by Basil Dean, and published in the Edmonton Journal.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THE PUBLISHER'S NOTEBOOK

Whatever party is elected to office on Monday, it will face the difficult, uphill, often frustrating and sometimes embarrassing task of repairing our relationships with the United States.

There is no doubt that United States-Canadian relations are today at their lowest ebb in many years. This is by no means entirely the fault of the Government of Canada, but it is by no means entirely the fault of the Government of the United States either.

I recently spent a few days in the company of a number of prominent Americans, discussing some questions relating to United States-Canadian trade. The courtesy and politeness of the Americans at this gathering were almost embarrassing. They were invariably tactful about the problems of Canada, with which they were extremely well acquainted; they leaned over backward to say nothing, even in private conversation, which could be construed as an interference in our political affairs; and they were more than willing to admit that most of the blame for the difficulties surrounding relations between the two nations lay on the American side.

Considering the relative size and strength of the two countries, and considering the innumerable worldwide preoccupations, many of them highly perilous, with which the Government of the United States must grapple every day, it is astonishing how much time and attention Washington is prepared to give to the question of United States-Canadian relations.

The fact is that all Americans are proud of their relationship with Canada, of the long undefended frontier, of the sense of common purpose which usually distinguishes our joint affairs.

It may be true, as we often allege, that they sometimes take us for granted, but at the same time I gather that a widespread wave of annoyance with Washington swept across the United States when Mr. Diefenbaker reacted so violently to the American public statement on nuclear warheads.

The fact of the matter is that while we in Canada must continue to fight for our national identity and preserve it against the friendly but relentless social and economic pressure from across the border, we also have to face the fact that we live alongside the most powerful nation on earth.

We must recognize that the United States today is an imperial power, with a responsibility, voluntarily assumed at incredible cost, to maintain the security of the whole free world.

In 1963, the United States is almost as powerful in relation to the rest of the world as Rome was at the apex of her imperial power, and as Britain was in the middle of the last century.

It is inevitable that the United States, in the discharge of these frightening responsibilities, will often do things which we in Canada do not like.

When we do not like them, we are entitled to make our opinions known. We are also entitled to be apprehensive about the extent to which corporate enterprise in this country is dominated by American ownership. We are entitled to take such measures as we can to minimize the effects of this alienation of our industry and our natural resources.

But at the same time we cannot ignore the fact that friendship with the United States must be, and will continue to be for the foreseeable future, the only possible foundation of Canadian foreign policy.

If we think life is sometimes uncomfortable with this friendly superpower just across the border (something like, as one of my American friends once put it, sharing a small tent with a friendly elephant), we might consider what it would be like if the superpower were not friendly.

There are many reasons why it is in the American interest to have a friendly nation on the northern borders of the United States. But there are much more compelling reasons why it is in the Canadian interest to have a friendly nation on the southern borders of Canada.

If the two nations became genuinely unfriendly, it would be bad for the American image abroad, and the United States would find it a bit of a nuisance. Canada, by contrast, would find it a total disaster.

We ought not to forget this. We ought to remember that the stronger the United States is, the safer in the long run we are. We ought to be as understanding as we can about the awful decisions which the President of the United States must make every day, and while we can and should tell him when we think his decisions are damaging to us, we ought also to recognize that the Canadian view of what he is doing is by no means the only factor which he has to take into account.

BASIL DEAN.

Mr. AIKEN. Mr. President, will the Senator from Montana yield?

Mr. MANSFIELD. I yield.

Mr. AIKEN. I am happy to hear the remarks of the distinguished majority leader, because I feel that he always says what he thinks and what is good for the country.

I wish to inform him that the Canadians have gotten the jump on us, because this morning I received from a prominent member of the Canadian Parliament, who also is a member of the victorious party in the recent election, a letter in which he states that he believes we should be making plans for the parliamentarians to get together as soon as possible, because he feels sure that any difficulties which have arisen in recent months can be ironed out and that the relationship between the two countries will be better than ever.

I agree with that suggestion by the distinguished Canadian; and I, too, feel that the time has come when we should be making such plans.

I suppose the Canadians will first wish to organize their Parliament—which will occur sometime within the next 60 days, I believe. But certainly we should be making plans for getting together for consultations, because there is nothing like sitting across the conference table and talking with representatives of the other country, in order to lay at rest unfounded rumors.

Certainly the Senator from Montana is—as he always does—rendering a great service by making his statement today.

Mr. MANSFIELD. I thank the Senator from Vermont; and I look forward to the resumption, under his leadership, of these meetings—which, I repeat, I hope will on occasion be held elsewhere than in the two Capitals, so that the representatives of Canada can see what the rest of our country looks like, and so that the representatives of our country can see what the rest of Canada looks like.

Mr. AIKEN. The Senator from Montana means elsewhere than in Ottawa and Washington, I suppose.

Mr. MANSFIELD. Yes.

Mr. AIKEN. Not elsewhere than in Helena and Montpelier.

Mr. MANSFIELD. Certainly. [Laughter.]

EVILS AND CRUELTIES OF TOTALITARIANISM

Mr. KUCHEL. Mr. President, Herbert Brin, a gifted writer, is a distinguished newspaper publisher in California. I am proud to count him a dear friend.

Recently Mr. Brin dispatched two significant and deeply moving reports from behind the Iron Curtain which appeared in his newspaper. Those reports remind us who read them of the evils and cruelties of totalitarianism, both Communist and Fascist. The two news stories—one from Moscow entitled "Russian Jews Doomed," and the other from Auschwitz entitled "A Visit to Auschwitz"—speak more eloquently than any further introduction which could be made in the Senate concerning them.

I am delighted to share the reports published in Mr. Brin's Jewish Family Weekly Heritage with the Congress. I ask unanimous consent that the two articles, one dated January 17, 1963, and the other dated February 14, 1963, be printed at this point in the Record.

There being no objection, the articles were ordered to be printed in the Record, as follows:

[From the San Diego (Calif.) Heritage, Jan. 17, 1963]

RUSSIAN JEWS DOOMED

(By Herb Brin)

Moscow (Special to Heritage).—Barring a miracle, Jewish life is doomed in this land where nearly 3 million of our people live.

I bear witness.

The totality of repressive measures used to convert Jews to a least common denominator status in this dialectic heaven is frightening.

They are destroying a people's spirit, culture and history.

There is absolutely no contact possible with Jewish life in Russia.

If there are Jews who care in Russia—who can find them?

And in my search that took me to many parts of Moscow, I could find but one Soviet authority to speak for the Jewish community—a very frightened commissar named Aaron Levovitch Vergelis.

Vergelis is editor of the only Yiddish publication in Russia, the Sovietishe Heimland—a literary magazine of little consequence which was launched about a year ago.

He is the spokesman for Jewish life because no formal Jewish community exists.

The rabbi of Moscow's synagogue is silenced: used to attend functions of the party hierarchy at the Kremlin, and little else.

One Russian citizen warned me not to attempt to speak with the rabbi.

He described Vergelis in a singular Yiddish word: "Shvantz," "Snake"—a measure of the acceptance of the magazine by Jews.

These are facts that I found: no newspaper exists to serve Jewish life in Russia; only three or four concerts of Yiddish music are presented during a winter season; there are no Jewish schools for children; each person carries an identification card marked: "Nationality, Jewish"; intermarriage is high as Jewish life is in an advanced process of disintegration.

I was brought to the office of Editor Vergelis by an Intourist guide who was present during the discussions. (To check on the conversation which was to be held in Yiddish?)

Vergelis insisted that despite the assimilation process—which he acknowledged—"the Jewish people will not die out in Russia."

He gave me the "broad picture" act—that the future will one day evolve a "single world culture" and that this was good.

"Is it good for a people to lose its history?" I asked.

Vergelis looked from me to the Intourist guide, and answered in Russian, to be translated to me in English: "It will not be lost."

I asked why Jews of Russia could not be called upon to help the Jews of Morocco (in order to open the subject of contact with Jewish life abroad).

"Our principle is that the Government of Russia acts for us," said Vergelis.

I reminded him that the Jews of America had once called upon the Government of the United States to act in the matter of the Kishinev pogroms. (The United States subsequently recalled its Russian Ambassador in protest against the pogroms.)

"Can the Jews of Russia call upon government to act in behalf of Jews who may be assaulted in other lands?" I asked.

Vergelis understood the implications: that the Jews of Russia were not free.

Then I asked whether it was a wrong principle demanded by Jews of America that they be accorded the right of contact with coreligionists—and families—in Russia.

This was the answer: "For peace, it is a good thing to have contacts against fascism."

I insisted that the principle was larger than a brotherhood against "fascism"—rather that men be accorded the right to communicate freely one with the other.

"There is no organization of Jews in Russia," I said. "How can there be contact except through you?"

Vergelis said there were peoples friendship clubs in America that had contact with him.

"That's the Communist Party," I told him. "American Jews don't want to involve in politics in the matter. We want to be free to communicate with our people here."

I had the feeling that the conversation, in three languages, was being tape recorded, so I appealed over the head of Vergelis to whomever may be listening:

"You have your cultural and political structure and we have ours. That's your business and ours. But I appeal to you to help in the establishment of a committee for contact."

I suggested that the poet, Yevtushenko, be named honorary chairman of such a Russian committee—for while Yevtushenko was not Jewish, he was aware of the depth of the Jewish tragedy in Russia.

Editor Vergelis, obviously moved by my plea, flushed and spoke softly, but promised nothing.

He had advice for Israel:

"Israel must develop a more progressive (meaning Communist) politic; engage more strongly in the fight against fascism * * *. Israel's politics of animosity toward the Arabs and against the progressive (Communist) countries is not clever politics; the support of Adenauer by Israel is deeply resented by Soviet Jews; the press, and parties of Israel should not attack the progressive countries.

"We wish for Israel that they build the land in a democratic way. What is best for the people of Israel is best for the land of Israel."

Then the editor arose and made a speech in Russian, to be transmitted through me to the people of California: that the only way to fly was through cooperation with the Communists.

I suspected the speech was for the authorities on high.

Vergelis was quick to point out that his literary magazine was printing the works of Yiddish writers who had been slain by the Communists under Stalin.

This constituted rehabilitation of the writers, he noted.

I told him that I was the first editor in America to print the story in the English-Jewish press of the destruction of 68 Jewish writers during the Stalin era.

I told him that when I published the stories originally, in 1954 and 1955, I had been attacked by the Communist press as being "irresponsible."

A few weeks later, admission of the tragedy was printed by the Yiddishe Folkstimme in Warsaw, and later confirmed in the famed "cult of the individual" speech of Mr. Khrushchev.

On the sabbath, I attended services at the Moscow Synagogue.

This huge structure is the only one serving our people in the heartland of communism.

It is dirty, unpainted, and a woeful picture of Jewish life in the land.

At the synagogue, I was asked by an attendant to sit up front in a special section set aside for visitors.

Instead, I sat in an area to the right, surrounded by old people, pensioners, who asked a torrent of questions and wanted to know so much.

I prayed with them, and for them.

[From the San Diego (Calif.) Heritage, Feb. 14, 1963]

A VISIT TO AUSCHWITZ

(By Herb Brin)

Auschwitz, Poland.—How is a man remembered?

By a scratch upon a wall, he is remembered that once a human being was born, attained manhood, became a father, and nourished a dream within his heart.

But here at Auschwitz the scratches are many, scratch upon scratch upon scratch.

The fingernails bled to find plaster on the walls to scratch an initial, a prayer, a desolate, desperate cry for help.

Twenty years ago it happened that a modern government gathered a people from the far reaches of a continent to manufacture for them death.

Twenty years ago the drama of horror raged in fury, shielded from human understanding by a war that defied description.

If children cried at Auschwitz, there was none to hear.

If mothers fled naked into the forests for their lives, they were returned by the peasants for a grisly ransom.

Children and parents walked here to their eternity, naked and ashamed.

It is to Auschwitz that I came in pilgrimage.

At Birkenau's gas chamber I stood in a foot of snow to light a candle and to recite a prayer.

The cold wind chilled the marrows, and blood was ice in my veins.

Snow gave no beauty to the desolation and the sun gave it no warmth.

At Birkenau, the factory of death for Auschwitz, I stood in silence and in the bleakness of it all, I stood alone.

Only a memory ago, 4 million dreams were destroyed here in the most depraved act by government in human experience.

Three million were Jews.

The rest were citizens of Poland—and the gypsies of Europe.

One asks: Why the gypsies?

But then, one asks: Why a child?

My ride to Auschwitz was an austere one. It began from the city hall of Crakow, the university city of southern Poland, where I was the guest at coffee with Mayor Jan Garlicki.

By car, west, toward the small industrial city of Oswiecim, where terror struck by night and by day, in fire, and in gas.

Here were marshaling yards, for to transport cargo, such yards are necessary.

Still filling the yards of Oswiecim are the cattle cars, the box cars of eternity, now mercifully empty.

They are the same cars that trundled in the night toward the spur track at Birkenau, where a doctor's finger would wave to the right or to the left.

If to the right—it was to the labor camp.

If to the left—it was to the showers without water.

Only a handful were selected for labor.

If the victims were "aryans," they would be photographed and their fate recorded.

If they were "subhumans"—even the dignity of a photograph in death was denied them.

Few of the victims at Auschwitz' 25 square miles of horror ever saw the sign: "Arbeit Macht Frei," "Work Makes Freedom." This was the sign at the main gate to Auschwitz, under which passed the first victims to be met by a band of prisoners playing lively Strauss waltzes.

Later, so the manufacturing process would not be hampered, the victims were taken directly from railroad spur at Birkenau to the underground shower rooms.

In contrast to the desolation at Birkenau, the main barracks at Auschwitz proper are two-story brick structures which, under a covering of snow, have a college dormitory appearance.

Here, human torture knew no measure.

Does a baby's shoe tell the story?

Thousands upon thousands of baby shoes are contained in these barracks.

Does a shaving mug tell the story?

Who can count them? Or the pots they hoped would contain food for them in prison; or the mounds of crutches of the infirm.

Of this human hair, no wigs will be made and no longer will the suitcase of Suse Pollak take her on a holiday in Europe * * * for the macabre suitcases at Auschwitz tell the story for Ludwig Wodak and Olga Kornfeld, and Herman Pasternak, and Franz Kohn—names you can see on top.

Prayer shawls are in showcase, but they are not for sale.

The shoe polish tells the story: the brands are from Greece and from Holland; from France and from Hungary; from Poland and from Yugoslavia.

The flags of 28 nations of the earth are displayed at Auschwitz—the nations whose people were taken.

The flags include the American flag—for many American citizens died in the orgy of horror.

One sees the empty cans of Cyklon B gas pellets, and one leaves the barracks of Auschwitz for Birkenau 3 miles away.

The roads are themselves forbidding as a gray stillness descends upon the earth and an oblique sun strains pitifully through the early haze.

This is the factory of death.

A woman guard takes you through the wooden huts where 1,200 souls would be stored, a day, a week, 2 weeks * * *

Protecting the Nazis from the women and children was an electrified fence of barbed wire.

Who will ever know how many ran to the fence, early?

The inside of the huts were as though yesterday they were throbbing with death: the odor has not left them, the odor of human refuse and terror.

In a corner I found a tiny wire scale.

It was one of many fashioned by the prisoners to measure rations of bread—that in extremes, the sharing would be fair.

The wooden bunks of terror are still there, and I could hear the sobs coming from the corners, from the shadows, a child here, a mother there * * *

On to the railroad spur which ends at an austere stone monument which says simply: "Oswiecim, 1940–45."

Past the twisted jungle of destroyed buildings and to the contorted concrete roof of the crematorium building.

Shame of sorts came to the German army only when it was caught.

For only then were the gas chambers blown up, the crematorium destroyed.

One walks through snow to the knee to approach a monument to the Jewish victims at Birkenau.

The footprints are mine alone—for who will come to Birkenau of a winter to light a candle that 20 winters ago men, women and children * * *

I recited the ancient Kaddish, the Hebrew prayer for the dead that speaks not of death but of holiness.

"Yiskadal v'yiskadash."

Blessed is the name of the Lord.

It was man who failed.

IMPEACHMENT NONSENSE

Mr. KUCHEL. Mr. President, recently the San Francisco Examiner, a great American newspaper, threw some needed cold reason on the occasional bleatings of extremists who demand the impeachment of that great American, the Chief Justice of the U.S. Supreme Court. In a rational and responsible editorial entitled "The Nonsensical Itch To Impeach," the San Francisco Examiner warns that the shrill cry for impeachment is errant nonsense, but that it "attracts frightened souls who, unable to cope with a complex and difficult world, need someone to blame."

The editorial points out further that "the Chief Justice's 'treason' consists of writing opinions with which the extremists disagree."

The VICE PRESIDENT. The time of the Senator from California has expired.

Mr. KUCHEL. Mr. President, I ask that I may be permitted to speak for 1 additional minute.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

Mr. KUCHEL. The Examiner concludes with the statement:

> The lesson in all this probably won't get through to the kind of persons who put up "Impeach Earl Warren" billboards. But it is, we trust, a useful reminder to all others that the fretful, lunging and frightened way of the radical right is not the American way.

The text of the editorial is excellent. The lesson that it spells out is clear. I ask unanimous consent that the entire text of the editorial appearing in the San Francisco Examiner on March 18, 1963, be printed at this point in my remarks.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THE NONSENSICAL ITCH TO IMPEACH

> Billboards exclaiming "Impeach Earl Warren" have made a belated appearance in the bay area. This cry was first raised in 1954 by a few southerners after the Supreme Court's unanimous decision outlawing segregation. Chief Justice Warren wrote that decision. Later the cry was taken up by various extremist groups, including the John Birch Society; all claim the Court is soft on communism.
>
> Judged strictly as a slogan, the cry is shrewd. It attracts frightened souls who, unable to cope with a complex and difficult world, need someone to blame. The Chief Justice is handy to their purpose, a personal devil to flay. The impeachment slogan promises the relief of action with a high emotional content.
>
> But as a practical political slogan, an obtainable objective, the cry is arrant nonsense.
>
> We are indebted to the Los Angeles Times for a reminder that the rarely used impeachment process is hardly as simple as the extremists seem to regard it.
>
> In the first place, to impeach is not to convict or to remove from office. To impeach is only to vote a formal charge. This must be done by the House of Representatives. Thereafter a trial must be held before the Senate, sitting as court and jury. The Senate arrives at a verdict by majority vote.
>
> But wait a minute. What offense has the Chief Justice committed? Treason, reply the extremists. Treason is specifically defined in the Constitution. And that definition isn't really the kind of treason they are talking about. Winnow out the nonsense, and it develops that the Chief Justice's "treason" consists of writing opinions with which the extremists disagree.
>
> As it happens, millions of Americans disagree at one time or another with decisions written by the Chief Justice or other members of the Court. That includes us. We too have regarded as wrong the Court's decision in some cases dealing with domestic Communists.
>
> But if the crime of treason were charged or impeachment invoked every time the Supreme Court or the President acted contrary to the views of a part of the American public, we would have no stable Government—and no claim to stability as a people either.
>
> The first and greatest Chief Justice, John Marshall, was accused of usurping the power of Congress and the President. The Dred Scott decision split the Nation before the Civil War; the Court of the so-called "Nine Old Men" of the early Roosevelt era evoked fire and fury. But in all these instances our people had the good sense not to invoke impeachment. The one impeachment from political motives that nearly succeeded—that brought against President Andrew Johnson—taught our people that impeachment is never the proper weapon to settle political differences.
>
> The lesson in all this probably won't get through to the kind of persons who put up "Impeach Earl Warren" billboards. But it is, we trust, a useful reminder to all others that the fretful, lunging and frightened way of the radical right is not the American way.

PROBLEMS OF OREGON FARMERS

Mr. MORSE. Mr. President, Mr. Paul T. Rowell, chief of the Agricultural Development Division of the Oregon Department of Agriculture, in the March 1963 issue of the official publication of the State department of agriculture, has written an article entitled, "Tariff and Trade Restriction Problems of Oregon Agriculture."

In this article, Mr. Rowell has given an excellent exposition of the problems faced by Oregon farmers, particularly our orchardists, seedgrowers, poultry and potato producers in connection with the export of farm commodities.

I particularly call to the attention of Senators the view expressed under the heading of "Conclusions" in his article in which Mr. Rowell states:

> Self-sufficiency in agriculture production is laudable for any nation if that can be attained through efficient production and costs under its type of economy. It is not so when this is attained through inefficient production protected at an artificial level by undue trade restrictions on imports from other countries.
>
> Oregon producers never have requested this type of protection.

They have asked only that efficient production at the level of the U.S. economy be protected against ruinous competition from nations with much lower labor and other costs of production.

What we need is a two-way street, upon which commodities may be traded on a live-and-let-live basis between the friendly and free nations of the world.

Upon such a basis I feel sure Oregon agriculture can hold its own and make further progress in the future.

In my judgment, this is a fair summation of the situation and expresses clearly and concisely the views of those Oregon citizens engaged in our No. 2 industry. Because of the helpful background material contained in the article, I ask unanimous consent that it be printed at this point in my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

TARIFF AND TRADE RESTRICTION PROBLEMS OF OREGON AGRICULTURE

(By Paul T. Rowell)

Oregon agriculture faces both import and export tariff and trade restriction problems in maintaining and broadening markets for its products. On some commodities, Oregon producers must compete with imports to maintain their markets in our own country. On others, they need access to foreign markets for a portion of their output.

At first glance this might appear to indicate that Oregon producers want to eat their cake and have it too. What is the true situation?

BACKGROUND

Going back to the early 1930's, most nations, including our own, had rather high protective tariffs on both industrial and agricultural commodities, particularly on those produced at home. Following passage of our first Reciprocal Trade Agreements Act in 1934, many reductions in import tariffs or duties were made by our country in return for import duty concessions by other countries.

In addition, however, under the most-favored-nations clause in our act, concessions granted by our country on imports from one nation automatically became effective on such imports from all other most favored or friendly nations. As such broadened concessions were not given by other nations, our import duties were decreased on a broader basis and more rapidly than were those of other nations.

Then came World War II, at the end of which the economies of practically all other nations were in much worse shape than our own. European countries were short of dollars during that period, and developed nontariff added restrictions in the form of embargoes, the withholding of import tender or import licenses, and other means of curtailing imports to conserve their dollars.

POSTWAR DEVELOPMENT

Since then the economies of many of those countries have been rebuilt, and they are no longer short of dollars. However, those nontariff absolute restrictions continue to be used by European and many other countries long after economic justification is gone. As then Foreign Agricultural Service Administrator Max Meyers testified before the Senate Appropriations Committee in the spring of 1960:

"No matter how hard we work on the merchandising end of foreign marketing, such work can be frustrated if the trade policies of other countries give our products only limited access to their markets. One of our high priorities is being given to easement of foreign trade restrictions.

"Since the war our Government has engaged in a series of negotiations with other countries in which we have lowered tariffs on each other's goods in order to enlarge trade in both directions. In many instances we were not able to obtain the full benefits of the concessions we received because other countries had quotas or other restrictions in effect which limited our export opportunities.

"Often there was justification at the time for such controls due to the serious balance-of-payments problems these countries were experiencing.

"By late 1959, however, it became apparent that the balances of payments and foreign exchange reserves of a number of countries had improved to the point where they could no longer justify continuation of major restrictions which many of them still maintained against imports from the dollar area. The full power of the U.S. Government has been brought into play to make a renewed assault on this type of trade barrier. We in the Department of Agriculture are participating actively in this effort."

Efforts by our Government to date have been unsuccessful in obtaining removal of those nontariff real regulators of import trade by European countries and most others except our own. Diplomatic rather than trade considerations have been the primary factor in trade agreement negotiations with other countries. This approach has ruled out the withholding of further import duty concessions by our country or the threat of our application of added restrictions if necessary to obtain removal of the nontariff absolute restrictions applied by other nations. These are applied by most other nations whenever their domestic production is adequate for their market demands and added supplies might affect market prices for their own producers.

APPLE AND PEAR EXPORTS

As an example, quoting from "Foreign Agriculture," issue of January 28, 1963, by Foreign Agricultural Service of USDA:

"Onetime leader in the world's apple trade, the United States now ranks fifth, after Italy, Argentina, the Netherlands, and Australia.

"In the years before World War II, this country outran all competitors—the race wasn't even close. Then during the war, U.S. apple exports shrank to one-tenth of their 1935–39 average. Except for Canada's, trade totals of most world exporters also declined.

"By 1948, the world's apple exports had bounced back to one-half of the prewar levels. U.S. apple exports, however, never made a comeback. Around 1945, Western Europe—chief outlet for U.S. apples—had shut its doors to apple imports. Initially, the controls were for balance-of-payments reasons and were authorized by GATT (General Agreement on Tariffs and Trade). Although no longer justified on these grounds, the controls were retained to protect local producers. Last year, U.S. apple exports were 4.9 million bushels, or one-half of the U.S. prewar average."

The above experiences apply equally well to U.S. winter pear exports. Over the years, Europe has been an important market outlet both for Hood River apples and for Medford and Hood River winter pears. Both have suffered heavy losses of markets in those countries since World War II.

IMPORTS

On the import side, Oregon producers of several commodities have been affected, in some cases severely, by import competition with little import tariff protection and none of the nontariff absolute restrictions protecting agricultural producers in other countries. Oregon producers of cherries, filberts, strawberries, lamb, wool, beef, cheese, seafoods and fur-bearing animals are some of those affected to greater or lesser degrees.

FINE FESCUE SEEDS

An outstanding example of severe damage to Oregon producers from import competition is that of fine fescue seeds, about 90 percent of U.S. production of which is in Oregon. U.S. usage of these fine lawn and turf seeds has increased greatly in recent years with the vast amount used for suburban home development, golf courses, and similar purposes.

Oregon producers set about to fill those demands, and were doing a good job of it. Then wheat producers in the Peace River Valley of Canada found they could grow creeping red fescue seed quite successfully, and at much lower costs, on their cheaper lands and with cheaper labor costs than in this country.

As a result, in several recent years, Canada has exported to this country far more creeping red fescue seed than we have produced and in some years, Canada shipped to us more than our total production of both creeping red and chewings fescue seeds, which are similar and interchangeable for most usage needs.

With U.S. costs of production around 25 cents per pound, our import duty on fine fescue seeds is only 1 cent per pound, and has been no deterrent to imports from production areas with much cheaper land and labor costs. As a result, and with total market supplies in this country far exceeding market needs, prices to Oregon producers of fine fescue seeds dropped heavily below costs of production for several years. Last year the price here was around 10 cents a pound, with little market demand. This year there is some improvement in market prices and demand, due in part to some abandonment of acreage and reduced production by Oregon growers. Also helping the situation was some return to wheat production by Canadian growers due to their government's emphasis on and incentives given for greater wheat production there the past year, along with the very low U.S. market prices for fine fescue seeds.

By comparison, let's look at some situations faced by Oregon farmers who wish to export even a small portion of their production.

TURKEYS

In July 1957 Canada put in effect a price-support program on their turkey production, and simultaneously placed a total embargo on imports of slaughtered or dressed turkeys from this country. With the costs of production of turkeys and of fine fescue seeds about equal per pound, Canada's import duty on turkeys was and is 5 cents per pound, compared with our 1-cent-per-pound import duty on fine fescue seeds.

U.S. turkey exports to Canada had been only about 1 percent of U.S. production, and were equal to about 10 percent of Canada's turkey production. Oregon producers, however, had been marketing around 15 percent of their turkey production in western Canada, while paying that country's 5 cents per pound import duty. Canada's total embargo remained in effect over 2 years, with resulting surpluses here and serious effects on market prices to Oregon turkey producers.

POTATOES

Another example of nonreciprocal handling of import duties is in the application of Canada's so-called antidumping duty. This is an added duty which is applied on an overnight basis when a competitive agricultural commodity is coming in at a price which would reduce the market price substantially to their own producers.

In the fall of 1961 U.S. potato production was heavy, and market prices fell to $2 per hundredweight F.O.B., for U.S. No. 1 potatoes. With a market price in Canada at that time of $2.78 per hundredweight that country applied an antidumping duty of 78 cents per hundredweight, in addition to its regular import duty of 37½ cents per hundredweight.

The United States has an antidumping duty also, but which is applied only when an exporting nation is pricing its product to our country at less than it is selling within its own country. In the instance above (as in other such instances on U.S. fruits and vegetables), U.S. potatoes were selling at the same price to U.S. markets as they were offered to Canada's markets.

EUROPEAN COMMON MARKET

Much emphasis has been given during the past year to formation of the European Common Market, and to the passage of the Trade Expansion Act last fall by our Congress to cooperate with the ECM and to meet the problems developed by it.

Basically, the ECM, known more formally as the European Economic Community, is a trade federation of six countries of Western Europe, including Italy, France, West Germany, Belgium, the Netherlands and Luxembourg.

Over a period of several years, trade barriers between the ECM member countries are to be reduced to zero, and a common external tariff on each commodity is to be applied to imports from nonmember countries.

As pointed out earlier, trade policies of European countries, as well as of most others, have been heavily protectionist on agricultural commodities which they produce. In general, ECM policies and plans now include a continuation of those strongly protectionist policies, but on a uniform basis by all member countries which would average those previously in effect in the various member countries. Already this has developed serious effects on European trade of some U.S. farm commodities.

POULTRY

ECM regulations on poultry imports have set up a complex system of fixed duties, variable levies, and minimum prices, tending to insulate the Common Market from competitively priced poultry from the United States and elsewhere. West Germany's import fee on U.S. broiler chickens was hiked from 5 cents a pound to 12½ cents on August 1, 1962, and U.S. exports skidded 50 percent from their rate which sent more than 40 million pounds of broilers to West Germany in 1961.

German farmers and other ECM countries can't yet fill the gap, so some German buyers predict a cut in the import fee to stimulate shipments. Nevertheless ECM policy is geared to building self-sufficiency in their agricultural production, so the long-range outlook at this time is poor for our exports of competitive products to that area.

TRADE EXPANSION ACT

Under provisions of the Trade Expansion Act of 1962, our President has been given greater powers than ever before to deal with these problems and to obtain fair treatment for U.S. producers. Secretary of Agriculture Orville L. Freeman, before the Agricultural Ministers of the organization for Economic Cooperation and Development, in Paris on last November 19, said:

"We cannot be internationally minded in industrial areas of our respective economies, but nationalistic and overly protective in the agricultural sector. Either the two great sectors must move forward together under liberal trade arrangements, or both will in time succumb to protectionism."

Under Secretary of Agriculture, Charles S. Murphy, in a statement before the Subcommittee on International Exchange and Payments of the Joint Economic Committee, on December 12, 1962, said of our negotiations with the ECM:

"We propose to insist upon fair treatment. * * * We have a mandate by the Congress to use this act to gain access for our agricultural commodities. This is evident from the section 252 provision." (Section 252 authorizes the President to withdraw existing trade agreement benefits or to refrain from proclaiming any negotiated trade agreement concessions to countries which maintain unreasonable import restrictions which burden U.S. commerce directly or indirectly.)

These statements were made by Under Secretary of Agriculture Murphy also in his talk before the Sugar Club in New York City on December 17, 1962. In a letter December 28, 1962, to Under Secretary Murphy, I complimented him for making such statements. I added, however, in part,

"It seems apparent that the solution of this matter lies in now doing what we have not done in the past, insisting upon removal of such unwarranted restrictions as a prerequisite to our consideration of any further concessions to those countries, coupled with a threat if necessary, of imposition of similar restrictions by this country, as a "big stick" if needed to convince them that we no longer will knuckle under their continuation of such unjustified restrictions. Until we insist on fair treatment with something other than words, arguments, and entreaties for fair play, we will continue to be at the mercy of those shrewd bargainers across the table.

"With a mandate by the Congress to use this act to gain access for our agricultural commodities, and the powers given the President to carry this out, the way is there if we will use it. This means realistic administration with full backing by the President, of the policies laid down in the Trade Expansion Act, so well voiced in your talk before the Sugar Club on December 17."

CONCLUSIONS

Self-sufficiency in agricultural production is laudable for any nation if that can be attained through efficient production and costs under its type of economy. It is not so when this is attained through inefficient production protected at an artificial level by undue trade restrictions on imports from other countries.

Oregon producers never have requested this type of protection.

They have asked only that efficient production at the level of the U.S. economy be protected against ruinous competition from nations with much lower labor and other costs of production.

What we need is a two-way street, upon which commodities may be traded on a live and let-live basis between the friendly and free nations of the world.

Upon such a basis I feel sure Oregon agriculture can hold its own and make further progress in the future.

EXPENDITURES FOR HIGHER EDUCATION

Mr. MORSE. Mr. President, Dean Richard W. Lindholm of the School of Business Administration of the University of Oregon, last February published in the Oregon Business Review an article entitled "Higher Education Expenditure Comparisons." Because of the information contained in this article, which I feel will be helpful to Senators at the time education legislation is considered on the floor, I ask unanimous consent that the article to which I have alluded be printed at this point in my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

HIGHER EDUCATION EXPENDITURE COMPARISONS

(By Richard W. Lindholm)

State and local government taxes and expenditures are being treated together in this article because comparisons of State figures alone can give an incorrect impression.[1] In different States larger or smaller portions of total education expenditures are made by local governments. Even comparisons including total State and local government taxes and expenditures cannot be assumed to indicate absolutely correctly the relative support. For example, the portion of the higher education effort undertaken with tax revenues varies considerably from State to State. In the States used in the comparison the portions of higher education financed from private sources seem to be about the same.

State and local government expenditures are expanding at accelerating rates and between 1958 and 1960 tended to increase more rapidly than personal income. Table 1 shows that in 1960 State and local government expenditures as a percent of personal income varied from a low of 13.9 percent in California to a high of 15.9 percent in Minnesota. This 2 percentage points of difference amounts to a 14 percent difference between the two States in the relative importance to the economy of each State of the level of State and local government activities. Oregon, with State and local government expenditures equal to 15.3 percent of personal income in 1960, is just below Minnesota.

The point highlighted by the above discussion and clearly shown in table 1 is that higher personal income in California permits very substantial State and local government expenditure efforts, while the total, as a percent of personal income, remains lower than in any of the other five States included in the comparison. One cannot help wondering whether or not the boldness of California's State and local government expenditure programs has been a cause of the high per capita income arising from activities other than those of State and local government. In other words, is there a multiplier impact of State and local government expenditures when pointed in directions closely related to economic growth?

HIGHER EDUCATION DEMAND

Higher education expenditures by State and local governments[2] have expanded rapidly. The increase in the Nation has been more than tenfold since 1942; from 1957 to 1960 there was an expansion of 38.9 percent, and these were years when the number of persons of college age did not increase particularly and the value of the dollar was not shrinking noticeably. The growing activity in this area is obvious.

The numbers of persons between the ages of 15 and 24 in the United States for the years 1960, 1965, and 1970 are given in table 2. These are the most recent official population projections by age bracket provided for the United States by the U.S. Bureau of the Census. Additional population projections by age brackets have been made by the U.S. Bureau of the Census for planning purposes in particular areas. Education is one area where this has been done.

---

[1] Data and comparisons are presented for Oregon, Washington, California, Minnesota, Colorado, and Florida.

[2] Junior and community colleges are frequently local rather than State institutions.

TABLE 1.—*State and local government expenditure trends in Oregon, Washington, California, Minnesota, Colorado, and Florida, 1958–60* [1]

State	Total direct general expenditures of State and local government (millions)		Percent of growth, 1958 to 1960	Total State and local expenditures as a percent of personal income	
	1958	1960		1958	1960
Oregon	$539.4	$608.0	12.7	15.2	15.3
Washington	879.5	951.6	8.2	14.7	14.4
California	5,016.0	6,020.6	20.0	13.5	13.9
Minnesota	981.1	1,127.1	14.8	15.1	15.9
Colorado	542.3	605.0	11.6	15.3	15.0
Florida	1,132.0	1,415.9	25.0	13.3	14.4

[1] Oregon's comparative position improves when it is tax collections that are compared with personal income. This arises because in Oregon Federal funds provide a larger portion of State and local government expenditures, e.g., in 1960 18.6 percent in Oregon and 12.1 percent in California.

Table 2 age brackets are not particularly appropriate for estimating higher education enrollments. The table is useful to this discussion only because it indicates in a general way the expansion in numbers in the upper "teens" and lower "twenties" that is upon us. This general expansion of the numbers in these age brackets is closely related to the expenditure expansion in higher education that is also upon us.

Table 3 is based on a special U.S. Bureau of the Census study of school and college enrollment expectations. The estimate for 1985 was prepared by the Bureau of Business Research of the University of Oregon. The Bureau of the Census estimated enrollment on the basis of a number of different assumptions. The estimates included in table 3 assume a moderate increase in the percentage of persons within the college age brackets who will actually attend college. It also assumes a decline by 1970 from the very high fertility level of 1955–57 down to the level of 1949–51. This decline is not of critical importance in estimating higher education enrollments, because most persons for the period of the forecast have already been born. However, the assumption of the percentage of persons in each college age bracket who will attend college is important. The assumption of only a small increase in this percentage rather than a continuation of the larger current upward trend gives a conservative yet realistic estimate. It will be too high only if facilities for higher education fail to expand sufficiently to meet the need.

The rapid expansion of higher education enrollment is expected to be completed by 1980. It is also clear that by 1980 the demand for higher education will certainly be twice as great as in 1960, and it may be considerably more.

Although the increase in numbers enrolled in American colleges and universities in 1970 over 1965 will be approximately the same as the increase in 1965 over 1960, it may be forecast with considerable confidence that the addition to the financial burden will be more than proportionate. This will be true because:

TABLE 2.—*Expected number of persons in the United States between the ages of 15 and 24, selected years, 1960–70*

	1960 (thousands)			1965 (thousands)			1970 (thousands)			Percent increase from 1960 to—					
										1965			1970		
	Total	Male	Female	Total	Male	Female	Total	Male	Female	Total	Male	Female	Total	Male	Female
15 to 19 years	13,446	6,806	6,640	17,019	8,635	8,384	18,911	9,595	9,316	26.6	26.9	26.3	40.6	40.9	40.3
20 to 24 years	11,100	5,553	5,547	13,542	6,810	6,732	17,094	8,623	8,471	22.0	22.6	21.4	54.0	55.2	52.7

1980	7,577	112.0	5,129	119.3	2,448	98.9
1985	7,600	112.9	5,131	119.4	2,469	100.6

Source: 1960–1980, U.S. Bureau of the Census. 1985, Bureau of Business Research, University of Oregon.

1. A much larger proportion of students will be taking upper division and graduate courses in 1970 than in 1965. Nineteen sixty-five will be only the second year of the expansion of higher education enrollment arising from larger high school graduating classes. Because of this, the enrollment expansion will exist only in the freshman and sophomore years in 1965, but in 1970 it will be spread throughout college upper division and graduation programs. Upper division and graduate work is much more expensive in terms of faculty, libraries, and laboratories than is lower division instruction.

2. During the 1960 and 1965 period some very expensive facilities of higher educational institutions are being utilized more completely than during the 1955–60 period. This more complete utilization permits assimilation of expanded enrollment by meeting only the additional variable costs. By the 1965–70 period, under-utilized libraries and laboratories will have become overcrowded. Under these conditions, full costs will have to be met in providing higher education for each additional student.

3. During the postwar inflation, salaries of college staffs have not risen as rapidly as many other technical and professional salaries. The rapidly rising need for additional teachers at all levels, and particularly at the college level, will develop pressures tending to rectify this situation. The result is very likely to be faculty costs rising considerably more rapidly than the size of the student body.[3]

4. To a considerable extent the increase in college enrollments prior to 1964 consisted of expanded numbers of female students. With the increase in the absolute size of high school graduating classes, the portion of expanding college enrollment consisting of male students will increase. The types of college work tending to be taken by males, i.e., science, engineering, and medicine, are considerably more expensive than those for females, who tend to concentrate in education, language and literature, and general studies.

HIGHER EDUCATION EFFORT

Table 4 has been devised to show the rate of growth of higher education between 1942 and 1960 in Oregon and the five States chosen as a comparison base, Washington, California, Minnesota, Colorado, and Florida. State and local government expenditures for higher education as a percent of personal income have increased the least in Minnesota. Measured in this fashion, Minnesota's higher education expenditures in 1942 were 42.1 percent as great as in 1960. In California the increase has been most dramatic, with the level in 1942 only 14.2 percent of that in 1960. The Oregon expansion, measured as change of percentage of personal income spent on higher education by State and local governments, is 6.3 percentage points less than in Washington, 12.4 percentage points greater than in Minnesota, and 15.5 percentage points less than the California expansion.

In all States, with the exception of California and possibly Washington, the expansion of higher education expenditures by State and local governments as a percent of personal income was relatively moderate between 1957 and 1960. Measured in this fashion, expenditures for higher education in California increased 46 percentage points between 1957 and 1960, and the increase for Washington, the next most active State in this respect, was less than half as great and equaled 22.6 percentage points. Oregon, with an increase of 16.9 percentage points, was fourth in effort expansion, being exceeded by Minnesota as well as by California and Washington. Colorado's higher education expenditure growth of 12 percentage points is the lowest.

TABLE 4.—*Index of personal income spent on higher education*

State	1960	1958	1957	1942
Oregon	100	94.9	83.1	29.7
Washington	100	73.4	77.4	23.4
California	100	66.9	54.0	14.2
Minnesota	100	88.9	80.2	42.1
Colorado	100	93.5	88.0	37.0
Florida	100	83.9	85.5	40.3
Average	100	83.6	78.0	31.1

---

[3] Prof. Seymour E. Harris has over a period of years carried out studies in this area. It is his belief, which is backed by considerable data, that, if 1930 is considered 100, the real income of college professors in 1958 had fallen to 85, while the real income of the average American had risen to 175.

Although California has experienced by far the greatest growth rate as measured in table 4, her expenditures in 1960 as a percent of personal income as shown by table 5 are only 0.01 percentage points greater than those of Colorado, the State with the lowest growth rate between 1957 and 1960. Table 5 shows clearly that both California and Washington between 1958 and 1960 dramatically increased their commitment to higher education. They were able to do this partially because their relative effort measured as percent of personal income spent on higher education by State and local governments in 1958 was considerably below that of Colorado, Minnesota, and Oregon (see table 5).

TABLE 5.—*Higher education expenditures as a percent of personal income* [1]

State	1960	1958	1957	1942
Oregon	1.18	1.12	0.98	0.35
Washington	1.24	.91	.96	.29
California	1.39	.93	.75	.19
Minnesota	1.26	1.12	1.01	.53
Colorado	1.38	1.29	1.20	.51
Florida	.62	.52	.53	.25

[1] Comparative data are not available to determine if a difference exists between States in the portion of higher education expenditures financed with Federal funds.

Table 5 shows that in 1960 higher education expenditures as percent of personal income were just about even and highest in California and Colorado at 1.39 and 1.38 percent, respectively. The next two States in terms of effort, and also about equal, are Minnesota and Washington at 1.26 and 1.24 percent, respectively. Oregon at 1.18 percent is alone, with Florida far in the rear at 0.62 percent. Relative effort in Oregon has deteriorated since 1958, when the State was tied with the second most active State, Minnesota; the relative position of these two States in 1957 has been reestablished.

These measurements of percent of personal income spent on higher education do not measure the effectiveness of that education. Certainly, unwise policies and duplication of services may cause State and local governments to make ineffective expenditures in the area of higher education. But there are no good grounds for believing that efficiency is any lower in educational expenditure than in any other activity.

THE MALLORY RULE

Mr. MORSE. Mr. President, in today's issue of the Washington Post there appears an excellent editorial entitled "Protecting Defendants."

The editorial deals with the position of the Washington Post in regard to the Mallory rule. The position stated happens to be my position. It is also the position that was taken by a majority of the members of the District Bar Association at a meeting here in Washington, D.C., last week. The editorial comments briefly upon the so-called Acheson proposal—the proposal of the U.S. district attorney—in this area. It criticizes the Acheson bill. I think every word of the criticism is sound. The Acheson bill is a most unacceptable compromise. When one concludes a reading of the Acheson bill, he discovers he has nothing but a meaningless hodgepodge left.

I believe that the position of the Washington Post is so sound in its criticism that I ask unanimous consent that the entire editorial be printed at this point in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

PROTECTING DEFENDANTS

The explosion at the District Bar Association meeting last week was a thoroughly healthy one. It reflected a rank-and-file rebellion against an attempt by the Board of Directors to put through a resolution which would have placed the association on record behind proposed legislation designed to diminish the protection of defendants in District courts.

An overwhelming majority of the 900-odd lawyers who attended the meeting voted against three bills proposed by a special committee (set up in disregard of the regular criminal law committee) aimed at revising the Mallory rule and permitting easy interrogation of suspects by policemen. The outcome was immensely becoming to independent lawyers in a free country—where one of the functions of a lawyer is to protect individuals against arbitrary or overbearing governmental conduct. Lawyers are, in a special sense, the champions of legal and constitutional rights. The District Bar Association ably vindicated that special responsibility.

The Senate and House District Committees are both now considering a sheaf of proposals to deal with the admissibility of criminal confessions in court here. In one way or another these seek revision of the *Mallory* rule laid down by a unanimous Supreme Court in 1957, although no real showing has ever been made that the *Mallory* rule interferes unduly with effective law enforcement.

Conspicuously absent from this sheaf of proposals is any recommendation from the Department of Justice, which has had the subject under consideration for many months. Instead, there is a bill proposed by U.S. Attorney David Acheson after consultation with Department officials but without their expressed concurrence or any official administration endorsement.

The Acheson bill seems to us longer but not much better than the proposal rejected last week by the bar association. It hems and haws, advances and retreats, gives with one hand and takes away with the other. It makes a gesture at protecting constitutional rights by providing that arrested persons be plainly advised of their right to remain silent by police officers—but not by a judicial officer—and by providing that arrested persons be afforded reasonable opportunity to notify a relative or friend and consult with counsel—but it does not assure provision of counsel for the indigent and the ignorant.

This proposal by the U.S. attorney is undoubtedly a conscientious effort to reconcile the exigencies of criminal prosecution with the imperatives of constitutional liberty. We think it ends in whittling away dangerously at vital procedural safeguards. It is a sound principle of law that arrested persons should be taken before a judicial officer without unnecessary delay, that they should be advised of their rights by a judicial officer and that they should be subject to detention only upon the authorization of a judicial officer. The only effective way we can think of to make the police observe this principle of law is to forbid the use of any evidence, including confessions, obtained in violation of it.

Mr. MORSE. Mr. President, I also ask unanimous consent that an article which appeared in the Washington Post this morning, announcing that the American Law Institute will undertake a study of the whole question of investigation arrest and the assurance that there shall be adequate notice and hearing on arraignment prior to long police examination. I ask unanimous consent that the article be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

LAW GROUP TO PROBE ARREST ISSUE

The American Law Institute plans a deep probe into a legal issue that is generating attention and controversy in Washington—the period between the arrest of a suspect and his appearance before a magistrate.

The Ford Foundation announced yesterday in New York City that it has made a grant of $215,000 to the institute, to draft a model statute that it hopes will be a guide for State legislation and for Federal, State, and local officials.

The model code on prearraignment procedures will be drafted by a small research staff and reviewed by a committee of judges, lawyers, law teachers, police officers, and sociologists. No time limit was set for the production of the code, but Washington lawyers said some of the studies carried out by the institute have lasted 3 or more years.

The rights of crime suspects stirred controversy here with the banning of investigative arrests effective March 15, a move defended by civil liberties advocates and attacked by those who feel the court's liberal rulings will let criminals go free.

Legislation is also before Congress to modify the Mallory rule, which requires that an arrested person be arraigned promptly and that he be instructed of his rights if a confession obtained from him after his arrest is to be used to convict him. Police officers have protested that overly strict enforcement of the rule hampers interrogation of suspects.

Although the District of Columbia operates under Federal procedural rules, systems vary widely in the 50 States and many authorities complain that the functions of police and prosecutor remain unregulated during the prearraignment period.

Officials here say the newly announced probe will be discussed when the institute holds one of its regular meetings at the Mayflower Hotel May 21–25.

Another grant of $500,000 was made by the Ford Foundation to the Walter E. Meyer Research Institute of Law to probe criminal justice, particularly the handling of petty offenses. The Meyer Institute's program also will include research on family disorganization and juvenile crime as dealt with by the courts; reparation for victims of auto accidents; protection of consumers against deceptive products and practices; the integrity and efficiency of police, courts, and other agencies in large cities; and problems of local government and community services.

Among the other grants announced by the Ford Foundation was one of $175,000 to Morgan State College in Baltimore. The grant is to expand that predominantly Negro college's program of education in public affairs. It will include internships in political offices, field research, and related activities.

Mr. MORSE. Mr. President——

The VICE PRESIDENT. The time of the Senator from Oregon has expired.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senator from Oregon may proceed for an additional 3 minutes.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

Mr. MORSE. I wish to say to those in the Congress who are so anxious to have quick action reversing the U.S. Supreme Court landmark decision in the Mallory case that we should wait until the American Law Institute completes its study of the subject. A group of scholars, judges, and law enforcement officers will prepare the study. We will then in my judgment for the first time have a sound, factual, and scholarly basis on which to act on the Mallory rule.

I strongly recommend a postponement of any further consideration of the matter in the Senate until the American Law Institute prepares its report.

The article, entitled "Law Group To Probe Arrest Issue," states:

> The American Law Institute plans a deep probe into a legal issue that is generating attention and controversy in Washington—the period between the arrest of a suspect and his appearance before a magistrate.
>
> The Ford Foundation announced yesterday in New York City that it has made a grant of $125,000 to the institute—

Which will be available for the study. I certainly think it would be shortsighted for the Congress to proceed to act until this scholarly report and study is completed.

PROPOSAL TO ELIMINATE FEDERAL SUBSIDIES TO MISSISSIPPI

Mr. MORSE. Mr. President, in the New York Times of Friday, April 19, there appeared a column by James Reston entitled "How To Make Things Worse Than They Really Are." The article sets forth Mr. Reston's opposition to any proposal that Federal funds should be denied the sovereign State of Mississippi because of difficulties in Mississippi in giving first-class citizenship right to all American citizens, including Negroes.

I completely agree with the observation of Mr. Reston. The way to solve our civil rights problem is not by way of the penalty route. We do not solve problems by penalizing or acting out of vindictiveness or on an emotional basis.

We have a serious problem of civil rights in Mississippi. In my judgment, the way to handle it is to amend the civil rights laws of our country on a legislative basis, and to enforce the laws that we already have. But I do not believe that it would be a sound course of action to follow the proposal made by some in the Congress that we ought to deny to any State its share of Federal aid money in regard to a measure that involves sound general welfare programs because we do not like what is going on inside the borders of that State. In my judgment, that is not the way to solve our civil rights problems.

Mr. MANSFIELD. Mr. President, I have listened with interest to what the distinguished senior Senator from Oregon had to say about Mississippi. I agree wholeheartedly with his remarks on the Mississippi situation and the suggestion by the Civil Rights Commission.

Insofar as the proposal or suggestion made by the Civil Rights Commission that the President cut off Federal subsidies to Mississippi is concerned, the President has stated that he does not have this power, nor does he think any President should have that power. The President is correct in both instances, because he does not have the constitutional power, and, secondly, if he did have that authority and used it, Mississippi might be used as a precedent and the same tactic might be employed against other States. Furthermore, Mississippi is a part of the Union of 50 States, and a proposal of this kind would not only bring about a "set apart" status for Mississippi, but it would also be felt most deeply by the Negroes who comprise approximately 45 percent of Mississippi's population. In addition, such a proposal would bypass the courts by giving to the President, and/or the Congress, the right to determine when a State's conduct conflicts with the Constitution. Mississippi is not the only State in which the Government spends more money than it takes out.

Finally, so far as the new airport at Jackson is concerned, I understand there are no Federal funds involved in the construction of the terminal.

Patience and the judicial process are the answers in instances of this kind—not arbitrary proposals or unwarranted, dictatorial action; the provision for it does not exist under the Constitution.

CRITICS MISS POINT ON FEDERAL FINANCE

Mr. MOSS. Mr. President, the Members of Congress are aware of the concern of our citizens over the rising cost of Government in the last decade. And we are well aware—although many of our citizens are not—that both the costs and the debts of State and local governments have risen much faster than those of the Federal Government.

This fact does not imply criticism of the States. We understand, I am sure, the tremendous burdens being placed on these units of Government by the needs of a rapidly expanding population, and the vigorous efforts many are making to carry these burdens.

However, if our citizens are to make the proper decisions concerning Government, they must act from a knowledge of the facts. And it is refreshing to see on the business pages of our newspapers such an analysis as that by the well-known financial writer Mr. Harold B. Dorsey, which was carried by the Washington Post last Monday, April 15.

I ask unanimous consent that Mr. Dorsey's column be made a part of the RECORD.

There being no objection, the column was ordered to be printed in the RECORD, as follows:

CRITICS MISS POINT ON FEDERAL FINANCE

(By Harold B. Dorsey)

There is a propensity among critics of government expenditures and taxes to concentrate on the Federal Government's financial operations and to ignore those of the State and local governments. There have been instances where the word "government" has been used so loosely that the Federal Government tends to be criticized for State and local government actions.

In the 5 years through 1962, the number of workers on the Federal Government payroll increased 124,000 (5.6 percent). The number of employees on the payrolls of State and local governments increased by 1,435,000 (26 percent). State and local government workers outnumbered Federal employees by 2.9 times last year.

Federal Government debt in the same 5-year period increased about 14 percent. The debt of State and local governments increased by about 55 percent. On a cash basis, Federal Government expenditures in the same period increased about 34 percent and the State and local government expenditures increased 43 percent. Furthermore, the increase in the Federal expenditures includes substantially larger grants-in-aid to the State and local governments.

When we think of "government" levies siphoning off an increasing proportion of the productive efforts of the nongovernment economy, perhaps we should note that, on a cash basis, Federal receipts increased by approximately 27 percent in the 5 years through 1962, whereas the State and local government receipts increased by about 43 percent.

Five years ago (1957), Federal Government purchases of goods and services accounted for 11.8 percent of total gross national product and last year the proportion was 11.3 percent. The proportion for similar State and local government purchases was 8.3 percent in 1957 and increased to 10.3 percent last year.

It is quite clear then that in all of these measurements of employment and fiscal operations, the State and local government figures have been rising much more rapidly than those of the Federal Government. I doubt that there is a broad comprehension of these facts. This is unfortunate because it leads to many misunderstandings in the interpretation of business and government statistics.

For example, the Federal tax burden is not difficult to follow—and to criticize—because the bulk of it consists rather simply of income and social insurance taxes. The bulk of the State revenues comes from property taxes and from various types of sales and excise taxes, and license fees. Most of the sales and excise taxes are directly added to the price of goods and services sold and tend to be overlooked. Some portion of the increase in the cost-of-living index is caused directly by these taxes.

The rising importance of State and local government activities vis-a-vis the Federal Government deserves more attention in the projections of business prospects. Business analysts labor over the economic effects of Federal receipts and expenditures, but usually do not have a proportionate interest in the same figures for the State and local governments.

Similarly, the effect of Federal debt on the banking structure is analyzed carefully with little thought being given to the effects of State and local government deficit financing. In the past 18 months there has been little change in the commercial bank holdings of Federal securities whereas their holdings of State and local government issues have been rising quite sharply.

There is not enough space here to even tabulate the economic, sociological, and political interpretations that are distorted by a failure to comprehend the rapidly changing relationship between the Federal Government's financial operations and those of the State and local governments.

One small item occurs to me that may be germane to the current situation. The beneficial effects of a reduction of, let us say, $10 billion in Federal income taxes are likely to be offset, in part, by the steady increase in the tax burden of State and local governments, even though these latter levies may be fairly well hidden in sales and excise taxes that increase the prices of commodities and services.

RATIFICATION BY FLORIDA LEGISLATURE OF PROPOSED ANTI-POLL-TAX AMENDMENT TO THE CONSTITUTION

Mr. HOLLAND. Mr. President, I am particularly happy to report to the Senate today that the State of Florida, which

I represent in part, has ratified the proposed anti-poll-tax amendment to the Constitution, thus becoming the 31st State to do so.

This action followed the strong recommendation of the Governor of Florida, the Honorable Farris Bryant, in his regular message to the legislature. Florida was the second Southern State to ratify, the first being Tennessee.

Pursuant to the assurances which I have frequently given Members of the Senate during the years of consideration by the Congress of this matter, I appeared personally on April 10 before a joint meeting of the senate committee on constitutional amendments and the house committee on memorials and resolutions of the Florida Legislature, representing not only myself but also my distinguished colleague (Mr. SMATHERS) who has stood stanchly with me, along with so many other Members of this body, in this long fight. Those were the committees to which the resolutions of ratification had been referred.

Immediately thereafter, each committee favorably reported its respective resolution of ratification with a single dissenting vote. Shortly thereafter, on Friday, April 12, the Florida Senate approved the anti-poll-tax resolution by a vote of 36 to 6, and the Florida House by a vote of 105 to 3.

On last Thursday, April 18, the Florida House accepted the Senate's resolution ratifying the amendment, thus completing formal ratification by the legislature of my State.

With this highly commendable action by the Florida Legislature, leading toward better government through wider voter participation in Federal elections, we thus have moved one more important step forward toward ratification by the 38 States of the Union required.

As I have pointed out to the Senate recently, one house or the other of the legislatures of four other States has approved a resolution ratifying the anti-poll-tax amendment. Those States are Iowa, Delaware, Oklahoma, and Missouri.

The legislatures of four other States to which the anti-poll-tax amendment has been submitted by the General Services Administrator are also presently in session. Those States are Maine, New Hampshire, North Carolina, and Texas.

I am indeed hopeful that we shall soon receive good news from the legislatures of several of the above named eight States.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. HOLLAND. I yield to the distinguished majority leader.

Mr. MANSFIELD. The distinguished senior Senator from Florida is entitled to special commendation, because for more than a decade he has been the leader in the fight to abolish the poll tax as a means for validating a voter's right to cast his vote.

The Senator from Florida within the past several days appeared before his own State legislature. I am sure, because of his active and personal interest in the proposal, that he had much to do with getting the legislature of his State to go along with his proposal.

I have heard statements made time and time again on the floor of this Chamber that the way to bring about the abolition of the poll tax is to legislate, rather than to follow the process of constitutional amendment. I am happy, therefore, to know that Florida is the 31st State to take action, and that under the amendatory constitutional process we are so close to the goal of removing the poll tax as a means test for voting.

I wish to pay public tribute to the leader in this fight who, against terrific odds—and time and time again against entrenched opposition—has been able to bring this particular issue to the extremely favorable position which it occupies at the present time. I express the hope that if we cannot get the necessary votes from State legislatures this year, that next year will mark the end of this struggle.

Mr. HOLLAND. Mr. President, I certainly appreciate those more than generous remarks. I would be derelict if I did not say that the action in 31 States has been due in large part to the activities of Members of the Senate on both sides of the aisle, who, having supported my resolution proposing the amendment last year, have proceeded to bring the matter to the attention of their own State legislatures, with such gratifying results. I am certainly deeply beholden to them.

Since our State has now become bipartisan—there are some 15 members of the legislature who represent the party which occupies the other side of the aisle here—I wish to make it very clear that the support of ratification came from both parties, and was completely bipartisan. Although I have not reviewed the vote, it is my understanding that every member of the opposing part of both Houses of the Florida Legislature voted for ratification.

So we continue this completely bipartisan effort, which I hope will soon be consummated.

I thank the majority leader.

THE SITUATION IN LAOS

Mr. LAUSCHE. Mr. President, today's Washington Post carries the story:

> Neutralist Prime Minister Prince Souvanna Phouma brought back another Communist Pathet Lao cease-fire promise from the Plain of Jars today, a week after he hopefully returned with the first one that turned out to be embarrassingly empty.

During 1961, and in the early part of 1962, the newspapers of the country, commentators and others, were reporting word that there was to be a cease-fire in Laos.

Day after day I listened to commentators and read newspapers giving the encouraging word to the people of the world that firing would cease in that important land in the Far East. But no cessation of firing came about. The firing continued. The Communists were the ones who were moving forward, taking increasing control of the Laotian land.

Today we have a sad spectacle of an identical repetition of what happened in 1961 and 1962. I think we ought to give some consideration to the fact that we have been again deceived, again trapped, and again weakened in our political and military position by the coalition government that was so widely heralded by members of the administration and others as the solvent of the problem in South Vietnam, Laos, Thailand, Malaya, and other places in the Far East.

On this score, a year or more ago, I warned against the establishment of a troika government. I pointed out what happened in Yugoslavia, wherein the Mihailovitch forces were compelled to join in a coalition government with Tito. Others pointed out what had happened in China when Chiang Kai-shek was compelled to enter into a coalition government with the Communists of China. Others pointed out the situation which prevailed in Poland, Bulgaria, Rumania, and other countries.

Wherever a commitment was made by the Communists to establish a neutral coalition government, that commitment was violated.

We then come down to the summer of 1962. The proposal was made, "Let us have a coalition, a three-headed, a troika government. We will have a neutralist in the middle, a Communist in the left wing, and a member of the incumbent government in the right wing, and out it will come triumph in the Far East."

Those who warned and those who spoke about the danger and said that the coalition government would be only a vehicle for the advancement of the Communist cause were looked upon with contempt and disdain.

Well, the newspapers today report that practically all of the strongholds of the incumbent royal government have been taken over by the Communists. The question is, How far can we tolerate conditions of that type?

Mr. President, I ask unanimous consent to have some additional time.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senator from Ohio may have 3 additional minutes.

The PRESIDING OFFICER (Mr. CHURCH in the chair). Without objection, it is so ordered.

Mr. LAUSCHE. I know these words are unwelcome, but, though unwelcome, they are true. They cannot be denied. And I will not remain silent just because of their unpopularity.

I have before me the protocol that was entered into by, I think, 14 nations, concerning Laos. It is the protocol for the establishment of the coalition government. To begin with, a commission was created, a commission made up of Canada, India, and Poland, to insure that the commitments in the protocol would be carried into effect.

We knew then, and we know now, that Poland and India could not be expected to do much with regard to carrying into effect the commitments. One of the articles in the protocol provides that within 30 days after the protocol is signed the troops of the United States, of France, and of Communist China and Russia were to be removed from Laos.

The agreement was signed, I think, on September 6. By October 6, those troops were to be removed. The United States removed its soldiers. France removed its soldiers. But Red China and Red Russia did not comply with the agreement. Ten thousand of them were there. How many went out of the country we do not know, but it is an established fact that that part of the agreement was flagrantly voilated.

There were other articles in the agreement. Practically none of them were fulfilled. The commission, made up of Poland and India, primarily, and also Canada, was supposed to be insurance that there would be no firing. There was no firing since last September, but the firing has begun again and the Communists are advancing.

Laos is gone. The papers report today that the President may sent the fleet to South Vietnam area to give a demonstration of strength.

We are doing exactly what Chamberlain did. We are being pushed and we are retreating, and each day our problem is betting graver. Now we are going to try to help in South Vietnam. Our ability to help has been substantially reduced by the fall of Laos.

The PRESIDING OFFICER. The Senator's additional time has expired.

Mr. LAUSCHE. I ask to have some additional time.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senator from Ohio may have 3 additional minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LAUSCHE. It has been the practice, and it has been so since 1944, that when a coalition government is created, with the Communists as a part of it, they break their word. They did exactly that in Laos. The consequence is that our position in the world is made basically and fundamentally worse than it was 2 years ago.

A moment ago I stated that the Senator from Connecticut [Mr. DODD] had made a statement on the floor of the Senate on May 21, 1962. I suggest that his statement be read, because it foretold exactly what we are witnessing today. He told about the coalition government of Subasic of Yugoslavia. Tito took over and the neutralists were kicked out. The Slovenes, Croats, and Serbs, who believe in a democratic form of government, in the main have had to flee to Canada, Australia, South America, and the United States.

The same thing happened in Poland, in Czechoslovakia, and in Bulgaria. Yet we persist in making coalition agreements with Communist Russia.

It is now proposed to make a treaty on the banning of nuclear tests and the banning of armaments. I would like to see a treaty of that type executed, but I warn that we must have an agreement filled with ironclad provisions, so that we shall never again be betrayed and duped by the duplicity and the deceit and the mendacity of the Communists.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point an excerpt from the speech of the Senator from Connecticut [Mr. DODD] in the Senate on Monday, May 21, 1962.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

SPEECH OF HON. THOMAS A. DODD, OF CONNECTICUT, IN THE U.S. SENATE, MONDAY, MAY 21, 1962

Mr. President, we are all, I know, deeply distressed over the trend of events in Laos. No one could help but be impressed by the President's message, and by his warning concerning the gravity of the situation in southeast Asia.

President Kennedy will, I am certain, have the support of all of us in his decision to dispatch American troops to defensive positions on the Laotian frontier, and for any further measures he may find it necessary to take to prevent the subjugation of southeast Asia by international communism.

In his prompt and solitary decision to send American forces into Thailand, President Kennedy has provided the kind of leadership which galvanized the free world at the time of the Korean invasion, the kind of leadership which our allies expect of us. By his actions President Kennedy has greatly bolstered the entire position of the free world in the southeast Asia crisis. But these energetic measures, I fear, will be seriously undermined and conceivably negated unless we also take measures to reappraise and revise certain aspects of our policy in Laos.

Both Republican and Democratic administrations have committed themselves to defend the freedom of Laos against the threat of Communist aggression. When SEATO was established after the fall of North Vietnam, Laos was specifically brought under the SEATO umbrella and the Asian Communists were warned that an attack against it would result in a collective response by the SEATO powers.

But today, despite our onetime assurances to Laos and despite the assurances we have now given to Vietnam and to Thailand, the fact remains that Laos stands in serious danger of a Communist takeover.

The present crisis makes it imperative that we reappraise our recent policy in Laos, to see where we have erred and what might be done, even at this late date, to salvage something from the situation.

In Laos, Communist tactics have admittedly been complex, but they have in no way been novel. On the one hand, they have exercised military pressure through native guerrillas and North Vietnamese troops. On the other hand, they have inactivated us through protracted negotiations and bewitched us with the prospect of a neutralist Laos, governed by a Communist-neutralist-conservative coalition.

In Laos, indeed, our entire policy has been predicated on the assumption that Soviet desires did not go beyond the establishment of a truly neutral government, open to the influence of Moscow and Washington alike. It is in line with this belief that we have urged our Laotian friends to enter into a coalition government with the Communist and neutralist forces. But the prospects of peaceful coexistence in Laos have been shattered by the events of the past week.

"That the United States has been played for a fool—"

Said the distinguished columnist Marguerite Higgins, in the New York Herald Tribune, Monday, May 14—

"was evident in Washington, firstly, from events in Laos, where Red troops led by Hanoi and Red-Chinese trained officers were ferociously giving the lie to the Harriman doctrine * * *. It was evident from the small, smug smiles of the Communist statesmen and journalists in Washington, who were patronizingly telling the subdued and silent non-Communist set that—in the words of one Soviet bloc official—'the New Frontier never really set much store by Laos anyway, so how could you consider it a setback?' It was evident from the cold indifference with which Moscow heard out Washington's pleas to live up to pledges to support the cease-fire."

The crisis of Laos represents a crisis of the first magnitude for the whole of southeast Asia. Indeed, it is no exaggeration to say that it represents a crisis of the first magnitude for the whole free world.

The countries of southeast Asia are rich in natural resources. But it is their strategic importance, rather than their economic importance, that makes them primary targets of Communist aggression.

If the Communists ever succeeded in establishing their dominion over the whole of southeast Asia, they will, in effect, have cut the world in half. The western Pacific land mass will be theirs from the Bering Straits to Singapore, while the control of the southern island chain, from Sumatra to New Guinea, would give them command of the entrances from the Pacific Ocean to the Indian Ocean.

The Communists' conquest of southeast Asia would produce so serious a shift in the world balance of power that our very ability to survive would be called into question.

From our recent policy in Vietnam and from the commitment we have now made to Thailand, it would appear that we have accepted the harsh reality that our own security and the security of southeast Asia are inseparately intertwined. The most dramatic evidence of this is the fact that 5,000 American soldiers are today serving in South Vietnam as instructors in guerrilla warfare, as transport pilots, and as advisers in combat areas, while another several thousand have now been dispatched to the frontier of Thailand.

The administration has made it clear by these commitments that South Vietnam and Thailand will not be permitted to fall to communism. But we have been warned, and rightly, that it may take many years before this battle is won, and that it will almost certainly take a much heavier commitment in American manpower and, conceivably, in American blood.

The Communist assault on the countries of southeast Asia has been incredibly persistent, incredibly cunning, and remarkably successful.

Their primary weapon in this area has been guerrilla movements, organized and trained in and supported from territory already under their control. With this weapon they almost succeeded in taking over Malaya, they succeeded in conquering the larger part of Vietnam, and they have now taken control of the larger part of Laos.

In Malaya, the number of Communist guerrillas never exceeded 10,000. But it required the expenditure of billions of dollars and the efforts of a highly trained British Commonwealth force of several hundred thousand men over a period of 5 years before the Malayan guerrillas were brought under control. As a result of the British experience in Malaya, it is now accepted as a fact that, even employing troops of the highest quality, a successful antiguerrilla operation requires antiguerrilla forces 10 to 15 times as numerous as the guerrilla forces which oppose them.

In Vietnam, when I was there less than a year ago, the number of Communist guerrillas was estimated at approximately 10,000 men. Opposing them was a Vietnamese army some 120,000 strong, backed up by another 30 or 40 thousand home guards. But even with these numerical odds, the Government was able to make no serious headway against the guerrillas. More than 1,000 Government representatives and village administrators were being assassinated every month. Every day brought new reports of attacks on bridges and powerhouses and other installations. The hard-pressed Government army, which had done without leave for many months, was strained to the breaking point. The administration of the country was slowly deteriorating as a result of the terrible casualties inflicted on administrators and technicians at all levels of government. The morale of the people was sagging.

I wholeheartedly applaud the administration's commitment to save South Vietnam from the growing menace of Communist subversion. But, on the basis of what I saw and learned in the course of an extensive tour of southeast Asia last year, I am afraid that there has been a tendency to focus too narrowly on South Vietnam.

As matters stand today, I believe that our policy in South Vietnam is in conflict with our policy in Laos, that our policy in Laos, as a matter of fact, is undermining the affirmative and courageous policy we are endeavoring to follow in Vietnam.

I think we would all have less difficulty in understanding the world situation if we studied our maps more frequently. In the case of Laos, its strategic importance should be instantly apparent from a look at the map.

If there is any one country that may be described as the geographic heart of southeast Asia, it is Laos. For Laos has common frontiers with virtually every country in the area—with Communist China and North Vietnam, with the neutralist nations of Cambodia and Burma, and with the two committed nations of the southeast Asia mainland, South Vietnam and Thailand.

Toward the end of 1960, Soviet planes began airlifting supplies to the Lao Communist, or Pathet Lao, forces. At this point, the Soviets were still very uncertain of our reaction. The first Soviet planes that flew in carried benzene. These Soviet planes discharged their cargoes unmolested: we did nothing. Perhaps President Eisenhower did not want to commit the American Government to a potentially hazardous course of action in the last days of his regime.

In any event, the next group of Soviet planes that arrived carried small arms ammunition. Still, we did nothing.

Then Soviet planes began to arrive bearing jeeps and howitzers and other heavy equipment. Still, we did nothing.

Finally, when it was apparent that they could intervene with impunity, and that there would be no American reaction, the Communists began flying in technicians and military personnel.

There still was the possibility that SEATO would honor its obligations to defend Laos against the threat of Communist aggression. But when the SEATO Council met in April of 1961, it took no action. The SEATO nations in the immediate area—the Philippines, Thailand, Australia, New Zealand, and Pakistan—all favored common military action in defense of Laos. Britain and France objected. The United States sat on the fence. And since all SEATO decisions must be unanimous, SEATO did nothing.

I want to emphasize that at the time this SEATO meeting took place, our Asian allies were prepared to provide all or most of the necessary ground troops. They took the stand that it was much better for Asians to fight in Asia and that, if SEATO did intervene, American participation should consist primarily of air and logistical support. Had we provided the necessary leadership at this historic session of SEATO, Laos would not be on the verge of falling to communism today. But instead of providing such leadership, our own primacy in SEATO was used as a brake to prevent the Asian member nations from taking the measures of collective self-defense which they considered essential.

Our Asian allies were bitterly disappointed. "We are prepared to fight and die with you if necessary."

Philippine Foreign Minister Serano said to me just a year ago this month—"but we cannot fight without American leadership."

For this delinquency we shall, I am afraid, have to pay a heavy price both in American and Asian blood.

One of the excuses that has been offered for our own inaction in Laos is that the Lao people and the Lao Army have shown no will or ability to resist the Communists. This is coupled with the assertion that the Communists apparently have far more popular backing than does the Royal Lao Government.

Even if these assertions were completely true—which they are not—it would, in my opinion, still be necessary to defend Laos; even if we were not interested in the fate of the Lao people, the defense of Laos would still be a strategic necessity because, ultimately, the fate of all southeast Asia and our own security may hinge on it.

But I do not accept the thesis that the Lao people are indifferent to communism and that the Royalist forces are incapable of fighting.

I remind the Senators that it was a year ago last December that the Royalist army, under General Phoumi, drove the highly touted Kong Le rebels out of Vientiane.

I remind the Senators, too, that certain units of the Lao Army, in particular the 10,000 Meo tribesmen who are serving with it, have put up truly heroic resistance in situation after situation.

I call to their attention the fact that there are now more than 40,000 refugees from Communist terror in the Vientiane area, and that hundreds more are arriving every day.

I call to their attention the reports of the dedicated American missionary, Father Matthew Menger, whom I met in Laos, and whom I recently had the pleasure of seeing again in this country. Father Menger is one of the very few Americans who speak Laotian fluently. He has traveled extensively on foot throughout the country. He has, even in recent months, visited many villages in territory that is supposed to be under firm Communist control. Father Menger has reported that the Communists control the strategic centers; but even in the northern province of Samneua, which was the first to fall to the Communists, the capital city of Samneua is completely surrounded by anti-Communist villages.

As of 2 years ago, it was probably true that few Laotians knew the meaning of communism or felt very strongly about it. But, as of today, the evidence is that the Laotian people have learned the meaning of communism the hard way, from their actual experiences under Communist rule in those portions of the country that have been overrun by the Laotian and Vietnamese Red forces.

True, the Laotians, by and large, are not a martial people. There may be a number of reasons for this. Certainly one of them is the orthodox Buddhist religion which prevails in Laos and which frowns upon the killing of any living thing, even so useless a thing as a mosquito. But American military men with whom I discussed the situation told me that, with adequate training and proper leadership, the Lao can be a very good fighting man. They said that certain of the best trained units in the Royalist army had conducted themselves in a highly creditable manner in engagements with the Communists. Against the Laotian Communists, I was told, the Royal army was generally able to hold its own and better. But they were simply no match for the hardened professionals of the North Vietnamese Communist army which has been participating in the Laotian civil war through independent units and through units of specialists attached to the Laotian Communist forces.

There is another reason, in my opinion, why the Royal Laotian army units have frequently failed to stand up against the Communist enemy. All the world has confidence in a winner; and in Asia, far more than in Western countries, human behavior is determined by a belief in an irresistible wave of the future or by an equally fatalistic acceptance of certain downfall and defeat.

With their aggression, their determination, their persistence, their arrogant self-confidence, and the unstinting backing they have received from the Soviet Union and Red China, the Lao Communists have succeeded in creating the impression that they are part of the irresistible wave of the future. By our own inaction and by our repeated failures to live up to our assurances, we have fostered the corollary impression that our side is doomed.

Under these circumstances, who can blame the Lao army if its morale has frequently been uncertain? Even Americans serving as instructors and advisers in Laos have been demoralized by the ambivalence of American policy. For example, last Sunday over one radio news program, an American instructor in Laos was quoted as saying:

"Why am I here trying to teach these people to fight, if it's already been decided that the country is to be turned over to the Communists?"

Parenthetically, at this point, I would like to say a few words about the unfortunate habit of designating Prince Boun Oum and Gen. Phoumi Nouvasan as rightwing leaders. The manner in which this description has been used by the press and, regrettably, by some State Department spokesmen, somehow suggests that Prince Boun Oum and Gen. Phoumi are exploiters or big landowners or political reactionaries. Actually, Laos is a very primitive country without any landowning or capitalist class, and from a purely economic standpoint, it makes little sense to talk of rightwing or leftwing. I believe it would be far more correct and far more meaningful, and certainly, it would feed far less grist to the Communist propaganda mill, if our press could learn to refer to the Communists as "Communists" and to people like Prince Boun Oum and General Phoumi as Loyalist or anti-Communist leaders rather than rightwing leaders.

I consider this matter of nomenclature of the greatest importance, because it is with insidious little words like these that public opinion is poisoned against our friends in other countries.

Against the background of SEATO's failure, the Lao Government in May of last year agreed to negotiations with the Communists.

Speaking in Manila a year ago, and speaking on the floor of the Senate on my return from the Far East, I said that the Communists would not be satisfied with the partial conquest of Laos, and that they would violate the cease-fire at every opoprtunity. For the accuracy of this prediction, I take no particular credit. I believe that this prediction could have been made by anyone familiar with Communist tactics.

Since the cease-fire was signed, the Communists have occupied point after point, until today they hold more than half of Laos. North Vietnamese intervention, previously limited and carefully veiled, is now unconcealed and massive. At the present time, there are reported to be in excess of 7,000 battle-hardened soldiers of the North Vietnamese armies fighting alongside the Lao Communist forces.

Communist supplies are moving into Laos at a constantly accelerated rate, by land and by air, supporting the greatly increased Communist military activities, both in Laos and in Vietnam. As a matter of fact, it is thanks primarily to their control of this area adjoining South Vietnam that the Vietnamese Communists have been able to double the size of their guerrilla forces in South Vietnam over the past year.

And while all this has been going on, we have continued to negotiate with undeterred good faith, in the hope that a truly neutral government can be constructed around the personality of Souvanna Phouma.

Prince Souvanna Phouma, we are told, is not a Communist. But I also recall that we were told that Castro was not a Communist. For my own part, I believe that we are building our foreign policy on forlorn and impossible hopes when we assume that Prince Souvanna Phouma, who has visited the Communist capitals but has refused an invitation to the United States, and who openly shares offices and living quarters with his half-brother Prince Souphanouvong, the acknowledged head of the Lao Communist movement, will save Laos from communism.

When I was in Laos last May, I was assured categorically that we would never consent to giving the Communists the key positions of the Ministry of the Interior and Ministry of Defense in any coalition government. But today, it is reported that our representatives have agreed to assign both the Ministry of Defense and the Ministry of the Interior to the designees of the so-called neutralist leader, Prince Souvanna Phouma, on the specious theory that a Souvanna Phouma government is the only thing that can save Laos from a complete takeover by the Communists. Not merely have we accepted this position, but for several months now we have been pressuring our Lao friends to enter into such a coalition government against their own better judgment.

Prime Minister Prince Boun Oum and his Defense Minister, General Phoumi, have, to their credit, resisted our pressures. And, to our shame, we have now cut off our monthly assistance to the Government of Laos in an effort to force them into a coalition with the Communists.

THE QUESTION OF COALITION GOVERNMENT

I do not know whether to be surprised or awed over the fact that, after so many sorry experiences, we have again fallen for that most shopworn of all the Communists' shell games; the coalition government.

The free world first fell for the coalition government trick during World War II. In November 1944, having abandoned General Mihailovitch in Yugoslavia, Britain and the United States attempted the impossible task of preventing a Communist takeover by forcing Prime Minister Subasic into a coalition government with Marshal Tito. Needless to say, there were all kinds of assurances from Marshal Tito that he did not intend to communize Yugoslavia, and that there would be free elections at an early date.

In February 1945 at the Yalta Conference, the Tito-Subasic formula was to become the model for a whole series of coalition governments in central Europe—coalition governments which invariably and, in my opinion, inevitably paved the way for a complete Communist takeover. The central formula of the Yalta Declaration promised the liberated countries of Europe, "governmental authorities broadly representative of all democratic elements of the population." This, of course, was a euphemism for coalition governments.

Hardly had the Tito-Subasic agreement been signed, than Tito began to dishonor its terms. He made it clear that by free elections he meant elections with a single slate of Communist-approved candidates. The few non-Communist political leaders in the cabinet were removed, and placed in prison or total obscurity.

With minor differences in timing and technique, the coalition governments established in Rumania, Bulgaria, Hungary, Poland, and Czechoslovakia developed along similar patterns.

The proven Communist techniques for subverting representative government via interparty coalitions has been described with amazing frankness by the Czechoslovak Communist, Jan Kozak, in a book intended as a guide for fellow Communists. In this booklet, Mr. Kozak spoke of "the possibility of forming a government of broad democratic forces grouped around the working class, relying on the revolutionary activity of the masses. Such a government can be set up without armed battle by peaceful means. Its installation would be practically tantamount to the establishment of the democratic revolutionary power of the people." Specific lessons were drawn from the Red takeover in Czechoslavakia.

Mr. Kozak's formula calls for a combination of "pressure from above" and "pressure from below" to convert the coalition government into a "socialist" one. He said:

"Gradually, as the national and democratic revolution changed into a socialist one, the pressure 'from above' was applied in an ever-increasing measure for the direct suppression and destruction of the counterrevolutionary machinations of the bourgeoisie. Let us recall the signal role played in the development and extension of that pressure by the Ministry of the Interior, for instance, which was led by the Communists, and the units of State Security directed by them."

I challenge anyone to read Mr. Kozak's brochure outlining the Communist theory and practice of coalition governments, and come away from this reading still convinced that Communists can enter into coalitions in good faith.

I find it all the more difficult to understand our present policy in Laos because Ambassador Harriman has, himself, had a very personal and exceedingly bitter experience with coalition governments in the immediate postwar period.

The governments set up in the central European countries after their "liberation" by the Red Army did not correspond in any way to the democratic governments that had been forecast by the Yalta Declaration.

Speaking in the House of Commons on August 20, 1945, the British Foreign Secretary said:

"The governments which have been set up in Bulgaria, Rumania, and Hungary do not, in the view of the British Government, represent a majority of the people. The impression I got from recent developments was that one kind of totalitarianism was being replaced by another. * * * The form of government being set up does not impress me as being sufficiently representative to meet the requirements of diplomatic relations."

It was against this background that the foreign ministers of the allied powers met in Moscow in December 1945. Despite the wholesale violation of the Yalta agreement, the British and American Governments joined the Soviet Government in calling for the establishment of a new coalition in Rumania. This coalition was to include representatives of the two national parties, the National Peasant and the National Liberal Party, and it was to be followed by free and unfettered elections. To carry out this agreement, a supervisory commission consisting of Foreign Minister Vishinsky, Ambassador Harriman, and British Ambassador Sir Archibald Clark-Kerr, was sent to Bucharest.

Jules Maniu, the revered leader of the Peasant Party, and the other democratic leaders warned the Western ambassadors that the Communists had absolutely no scruples and that their assurance of free elections meant nothing. But Sir Clark-Kerr and Mr. Harriman argued against these misgivings and urged the democratic Rumanian leaders to enter into the coalition.

What happened subsequently is a matter of recent history; but our memories, unfortunately, seem even too short for this small span. The opposition press was completely suppressed. Opposition parties were first intimidated, then terrorized, then illegalized. The opposition leaders, Jules Maniu of the Peasant Party, Bratianu of the National Liberal Party, and Petrescu of the Social Democratic Party, were all imprisoned; and in July 1951 it was reported that Maniu died in prison, a martyr to his country's freedom.

Today in Laos, it seems to me that the tragedy of Rumania is being repeated almost step for step. Even some of the cast is the same. Thus, we find Mr. Harriman urging the Lao anti-Communist leaders, against their own better judgment, to enter into a coalition government with the Communists; and I take it for granted that Mr. Harriman must be repeating some of the well-intentioned assurances that he gave to the democratic political leaders in Rumania in 1946.

The assurances in Laos, I am afraid, have not always been the most friendly. I should like to draw the attention of my colleagues to the following account by the distinguished American correspondent, Joseph Alsop, which appeared in the New York Herald Tribune for April 23, 1962:

"Governor Harriman looked at the Lao leaders one by one; pointed a stern forefinger at each of them in turn; and told them that he wished them to know they would be 'responsible for the destruction of their country' if they refused to do his bidding. There was a brief silence, and General Phoumi then replied: 'You know, Governor Harriman, we in Laos have many years' experience of colonial rule. But we were never spoken to in quite that fashion in the colonial times.'"

The coalition government gambit has had results just as disastrous in Asia as in Europe. In fact, our commitment to a coalition government in China in the postwar period was perhaps more responsible than any other single factor for the loss of mainland China to the Communists.

The commitment to a coalition government or a "government of national unity" was formalized in the so-called Marshall directive of December 1945. This directive, which was drafted by John Carter Vincent, the head of the Far Eastern desk in the Department of State, reflected the philosophy of the Institute of Pacific Relations, which for many years had enjoyed a near monopoly on Far Eastern expertise.

At the time when the Marshall directive was issued, the Nationalist forces occupied the bulk of China, had overwhelming military superiority, and were pressing offensives against the Communists at a number of points. In a misguided effort to force President Chiang into a coalition government with the Communists, Secretary of State Marshall, in the summer of 1946, placed an embargo on arms and ammunition to the Nationalist forces. Repeatedly, the Nationalists were told that unless and until they came to terms with the Communists, they could expect no active assistance from the United States. Finally, in the fall of that year, with the aid of the embargo and a variety of other pressures, the Department of State succeeded in forcing President Chiang to agree to an armistice, and to conversations with the Communists with a view to forming a coalition government.

These conversations dragged on for months and months, punctuated by repeated violations of the cease-fire by the Communists. The Chinese Reds, for their part, maintained the pretense of favoring a coalition government until the Nationalist position had so weakened that the Communists were no longer interested in compromise.

Our folly in China persisted to the bitter end. As late as March 1948, the administration reiterated its adherence to the principles enunciated in the Marshall directive.

Commenting on the similarity between our ill-fated China policy and our present policy in Laos, the New York Times said editorially on May 12, 1962:

"The American policy is based on Washington's belief that the Lao are uninterested in political or ideological conflicts and, in contrast to the Vietnamese, will not fight.

But to back up that policy and force the pro-Western leaders into the coalition with the Communists, even to surrender the army and police, which they refuse, American authorities have tended to undercut the pro-Western Government, even to accuse it of provocation, until this policy begins to resemble that which lost China."

In justification of the coalition policy in Laos, it has been argued that not every government which included Communist ministers has wound up by succumbing to communism. It has been pointed out that such coalitions did, in fact, exist in France, in Italy, and in Finland, and one or two other countries in the postwar period.

This comparison completely skirts the issue. France and Italy emerged unscathed from the postwar experiments in coalition because there was no Communist military presence in these countries, because their security forces and the armed forces remained under anti-Communist control, and because the democratic parties in these countries disposed of very considerable resources in men, money, and experience.

Finland survived her postwar coalition because the Finns are one of the toughest people in Europe and perhaps the most sophisticated about the ways of their Soviet neighbors.

But Laos is not France or Italy; and the Laotian people, in terms of sophistication, cannot be likened to the French, Italians, or the Finns. Given the massive presence of the Red Chinese and North Vietnamese army on its frontiers, given the existence in Laos of substantial units of Red Chinese and Vietnamese forces, given the lack of national unity, the lack of sophistication, the dearth of political leadership, not even a miracle could save Laos if it were ever saddled with a coalition government such as is now proposed.

I cannot understand the persistence in believing, despite all the available evidence, that Souvanna Phouma is truly a neutralist, that he is not under Communist domination, and that he can be trusted to designate non-Communists for the positions of Minister of Defense and Minister of the Interior.

In an interview with Ronald Stead of the Christian Science Monitor, which appeared in the March 21, 1962, issue of that paper, Prince Souphanouvong, the Laotian Communist leader, on the one hand denied that his half-brother Prince Souvanna Phouma "is a prisoner of the Pathet Lao." Mr. Stead wrote: "He described this as 'an odious calumny against the rightful Prime Minister of Laos (Souvanna Phouma) and a maneuver to cause a split between my half-brother's government and the Pathet Lao.'"

On the other hand, Prince Souphanouvong said to Mr. Stead: "Nobody can destroy the firm solidarity forged in the fire of battle. For this reason American efforts to separate us must be in vain."

Mr. Stead, incidentally, was to my knowledge the only American correspondent to point out that—"Souvanna Phouma now has headquarters and joint residence with his half-bother, Prince Souphanouvong, leader of the pro-Communist Pathet Lao armed forces and their political counterpart, the Neo Lao Haksat."

In the light of all this, it is inconceivable to me that the kind of coalition government now proposed can terminate in anything but a Communist Laos. True, there are a few instances of coalition governments—France, Italy, and Finland—which did not terminate in disaster. But this was only so because the democratic elements in these countries succeeded in extricating themselves from the coalitions with the Communists at their earliest opportunity.

It can be stated categorically that there has never been an instance of a stable, neutral coalition government, embracing Communists and non-Communists.

It can be stated categorically that there has never been an instance of a coalition government that has served the interests of the free world.

It can be stated categorically that there has never been a coalition government in which the Communists held the twin positions of the Ministry of the Interior and Ministry of Defense, which did not culminate in a complete Communist take-over.

It is in the light of this historic experience, that we must take a fresh look at the situation in Laos.

To let Laos fall to communism while we attempt to defend South Vietnam would be like trying to catch the flood waters in buckets, while doing nothing to strengthen or maintain the river levees. I have discussed the situation in southeast Asia with a number of military men with experience in the area, and I have yet to meet one who does not agree with this estimate. But apparently in this situation, as in other situations, we have paid scant attention to the opinions of our military men.

We have also paid scant attention to American missionaries serving in the field. Why we consult them so little, I shall never be able to understand, because they are a remarkably dedicated and intelligent group of men, who have no political axe to grind, who invariably speak the language of the country, who have lived with the people, and who have traveled widely, frequently on foot. They are in a far better position than most people to know what is going on in a country such as Laos or the Congo.

In this connection, I would point out that our policy in China went off the tracks when our State Department fell for the proposition that the Chinese Reds were really agrarian reformers. American missionaries in China warned against this policy, but no one listened to them. By the time we got the "agrarian reformer" sand out of our eyes, China had gone Communist.

Speaking from a more recent and more personal experience, I believe that many of the mistakes we have made in our Congo policy could have been avoided if we had troubled to obtain the opinions of the scores of American missionaries who are today serving there, and who know the country far more intimately than most foreigners there. But so far as I know, the many dedicated American missionaries in the Congo were never asked for their opinion; and the few that offered their opinions were ignored.

During the past week, the Lao Communist forces, supported by the Chinese Communists and North Vietnamese, have seized Nam Tha and other towns in northern Laos, in a drive that has carried them all the way to the border of Thailand. At this very moment, Communist forces are threatening the capture of the royal capital of Luang Prabang and the administrative capital of Vientiane.

There are reports that, as a result of the massive and flagrant violations of the armistice by the Communists, the administration is now reconsidering its position on Laos. I earnestly hope that this is so. I earnestly hope that the measures already announced in Vietnam and in Thailand will be followed by still further measures already specifically geared to the situation in Laos. I earnestly hope that we will not accept this new act of aggression in Laos as a fait accompli and force our friends in Laos into a coalition government against this background.

I am in wholehearted agreement with the distinguished Senator from Washington [Mr. Jackson], who said several days ago that he would prefer a partitioned Laos to a united Laos governed by a coalition government.

We already have two Koreas, two Germanys, two Vietnams. And no one could possibly be happy at the prospect of seeing another country partitioned. But we are in the unpleasant position where we are compelled to choose the lesser of two evils. And, recognizing this, there is no doubt in my own mind that partition would be an infinitely less dangerous evil than a coalition government that is bound to terminate with the Communists in complete control of the country.

I do not think I am revealing any military secret when I say this attitude is shared by many of our own military men, by many of our friends in southeast Asia, and by some of our much-abused friends in Laos. The reason for their preference is obvious. If an anti-Communist government can be maintained in the southern portion of Laos, including the critical Lao panhandle and the Mekong River Valley as far west as Vientiane, and as far north as Luang Prabang, this would protect Cambodia, it would greatly facilitate the struggle against the Vietnamese guerrillas, and it would afford a large measure of protection to Thailand.

LESLIE N. SHAW, ACTING POSTMASTER OF THE CITY OF LOS ANGELES

Mr. ENGLE. Mr. President, recently I had the pleasure of administering the oath of office to Leslie N. Shaw as acting postmaster of Los Angeles. Mr. Shaw has had a successful career in the business world and has distinguished himself in civic affairs. He is highly qualified to meet the challenges of one of the largest post offices in the country.

I am pleased to call attention to an editorial in the Los Angeles Times paying tribute to Mr. Shaw, and ask unanimous consent that it be printed in the Record.

There being no objection, the editorial was ordered to be printed in the Record, as follows:

Los Angeles' Negro Postmaster

Leslie N. Shaw, 41, took his oath of office Monday as postmaster of Los Angeles. He is the first Negro to hold the postmastership in a major U.S. city.

Shaw, a savings and loan banker and business executive, has obvious qualifications for his new job. But his appointment is also a measure of steady progress Negroes have made in the last 25 years under both Democratic and Republican regimes.

Despite the slow-paced advance in the Deep South, racial intolerance is being erased with the approval and support of men of good will.

The civic luncheon honoring Shaw was a deserved tribute to a man of demonstrated merit and ability.

CALIFORNIA TO COMMEMORATE RESTORATION OF CONSTITUTIONAL GOVERNMENT IN MEXICO

Mr. ENGLE. Mr. President, by a concurrent resolution of each house of the State legislative body, adopted without a single dissenting vote, effective March 6, 1963, the Legislature of California has instructed the California Civil War Centennial Commission to commemorate the restoration of constitutional government in the Republic of Mexico consequent upon the withdrawal of the imperial forces of Napoleon III and the overthrow of Archduke Maximilian.

The California commission was created by legislative resolution in January 1961, and is composed of 29 uncompensated members appointed by the Governor. The chairman is William Lawrence

Shaw, of Sacramento, who is also a deputy attorney general of California.

The resolution reads as follows:

ASSEMBLY CONCURRENT RESOLUTION 32

Resolution Relative to the Civil War Centennial Commission

Whereas in April 1862, Emperor Napoleon III undertook the conquest and exploitation of the Republic of Mexico then headed by President Benito Juárez; and

Whereas President Juárez was the symbol of constitutional government in Mexico and of the election of a president and other officials responsible to the people; and

Whereas despite the gallant resistance of the Mexican armed forces, the nation was overrun by the minions of Napoleon III and in June 1863 Mexico City was occupied; and

Whereas through the intrigues of Louis Napoleon, the Archduke Maximilian was declared Emperor in April 1864, contrary to the will and wishes of the Mexican people; and

Whereas the Government of the United States of America was distracted by a great Civil War raging from April 1861 until April 1865, and was thus unable to prevent and forestall the invasion of Mexico by Napoleon III although the United States of America constantly refused to accede to the conquest of the Republic of Mexico by foreign might, and vigorously protested by President Abraham Lincoln and by President Andrew Johnson against the imposition of tyranny upon the Mexican nation; and

Whereas after the cessation of hostilities in the American Civil War in April 1865, the United States of America demanded the removal by Napoleon III of his invading forces in Mexico and the termination of the purporting rule of Maximilian; and

Whereas the influence of the United States of America was a far-reaching weight to induce Napoleon III to withdraw from Mexico beginning in 1866 and concluding in 1867, and thereafter Maximilian was deposed and overthrown and constitutional government was restored in the Republic of Mexico under triumphant President Juárez; and

Whereas the Civil War Centennial Commission of California is currently engaged in the commemoration in California of the great American Civil War, 1861–65, which as an event in history is linked closely in part to the invasion and the attempted conquest of Mexico, 1861–67; and

Whereas sentiment in California in the years 1861–67 was overwhelmingly in favor and support of the people of the Republic of Mexico and adverse to Napoleon III and to Maximilian and among others U.S. Senator James A. McDougall of California, 1861–67, repeatedly in the Senate of the United States challenged and condemned the incursions of Napoleon III into Mexico: Now, therefore, be it

Resolved by the Assembly of the State of California (the Senate thereof concurring), That the Civil War Centennial Commission of California is directed and authorized to observe and commemorate by all proper means the restoration of constitutional government in the Republic of Mexico consequent upon the withdrawal of the imperial forces of Napoleon III and the overthrow of Maximilian; and be it further

Resolved, That the chief clerk of the assembly is hereby directed to transmit suitably prepared copies of this resolution to the Honorable Edmund G. Brown, Governor of the State of California, and to the executive secretary of the Civil War Centennial Commission of California.

THE 300TH ANNIVERSARY OF THE CAROLINA CHARTER

Mr. JORDAN of North Carolina. Mr. President, on March 24, 1663, Charles II of England made a princely grant of land in the New World to eight of his friends who had helped him win back the throne his father had lost, along with his head, to Cromwell and the Puritans.

These eight men became known as the Lords Proprietors of Carolina, and the grant included the territory between Virginia and Florida westward from the Atlantic to the "South Seas" or Pacific Ocean.

This year in North Carolina we are celebrating the 300th anniversary of the signing of the Carolina Charter, after several years of intensive preparation under the leadership of the Carolina Charter Tercentenary Commission, established by our general assembly, and the Federal Tercentenary Commission, established by act of Congress last year.

The anniversary year opened on March 24 with numerous local observances in cities and towns throughout North Carolina. On April 6, at historic Edenton, Postmaster General J. Edward Day presided over ceremonies marking the issuance of the Carolina Charter Tercentenary Commemorative stamp which went on sale for the first time that day. During the remainder of this year commemorative programs will be held by schools, colleges, universities, religious and civic organizations, and other groups in our State.

Mr. President, the original charter is itself on display in the Hall of History in Raleigh. It was acquired for the State of North Carolina in 1949 by public-spirited citizens who purchased it from a British bookseller.

The original document is on four pages of parchment and, of course, contains some obsolete words, spellings, and usages of the times. The Carolina Charter Tercentenary Commission arranged for the preparation of a transcription in modern English from the original charter which faithfully follows its text and meaning. I ask unanimous consent that the text of this transcription be printed in the body of the RECORD at this point.

There being no objection, the text was ordered to be printed in the RECORD, as follows:

CHARTER TO THE LORDS PROPRIETORS OF CAROLINA

MARCH 24, 1663.

(EDITOR'S NOTE.—In the following transcription, care has been taken to follow faithfully the text of the charter, but certain features have been modernized. Some obsolete words have been replaced by their modern equivalents. Spelling also has been modernized and made uniform except for proper names, for which the original spellings, including variations, have been retained. The capitalization in the document has been kept, but a few capitals have been added. Punctuation and indentation have been supplied by the editor. In the original document, each time reference is made to the Lords Proprietors all their names and titles are set forth. This occurs 35 times in the Charter. For the sake of brevity, in this transcription the names of all proprietors are mentioned only once. Thereafter only the name of Edward, Earl of Clarendon, is shown, the other proprietors' names being replaced by ellipses. Transcribed from the original charter, which is on display in the hall of history, Raleigh, N.C.)

Charles the Second, by the grace of God, King of England, Scotland, France, and Ireland, defender of the Faith, etc. to all to whom these presents shall come, Greeting:

Whereas, our right trusty and right well-beloved Cousins and Counsellors: Edward, Earl of Clarendon, our High Chancellor of England; and George, Duke of Albemarle, Master of our Horse and Captain General of all our Forces; Our right trusty and well-beloved William, Lord Craven; John, Lord Berkley; Our right trusty and well-beloved Counsellor, Anthony, Lord Ashley, Chancellor of our Exchequer; Sir George Carterett, Knight and Baronet, Vice Chamberlain of our Household; And our trusty and well-beloved Sir William Berkley, Knight; and Sir John Colleton, Knight and Baronet, being excited with a laudable and pious zeal for the propagation of the Christian Faith and the enlargement of our Empire and Dominions, have humbly besought leave of us, by their industry and Charge, to Transport and make an ample Colony of our Subjects, Natives of our Kingdom of England and elsewhere within our Dominions, unto a certain Country, hereafter described, in the parts of America not yet cultivated or planted, and only inhabited by some barbarous People who have no knowledge of Almighty God;

And whereas, the said Edward, Earl of Clarendon; * * * have humbly besought us to give, grant, and Confirm unto them, and their heirs, the said Country, with Privileges and Jurisdictions requisite for the good Government and safety thereof:

Know ye, therefore, that We, favouring the pious and noble purpose of the said Edward, Earl of Clarendon; * * * Of our especial grace, certain knowledge, and mere motion, have given, granted, and Confirmed, and, by this our present Charter, for us, our heirs and Successors, do give, grant, and Confirm, unto the said Edward, Earl of Clarendon; * * * their heirs and Assigns:

TERRITORY AND PRIVILEGES GRANTED

All that Territory or Tract of ground, situate, lying, and being within our Dominions in America, extending from the North end of the Island called Luck Island, which lies in the Southern Virginia Seas and within six and Thirty Degrees of the Northern Latitude, and to the West as far as the South Seas; and so Southerly as far as the River Saint Mathias, which borders upon the Coast of Florida, and within one and Thirty Degrees of Northern Latitude; and West in a direct Line as far as the South Seas aforesaid; Together with all and singular Ports, Harbours, Bays, Rivers, Isles, and Islets, belonging unto the Country aforesaid; And also, all the Soil, Lands, Fields, Woods, Mountains, Farms, Lakes, Rivers, Bays, and Islets situate or being within the Bounds or Limits aforesaid; with the Fishing of all sorts of Fish, Whales, Sturgeons, and all other Royal Fishes in the Sea, Bays, Islets, and Rivers within the premises, and the Fish therein taken;

And moreover, all Veins, Mines, and Quarries, as well discovered as not discovered, of Gold, Silver, Gems, and precious Stones, and all other, whatsoever be it, of Stones, Metals, or any other thing whatsoever found or to be found within the Country, Isles, and Limits aforesaid;

And furthermore, the Patronage and Advowsons of all the Churches and Chapels which, as Christian Religion shall increase within the Country, Isles, Islets, and Limits aforesaid, shall happen hereafter to be erected; Together with licence and power to Build and found Churches, Chapels, and Oratories in convenient and fit places within the said Bounds and Limits, and to cause them to be Dedicated and Consecrated according to the Ecclesiastical Laws of our Kingdom of England; Together with all and singular the like and as ample Rights, Jurisdictions, Privileges, Prerogatives, Royalties, Liberties, Immunities, and Franchises of what kind soever within the Country, Isles, Islets, and Limits aforesaid;

To have, use, exercise, and enjoy, and in as ample manner as any Bishop of Durham, in our Kingdom of England, ever heretofore have held, use, or enjoyed, or of right ought or could have, use, or enjoy.

And them, the said Edward, Earl of Clarendon; * * * their heirs and assigns, we do, by these presents, for us, our heirs and Successors, make, Create, and Constitute the true and absolute Lords and Proprietaries of the Country aforesaid, and of all other the premises;

Saving always, the Faith, Allegiance, and Sovereign Dominion due to us, our heirs and Successors, for the same; and Saving also, the right, title, and interest of all and every our Subjects of the English Nation which are now Planted within the Limits and bounds aforesaid, if any be;

To have, hold, possess, and enjoy the said Country, Isles, Islets, and all and singular other the premises; to them, the said Edward, Earl of Clarendon; * * * their heirs and Assigns, forever;

To be held of us, our heirs and Successors, as of Manor of East Greenwich, in our County of Kent, in Free and Common Soccage, and not in Capite nor by knight's Service;

Yielding and paying yearly, to us, our heirs and Successors, for the same, the yearly Rent of Twenty Marks of Lawful money of England, at the Feast of All Saints, yearly, forever, The First payment thereof to begin and be made on the Feast of All Saints which shall be in the year of Our Lord One thousand six hundred Sixty and five; AND also, the fourth part of all Gold and Silver Ore which, within the limits aforesaid, shall, from time to time, happen to be found.

And that the Country thus by us granted and described may be dignified with as large Titles and Privileges as any other parts of our Dominions and Territories in that Region:

PROVINCE NAMED CAROLINA

Know ye, that We, of our further grace, certain knowledge, and mere motion, have thought fit to Erect the same Tract of Ground, Country, and Island into a Province, and, out of the fullness of our Royal power and Prerogative, we do, for us, our heirs and Successors, Erect, Incorporate, and Ordain the same into a Province, and do call it the Province of Carolina, and so from henceforth will have it called.

And forasmuch as we have hereby made and Ordained the aforesaid Edward, Earl of Clarendon; * * * their heirs and Assigns, the true Lords and Proprietors of all the Province aforesaid:

PROVISIONS FOR ENACTING LAWS

Know ye, therefore, moreover, that We, reposing especial Trust and Confidence in their fidelity, Wisdom, Justice, and provident circumspection, for us, our heirs and Successors, Do Grant full and absolute power, by virtue of these presents, to them, the said Edward, Earl of Clarendon; * * * and their heirs, for the good and happy Government of the said Province:

To ordain, make, Enact, and under their Seals to publish any Laws whatsoever, either appertaining to the public State of the said Province or the private utility of particular Persons, according to their best discretion of, and with the advice, assent, and approbation of the Freemen of the said Province, or of the greater part of them, or of their Delegates or Deputies; whom, for enacting of the said Laws, when and as often as need shall require, WE WILL that the said Edward, Earl of Clarendon; * * * and their heirs, shall, from time to time, assemble, in such manner and form as to them shall seem best;

PROVISION FOR ENFORCING LAWS

And the same Laws duly to execute upon all people within the said Province and Limits thereof for the time being, or which shall be Constituted under the power and Government of them, or any of them, either Sailing towards the said Province of Carolina or returning from thence towards England, or any other of our or foreign Dominions; by Imposition of penalties, Imprisonment, or any other punishment, YEA, if it shall be needful and the quality of the Offence require it, by taking away member and life, either by them, the said Edward, Earl of Clarendon; * * * and their heirs, or by them or their Deputies, Lieutenants, Judges, Justices, Magistrates, Officers, and Ministers, to be Ordained or appointed according to the tenor and true intention of these presents;

And likewise, to appoint and establish any Judges or Justices, Magistrates or Officers whatsoever within the said Province, at Sea or land, in such manner and form as unto the said Edward, Earl of Clarindon; * * * or their heirs, shall seem most convenient;

Also, to remit, release, Pardon, and abolish, whether before Judgment or after, all Crimes and Offences whatsoever against the said Laws; and to do all and every other thing and things which unto the Complete establishment of Justice, unto Courts, Sessions, and forms of Judicature, and manners of proceeding therein, do belong, although in these presents express mention be not made thereof;

And by Judges, by him or them delegated, to award Process, hold Pleas, and determine, in all the said Courts and Places of Judicature, all Actions, Suits, and Causes whatsoever, as well Criminal as Civil, real, mixt, personal, or of any other kind or nature whatsoever;

Which laws, so as aforesaid, to be published our pleasure is, and We do enjoin, require, and Command shall be absolute, firm, and available in law; And that all the liege People of us, our heirs and Successors, within the said Province of Carolina, do observe and keep the same inviolably in those parts, so far as they concern them, under the pains and penalties therein expressed or to be expressed;

Provided, Nevertheless, that the said laws be consonant to reason and, as near as may be conveniently, agreeable to the laws and Customs of this our Kingdom of England.

LAWS IN EMERGENCIES

And because such assemblies of Freeholders cannot be or suddenly called as there may be occasion to require the same:

We do, therefore, by these presents, give and Grant unto the said Earl of Clarendon; * * * their heirs and Assigns, by themselves or their Magistrates in that behalf lawfully authorized, full power and authority, from time to time, to make and Ordain fit and wholesome Orders and Ordinances within the Province aforesaid, to be kept and observed, as well for the keeping of the Peace as for the better Government of the People there abiding; and to publish the same to all to whom it may concern;

Which Ordinances We do, by these presents, straightly Charge and Command to be inviolably observed within the said Province, under the penalties therein expressed; So as such Ordinances be reasonable, and not repugnant or contrary, but as near as may be agreeable, to the laws and Statutes of this our Kingdom of England; And so as the same Ordinances do not extend to the binding, charging, or taking away of the right or interest of any Person or Persons in their freehold, goods, or Chattels whatsoever.

And to the end the said Province may be the more happily increased by the multitude of People resorting thither, and may likewise be the more strongly defended from the incursions of Savages and other Enemies, Pirates, and robbers:

Therefore, We, for us, our heirs and Successors, Do give and Grant, by these presents, Power, licence, and liberty unto all the liege people of us, our heirs and Successors, in our Kingdom of England or elsewhere within any other our Dominions, Islands, Colonies, or Plantations, Excepting those who shall be especially forbidden, to transport themselves and Families unto the said Province, with convenient Shipping and fitting Provisions, and there to settle themselves, dwell, and inhabit; any law, Act, Statute, Ordinance, or other thing to the contrary in any wise notwithstanding.

RIGHTS OF ENGLISHMEN GRANTED TO SETTLERS

And we will also, and, of our more especial grace, for us, our heirs and Successors, do straightly enjoin, Ordain, Constitute, and Command, that the said Province of Carolina shall be of our Allegiance; And that all and singular the Subjects and liege people of us, our heirs and Successors, transported or to be transported into the said Province, and the Children of them and of such as shall descend from them there, born or hereafter to be born, be and shall be Denizens and lieges of us, our heirs and Successors, of this our Kingdom of England; and be in all things held, treated, and reputed as the liege, faithful people of us, our heirs and Successors, born within this our said Kingdom or any other of our Dominions; and may inherit or otherwise Purchase and receive, take, have, hold, buy, and possess any lands. Tenements, or hereditaments within the same Places, and them may Occupy and enjoy, give, sell, alien, and bequeath; as likewise, all liberties, Franchises, and Privileges of this our Kingdom of England, and of other our Dominions aforesaid, may freely and quietly have, possess, and enjoy as our liege people born within the same, without the let, molestation, vexation, trouble, or grievance of us, our heirs and Successors; any Statute, Act, Ordinance, or Provision to the contrary notwithstanding.

And furthermore, that our Subjects, of this our said Kingdom of England and other our Dominions, may be the rather encouraged to undertake this Expedition with ready and cheerful minds:

CONDUCT OF TRADE

Know ye, that We, of our especial grace, certain knowledge, and mere motion, do give and grant, by virtue of these presents, as well to the said Edward, Earl of Clarendon; * * * and their heirs, as unto all others we shall, from time to time, repair unto the said Province with a purpose to inhabit there or to trade with the Natives of the said Province, full liberty and License to lade and freight in any Ports whatsoever of us, our heirs and Successors;

And into the said Province of Carolina, by them, their Servants and Assigns, to Transport all and singular their goods, Wares, and Merchandises; as likewise, all sorts of grain whatsoever, and any other things whatsoever necessary for the food and Clothing, not prohibited by the laws and Statutes of our Kingdoms and Dominions; to be Carried out of the same without any let or molestation of us, our heirs and Successors, or of any other our Officers and Ministers whatsoever; Saving also, to us, our heirs and Successors, the Customs and other duties and payments due for the said Wares and Merchandises, according to the several rates of the Places from whence the same shall be transported.

We will also, and, by these presents, for us, our heirs and Succesors, do give and Grant Licence, by this our Charter, unto the said Edward, Earl of Clarendon; * * * their heirs and Assigns, and to all the Inhabitants and Dwellers in the Province aforesaid, both present and to come, full power and absolute authority to Import or unlade, by themselves or their Servants, Factors, or Assigns, all Merchandises and goods whatsoever that shall arise of the fruits and Commodities of the said Province, either by land or Sea, into any the Ports of us, our heirs and Successors, in our Kingdom of England, Scotland, or Ireland, Or otherwise to dispose of the said goods in the said Ports; and, if need be, within one year next after the unlading, to lade the said Merchandises and goods again into the same or other Ships, and to Export the same into any other Countries, either of our Dominions or foreign, being in Amity with us, our heirs and Successors; So as they pay such Customs, Subsidies, and other duties for the same, to us, our heirs and Successors, as the rest of our Subjects of this our Kingdom for the time being shall be bound to pay, beyond which We will not that the inhabitants of the said Province of Carolina shall be any way Charged.

Provided, nevertheless, and our Will and pleasure is, and We have further, for the Considerations aforesaid, of our more especial grace, certain knowledge, and mere motion, given and Granted, and, by these presents, for us, our heirs and Successors, Do give and grant, unto the said Edward, Earl of Clarindon; * * * their heirs and Assigns, full and free license, liberty, and authority, at any time or times from and after the Feast of Saint Michaell The Archangel which shall be in the year of our Lord Christ One thousand six hundred Sixty and Seven, as well to Import and bring into any of our Dominions from the said Providence of Carolina, or any part thereof, the several goods and Commodities hereinafter mentioned: That is to say, Silks, Wines, Currants, Raisins, Capers, Wax, Almonds, Oil, and Olives; without paying or Answering to us, our heirs or Successors, any Custom, Impost, or other duty for or in respect thereof, for and during the term and space of Seven years, to commence and be accounted from and after the First Importation of four Tons of any the said goods in any one Bottom, Ship, or Vessel from the said Province into any of our Dominions; as also, to export and carry out of any of our Dominions into the said Province of Carolina, Custom free, all sorts of Tools which shall be useful or necessary for the Planters there in the accommodation and Improvement of the premises; any thing before in these presents contained, or any Law, Act, Statute, Prohibition, or other matter or thing heretofore had, made, Enacted, or provided or hereafter to be had, made Enacted, or Provided, to the contrary in any wise notwithstanding.

ESTABLISHMENT OF PORTS IN CAROLINA

And furthermore, of our more ample and especial grace, certain knowledge, and mere motion, WE DO, for us, our heirs and Successors, Grant unto the said Edward, Earl of Clarendon; * * * their heirs and Assigns, full and absolute power and authority to Make, Erect, and Constitute within the said Province of Carolina, and the Isles and Islets aforesaid, such and so many Seaports, harbours, Creeks, and other Places for discharge and unlading of goods and Merchandises out of Ships, Boats, and other Vessels, and for lading of them, in such and so many Places, and with Jurisdictions, Privileges, Jurisdictions,[1] and Franchises unto the said Ports belonging, as to them shall seem most expedient;

And that all and singular the Ships, Boats, and other Vessels, which shall come for Merchandise and Trade into the said Province, or shall depart out of the same, shall be laden and unladen at such Ports only as shall be erected and Constituted by the said Edward, Earl of Clarendon; * * * their heirs and Assigns, and not elsewhere; any use, Custom, or any thing to the contrary in any wise notwithstanding.

And we do, furthermore, Will, appoint, and Ordain, and, by these presents, for us, our heirs and Successors, do Grant unto the said Edward, Earl of Clarendon; * * * their heirs and Assigns, That they, the said Edward, Earl of Clarendon; * * * their heirs and Assigns, may from time to time, forever, have and enjoy the Customs and Subsidies, in the Ports, Harbours, Creeks, and other Places within the Province aforesaid, payable for goods, Merchandises, and Wares there laded or to be laded or unladed; the said Customs to be reasonably Assessed upon any occasion by themselves, and by and with the Consent of the free people there, or the greater part of them, as aforesaid; to whom We give power, by these presents, for us, our heirs and Successors, upon just Cause and in a due proportion, to Assess and Impose the same.

AUTHORITY FOR SUBGRANTING LAND

And further, of our especial grace, certain knowledge, and mere motion, We have given, Granted, and Confirmed, and, by these presents, for us, our heirs and Successors, do give, Grant, and Confirm, unto the said Edward, Earl of Clarendon; * * * their heirs and Assigns, full and absolute licence, power, and authority that the said Edward, Earl of Clarendon; * * * their heirs and Assigns, from time to time hereafter, forever, at his and their will and pleasure, may Assign, Alien, Grant, Demise, or enfeoff the premises, or any part or parcels thereof, to him or them that shall be willing to purchase the same, and to such Person or Persons as they shall think fit;

To have and to hold to them the said Person or Persons, their heirs and Assigns, in Fee simple or Fee tail, or for term of life or lives or years; to be held of them, the said Edward, Earl of Clarendon; * * * their heirs and Assigns, by such Rents, Services, and Customs as shall seem meet to the said Edward, Earl of Clarendon; * * * their heirs and Assigns, and not immediately of us, our heirs and Successors.

And to the same Person or Persons, and to all and every of them, We do give and Grant, by these presents, for us, our heirs and Successors, License, authority, and power That such Person or Persons may have or take the premises, or any parcel thereof, of the said Edward, Earl of Clarendon; * * * their heirs and Assigns; and the same to hold to themselves, their heirs or Assigns, in what estate of Inheritance soever, in Fee simple or Fee tail or otherwise, as to them and the said Earl of Clarendon; * * * their heirs and Assigns, shall seem expedient; The Statute made in the Parliament of Edward, Son of King Henry, heretofore King of England, our Predecessor, commonly called the Statute of Quia Emptores Terrarum, or any other Statute, Act, Ordinance, use, Law, Custom, or any other matter, Cause, or thing heretofore published or provided to the contrary in any wise notwithstanding.

NOBILITY IN CAROLINA AUTHORIZED

And because many Persons born or inhabiting in the said Province, for their deserts and Services, may expect, and be capable of, Marks of Honour and favour, which, in respect of the great distance, cannot conveniently be Conferred by us:

Our will and please, therefore, is, and We do, by these presents, Give and Grant unto the said Edward, Earl of Clarendon; * * * their Heirs and Assigns, full Power and Authority to give and Confer, unto and upon such of the Inhabitants of the said Province as they shall think do or shall merit the same, such marks of favour and Titles of honour as they shall think fit; so as those Titles or honours be not the same as are enjoyed by or Conferred upon any the Subjects of this our Kingdom of England.

FORTIFICATION OF CAROLINA

And further, also, We do, by these presents, for us, our heirs and Successors, give and grant Licence to them, the said Edward, Earl of Clarendon; * * * their heirs and Assigns, full power, liberty, and licence to Erect, raise, and build, within the said Province and Places aforesaid, or any part or parts thereof, such and so many Forts, Fortresses, Castles, Cities, Boroughs, Towns, Villages, and other Fortifications whatsoever, And the same, or any of them, to Fortify and furnish with Ordnance, Powder, Shot, Armour, and all other Weapons, Ammunition, and habiliments of War, both offensive and defensive, as shall be thought fit and convenient, for the safety and welfare of the said Province and Places, or any part thereof; And the same, or any of them, from time to time, as occasion shall require, to dismantle, disfurnish, demolish, and pull down; and Also, to place, Constitute, and appoint, in or over all or any of the said Castles, Forts, Fortifications, Cities, Towns, and Places aforesaid, Governors, Deputy Governors, Magistrates, Sheriffs, and other Officers, Civil and Military, as to them shall seem meet;

CITIES AND TOWNS

And to the said Cities, Boroughs, Town, Villages, or any other Place or Places within the said Province, to grant Letters or Charters, of Incorporation, with all Liberties, Franchises, and Privileges requisite and usual, or to or within any Corporations within this our Kingdom of England granted or belonging; And in the same Cities, Boroughs, Towns, and other Places, to Constitute, Erect, and appoint such and so many Markets, Marts, and Fairs as shall in that behalf be thought fit and necessary;

MANORS AND MANORIAL COURTS

And further, also, to Erect and make in the Province aforesaid, or any part thereof, so many Manors as to them shall seem meet and convenient; and in every of the same Manors to have and to hold a Court Baron, with all things whatsoever which to a Court Baron do belong; And to have and to hold Views of Frankpledge and Courts Leet, for the Conservation of the Peace and better Government of those parts, within such Limits, Jurisdiction, and Precincts as by the said Edward, Earl of Clarendon; * * * or their heirs, shall be appointed for that purpose, with all things whatsoever which to a Court Leet or view of Frankpledge do belong; the same Courts to be held by Stewards, to be Deputed and authorized by the said Edward, Earl of Clarendon; * * * or their heirs, or by the Lords of other Manors and Leets for the time being, when the same shall be Erected.

And because that, in so remote a Country and situate among so many barbarous Nations, the Invasions as well of Savages as other Enemies, Pirates, and Robbers may probably be feared:

PROVISION FOR ARMED FORCES

Therefore, we have given, and, for us, our heirs and Successors, do give, power, by these presents, unto the said Edward, Earl of Clarendon; * * * their heirs and Assigns, by themselves or their Captains or other their Officers, to Levy, Muster, and Train all sorts of men, of what Condition or wheresoever born, in the said Province for the time being; and to make War and pursue the Enemies aforesaid, as well by Sea as by land, yea, even without the limits of the said Province; and, by God's assistance, to vanquish and take them, and, being taken, to put them to death, by the law of war, or to save them, at their pleasure; and to do all and every other thing which unto the Charge And Office of a Captain General of an Army belongs, or has accustomed to belong, as fully and freely as any Captain General of any Army has ever had the same.

Also, our Will and pleasure is, and, by this our Charter, We do give unto the said Edward, Earl of Clarendon; * * * their heirs and Assigns, full power, liberty, and authority, in case of rebellion, tumult, or Sedition, if any should happen, which God forbid, either upon the land within the Province aforesaid or upon the main Sea in making a Voyage thither or returning from thence, by him and themselves, their Captains, Deputies, or Officers, to be authorized under his or their Seals for that purpose, to whom also, for us, our heirs and Successors, we do give and Grant, by these presents, full power and authority, to exercise Martial Law against mutinous and seditious Persons of those parts, such as shall refuse to submit themselves to their Government, or shall refuse to serve in the Wars, or shall fly to the Enemy, or forsake their Colors or Ensigns, or be loiterers or Stragglers, or otherwise howsoever offending against Law, Custom, or Discipline Military; as freely and in as ample manner and form as any Captain General of an Army, by virtue of his Office, might, or has accustomed to, use the same.

---

[1] Repetition in the manuscript.

SEPARATION OF CAROLINA FROM OTHER COLONIES

And Our further pleasure is, and, by these presents, for us, our heirs and Successors, We do Grant unto the said Edward, Earl of Clarendon; * * * their heirs and Assigns, and to the Tenants and Inhabitants of the said Province of Carolina, both present and to come, and to every of them, that the said Province, and the Tenants and Inhabitants thereof, shall not from henceforth be held or reputed a Member or part of any Colony whatsoever, in America or elsewhere, now transported or made, or hereafter to be transported or made; nor shall be depending on, or subject to, their Government in any thing, but be absolutely separated and divided from the same;

And our pleasure is, by these presents, that they be separated, and that they be subject immediately to our Crown of England, as depending thereof forever; And that the Inhabitants of the said Province, nor any or them, shall, at any time hereafter, be compelled or compellable, or be any ways subject or liable, to appear or Answer to any matter, Suit, Cause, or Plaint whatsoever, out of the Province aforesaid, in any other of our Islands, Colonies, or Dominions in America or elsewhere, other than in our Realm of England and Dominion of Wales.

PROVISION FOR RELIGIOUS TOLERANCE

And because it may happen that some of the People and Inhabitants of the said Province cannot in their private opinions Conform to the Public Exercise of Religion according to the Liturgy, forms, and Ceremonies of the Church of England, or take or subscribe the Oaths and Articles made and established in that behalf; and for that the same, by reason of the remote distances of those Places, Will, as We hope, be no breach of the unity and uniformity established in this Nation:

Our will and pleasure, therefore, is, and We do, by these presents, for us, our heirs and Successors, Give and Grant unto the said Edward, Earl of Clarendon; * * * their heirs and Assigns, full and free License, liberty, and Authority, by such legal ways and means as they shall think fit, to give and grant unto such Person and Persons inhabiting and being within the said Province, or any part thereof, Who really in their Judgments, and for Conscience sake, cannot or shall not Conform to the said Liturgy and Ceremonies, and take and Subscribe the Oaths and Articles aforesaid, or any of them, such Indulgencies and Dispensations in that Behalf, for and during such time and times, and with such limitations and restrictions, as they, the said Edward, Earl of Clarendon; * * * their heirs or Assigns, shall, in their discretions, think fit and reasonable;

And with this express Proviso and Limitation also, that such Person and Persons to whom such Indulgencies or Dispensations shall be granted, as aforesaid, do and shall, from time to time, Declare and continue all fidelity, Loyalty, and Obedience to us, our heirs and Successors; and be subject and obedient to all other the Laws, Ordinances, and Constitutions of the said Province, in all matters whatsoever, as well Ecclesiastical as Civil; And do not in any wise disturb the Peace and safety thereof, or scandalize or reproach the said Liturgy, forms, and Ceremonies, or any thing relating thereunto, or any Person or Persons whatsoever for, or in respect of, his or their use or exercise thereof, or his or their obedience or Conformity there unto.

INTERPRETATION OF CHARTER BY COURTS

And in Case it shall happen that any doubts or questions should arise concerning the true Sense and understanding of any word, Clause, or Sentence contained in this our present Charter:

We Will, Ordain, and Command that, at all times and in all things, such interpretation be made thereof, and allowed in all and every of our Courts whatsoever, as lawfully may be Adjudged most advantageous and favourable to the said Edward, Earl of Clarendon; * * * their heirs and Assigns.

Although express mention be not made in these presents of the true yearly value and certainty of the premises, or any part thereof, or any other gifts and grants made by us, our Ancestors or Predecessors, to them, the said Edward, Earl of Clarendon; * * * or any other Person or Persons whatsoever, Or any Statute, Act, Ordinance, Provision, Proclamation, or restraint heretofore had, made, published, ordained, or Provided, or any other thing, Cause, or matter whatsoever to the contrary thereof in any wise notwithstanding.

In witness whereof We have caused these our Letters to be made Patent.

Witness, our Self, at Westminster, the Four and Twentieth day of March, in the Fifteenth year of our Reign.

By the King.

Howard.

CANADIAN LUMBER IMPORTS

Mr. MORSE. Mr. President, for some time the question of trade between the United States and Canada has been a matter of deep concern to both countries. We in the Northwest have been particularly apprehensive because some of the lumber problems that we face have been created by increased imports of lumber from Northwest Canada. At this time, I shall not detail the extensive steps which the Kennedy administration has undertaken. In my judgment these steps have been of value. Nor shall I discuss the extensive legislative proposals the industry has offered suffice it to say, there are still many unresolved problems.

On April 7 and 9, the Pacific Northwest Trade Association called a general conference in Yakima, Wash. Mr. Robert B. Pamplin, president of the Georgia-Pacific Corp., made an extremely constructive presentation, as did Mr. B. M. Hoffmeister, the president of the Council of Forest Industries of British Columbia. In addition, on April 9, in Portland, Oreg., Mr. G. C. Edgett, executive vice president of the West Coast Lumbermen's Association, addressed the Oregon Bankers Association on the same subject.

I am deeply impressed by these three papers because in my judgment they set forth the possibilities of settling differences over the conference table and moving forward through the use of commonsense and industrial statesmanship.

Canada now has a new Government and I look forward to the possibility that there may be further discussions between our Governments. I think it useful that these papers be given wide circulation. Even more significant is the value of the suggestions made in these papers for use by those in the industry who wish to seek out solutions relying upon private initiative and mutual good will.

It is for the foregoing reasons that I ask unanimous consent that the three papers I have referred to, plus a newspaper clipping on the conference, be printed in the Record at this point.

There being no objection, the papers and clipping were ordered to be printed in the Record, as follows:

TOTAL FREE TRADE—TODAY'S OPPORTUNITY AND TOMORROW'S PROSPERITY

(By R. B. Pamplin, president, Georgia-Pacific Corp.)

Before speaking my views about the effect of free trade in the area of the forest products industry, I think it would be well to establish my perspective. My company is one of the U.S. major forest products concerns. We own something over 2 million acres of timberlands and have 73 manufacturing operations scattered in all parts of the country. Our only association with Canada is approximately 275,000 acres of timberlands in New Brunswick. The products we make include plywood, paper and paper products, lumber, hardboard, flakeboard, and chemicals.

I am at heart a believer in free trade. However, when we talk about free trade I do not believe that we can localize it to the forest products industry. Therefore, I am going to talk about free trade generally and about free trade in the forest products industry in particular.

First of all, let us look at free trade as such. We know that President Kennedy leans toward free trade. We also know that free trade is being tried and has proved very, very successful in the Common Market in Europe. Therefore, having this background, you might say that the trend is to free trade, and it has proved to be a very desirable and beneficial trend.

Being a businessman, I have learned through experience that when you see a desirable trend developing you should try to get on it as soon as possible. In fact, it is better to create and lead a trend, but you certainly do not want to sit back and let the trend get ahead of you. If you do this, others are going to be running with the ball while you are sitting and looking on.

Right here, I feel it would be well to examine what it was that caused those six countries to bind together and form the European Common Market and to examine the beneficial results they have received therefrom.

The great technological developments of the 20th century made possible substantial cost reductions through large-scale production. In the case of automobiles, for instance, as you increase the number of units your cost goes down quite substantially. Therefore, in order to compete successfully, it was necessary to produce the maximum number of units; and if you produce these large numbers of units you must have a mass market in which to distribute and sell the product. Prior to the Common Market, this was not possible as economic nationalism had divided Europe into cramped compartments sheltered by tariffs and other protective devices. This prevented producers from having the mass market which is so vital to this type of an economy. Therefore, when these walls were removed, it permitted the people in these six countries to take advantage of technological developments and to build plants for mass production. Most important of all, it enabled them to distribute and sell their products to the mass market that was created.

One of the reasons that we have been so successful in the United States is because we have a common market among 50 States, which enables us to take advantage of the very same points I have mentioned. That in my opinion is one of the main reasons why we are leaders of the world today.

A good example of what I am talking about is plywood. Plywood came into its own during World War II. Since the war, plywood usage has increased at an average of 10 percent, compounded annually, which is almost unheard of in a commodity. At the same time the index price of plywood has decreased since 1948 from $97 to $62. And the most amazing part of this story is that even though prices decreased over 35 percent, wages in turn increased in the same period by over 50 percent. This is a classic example of prosperity and deflation, both at the same time. It is what every government tries to accomplish, but no government has been able to do. This is so important to us that I feel we should examine the story of plywood and see how it came about, hoping that we can accomplish the same thing in other products.

The first and most important ingredient of course was the mass market that permitted large-scale production. Then we had the wonderful cooperation between labor and management. The leaders of our unions and management in the Northwest are to be complimented on the way they have cooperated and worked together in cutting costs through better equipment and more efficient labor. I know you have heard management state many times that they cannot give a wage increase unless productivity goes up proportionately. In my opinion, this is self criticism most of the time for management should have more to do with increased productivity than anyone else. Sure, labor can help, but labor is dependent upon leadership from management. Our company has been one of the leaders in this movement, and we can certainly say that we are very satisfied with the results. The last ingredient is a free market without any restrictions—that is, no protection and with the law of supply and demand operating.

Now, let us look at a proposed common market between the United States and Canada and see what each of us has to gain by such a common market.

We in the United States will gain an additional market in Canada represented by some 19 million people, which is about 10 percent of our present market. This is important to us. However, it is in my opinion practically the only point that we will gain from an economic point of view.

Now, what does Canada have to gain? Canada has followed a policy of protecting its manufactures with high tariffs. This is an expensive luxury. It keeps Canadian prices higher than they need be, while restricting foreign trade. If we had free trade, these higher prices would disappear. Then, too, we would be expanding Canada's market, without restrictions, from some 19 million people to some 206 million people. This would enable Canada to concentrate on the production of items on which she has an economic advantage. This would include forest products, aluminum, oil, gas, etc. Since Canada is endowed with wonderful natural resources for the production of these products, it would give her the shot in the arm that is needed to utilize these natural resources. Here again the secret to Canada's strong economy for the future would be the mass market without restrictions that would be available to her.

Let us talk now about the effect of this on the timber products industry. Canada is capable of mass producing substantially more lumber, pulp and paper, and other wood products than can be marketed in Canada, and the United States is a logical market for most of this surplus. Therefore, we in the United States who are in this type of business will have to compete with this Canadian surplus. Myself, I would go along with this free competition providing we could compete on equal terms. Right now, we cannot. We have the Jones Act which permits Canadian producers to ship on foreign ships while we must ship on American ships. This gives Canadian producers an advantage of anywhere from $8 to $17 per thousand feet on lumber and a similar advantage on other products. Then, too, the Canadian dollar is now selling at approximately 92½ cents compared with the American dollar, which in turn gives Canadian producers an additional 7½ percent advantage on exports to the United States. However, on imports, Canadian importers are penalized by this same 7½ percent which doesn't make too much sense since Canada imports more than she exports.

Therefore, the Jones Act should be repealed and the Canadian dollar put on a par with the American dollar as soon as possible. It is bad policy to build up an industry to a substantial capacity through protective devices when you know that over the long pull these protective devices have to be removed. In other words, when you see something that is as wrong as this is, the quicker you can correct it the less the damage is going to be. We are willing to compete with Canada on equal terms, but we are not willing to compete with the handicap of the Jones Act and the discount on the Canadian dollar.

Naturally, when you go from a protected market to a free market it has to be done in a gradual way, and in doing so the present tariff should be decreased say over a 5- or 10-year period in order that there might be an orderly adjustment. Even though this is done, there is going to be quite a bit of disruption in both countries as a result. However, these disruptions can also be stimulating and beneficial. In other words, what will happen will be the same thing that happened in Europe. A lot of new plants will be built to take advantage of this new market. These plants will produce at a much lower cost than a lot of our present plants. The present plants will be forced to modernize or be put out of business. We look on this quite often as bad. However, in my opinion it is good. Any time that we can find a better and cheaper way to do things, it should be done. This is growth. This is prosperity. And since we are going to have to compete in a world market more and more in the future we are going to have to work together as a team and do things bigger and better or we will not be able to compete with the Common Market in Europe and our other competitors the world over.

Perhaps we should not overlook the fact that there may be a better way for solving this than by having a common market. Perhaps we should examine our two countries joining together as one. This is where one plus one equals three instead of two. We would then gain all the economic advantages of a common market that I have mentioned and in addition pick up an indirect advantage—that of national defense. This is so important for survival that it certainly should be considered. In view of changing parties in power and the individuals running the governments, we are now constantly having trouble coordinating our national defense. I will not go into it here, but you know some of the problems that we are having in this respect at the present time. If we were all one country, we would not have this problem. This union could very easily be accomplished if the provinces of Canada should elect to become States and instead of having the United States of America perhaps have a United States of America and Canada or some other suitable name.

Then, too, if the results of the United States and Canada joining together are beneficial, perhaps we should consider extending an invitation on some suitable basis to our Mother Country—England—as well as to our brothers Australia and New Zealand. I am sure we would all benefit by such a move as we are the same type of people and our countries complement each other in an economic way. It would give us a mass market of right at 271 million people. One hundred and eighty-seven million of these people would be from the United States and 84 million from Canada, England, Australia, and New Zealand. This would compare with approximately 174 million people in the Common Market of Europe.

Over and above this economic advantage, we would be in a much better position for the defense of our countries in case of an emergency.

In the event we were to do this, then I feel Europe should be weaned and permitted to grow up as an equal partner with us. In other words, what I am trying to say is that we as a group would pull out of Europe and let them handle their own affairs. This is what General de Gaulle wants and in my opinion it would probably be the best for all concerned to permit this to happen. I recognize that it is easy to say this and it is much more complicated to do. However, Europe is certainly strong enough economically to permit this, even though we might have to help them in a military way initially. When they are on their own they can and will develop capacity to take care of themselves.

Were we to do this, it would certainly take a big load off the United States. It would relieve us of the support that we are now giving Europe and also it would be possible to make Europe an equal partner with us in helping support the economies and defenses of the rest of the free world.

In conclusion, I feel that if we were to have a free market between Canada, the United States, and include England, Australia, and New Zealand, we could and would be the leaders of the world for many, many years to come. Particularly is this true if we as countries, and in turn our leaders of industry and labor, would work together as a team, recognizing each others problems and taking advantage of our know-how, mass markets, and vast natural resources.

I want to thank you for inviting me to appear here today and for the opportunity of expressing my views.

U.S. AND CANADA FREE TRADE AREA IN RELATION TO FOREST PRODUCTS

(Address given to the Pacific Northwest Trade Association, April 8, 1963, Yakima, Wash., by B. M. Hoffmeister)

Dynamic postwar changes have shifted the balance of world economic power. The relative importance of Europe has increased; there is a beginning of industrialization in the underdeveloped countries; and the Communist bloc has become important. The result is a lessening of the relative strength of North America.

These realities underline the necessity of a Canadian and American partnership to provide a secure base for the free world.

This partnership cannot exist without economic cooperation. The forest industries of both countries have long been a strong foundation of the economy and leaders in economic growth. Our industry contributes to the living standard by converting forest crops to building materials, paper products and chemicals. We rely upon prosperous people, an expanding population, and sound public forest policy for our prosperity. In this we have more in common than not. Surely our industries can set an example that will lead the way to freeing trade and strengthening North America.

Interdependence in all facets of the free world's affairs has remolded the devices of economic cooperation. These include the

International Monetary Fund, set up to stabilize currency; the International Bank for Reconstruction and Development, designed to provide loans to countries in need of capital; and, most important, the General Agreements on Tariffs and Trade, which provides an agency to police an agreed code of international behaviour to prevent increased trade restriction. These are deliberately created devices which have become the pivot of free world solidarity. More is still to be done, and the Trade Expansion Act of 1962 is an example of further American leadership for freer trade. But this is a general offer to all countries. A step beyond seems necessary in Canadian-American relations. Failure to achieve a specific form of economic partnership would fly in the face of the most significant change of the postwar world; that is, the rapid welding of Canadian-American economic interdependence in response to the natural forces of economic geography inherent in both nations.

COMMODITY EXCHANGE BETWEEN CANADA AND THE UNITED STATES

In simple terms, we buy commodities we do not have or which we can purchase to better advantage in the United States, and the United States supplements its domestic needs with Canadian supply. In 1960, 43 percent of our American purchases were iron and its products, and forest products were 44 percent of American purchases from us. Logically, the exchange of Canadian natural resources for the production of efficient American factories is mutually beneficial.

It cannot be overlooked that an important portion of American imports flow from American investment placed in Canada to supply U.S. needs. It follows that the vital interests of three groups of American citizens are injured by trade restriction placed upon such goods. These Americans are: the consumers, whose cost of living is increased; the investor, whose capital investment in Canada is in jeopardy; and the producers of American goods sold in Canada, whose market is threatened.

It is significant that in 1961 the average Canadian bought $212 of American goods, while the average American spent $18 on Canadian goods. This, more than anything else, measures the reliance Canadians place upon U.S. trade. But there are other measures of the economic interdependence. Canada's purchasing power is the equivalent of a European country of 40 million people. We buy more from the United States than the six countries of the European Economic Community. Twice as much U.S. capital is invested in Canada as in Europe. The U.S. balance-of-payment problem would be more serious without the $7 billion earned in trade with Canada in the last decade.

Our two nations should not push against our natural destiny of greater economic integration or step backward into an era of increasing trade restriction.

The forest industry relies upon the growth of a crop that requires several generations to mature and depends upon the plans of man and nature. In fact, the laws of nature bear as heavily on this industry as on any other. This is the common ground to which the industries on both sides of the border are rooted.

It is an industry with a tradition of independence. We have never been able to afford unnatural conditions or inefficiencies. It is an industry which has succeeded through competition and, in doing so, has met the challenge of competitive substitutes by widening the range of its building products, creating new improvements in paper and better quality chemicals. If it had been an industry content to stand pat, breaking logs into boards, it would have been run over by the rush of substitutes.

These fundamental characteristics make me believe that free trade will benefit the industry. I believe that removing the cost of artificially supporting the inefficient sectors of the economy will free consumer purchasing power and increase demand for our products. This is more than Darwin's theory of survival—it is a reality of the modern need to strengthen the economy. As an example of the cost of trade restriction, one can examine Canadian experience. Many Canadian purchases bear tariffs, and domestically produced goods are priced to include the tariff. On this basis, it has been reliably estimated that Canadian tariff policy costs the consumer more than $1 billion per year, which is a 4- to 5-percent reduction in the standard of living. The forest industry should not condone this wastage of the consumer's dollar. We need rising employment and an economically strong population seeking new homes and communities. This is why the North American forest industry must stand for freer trade.

FOREST PRODUCTS IN RELATION TO FREE TRADE

The tariffs of Canada and the United States on forest products favor the entry of raw and semimanufactured supply, and the restriction of manufactures. Under this, paper is protected with tariffs ranging up to 160 percent of value. Cabinets, furniture, and similar manufactures have complicated tariff structures. Building products, with the exception of plywood and other manufactured board, are low tariff items primarily because a product, such as lumber, is not truly a manufactured item. It is a raw material of the housing industry.

The United States has been a net importer of forest products since 1915. The volume of imports has increased in response to an 85 million population increase in the period, and the fact that domestic harvest of industrial timber in the decade just ended was no higher than the 10 years ending 1915.

The industries in both countries have changed in response to the static supply of U.S. commercial timber. There has been a significant shift in the U.S. industry to manufacturing higher valued products, such as paper, pulp, newsprint, and plywood, in preference to lumber. Canadian producers have concentrated on supplying the gaps in U.S. production of forest products. The shift in the form of the industry is most marked in the United States. The big three users of forest harvest are lumber, plywood, and pulp, and paper. In 1910, of the total raw material consumed by these three, lumber was 96 percent; now, it is 78 percent and in the Far West, once the lumber capital of the world, lumber is only 55 percent. More significantly, in coastal Oregon and Washington the value of lumber production is only half that of other forest products.

The shift is toward the ultimate goal where large factories produce paper, chemicals, and building products from a tree. Within each category, individual items compete with one another, just as the automobiles of General Motors overlap one another.

This means the lumber industry is shifting and emerging as part of an integrated forest industry, making full use of the resource supply and wasting nothing of the tree.

In this evolution the customer is the vital factor. His demands must be molded to accept the commodities available from the new age of wood. It is the total use of these products that is of pressing concern to the forest economy. Since the logs used for plywood or lumber are largely interchangeable, and many of the markets are equally interchangeable, does it matter that plywood, which is more profitable, expands and lumber declines? The forest industry ought to be more concerned with Armco Steel Corp.'s program to place 1.5 million tons of steel annually on the housing market.

The selective protection of particular commodities is a feature of forest product tariffs in both countries. This policy may have been rationalized in 1910 when there was a surplus resource relative to population, and an industry that was underdeveloped. In modern times, the choice of commodities and the location of industry is primarily determined by natural factors of economic geography, resource supply, and production costs. The Douglas-fir region of Oregon, which has two-thirds of the recent plywood expansion, naturally tends to that product because of the region's large sized tree and quality species. The 20-percent tariff on plywood is not a factor either in raising the price of plywood or the choice to shift from lumber to plywood. Plywood prices are set by competition with available alternatives, and the total supply in relation to consumer demand.

Canada, with its supply of northern spruce and hemlock, has a natural advantage to specialize in newsprint and specific grades of chemical pulp. In addition, other species provide sound tight knotted lumber specialties.

In many respects, the Canadian forest complements the American. Specialization on both sides results from natural factors. The removal of tariffs is not likely to alter the established trends. It is more likely that free trade will stimulate full-scale industrial cooperation to the benefit of the North American and export markets for forest products. This cooperation will help to get the most out of the forest and win for the industry an increased share of the consumer's dollar in the contest with substitutes for wood products.

We do not expect that freeing trade will be easy, and that adjustments will not be required on both sides of the border. But a study of free trade should be approached from the view that:

First, the tree is an amazing raw material, capable of producing paper of many kinds, a wide range of building materials and unnumbered chemicals from the residuals.

Second, all categories of forest products, paper, building materials and chemicals receive intense competition from nonwood alternates. There is no market that is exclusively a wood product market. The consumer market is one that is shared by the available alternate, with the largest share going to the industry which can serve it the most efficiently.

Third, competition for the consumer's dollar between the commodities within the three categories of forest products is healthy because it enables our industry better to withstand the inroads of nonwood substitutes.

Fourth, regional specialization to utilize natural advantages reduces costs and raises the consumer's purchasing power, which in turn benefits the economy and directly assists the forest industry.

The Canada-United States trade agreements now provide shingles, newsprint and pulp under free trade, and lumber under low tariffs providing free trade in most items. Of these, only lumber is a controversial item. A close study of the controversy reveals it is first, lumbermen complaining against a list of U.S. domestic policies, second, an effort to raise the price of lumber to the consumer. This controversy brings into focus all the emotions, logical and illogical, which would bear upon a study of free trade in forest products.

It seems reasonable to refer to the controversy in some detail since it is difficult to discuss free trade under the cloud of an anti-Canadian campaign, by sectors of the U.S. lumber industry.

LUMBER CONTROVERSY

The lumber industry has been involved in a series of tariff episodes since 1866. Each time the tariff went up there was retaliation, and looking back, very little if anything was accomplished.

For the past 20 years, lumber has been on a relatively free trade basis, during which our trade became well established. Last year, the U.S. Lumbermen's Economic Survival Committee complained that they were being injured by lumber imports from Canada and applied for a hearing under the escape clause provisions of international trade agreements.

The facts are readily available in authoritative studies prepared by qualified American agencies, both private and public. The most recent is the February 14 Report of the U.S. Tariff Commission which is no ordinary study. There were 1,309 pages of testimony, plus 65 exhibits, 2 weeks of hearings, followed by voluminous statements and briefs by all interested parties. The Tariff Commission sent out a comprehensive questionnaire to U.S. producers and consumers. They took 6 months to study the matter. All of the arguments made by lumber producers, both before and after the hearing, were presented to the Tariff Commission and all were considered by the five members of the Tariff Commission as well as the professional staff of the Commission.

The Commissioners reported a unanimous finding that the present trade agreements with Canada do not result in softwood lumber being imported in such increased quantities as to cause, or threaten to cause, serious injury to the American industry. The report goes further and details the major domestic factors which cause the rise in imports. Some U.S. lumber spokesmen are saying that the Tariff Commission recognized the validity of the U.S. industry's complaints but were bound by some technicality of U.S. laws from ruling in their favor. To these spokesmen, and that is to U.S. lumbermen, editors, and Congressmen we say in sincerity, please read the Tariff Commission report and choose for yourself. Decide whether it is not true that the main theme of this report is that there is not enough commercial timber in the United States to satisfy all the demands made upon it.

The Tariff Commission found that the basic reasons for increased imports were: A limited supply of commercially available softwood timber in the United States, coupled with tree-farming policy of owners, aimed at balancing cut to growth, results in an inelastic annual harvest of trees. Competition for this supply from lumber producers and from manufacturers of other forest products, whose needs are expanding, works against lumber by raising the price of logs.

Additionally, acquisition of land for pulp production is reducing forest land dedicated to growing timber of sawlog size.

These are manifestations of a shift from lumber to other wood products.

The Commissioners reported that a significant part of lumber imports is produced by Canadian mills owned or financed by Americans. They go on to say, "Much of this investment is made up by U.S. producers who have relocated or expanded operations into areas having extensive timber supplies and by U.S. distributors seeking an assured supply of timber."

After drawing attention to the inelastic supply of U.S. timber, the Commissioners showed that "consumption of logs by softwood plywood increased by 2.6 billion board feet from 1951 to 1961 which was more than the increase in the annual import of softwood lumber." This finding underlines the I.W.A.'s analysis that the major cause of sawmill closure is either shortage of timber or management's policy of shifting to other products.

Examination of the trend of forest industry employment in Oregon reveals a dramatic economic progress. Private enterprise has shifted to higher valued products and created employment and averted what would have been serious loss of jobs had the emphasis remained on lumber. The Commission noted that the Jones Act is a problem confronting Pacific coast shippers. There is disagreement with U.S. forest policy and in certain areas of the Pacific Northwest there tend to be more sawmills than available timber supply.

It should be noted that these are entirely domestic matters and that surely the solution will not result from tariffs or quantitative restrictions.

Incorrect statements are consistently being made respecting the position of Canadian shippers about which I would like to state a few facts.

British Columbia is not a low wage area. The base labor rate in the coastal region is $2.08 per hour in 1963 compared with coastal Oregon and Washington $2.10. The I.W.A.'s statement to the Tariff Commission highlighted this parity and drew attention to the fact that a large part of U.S. lumber production originates from hourly rates well below $1.50 per hour.

Second, Canadian currency is not deliberately manipulated to benefit British Columbia lumbermen. The Canadian dollar was forced down from 105 percent to 92.5 percent of U.S. parity by external pressures causing the Canadian currency to reach a realistic relation with the U.S. currency. It is interesting to note that during 9 of the past 11 years, the Canadian dollar was at a premium. Fundamentally, there is no more reason for the two currencies to be the same value than there is for the Mexican peso to equal the Jananese yen.

Underlying the Canadian currency problem is the persistently adverse balance of payments with the United States, which in 1961 amounted to approximately $1,400 million. The currency crisis followed a decade in which current account loss with the United States was $12 billion dollars, offset partially by a northward flow of capital.

Third, the Government of British Columbia does not subsidize timber prices. Far from it, the appraisal formula was borrowed from the United States and innovations were added, making it more harsh than the U.S. version. In both countries Government stumpage is a share of the difference between cost of production and selling price of lumber and where these factors are equal stumpage will be approximately the same.

Fourth, it is said Canadian tariffs prevent American lumber sales in Canada. On a per capita basis, in 1961 we bought $1.50 worth of your lumber and you bought $1.52 of ours.

The lumber producers in North America have problems but we recognize the common enemy as the per capita decline in the use of wood products, arising from steady replacement of substitutes. For example, per capita softwood lumber consumption dropped from 223 board feet in 1950 to 166 board feet in 1962.

The solution is not to raise the price of lumber by artificially curtailing the supply. This is a withdrawal instead of stepping forward to challenge the competitors on the construction site.

There is vital need for determined product promotion to place lumber in all uses best suited to its capabilities. This requires action to insure the customer gets the service and uniformity of quality he is entitled to receive.

There are exports markets available and these can be developed by a concerted effort offering a high standard of customer service.

Free trade in lumber products would be a constructive force, enabling us to go forward together in a forthright attack against substitutes—the real enemy.

THE FOREST OF THE PACIFIC SLOPE

The forest under two flags is divided about one-half on each side of the border. The American share has the highest value species and the major portion of plywood logs. The Canadian share provides high quality lumber and species ideally suited for pulp and newsprint. Both countries are reaching the full utilization of the present commercially available annual harvest. Further expansion will come from using those portions of the tree not now utilized and increased supply from more intensive forestry. This requires vigorous private enterprise unfettered by artificial gimmicks. From the bark, lignins and resins not used in making chemical cellulose or papermaking pulps, there are a host of silvichemicals. These new products come from residues. The Northwest has the power supply, the know-how and the capital—in fact, all the advantages to compete in world markets. This new horizon can be achieved but it will be frustrated by restriction of the natural laws of economic geography.

The objectives of the forest industry, in both the United States and Canada, are identical. Harvest the forest crop at the lowest possible cost, recover the maximum possible per acre, obtain the utmost utilization per cubic foot of tree, maintain competitive vigor by constantly researching technological and product improvement and earn a profit commensurate with capital and management skills employed.

There are numerous areas for cooperation and joint action suggested in the foregoing. By accepting the principle of freer trade, it seems to me that a number of inhibitions currently present would either disappear or be greatly diminished, thereby providing better opportunities for working out our problems rather than fighting them out. The latter course is expensive and seldom produces a clear-cut win. Furthermore, it is very important to work toward elimination of the so-called anti-American or anti-Canadian gossip which is very largely ill founded and imaginary. Injury, moreover, is a poor method of cultivating one's best customer and good neighbor. Surely, in our common interest, there is no alternative but to work together and approach our problems objectively. Let us have a quick end to this "anti" nonsense which does little more than please our enemies.

May I conclude by stating that I believe that the freeing of trade between our countries will provide greater economic security for North America, particularly in the light of patterns developing on the world scene. At the same time, I feel the forest industry of the Pacific Northwest would be stimulated.

As a preliminary step toward closer economic integration and fuller utilization of the great forest we share, I suggest that consideration be given to the following five points.

1. Develop a proposal for submission to the two Governments respecting elimination of tariffs on forest products.

2. Undertake joint action to resist the invasion of substitute materials, including a joint wood promotion program, and cooperative research projects aimed at expanding the engineered use of building materials, and reducing the cost of getting wood products into place in buildings.

3. Develop areas for cooperation in the expansion of oversea markets.

4. Foster closer relation in establishing and maintaining standards of quality in forest products.

5. Establish full liaison in the forestry sciences, relating to the control of forest fires, prevention of insect infestation and management of the forest crop.

A NEW APPROACH TO RESOLVE THE SOFTWOOD IMPORT PROBLEM

(Address by G. Cleveland Edgett, executive vice president, West Coast Lumbermen's Association, before the Oregon Bankers Association, Portland, Oreg., April 9, 1963)

There is always a problem in presenting the story of an industry. Its achievements can be magnified if for any reason this seems desirable. Its difficulties can be made to appear more dire than they actually are in an effort to enlist support.

You are concerned with the lumber industry, but I imagine that you are no more concerned with it than you are with any other enterprise—large or small—which is not willing or able, on the basis of its own skill, to perform successfully.

If we are unable or unwilling to meet our obligations, you have a responsibility to your investors and the community to proceed with great care. At the same time, you are deeply involved with any industry which has an influence on the well-being or prosperity of the people who depend on you for security.

The lumber industry has problems at the moment. It has always had them. It has always met them. It is not necessary to tell you that in this respect it is in no way different from any other enduring industry.

Because we work closely together, I appreciate this opportunity to share with you some background information on our problems. Also, I would like to take advantage of this occasion to offer some new ideas on how our difficulties might be overcome.

Let me say first that we, as an industry, ask only that we be permitted to operate on a fair, competitive basis. Given the same set of ground rules, we believe that we can compete with any nation in the world.

Traditionally, the Northwest lumber industry has prospered when homes and commercial structures have been in demand in the United States. Traditionally, the sawmills in this area have produced the boards, the 2-by-4 studs, the 2-by-8 or 2-by-10 joists for this type of construction.

Now, you should know that the forests which provide this material recognize no such artificial boundary as the Canadian border. The same forests which grow north in Oregon and Washington continue to grow north into the province of British Columbia. Mills in British Columbia harvest substantially the same type of timber that we harvest here. And they use the same type of equipment that has been developed here.

Traditionally, British Columbia mills—many of them cargo, or waterside, mills—have sold the bulk of their output in the United Kingdom. However, in recent years this pattern has changed in two respects. First the Baltic countries and Russia have tended to make the United Kingdom market less remunerative for British Columbia producers. Second, very large new stands of timber in interior British Columbia have been opened up and many new productive units installed. Canada has been forced to find a new market for its lumber production and the United States was the nearest and most lucrative market available.

We now find additional millions of board feet of Canadian lumber pouring down across the border through the Lake States, streaming down even to Texas, going by ship to all the ports of the eastern seaboard.

In 1939, 29 percent of Canada's lumber exports was sent to the United States. By 1961 the total had risen to 79 percent. This represents 15 percent of total domestic softwood consumption and it may reach over 18 percent this year.

As the result of a number of trade agreements, the duty on imported softwood lumber declined during this period from $3 per thousand board feet to 25 cents per thousand board feet—which is obviously of no consequence. It is easy to see that the lumber industry has been sacrificed at the bargaining table in favor of other commodities.

As an initial step, the lumber industry of this country sought relief by applying to the U.S. Tariff Commission for a more realistic duty on lumber imports. From October 2 to 12, 1962, the industry presented evidence of the injury to which it was being subjected.

The time, however, was, to say the least, inauspicious. On October 11, the day before the hearing ended, the Trade Expansion Act of 1962 was passed by Congress and signed by the President.

The goals of the act are the development of an open and nondiscriminatory trading system in the free world, an economic and efficient international exchange of goods and the stimulation of economic growth.

Political and economic questions apart from tariff reductions will influence the course of future negotiations under the new act. Aid to developing nations, political and military problems, conflicting national and regional goals, differences in economic and political structure and in the rate of economic development and the pressing internal problems of each of the major nations of the free world must be considered.

Obviously, the problems of the lumber industry are to be judged against a backdrop of global problems. The act specifically states that any increased imports complained of must result "in major part" from previous tariff concessions.

This is the nub of the matter. The Tariff Commission was unable to find that any competitive difficulties besetting the lumber industry were due "in major part" to tariff reductions.

In the course of its exhaustive investigation, however, the Tariff Commission found that there had indeed been serious injury. It assigned specific reasons for the deterioration of the competitive position of this country's lumber industry. I think you will be interested in some of these reasons.

The most important cause of the increased imports, said the Tariff Commission in its official report, is reflected in the much more pronounced "cost-price squeeze" in the United States than in Canada between the price of lumber and the rapidly rising price of timber and purchased logs.

The timber management policies of Government agencies and other owners of large timber resources have operated, and continue to operate, to limit the commercial availability of mature sawtimber. These policies, which are designed to achieve a long-term balance between cut and growth, have resulted in much more intense competition among buyers of such timber in this country than exists in Canada.

The competition for the supply of timber, especially in the United States, has occurred not only among producers of lumber, but among producers of a variety of other forest products, such as plywood and pulp and paper and, sporadically, among exporters of logs. The rising aggregate demand for such forest products in the United States, in conjunction with rather rigid limitations on the commercial supply of timber, has resulted in an upward trend in the domestic price of timber. This, in turn, has exerted an upward pressure on U.S. prices of lumber. The persistence of this pressure has encouraged the opening of new areas of production of timber and the expansion of sawmill capacity in Canada, particularly during the past few years.

The average bid price of Douglas-fir stumpage in the coastal district of northwestern Washington, for example, rose from about $23 per thousand board feet in 1958 to about $38 per thousand in 1959, then declined to about $23 per thousand in 1961. In the same years the bid prices for Douglas fir in the coastal district of British Columbia were less than half those indicated for northwestern Washington.

In the United States, national forest timber is offered for sale to all bidders. In British Columbia, cutting privileges are controlled by a complex system of licensing priorities, quotas, and quota rights, the provisions of which vary according to several categories of public timberland. Often these provisions tend to reserve cutting privileges to established operators in local areas and to limit competitive bidding.

The Tariff Commission went on to say that the depreciation of the Canadian dollar has been, and continues to be, an important stimulus to U.S. imports of lumber from Canada.

In May 1962, pursuant to an arrangement with the International Monetary Fund, Canada pegged its dollar at 92½ cents. The pegging of the rate at that level was designed to accomplish several purposes. Among the more important of them were the general curtailment of imports and the general expansion of exports. Inasmuch as lumber is a leading Canadian export and the United States is the major foreign market for it, the currency depreciation effectively promoted the expansion of lumber exports to the United States.

In terms of U.S. dollars, the depreciation of the Canadian dollar since 1959 is equivalent to approximately $7 per thousand board feet, based on the average unit value of imports of softwood lumber from Canada in 1962.

Cost of transportation accounts for a large part of the delivered price of most shipments of softwood lumber. An important factor affecting the volume of imports of softwood lumber, the Tariff Commission went on to say, is the charter rate for waterborne shipments from British Columbia to Eastern United States in relation to the intercoastal conference rate on shipments from the west coast of the United States to the same destinations.

Under the Jones Act, as you know, intercoastal shipments of cargo from U.S. ports must move in U.S.-flag vessels. A modest break in this restrictive pattern was achieved recently when temporary legislation was passed permitting the shipment of domestic lumber in foreign-flag vessels to Puerto Rico upon determination by the Secretary of Commerce that no U.S.-flag vessels are reasonably available.

For approximately 3 years before October 1957 the Canadian charter rate to Atlantic ports was higher than the U.S. conference rate by $3 to more than $7 per thousand board feet of lumber. During that period waterborne shipments from British Columbia to eastern United States declined materially. Commencing in October 1957, however, charter rates applicable to shipments from Canadian ports were reduced sharply.

Largely as a result thereof, British Columbia mills increased their waterborne shipments to eastern United States by more than 500 million board feet from 1957 to 1961. The differential favoring shipments from Canadian ports reached the highest point on record—$12 per thousand board feet—in April 1962, thereby contributing further to increased imports of Canadian lumber.

The Tariff Commission concluded with the observation that the evidence obtained in the course of the investigation suggests that the factors giving rise to the increase in imports, rather than the increase itself, are mainly responsible for the major problems confronting the domestic softwood lumber industry.

Let me say again at this point that we are seeking no favors. We expect no special treatment. We do feel we are entitled to the opportunity to compete on equal terms with our neighbors to the north, and we intend to aggressively fight for that opportunity.

We have a program and are spending our time, manpower, and money to implement it. It is true that some of us place the emphasis on different facets of the problem. But, basically, I believe that the industry would support an entirely new concept of achieving equality.

There are seven primary areas where I am convinced that specific action can be taken to resolve the problem of excessive imports of softwood lumber.

With respect to the Jones Act, I would suggest to Congress that it enact legislation that would require all softwood lumber discharged at ports in the United States, its territories, districts, and possessions to be transported in American-flag ships or vessels registered in the country of the point of origin.

One of the chief purposes of the Jones Act, you will recall, was to preserve this country's merchant marine fleet for use in the eventuality of war. This placed upon the Northwest lumber industry the considerable burden of operating at a heavy financial disadvantage in order to protect the interests of the Nation as a whole.

During World War II, when a scarcity of ships existed, Canada operated her own fleet of merchant ships. While she has virtually none now, the shipping companies are still in existence. Certainly Canada should share in the defense of the North American Continent by building up her own fleet of merchant marine vessels. The alternative, which poses many additional problems, is to permit American shippers also to use foreign bottoms which are cheaper because wages, food, maintenance, and other considerations are inferior.

Canada has already cooperated with this country in eliminating the 15-day freehold on shipments moving by rail. This actually was a concession involving the bulk of Canadian shipments of lumber into this country, for three-quarters of the approximately 4.5 billion board feet enter by rail. If an accommodation can be made in one area, it can be made in another.

There are, of course, important considerations which must be dealt with, among them the needs of our own steamship people, of American workers on American ships, and the Southern Pine producers. Nevertheless, this new proposal provides an opportunity to achieve equality in the market with other countries and maintain the relationship between rail and cargo shipping within our own Nation.

For the second point in this program, I believe that the American lumber industry would be willing to accept an orderly marketing agreement between Canada and the United States which would remove tariffs on softwood lumber in both directions.

The results of the election in Canada yesterday seem to indicate that our friends to the north believe that an improvement in international relations is long overdue. Historically, the party which now holds a slim majority in Canada has had more harmonious relationship with the United States; this may provide us with a better chance to achieve a new approach to tariff matters between our two countries.

In the past, Canada has maintained high tariff barriers on lumber—and the previous administration was particularly restrictive in a number of different fields. Canadian tariffs on lumber, for example, range from $5 to $10 per thousand, while ours remain very nominal at from 25 cents to $1 per thousand.

In another area of operation, our administration should, at the next meeting of the International Monetary Fund, suggest that Canada reexamine her previous fiscal policies and consider the repegging of the Canadian dollar to a higher value. It is by no means impossible that a new Canadian administration would be receptive to this view. You, as bankers, know that it is impossible to continue to rob Peter to pay Paul.

I feel, in addition, that all softwood lumber should be marked as to country of origin. This would tend to eliminate confusion as to species and areas of growth, and permit buyers who wish to "Buy American" to do so. This is not a restrictive measure as Canada is already marking its lumber for other export markets.

In the matter of forest policies there is much that can be done. I respectfully suggest to the Governors of the Western States that they immediately appoint a committee of specialists in the field of forestry to examine Forest Service policies in British Columbia and consult with softwood producers in the Northwest regarding policies in existence on this side of the border. This committee should document these policies and recommend measures which would result in greater equality between Canadian forest policies and those in existence under the various administrative agencies in the United States.

The Northwest lumber industry is presently investing very substantial sums of money in promoting the use of lumber throughout the United States. Canadian producers make a very modest contribution to this promotional effort through the national wood promotion program. The net effect, however, is that the Northwest industry is spending millions of dollars to promote the sale of 4.5 billion board feet of Canadian lumber in the markets of this country. Since the basic purpose of this program is to preserve lumber's position with regard to substitute materials, I believe that Canada's financial share in this effort should be very much greater than it is.

Perhaps I should mention at this point that we, likewise, are trying to do our share in developing oversea export markets—to the advantage of both the Canadians and ourselves. Next month a trade mission of eight key Northwest industry representatives will fly to the United Kingdom and Common Market countries to explore trade possibilities in that area and promote the advantages of lumber from this region. A similar trade mission to the Far East and Australia is on the planning boards.

Finally, I believe that if the foregoing program cannot be put into effect before the summer recess of Congress, the President should be given the authority to invoke section 22 of the Agricultural Adjustment Act and temporarily impose a 10 percent quota—10 percent of the softwood lumber consumption in this country—on the imports of Canadian lumber.

There is at least one bill before Congress calling for an even lower quota, but I feel that it is time to be both fair and realistic.

Ample justification for such action by the President exists. The several billion board feet of timber which were blown down in the Columbus Day storm constitute a salvage and marketing problem which is of vital economic importance.

If something tangible can be accomplished within the next 4 months in the areas mentioned, I do not believe that the industry would be inclined to press for a quota. Should no appreciable progress be made, however, the interests of both the lumber industry and this region as a whole demand that the quota solution be resolutely advanced.

Gentlemen, I submit these proposals for your earnest consideration. I suggest to you that the time is opportune to carefully appraise our responsibilities to investors in this great industry and vigorously pursue a program of reform that is practical and in accord with these changing times.

[From the Yakima (Wash.) Republic, Mar. 28, 1963]

CANADIAN LUMBER IMPORTS WILL BE TOPIC FOR PNTA

Free trade effects in an area where U.S. industry already has battlelines manned against Canadian imports will be under scrutiny during Pacific Northwest Trade Association spring general conference in Yakima, April 7–9.

All conference discussions will be on aspects of "A Canada-United States Free Trade Area." That theme will be introduced at the opening banquet in Chinook Tower, April 7, by Dr. Robert L. McNeill, Deputy Assistant U.S. Secretary of Commerce for Trade Policy. Dr. McNeill has replaced Christian A. Herter, former Secretary of State, who is now President Kennedy's special representative for trade negotiations, as the conference keynote speaker.

CONFLICT AREA

The area of present trade conflict to be discussed is that of lumbering. B. M. Hoffmeister, of Vancouver, British Columbia, and Robert B. Pamplin, Portland, Oreg., will be spokesmen for the forest industries of Canada and the United States on the April 8 conference luncheon program. All conference sessions are scheduled in the Chinook.

Hoffmeister is president of the Council of Forest Industries of British Columbia. Pamplin is president of Georgia-Pacific Corp., a major producer of lumber and other wood products in the U.S. Pacific Northwest.

TWO CAREERS

Hoffmeister has gained prominence in two careers—military and industrial. He has been a lumberman all his business life, starting at age 17 as a junior clerk for the Canadian White Pine Co. Nine years later he was sales manager of the company, a subsidiary of MacMillan, Bloedel & Powell River, Ltd.

He volunteered for service with the Seaforth Highlanders of Canada when World War II broke out in 1939 and, in field actions, he gained successive promotions until he became Canada's youngest major general. Among his many military medals is the American Legion of Merit. He led the Seaforth Highlanders landing in Sicily; commanded Canada's 5th armored division in Europe; and, at the close of the war, was commander of Canadian forces in the Pacific.

VIRGINIA NATIVE

Pamplin is a 1933 graduate of Virginia Polytechnic Institute and did graduate work at Northwestern University. He is a native of Virginia.

He joined Georgia-Pacific in 1934, became its secretary and treasurer 2 years later, financial vice president in 1948, administrative vice president in 1952, executive vice president in 1956, and president in 1957.

CIGARETTE ADS ON TELEVISION

Mr. MOSS. Mr. President, I have discussed before in this Chamber my interest in a program which would advise the American people of the hazards of cigarette smoking. Legislation which I cosponsored last session with the distinguished Senator from Oregon [Mrs. NEUBERGER] was not pursued when the U.S. Public Health Service announced the creation of a commission of impartial experts to undertake a study of the available data on the effects of smoking. We are now awaiting that report. I am advised, however, that it will not be forthcoming for some time—perhaps for a year—and meanwhile cigarette advertising goes on unabated in a form most calculated to entice our youth to adopt the cigarette habit.

Because of the urgency I have recently directed letters to the presidents of the major television networks and of the tobacco companies themselves, asking them to take the glamour out of cigarette advertising in the hope that they will begin to do voluntarily what I trust we will do more thoroughly through a massive educational campaign.

I ask unanimous consent that a copy of my letter to the TV networks be carried in the CONGRESSIONAL RECORD.

There being no objection, the letter was ordered to be printed in the Record, as follows:

I am writing to ask that you and your board of directors do everything possible to take the glamour out of cigarette advertising.

I am concerned about the appeal to youth through advertisements which make it appear that the most virile and accomplished of men, the most attractive and feminine of women, and our leaders in almost every field are all cigarette smokers—and the inference in some of the ads is that success in the business or social world go hand in hand with tobacco smoking. TV cigarette advertising is particularly insidious because the ad comes right into the living room and reaches all members of a family in a way that a newspaper or magazine ad would not.

I am aware, of course, of the extent to which your revenues come from tobacco advertising, and that some of the country's most informative and entertaining TV programs are made possible by the huge expenditures of the tobacco companies to sell their products. I am not suggesting that tobacco advertising be stopped, but I do feel that glorifying advertising in this field should definitely be curbed—and that the broadcasting industry should take a firm stand on it.

There is mounting medical evidence as to the health hazards of the extensive use of tobacco. The most serious is the soaring death rate from cancer of the lung. At least 36,000 Americans died of lung cancer in 1960, more than 50 times the number who died in 1914. Medical evidence compiled in this country, as well as in Europe, shows a positive relationship between cigarette smoking and the incidence of lung cancer. I am referring, of course, to such studies as the report released a year ago in Britain by the Royal College of Physicians and that of Dr. Oscar Auerbach and Dr. E. Cuyler Hammond before the 1962 annual meeting of the American College of Chest Physicians.

As you may know, the Royal College of Physicians appointed a committee of specialists to study the effects of smoking on the body. After nearly 3 years of work they concluded that cigarette smoking is a cause of both lung cancer and bronchitis. It delays healing of gastric and duodenal ulcers and probably contributes to the development of coronary heart disease and certain arterial disorders. The committee also believes cigarette smoking may cause cancer of the mouth and pharynx.

In this country Doctors Auerbach and Hammond examined lung tissue from nearly 1,600 autopsies over a 5-year period. They now agree that tobacco smoke is unquestionably the chief cause of thickening and rupture of the small air sacs and blood vessels in the lungs. As a result, the body's oxygen supply is sharply reduced, thus forcing the right side of the heart to work harder to supply enough oxygenated blood from the lungs. Dr. Hammond pointed out that nearly half of all deaths in this country are due to heart failure and circulatory diseases and that smoking is a contributing factor in the progress of these conditions. In fact, in nearly all of the cases they analyzed, the degree of damage was directly related to the amount and kind of smoking done.

I have been studying the mounting medical evidence on the hazards of cigarette smoking for some time, and in the last session of the Congress I was one of the sponsors of a resolution which asked the President to create a Commission on Tobacco and Health to conduct a massive educational program on what cigarette smoking does to the human body, with particular emphasis on the relationship between smoking and lung cancer. This resolution was not passed because shortly after its introduction the U.S. Public Health Service announced the creation of a commission of impartial experts to undertake a comprehensive and dispassionate review of all available data on cigarette smoking, and to make recommendations in this area. It is expected that the first phase of this study, the survey of the nature and magnitude of the health hazard, will be completed by this September. But it will be some time after that before any recommendations can be formulated.

I am hopeful that the well-documented recommendations which come out of this study will be meaningful and sound. America is considerably behind major European countries in looking squarely in the eye the growing epidemic of death and debilitation caused by cigarette smoking. In Italy, for example, the Parliament has passed an act outlawing any form of public advertising. In Britain, the Ministry of Health has blanketed the Nation's schools with posters warning of the dangers of cigarette smoking. In addition the tobacco industry itself has agreed to deglamorize cigarette advertising on television, and all advertisements which do appear are shown after 9:00 p.m. In Denmark the cigarette makers have agreed to stop advertising their products in moving picture slides and magazines aimed at teenage audiences.

In making my request that the American Broadcasting Co. television network control the type of cigarette advertising presented, I wish to state that I am familiar with the claims made by some individuals in the tobacco industry that their advertising is not directed at converting nonsmokers but merely at winning the support of established smokers for a particular brand. They hold that the choice of whether to smoke or not to smoke is an individual matter. I am sure that this is an honest appraisal of their motivation.

However, I believe what they fail to acknowledge is that cigarette advertising is skillfully directed toward young people in such a way to make it seem imperative for them to smoke if they are to be manly or glamorous, handsome, active, successful, gay, vibrant, and glowing with good health. I am told that to this end, the 20 top brands spent $144 million on advertising in 1961.

Studies show that more than half of all high school students smoke, and 4,500 more boys and girls between the ages of 12 and 17 take up the habit each day of the year. By doing so they are greatly increasing their chances for dreaded diseases and early deaths. In view of these facts, how can it be ethical for our mass media to continue using sports heroes and glamorous models in an effort to associate smoking with all that is exciting, pleasant, and desirable in life?

I hope you will accept this letter in the spirit in which it is written, and take a hard look at the type of cigarette advertising you are allowing sponsors to present on your network. I know you will agree with me that the resources of television should not be used to convince the youth of America—or even the nonsmokers in more adult groups—that they should use a product which is injurious to their health.

I am also writing directly to the major cigarette manufacturers to make the same sort of plea I am directing to you.

HEROES OF THE WARSAW GHETTO

Mr. WILLIAMS of New Jersey. Mr. President, 20 years have passed since the Warsaw ghetto uprising. During those years the world has slowly learned the full extent of the heroic, hopeless fight waged by a small group of individuals against a massive military machine.

On this 20th anniversary, extensive and memorable tributes are being paid to the 50,000 Jews who died during those terrible 3 weeks in Warsaw. At ceremonies in Warsaw, Polish resistance fighters, who had given some help despite the terror, watched as the heroes of the battle were honored. Here in Washington, a memorial will be dedicated today to the martyrs of Warsaw at the Adas Israel Synagogue.

Mr. President, these ceremonies are tributes to the courage of an immortal group of men, women, and children. I ask unanimous consent to have printed in the Record an article from the New York Times describing the Warsaw ceremonies. An editorial in the New York Times of April 21 is also offered as another memorial to those who died in the Warsaw ghetto.

There being no objection, the editorial was ordered to be printed in the Record, as follows:

[From the New York Times, Apr. 21, 1963]

HEROES OF THE GHETTO

Twenty years ago, in the Warsaw ghetto where the Nazis had herded thousands of Jews to die, a handful of men, women and children gathered their last strength and took up arms in a revolt they knew to be hopeless. Emaciated, fever racked, they had few weapons, few fighters to pit against the well-equipped units of the S.S. If they knew that they could not prevail in battle, they also must have known that the Nazis' fury would fall on the survivors.

Yet the pitiful army fought, in the ruins and sewers of the Warsaw ghetto. It is doubtful whether, measured by military standards, the action proved of value. The Jews inflicted few casualties. In a few short days they were overwhelmed and the ghetto was in flames.

It is fitting that the Warsaw ghetto uprising be remembered, as it will be today in ceremonies in New York and other parts of the country. As President Kennedy has said, the nameless ghetto fighters provided "a chapter in the annals of human heroism, an inspiration to the peace-loving people of the world and a warning to would-be oppressors."

Wherever men of any nation or creed respect courage in face of inhumanity, the fight of the few in the Warsaw ghetto will not be forgotten.

[From the New York Times]

POLES MARK ANNIVERSARY OF 1943 GHETTO UPRISING

Warsaw, April 18.—Senior Polish officials led delegates from all over the world today at the opening here of a 2-day ceremony marking the 20th anniversary of the Warsaw ghetto uprising. Nearly 50,000 Jews died in the hopeless 3-week fight against Nazi troops.

Edward Ochab, a high Communist Party official, began the ceremonies by awarding 91 state decorations to heroes of the battle. Included were Jewish survivors and Polish resistance fighters who aided them, and many posthumous awards.

Prominent among the visitors was an eight-man delegation from Israel led by former Attorney General Gideon Hausner, chief prosecutor in the Adolf Eichmann trial, who was born in Poland.

ROLLCALL TO BE READ

Ceremonies scheduled in Warsaw tomorrow included a wreath laying at the stone memorial cairn in the former ghetto that marks the site of the Jews' last stronghold. A rollcall of the resistance fighters will be read.

A trip will be made to the former Nazi extermination camp at Treblinka, 80 miles away, where 800,000 Jews were killed.

Mr. Hausner, whose delegation visited the Jewish cemetery in Warsaw, said it was, paradoxically, the only Jewish center in Poland. The country's prewar Jewish population of 3,500,000 has shrunk to 30,000, mostly old people who have refused to emigrate.

The fierce and bloody ghetto battle—along a street called Mila (Pleasant)—erupted on an Easter Sunday as the last gesture of those of the ghetto's original population of 600,00 who remained.

HOUSE-TO-HOUSE FIGHTING

Helped by the Polish underground, the survivors fought house to house and yard by yard as the encircling German forces moved in. Hitler eventually ordered in tanks and armored cars.

After 3 weeks the assault troops blasted their way into the command bunker, where the Jewish leaders had taken their last stand. The survivors there died fighting or turned their guns on themselves.

The anniversary ceremonies are sponsored by the Communist government.

Premier Jozef Cyrankiewicz, onetime inmate of the Auschwitz concentration camp, was patron, and Warsaw's mayor, Janusz Zarzycki, headed the organizing committee. Streets in many parts of Poland are to be named for Jewish resistance leaders.

MIGRANT FARM LABOR

Mr. WILLIAMS of New Jersey. Mr. President, the March 15 issue of Presbyterian Life carried a most interesting article on the situation of the migrant farm laborers in the United States.

In his informative and judicious article, Mr. Sissel points out quite accurately that the farmer has problems as well as the migrants, and that one of the forces working to help the migrant is "the active conscience of an increasing number of farm employers." However, the farmer cannot improve the housing and living conditions of his workers entirely unaided. Help such as proposed in the legislation before the Subcommittee on Migratory Labor is needed by both the farmer and the worker.

Mr. Sissel has given a carefully drawn and balanced picture of the situation of our migrant farmworkers, a group often voiceless and voteless. Because I think my colleagues will find this article of great interest, I ask unanimous consent that it be printed in the body of the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

NEWSLETTER FROM WASHINGTON

(By H. B. Sissel)

Given either a well-organized, well-financed lobby or deep, broadly articulated public support, any group interest can fare rather well in the Nation's Capital. Lacking both, it is likely to lose out among the competing voices clamoring for legislative and executive attention.

It may therefore come as a surprise that our Nation's 500,000 domestic migrant farmworkers (2 million if you count all family members) stand the best prospects in years of benefiting from ameliorative legislation from the Congress. A migrant health act approved by the last Congress, though insignificant in its contribution to the total solution, presaged these prospects. Several factors have helped create this guardedly hopeful situation. The most obvious was the controversial television documentary "Harvest of Shame," which pictorialized some of the worst, but not atypical, aspects of the lives of migrants before millions of TV viewers. Another has been the meticulous efforts of Senator HARRISON WILLIAMS of New Jersey, assisted by a dedicated staff who has assiduously avoided casting the grower in the role of villain in the picture. Another has been the active conscience of an increasing number of farm employers who have tried to improve the lot of the people who are with them so short a time, but upon whom they depend to bring in their harvests of vegetables, fruits, and nuts. And one of the most important factors has been the persistent, year-after-year hammering away by church groups and private agencies so easily dismissed as "do-gooders." Facts, figures, and experience gained from migrant ministries and social welfare work have buttressed the arguments of these latter groups on behalf of "the forgotten 2 million."

Migrant farmworkers continue to be one of the very few minority groups in the United States whose conditions have not improved in the last 30 years. In fact, relative to the improved standard of living in most of the rest of our population, their plight has actually worsened since John Steinbeck wrote "Grapes of Wrath" in the midthirties. Much of the propaganda put out by the cause groups states with only a modicum of license that migrants are "without voice and without vote." There is no question that the mobility of the migrant as he follows the crops deprives his children of formal education and his family of minimal health and sanitation provisions, and cuts him off from the benefits of the labor legislation that has given industrial labor cohesion and power. Lacking an established residence, he is cut off even from those subsistence welfare services that most communities give to their own indigent poor. Equally important from the point of view of the church, the migrant's sense of identity, personal awareness and worth, and his energy and aspiration are sapped by his inability to settle and belong anywhere. His total situation is not helped by virtue of the fact that his skin is probably dark.

* * * * *

As for public education, health, and welfare services, many local school districts or public health and welfare departments are unable adequately to take care of their own, let alone to meet the needs of a massive influx of temporary visitors.

Yet as of now the migratory farmworker is absolutely essential to the production and harvesting of a significant portion of our country's food supply. Further, the domestic worker competes with a foreign labor force that comes in temporarily (some permanently) under the protection and regulation of Federal law. Most of this foreign labor force consists of Mexican nationals who depend economically upon their seasonal income within the United States. At the same time, that income in a sense subsidizes their continuation in a state of poverty and takes some of the pressure off the Mexican Government to build its own durable economic institutions, starting with genuine land reform. Sudden and radical elimination of Mexican migrants from the farm labor force would undoubtedly be harmful to domestic growers, and to Mexican nationals as well.

What is needed to rationalize the farm labor market, as the experts put it, is a comprehensive Federal program that takes into consideration all the major components in this complex tangle of economic, political, and human problems. The grower needs a predictable number of harvesters on a temporary basis at the right place at the right time. Otherwise, he loses his crop. The worker needs to be assured of a systematic series of jobs under decent working and living conditions at an adequate wage. The Mexican national needs to be "phased out" of the picture in such a way that necessary adjustments can be made for his welfare at home. The consumer needs to be assured that his food costs won't skyrocket if justice is done for the worker. (They won't. Labor costs in this sector are insignificant in comparison to packaging and marketing costs.) This is obviously a situation in which the free play of the forces involved can only lead to further disorganization of the farm labor market and intensification of the human and economic problems it produces.

Meanwhile, Senator WILLIAMS has again introduced a series of bills intended to provide migrants with minimum wage protection; assistance to State-controlled improvement in health, education, and welfare programs; improved recruitment, transportation, and distribution services; regulation of the use of child labor; registration of crew leaders; better housing; and other benefits. Proposed legislation is also designed to assist growers in getting an orderly labor supply without at the same time perpetuating the plight of the harvesters. Detailed information about migrant labor legislation now before the Congress may be obtained without cost from the National Committee on Agricultural Life and Labor, 1751 N Street, NW., Washington, D.C. Much of this legislation could pass this year with just a bit more expression of concern and interest from the public, especially church people.

The United Presbyterian General Assembly, which meets this May in Des Moines, will have before it a comprehensive statement with appropriate recommendations for legislative and other action that can be taken toward solutions to the problems clustered around the production of the food most of us will eat today.

TASK FOR A PEACE CORPS

Mr. WILLIAMS of New Jersey. Mr. President, the proposed National Service Corps is one of the most important legislative measures to come before the 88th Congress. Among the many areas in which the Corps would operate, none is more needy than the migrant farm families of this Nation. Recognizing this fact, Cyrus Karraker, in a recent article in the Christian Century, spells out in detail exactly how great a help National Service Corps volunteers will be to this neglected group. Mr. Karraker is president of the Pennsylvania Citizen's Committee on Migrant Labor and he has a wide knowledge of the problem. In this interesting article he gives a clear picture of what can and should be done for our migrant farm workers by the National Service Corps. I ask unanimous consent that the article entitled "Task for a Peace Corps" be printed in the body of the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

TASK FOR A PEACE CORPS

(A program like that operating abroad could transform the lives of our migrant workers.)

(By Cyrus Karraker)

Last November it was announced that President Kennedy had named a Cabinet-level group headed by his brother Robert, the Attorney General, to study the feasibility of a domestic Peace Corps, patterned after the program which today has 4,000 volunteers at work in 40 countries. The wide press coverage given the President's announcement indicates how great is the public's interest in the humane work being done by the Peace Corps abroad. A domestic corps organized along the same lines would present opportunities to citizens to make their country a better place to live in. Could there be a higher type of patriotism?

A preliminary report submitted earlier by the Attorney General had suggested certain domestic areas in which volunteers could play important roles, "such as working in slum schools and recreation areas, migrant labor camps and correctional institutions."

I propose to deal with only one of the domestic areas mentioned, migrant labor, suggesting some services which volunteers might perform to help solve a grave social problem.

The challenge to these volunteers comes from a group of people estimated variously to number between 1 and 2 million—people whose average annual individual income is less than $1,000, whose education and health are neglected, and who lack every form of security. Among them are at least 150,000 children under 12 years of age.

Through the years many organizations have engaged in efforts to solve the problem posed by the presence of these unfortunate people, but progress in improvement of their welfare has been slow and spotty. And though congressional legislation would accomplish the greatest amount of improvement, at its last session Congress adopted only 1 of the 12 bills on migrant welfare that were introduced. That one had to do with health, and Congress adjourned without providing the funds necessary for its functioning. Obviously something extra and different is needed if public concern is to be aroused and if the walls that isolate migrant farm laborers from the rest of American society are to be broken down. That something might prove to be the suggested domestic Peace Corps.

Volunteers enrolled in such a corps could help the migrant farm laborers in many creative ways. Most urgent need at present is improvement of the physical conditions of the camps in which most of these people live. Thousands of those camps serve only as shelter from the weather. They are fly-ridden, they lack refrigeration facilities, they are overcrowded and unsanitary. The owners of many such camps protest that they cannot afford to provide better quarters for their workers.

Carefully chosen for their tasks and organized under able leadership, Peace Corps volunteers could transform these shelters into comfortable housing. In such an enterprise there is a precedent in the American Friends Service Committee's work camps, which for years have given students an opportunity to help convert bad city housing into decent places to live. Many migrant camps are the rural equivalent of slums, like them imperiling the physical and moral health of their residents. Physical improvement of the camps would in the end benefit the growers, too, since comfortable living conditions mean satisfied workers, more productive labor, greater monetary return.

Volunteers who possess certain necessary skills could be set to work building children's playgrounds at the camps, organizing adult recreation programs, and planning and carrying out vocational programs for the workers and their families. Though all the efforts to improve the camps may do no more than help the workers achieve a minimal living standard—a makeshift shelter in a camp can never be a home—that standard will be far above what most of these people have known.

Services besides the merely physical are needed, too. One of the most significant is establishment of education and health programs for the workers' children. In certain places this has been accomplished to a degree by provision of day-care centers and summer schools. But though the great value of such projects has been demonstrated over the years, no more than a fourth of the States in which migrants work make anything like adequate provision for the children's welfare. And only five States have so far taken advantage of the fact that Federal funds are available to the States for the extension of welfare services to migrant children as well as to resident dependent children. In 1962 the only satisfactory work being done for the benefit of migrant children was to be found in Colorado, New Jersey, New York, Ohio, Oregon, Pennsylvania, and Washington. Just now, however, welfare agencies in other States are displaying interest in such services, and apparently await only encouragement to begin offering them. Initiation of Peace Corps projects among migrants might not only result in improved living conditions; it might also focus the attention of State and county welfare officials on their responsibility for the welfare of migrant farm workers.

Volunteers for Peace Corps projects of this kind should of course be people with training and experience in child care, elementary education, health, and social work. One of their most important tasks would be to refer migrants burdened with personal problems to appropriate county welfare agencies; another, in cooperation with chaplains, would be to cultivate friendly relations between the migrant laborers and the community. Pennsylvania provides a model in its use of social workers in migrant welfare. Operating as mobile units, Peace Corps volunteers could be called to whatever area needed their particular skills at a given time.

Other needed services lie in the areas of religion and adult education. The value of the work already being done by chaplains in spiritual counseling and in promoting social adjustment is widely recognized. Usually the service is provided by a local council of Protestant churches or by Roman Catholic parishes in the neighborhood. But the chaplains are too few and in many instances their burdens are too great. Why should not a domestic Peace Corps have in its ranks persons able to serve as chaplains, working in cooperation with the social workers enrolled?

In adult education of migrants the field is virtually unlimited, because so far almost nothing has been done—this despite the fact that the average migrant worker has no more than a fifth grade education. Instruction is needed in the English language, American culture, child care, home management, nutrition and many other subjects. Aptitude and other tests could be used to discover youth who possess the potential for vocational or college education. A model is to be found in the student committees that have been formed at a number of colleges to help migrant youth get an education. Bucknell University has assumed leadership in this area, and committees are in existence at Bowling Green University and at Oberlin, Swarthmore, and Douglass colleges. Funds are available for scholarships; the difficulty lies in discovering young migrants who wish to continue education beyond high school.

There remains another area for service to migrant laborers, that of health. Most migrants live under conditions that favor the spread of contagious diseases not only among themselves but to the resident population of the area. This fact was acknowledged by New Jersey last summer when it conducted mass tuberculosis testing for its 25,000 migrant workers. Any comprehensive health program, however, should rest on such basic research as is being conducted in California, which has assumed national leadership in migrant health programs by setting up family health clinics in a number of counties, with the help of citizens' health committees. Any health program that approaches adequacy requires doctors and nurses far beyond the present resident supply. This is where trained medical personnel in a domestic Peace Corps could turn the tide of need.

Here, then, are the vital needs in one area where Peace Corps volunteers will be most welcome. We await the inception of a domestic Peace Corps.

MENTAL ILLNESS AND RETARDATION

Mr. HRUSKA. Mr. President, truly remarkable advances have been made in the past several years in many fields of medicine but in few has the progress been as dramatic as in the critical area of mental health.

Within the memory of virtually every Member of the Senate is the time when the mentally ill were consigned to bleak, dreary institutions which were little better—and in some cases infinitely worse—than jails.

In recent years, however, magnificent strides have been taken and the subject of mental illness, once shunned in public discussion, was again the subject earlier this year of a Presidential message to the Congress.

Time magazine, in the medicine section of its April 5 edition, discusses the work being done in the various States and concludes:

> Nebraska has been trying possibly the most fundamental approach to prompt treatment for the mentally ill, and is now being acclaimed as the Nation's second most advanced State in the promotion of mental health—after neighboring Kansas. Guided by Dr. Cecil W. Wittson, Nebraska's program aims at training the family doctor, pediatrician, internist and obstetrician-gynecologist to handle the everyday emotional problems of their patients. The Nebraska Psychiatric Institute invites family doctors to Omaha for training in consultation and observation of patients. They may even bring their own patients along for study. Back home, they are expected to set aside one half-day a week for patients with emotional problems. Twenty of them now have an average of 18 psychiatric patients each. And for a 6-month course in family-practice psychiatry scheduled to begin July 1, it is the doctors, for a change who are lined up on a waiting list and not the patients.

We salute the State of Kansas for the work it is doing along with the States of Georgia, New Mexico, and Illinois, which are also cited in the Time article.

The Omaha World-Herald, observed editorially:

> Nebraska's mental health program is one of which Nebraskans are justly proud. Time's estimate should be interesting reading for those who have been saying that in providing essential services for its people, Nebraska has been woefully deficient.

The progress made in Nebraska stems from action taken many years ago. In fact, the Senator from Nebraska witnessed and participated in many of the foundational steps when he served as chairman of the Douglas County Board of Commissioners. Fifteen years ago, our Douglas County Hospital extended its hospitality for several years at a $1 per year rental to the State board of control and the University of Nebraska College of Medicine to cover one entire wing of the Douglas County Hospital. The arrangement was to commence the gathering of a staff for the psychiatric unit which would take several years to build on the campus of the college of medicine in Omaha.

When the construction of that unit was completed, the staff which took charge was moved over from the leased space to put into operation procedures and activities which had a running start in the leased quarters. Thus there was never a day lost for the new building in getting off to a splendid start what has now developed into a very worthwhile and meaningful program.

My mind goes back to many fine citizens who participated in that work. Phil Vogt, administrator of Douglas County Assistance Department, and in my book one of Nebraska's first citizens; the then chancellor of the University of Nebraska, Dr. Reuben G. Gustavson, who brought about fine cooperation of the university and its board of regents; the board of control, then composed of W. H. Diers, Mrs. Harold Prince, and Forrest R. Johnston. Of the Douglas County Commissioners who were active at that time, only Leonard Bergman is still in office and doing a splendid job. Then and now appears the name and the authority in his field of Dr. Cecil W. Wittson, who undertook guidance of the institute and who enjoys national renown in his field, and of course many others.

All of us then knew that we were taking steps which would have impact for years to come. It was at considerable expense to Douglas County because of the shortage of space for its hospital patients. But we doubled up, the staff in charge underwent a great discipline and exercised competent management, as well as infinite patience, all of which were necessary to bridge that interim between organization of the Nebraska Psychiatric Institute and its moving into its present permanent home.

Again, I should like to say that Nebraska's progress in this field, as in so many others, has been commonsense, practical, within our resources, both financial and manpower. It is gratifying after all these years to note the progress made and the confidence with which the State faces the future for its even greater problems in this area.

I ask unanimous consent to have printed in the RECORD the article from the April 5 issue of Time, entitled, "Out of the Snake Pits."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

OUT OF THE SNAKE PITS

When John F. Kennedy sent to Congress the first Presidential message ever devoted exclusively to mental illness and retardation the core of his proposal was a plan to set up mental health centers in every major U.S. community—which might run to a total of 500 or more in the next 5 years. Even before Congress gets around to implementing the President's ideas, the prospect of Federal money for pump priming and pilot plants has set mental health officials and crusaders in all 50 States to taking stock of where they now stand.

A few States, mainly the more populous and wealthy, have anticipated the President's proposals—which, in fact, are based largely on their pioneering. Kansas, Massachusetts, New York and California have already done much to improve their State hospitals and to convert them into places where patients are treated instead of being simply locked away. But high on the list of mental health pioneers there is also, surprisingly, the State of Georgia.

ROTTEN UNDERNEATH

As recently as 1959 a newspaper exposé showed that Georgia's only mental hospital, saddled with the stigmatic name of State Hospital for the Insane at Milledgeville, was a monstrous snakepit. Behind the facade of an administration building that looks like the White House, it was crowded to its rotten, rat-infested rafters with 12,000 patients. At least 3,000 were senile oldsters who did not belong there—any more than the epileptics, dope addicts or alcoholics who jammed the hospital. Comparatively few patients ever got better, and those who did succeeded mainly on their own resources, for among Milledgeville's 50 doctors, many of dubious repute, were only three psychiatrists.

Milledgeville has now been taken out of woolhat politics and reformed by a topflight psychiatrist imported from New York, Dr. Irville MacKinnon. Its budget is up from $2.49 per patient per day to $3.29 (against a national average of $5.40). It has 50 psychiatric doctors, admits 6,000 new patients a year, and sends 60 percent of them home within 90 days.

NO BARS, NO LOCKS

More surprising than Georgia's backlog of woes, though, is that even before the 1959 scandal it had started an earnest effort to save its citizens from Milledgeville. Psychiatric clinics were set up in general hospitals for prompt and intensive treatment of the mentally ill, and outgoing Gov. Marvin Griffin put aside $300,000 in surplus funds to get the movement rolling.

In Atlanta's Grady Memorial Hospital, one of the first such clinics is now one of the most relaxed places in that vast and forbidding pile. Its windows have no bars, its doors are unlocked. Its four doctors and six nurses are more informal than their colleagues elsewhere in the hospital. Only a neat little name tag marks them as "staff." Patients are kept busy with psychotherapy (some of it in groups), occupational therapy and their own chores. Nearly all receive drug treatment, though few now get shock.

The Grady unit has 18 beds. Georgia also has a 20-bed unit in Augusta, and there are centers with 10 to a dozen beds in Macon, Columbus, and Albany. But because the facilities are still so limited, the Georgia clinics have strict eligibility rules. To get in, a patient must have the backing of a psychiatrist and another physician; he must be seeking help voluntarily; he cannot be currently addicted to drugs or alcohol; and the admitting psychiatrist must be convinced that his illness is likely to be arrested within a month.

By now, more than 2,600 patients have passed through the Georgia centers. Fewer than 300 have had to go on to Milledgeville, as against 1,700, the doctors estimate, who otherwise would have had to go there.

LINEUP OF DOCTORS

Other widely separated states are approaching the twin goals of early detection and intensive treatment by different methods:

New Mexico is the proving ground for a plan financed by the National Institute of Mental Health. In three areas, each embracing three counties, the state has installed a "community mental-health consultant" in the office of a county health department. Their job is to serve as counselors, to spot the client who is so disturbed that he should become a patient, and to refer him elsewhere for prompt treatment. But in practice, virtually every client has been so relieved by talking things out with his consultant (and sometimes his minister as well) that an imminent crackup has apparently been averted. For those with more severe upsets, scattered over New Mexico's sparsely settled acreage, Psychiatrist William Sears goes barnstorming in his own plane, visits each district at least once a month. In 3 years the 3 consultants have handled 1,800 cases in 2,775 interviews, referred fewer than 1 percent for intensive psychiatric treatment.

Illinois has 40 community clinics scattered around the State and has been supplying outpatient treatment for years. But for the more severely ill, instead of patching up the gloomy old State hospitals, Dr. Francis J. Gerty, director of the department of mental health, plans to spend $50 million on eight "hospital clinics." They will be so distributed that no one in the State will have more than a 2-hour drive to reach one: two in Chicago, one each in Centralia, Peoria, Springfield, Harrisburg, Rockford, and Decatur-Champaign.

Nebraska has been trying possibly the most fundamental approach to prompt treatment for the mentally ill, and is now being acclaimed as the Nation's second most advanced State in the promotion of mental health—after neighboring Kansas. Guided by Dr. Cecil W. Wittson, Nebraska's program aims at training the family doctor, pediatrician, internist and obstetrician-gynecologist to handle the everyday emotional problems of their patients. The Nebraska Psychiatric Institute invites family doctors to Omaha for training in consultation and observation of patients. They may even bring their own patients along for study. Back home, they are expected to set aside one-half day a week for patients with emotional problems. Twenty of them now have an average of 18 psychiatric patients each. And for a 6-month course in family-practice psychiatry scheduled to begin July 1, it is the doctors, for a change, who are lined up on a waiting list and not the patients.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the House had agreed to the amendments of the Senate to the bill (H.R. 4715) to incorporate the Eleanor Roosevelt Memorial Foundation, Inc.

ESTABLISHMENT OF WATER RESOURCES RESEARCH CENTERS

Mr. MANSFIELD. Mr. President, is there further morning business?

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

Mr. MANSFIELD. I ask unanimous consent that the unfinished business be laid before the Senate and made the pending business.

The PRESIDING OFFICER. Without objection, the Chair lays before the Senate the unfinished business, which will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (S. 2) to establish water resources research centers at land-grant colleges, and State universities, to stimulate water research at other colleges, universities, and centers of competence, and to promote a more adequate national program of water research.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. KUCHEL. Mr. President, I ask unanimous consent that the order for a quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WILLIAMS of Delaware rose.

The PRESIDING OFFICER (Mr. LAUSCHE in the chair). The Chair recognizes the Senator from Delaware.

DELINQUENT FEDERAL TAXES

Mr. WILLIAMS of Delaware. Mr. President, today I present the ninth annual report on delinquent Federal taxes.

This report is rendered as of December 31, 1962, and as in preceding years is broken down by district offices, first to show the delinquencies in employment taxes and second to show the total of all delinquent Federal taxes, including employment.

Under the term "employment taxes" are included withheld income taxes, social security taxes, unemployment taxes, railroad retirement, and so forth.

The total for all types of tax delinquencies in the United States for the year ending December 31, 1962, showed an increase of 3.5 percent or $1,100,780,000 as compared to $1,063,248,000 on December 31, 1961. This compares with a total of $1,614,494,000 in 1954—the first year in which these statistics were assembled.

While this represents a 3.5-percent increase in the overall tax delinquencies over last year, nevertheless when compared to the first report—1954—of $1,614,494,000 it is still a creditable record showing a little over a $500-million drop in total tax delinquencies during the past 9-year period.

Delinquent employment tax by December 31, 1962, had dropped 9 percent, as compared to the previous year, or from $268 million to $242 million. But this still remains an item which should be given continued attention. We must never overlook the fact that these employment taxes represent money which is withheld from the pay envelopes of the employees, and under no circumstances should they ever be considered or used as funds belonging to the employer.

Spectacular increases will be noted in some of the small district offices such as in Burlington, Vt., and Portsmouth, N.H., which show increases of 324.8 percent and 449.9 percent, respectively, in tax delinquencies for last year. The letter of the Commissioner, however, points out that these two increases largely result from the assessment of a certain large account involving a single taxpayer in those respective areas.

A similar explanation appears in connection with the San Francisco district, which shows an 80-percent increase in total tax delinquencies or an increase from $57,977,000 in 1961 to $104,359,000 in 1962. The Commissioner's letter points out that the issuance in December of income and gift tax delinquent accounts totaling over $68 million in the case of two taxpayers in the San Francisco district accounts for most of this unusual increase.

Even after taking into consideration these unusual increases outlined above, the 1962 report still shows better than a $500 million reduction in the total amount of tax delinquencies during the past 9 years, and it is in the face of this accomplishment under the reorganization act which was approved in 1952 that there is a question in the minds of some concerning the wisdom of the recently proposed concentration of the work in the large area offices.

I was a strong supporter of the reorganization act approved in 1952 which embraced several changes in the old procedure of tax collecting facilities. Significant in these changes were two particular and very essential points. The first was the removing of the directors from political patronage by placing them under civil service. The second was the decentralization of the workload from the heavily concentrated areas into the smaller regional offices.

In my opinion each of these points was of major importance, and while no one could assess to what extent either or both played in the accomplishment of a $500 million reduction in our total tax delinquencies, nevertheless I am concerned by that portion of the recent reorganization plan which reverses this decentralization idea and once again starts to concentrate the workload in the major offices.

That does not mean that some parts of the Commissioner's reorganization plan may not have merit or that the elimination of some area offices may not be wise, but I would strongly recommend caution before proceeding too far in reestablishing a system patterned after the old regime. We must not forget that the concentration of too much authority at the Washington level was the downfall of the old system.

Under the decentralization provisions of the reorganization plan the $500 million reduction in total tax delinquencies speaks for itself.

The 1962 report for the various offices is as follows:

Augusta, Maine, has a good report for 1962. Employment tax delinquencies were reduced 38.4 percent, and total tax delinquencies were reduced 13.7 percent. However, even with this drop the total tax delinquencies for 1963 are still higher than they were in 1954.

Boston, Mass., again has a very bad report. While showing a 4.2-percent decline in employment tax delinquencies, it shows a 17.3-percent increase in total tax delinquencies, bringing the total tax delinquencies in this office to an alltime high since these records were first computed. Delinquent accounts in this office have over the years consistently been increasing while the rest of the country has on an average been achieving a reduction of over 30 percent. This office needs the attention of the Commissioner.

Burlington, Vt., shows a reduction of 24.1 percent in its employment tax delinquencies but an increase of nearly 325 percent in total tax delinquencies; however, as the Commissioner points out, this drastic increase is largely accounted for by the assessment of one large delinquent account.

Mr. AIKEN. Mr. President, will the Senator from Delaware yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. AIKEN. I wish to advise the Senator from Delaware that since he received those figures, the Goldfine property in Vermont has been sold. There was a $3 million tax delinquency on the part of that one concern, but it cannot be carried as a delinquent tax in Vermont any more. As the Senator from Delaware knows, the Goldfine delinquency of $3 million was charged to every State where Goldfine owned any property. He owned $500,000 or $600,000 worth of property in Vermont, so Vermont was charged with that delinquency.

In my opinion, the small Internal Revenue offices, which Mr. Caplin is proposing to emasculate, are among the most efficient in the country. For instance, in Burlington, Vt., every tax return that was received on or before April 15 was tabulated and every dollar of the receipts deposited in the bank by April 18—within 3 days. If the Boston office can show any record that even remotely approaches the record of the Burlington office, I should be very much surprised.

I commend the Senator from Delaware for his exceptionally good work in trying to keep the Internal Revenue Service on the straight road. We all recall the Senator's reaction a few years ago, when he learned that there were so many delinquents in the Internal Revenue offices themselves. There seemed to be more in the offices than there were among the general taxpayers. The Senator performed a remarkable service in disclosing that fact. Of course, it cost quite a large sum to operate our penal institutions for a few years after that. The Senator performed a remarkable service then, and he is doing so now.

If the Internal Revenue Service in Washington would only ask its directors in the States where it is proposed to reduce the size of the offices how money can be saved, every one of them could tell how the cost of operating the offices could be reduced. But, as Mr. Caplin told us the other day at a hearing before the Committee on Finance, the Internal Revenue Service has established a management pattern and requires every office to hire so much management. Whether it be in New York City or in Anchorage, Alaska, it is necessary to hire the same number of supervisory personnel. That is ridiculous, because so large a number of officials is not needed in the smaller offices.

Again, I commend the Senator from Delaware for the excellent work he is doing.

Mr. WILLIAMS of Delaware. I thank the Senator from Vermont. As the report and the Commissioner's letters point out, Vermont has a fair record over a period of years. The drastic increase in this year's report is accounted for by the assessment of one large account. That is true also in the instance of Portsmouth, N.H., whose report I shall discuss in a moment.

Mr. AIKEN. Each year the national office of the Internal Revenue Service establishes collection goals. The Vermont office has well exceeded its goals in every way, for whatever purpose they have been established.

Mr. WILLIAMS of Delaware. Mr. President, Hartford, Conn., has made progress in reducing both its employment tax delinquencies and its total tax delinquencies, showing a reduction of 16.6 percent and 11.5, respectively.

Portsmouth, N.H., like Burlington, Vt., shows a drastic increase in total tax delinquencies of nearly 450 percent; however, again this results from the assessment of one large account. It should be noted that without this account Portsmouth has over the past 9 years been consistently making progress toward bringing its delinquencies in line.

Providence, R.I., decreased its employment tax delinquencies by 11 percent and total tax delinquencies by 12 percent.

Albany, N.Y., shows a reduction in its employment tax delinquencies of 29.6 percent and a 19.6 percent in total delinquencies. Both figures represent alltime lows in this office.

Brooklyn, N.Y., reports an 8.2 percent increase in its employment tax delinquencies and a less than 1 percent reduction in total tax delinquencies. This latter figure is a 9-year low.

Buffalo, N.Y., has reduced its employment tax delinquencies during the past 9 years by approximately $500,000 and reduced its total tax delinquencies by over $7 million, with the 1962 results showing a 14.7 percent and 8.7 percent reduction in employment and total tax delinquencies, respectively. Both of these accounts for 1962 are at an all-time low.

Lower Manhattan and Upper Manhattan were combined in 1960 and are now reported as Manhattan, N.Y. Their combined reports show a 14.8 percent reduction in employment tax delinquencies this year and a 5.1 percent reduction in their total tax delinquencies. These two offices have reduced their total tax delinquencies since 1954 from $329 million to $110 million in 1962. During this same period employment tax delinquencies in these two combined offices have been reduced from $44 million to $24 million. Both of these offices were in bad shape prior to the reorganization in 1952, and I commend them on their progress during this entire 9-year period. The 1962 figures represent lows for these offices.

Syracuse, N.Y., shows a reduction of 19.5 percent in its employment tax delinquencies, but this still leaves the account higher than it was 9 years ago. Total tax delinquencies were increased by 1.4 percent over last year, with that item approaching a 9-year high.

Baltimore, Md., turned in a good report for 1962, showing a reduction in both employment tax delinquencies and total tax delinquencies of 16.5 and 25.4 percent, respectively.

Camden, N.J., is another office which has not done too well in reducing its delinquent accounts over the past 9 years, showing a reduction in 1962 of 1.3 percent in employment tax delinquencies and a 3.3 percent reduction in total tax delinquencies; but employment tax delinquencies are still nearly 60 percent higher than they were in 1954, and total tax delinquencies are also higher than the first year in which these records were assembled. This office likewise needs attention, particularly in reference to its employment tax delinquencies.

Newark, N.J., shows an increase of 5.6 percent in employment tax delinquencies and 1.2 percent in total tax delinquencies; however, over the 9-year period this office has shown progress in both categories, each having been reduced by approximately 50 percent.

Philadelphia, Pa., shows a 30.3 percent increase in its total tax delinquencies during 1962 against a 2.8 percent reduction in employment tax delinquencies.

Pittsburgh, Pa., reports a 10.2 percent reduction in both employment tax delinquencies and in total tax delinquencies for 1962. However, again it should be pointed out that employment tax delinquencies for this office are over 30 percent higher than they were in 1954, the first year of such records.

Scranton, Pa., shows a reduction of 19.9 percent in employment tax delinquencies and 2.4 percent in total tax delinquencies.

Wilmington, Del., shows a 48.8 percent increase in employment tax delinquencies, bringing these delinquent accounts to a point 20 percent higher than they were in 1954. Total tax delinquencies in this office last year were increased by 9.4 percent; however, over the 9-year period total tax delinquencies in this office have been reduced from $22 million to $2.8 million.

Cincinnati, Ohio, last year reported a 27.3 percent reduction in employment tax delinquencies and a 12 percent reduction in total tax delinquencies; however, employment tax delinquencies, even after this reduction, are nearly double the 1954 total.

Cleveland, Ohio, reports a 14.4 percent reduction in employment tax delinquencies and a 15.2 percent reduction in total tax delinquencies. This represents an alltime low in total delinquencies.

Indianapolis, Ind., reports an 11.2 percent reduction in employment tax delinquencies; but even after this reduction, delinquent employment taxes in this office are still more than double the total in 1954. This office needs some attention. Total tax delinquencies during 1962 were reduced by 7 percent.

Louisville, Ky., reports a 9.8 percent increase in employment tax delinquencies, bringing these delinquent accounts to a 9-year high, or approximately double what they were in 1954. Increases during the recent years have been rather consistent; and, again, some attention should be given to finding the reasons. Total tax delinquencies in this office increased 18.1 percent last year.

Parkersburg, W. Va., in 1962 reported a reduction of 1.9 percent in employment tax delinquencies and an increase of 9 percent in total tax delinquencies.

Richmond, Va., reported a 17.4 percent reduction in employment tax delinquencies and a 15.7 percent reduction in total tax delinquencies. Employment tax delinquencies in this office are higher than the 1954 report, but the total delinquencies are at a 9-year low.

Atlanta, Ga., in 1962 reported a 4.9 percent reduction in employment tax delinquencies and a 9.2 percent increase in total tax delinquencies.

Birmingham, Ala., reported a 2.7 percent increase in employment tax delinquencies and a 24.4 percent reduction in total tax delinquencies. This brings the total tax delinquencies for this office to an alltime low.

Columbia, S.C., reported a 27.3 percent reduction in employment tax delinquencies and a 5.8 percent reduction in total tax delinquencies.

Greensboro, N.C., reported a 20.1 percent reduction in employment tax delinquencies, against an increase of less than 1 percent in total delinquencies. Total delinquencies in this office are near an alltime low.

Jackson, Miss., reports a 7.1 percent increase in employment tax delinquencies, bringing this item to a 9-year high. Total tax delinquencies were increased 3.3 percent. Employment tax delinquencies in this office need more attention.

Jacksonville, Fla., reported a 15.1 percent reduction in employment tax delinquencies and a 1.9 percent reduction in total tax delinquencies. Employment tax delinquencies in Jacksonville are still nearly double what they were 9 years ago.

Nashville, Tenn., reported a 5.9 percent and a 17.7 percent reduction in employment tax delinquencies and in total tax delinquencies, respectively.

Chicago, Ill., reported a 7.4 percent and a 21 percent reduction in employment tax delinquencies and in total tax delinquencies, respectively. Both categories in Chicago for 1962 were at an alltime low.

Detroit, Mich., is another office reporting an alltime low in its total tax delinquencies, having reduced them by 15.5 percent in 1962. It shows a reduction last year of 28.4 percent in employment tax delinquencies.

Milwaukee, Wis., for 1962 reports a reduction of 16 percent in its employment tax delinquencies and an 11.8 percent reduction in its total tax delinquencies. This brings the total delinquencies to an alltime low.

Springfield, Ill., reports both employment tax delinquencies and total tax delinquencies as having been reduced to an alltime low since these reports were first assembled in 1954. Its 1962 report shows a reduction in employment tax delinquencies of 20.2 percent and a reduction of 10.4 percent in total tax delinquencies.

Aberdeen, S. Dak., reports a 50.9 percent reduction in employment tax delinquencies and a 22.7 percent in total delinquencies. This is another office showing a commendable record in collecting employment taxes, having reduced these to an alltime low.

Cheyenne, Wyo., reduced employment tax delinquencies and total delinquencies by 37.7 percent and 4.3 percent, respectively.

Denver, Colo., reported a 2.7 percent increase in employment tax delinquencies. Employment taxes are more than 50 percent higher than they were in 1954, representing an alltime high. Total tax delinquencies were reduced last year by 13.1 percent.

Des Moines, Iowa, reports a 29.3 percent reduction in employment tax delinquencies; however, it reports a 53.7 percent increase in total tax delinquencies during the same year.

Fargo, N. Dak., reports a 40.2 percent reduction in employment tax delinquencies and a 29.6 percent reduction in total tax delinquencies, bringing the latter item for this office to an alltime low.

Kansas City, Mo., reports a 44.3 percent reduction in delinquent employment taxes, bringing this category to an alltime low, while it reports a 9 percent reduction in total tax delinquencies. This still leaves total delinquencies at more than double the figure in 1954.

Omaha, Nebr., reports a 1.7 percent reduction in employment tax delinquencies for 1962. This item is still higher than it was in 1954. Omaha last year, however, reduced its total tax delinquencies by 36.4 percent, thus reducing the total delinquent accounts to an alltime low.

St. Louis, Mo., reports a 22.6 percent reduction in employment tax delinquencies and a 13.2 percent reduction in total tax delinquencies. This represents an alltime low in total tax delinquencies for this office, and brings the account down to less than half of what it was in 1954.

St. Paul, Minn., reports a 21.2 percent reduction in employment tax delinquencies and a 4.4 percent reduction in total tax delinquencies.

Wichita, Kans., has a good report having reduced employment tax delinquencies by 41.2 percent and total tax delinquencies by 9.1 percent, bringing both accounts to a 9-year low.

Mr. CARLSON. Mr. President, at this point will the Senator from Delaware yield?

The PRESIDING OFFICER. Does the Senator from Delaware yield to the Senator from Kansas?

Mr. WILLIAMS of Delaware. I am glad to yield to the distinguished Senator from Kansas.

Mr. CARLSON. I am pleased to note the fine progress which has been made in the Wichita office in the reduction of delinquencies in the payment of employment taxes and in the payment of taxes generally. I am personally acquainted with members of the staff, as well as with the regional director; and I am proud of the record they have made in the past year.

I am also pleased to note that progress has been made in the Kansas City, Mo., office, which also collects taxes in our area.

It seems to me it would be most unfortunate if the Director of the Bureau of Internal Revenue and the Treasury Department were to insist on a complete relocation and reorganization of these structures, which are doing fine work.

The report being made by the distinguished Senator from Delaware is an encouragement to those who are doing a good job, and it also proves to those who are somewhat back in their percentage of collections that they have an opportunity to improve their collections in the next year or two.

Certainly the Senator from Delaware is entitled to great commendation from the Senate, the House of Representatives, and the taxpayers of the Nation for his efforts to secure these ever-increasing reductions in delinquencies in tax payments.

I believe he stated that the amount of reduction during the past year has been $500 million. I believe that is a commendable record; and all of us should give our commendations to the officials of the Bureau of Internal Revenue who are making increased efforts to collect the taxes, in the interest of the taxpayers generally.

So I commend the Senator from Delaware for his fine work, which I know involves a great many details.

Mr. WILLIAMS of Delaware. Mr. President, I thank the Senator from Kansas for his remarks. He has every right to be proud of the record of the Wichita report. This office has shown excellent progress since 1954, the first year for which these statistics were assembled.

Over the years, the Treasury Department nationally has achieved a reduction in the total tax delinquencies from approximately $1.6 billion to $1.1 billion—or $500 million less. I certainly commend the districts which have made possible this progress. I believe these annual reports help show the trouble spots, so that both the Department and we in Congress can give them our attention.

I was much surprised to find that prior to 1954 such annual figures had not been assembled. In 1954 that situation was called to my attention; and, upon my request the then Secretary of the Treasury, Mr. Humphrey, instructed the Department to compile these annual reports as of December 31 and to submit them to our committee.

I have been assembling these cumulative totals each year in order that we could get a clearer picture of what each office is doing. This report serves to keep the district officials more alert to their problems. The employees of the Treasury Department have done an excellent job. The reduction of $500 million in the total tax delinquencies during the past 9 years has been achieved during a period in which total tax collections of that agency have increased from around $60 billion annually to around $85 billion to $90 billion a year. So the reduction in the face of the larger collections is even more remarkable.

Continuing my reference to the various States:

Albuquerque, N. Mex., reports employment tax delinquencies reduced by 5.4 percent, but this still leaves this account nearly double the amount in 1954. In 1962 its total tax delinquencies were increased by 52.4 percent, which brings total delinquencies for this office to an alltime high and nearly double the 1954 report. This office has not been doing too well and needs attention.

Austin, Tex., shows employment tax delinquencies as being reduced by 26 percent, but this still leaves delinquent employment tax for this office higher than they were in 1954. Total tax delinquencies last year were increased by 9.6 percent.

Dallas, Tex., reports a 13.2 percent reduction in employment tax delinquencies and a 7.8 percent reduction in total tax delinquencies.

Little Rock, Ark., reduced its employment tax delinquencies by 23.2 percent, but this still leaves this category substantially higher than the 1954 report. While total tax delinquencies in 1962 were reduced 1.5 percent, it still leaves total tax delinquencies for the Little Rock area at approximately 400 percent over the 1954 report. This office also needs some attention.

New Orleans, La., reports a 4.7 percent reduction in employment tax delinquencies and a 10.2 percent reduction in total tax delinquencies.

Oklahoma City, Okla., reports an increase of 13.1 percent in employment tax delinquencies and a 16.7 percent increase in total tax delinquencies. Employment tax delinquencies in this office are at an alltime high.

Anchorage, Alaska, reports a 12.2 percent and a 13.7 percent increase in employment tax delinquencies and total tax delinquencies, respectively.

Boise, Idaho, reports a 5 percent increase in employment tax delinquencies and a 1.9 percent increase in total delinquencies. The delinquent employment tax account is at a 9-year high in this office.

Helena, Mont., for 1962 reports a 29.6 percent reduction in employment tax delinquencies and a 12.8 percent increase in total tax delinquencies. Employment tax delinquencies in this office are likewise higher than the 1954 report.

Honolulu, Hawaii, reports a 22.6 percent reduction in employment tax delinquencies and a 3.1 percent reduction in total tax delinquencies.

Los Angeles, Calif., while reporting a 2.7 percent reduction in employment tax delinquencies still carries this item as double the amount in 1954. Total tax delinquencies in Los Angeles last year were increased by 5.9 percent, bringing this item to an alltime high. This office likewise has not been doing too well and should be given attention.

Phoenix, Ariz., listed employment tax delinquencies last year as increased by 23.4 percent, bringing this item to an alltime high, or about double the amount of 9 years ago. At the same time the total tax delinquencies were increased by 10.7 percent, establishing a new high in this category. This office in recent years has been rendering very poor reports in handling its delinquent accounts.

Portland, Oreg., reports a 19.9 percent reduction in employment tax delinquencies and a 13.7 percent reduction in total delinquencies.

Reno, Nev., reports a 5.4 percent reduction in employment tax delinquencies, but again this account is still approximately 40 percent higher than it was 9 years ago. Total tax delinquencies in Reno increased by 19.9 percent last year.

Salt Lake City, Utah, reported an increase of 3 percent in employment tax delinquencies, bringing these accounts for this office to an alltime high; however, they do show a 12.7 percent reduction in total tax delinquencies, thus establishing an alltime low in this category.

San Francisco, Calif., reported a 2.1 percent reduction in employment tax delinquencies and an 80 percent increase in total tax delinquencies. As the Commissioner pointed out this unusually large increase in total tax delinquencies results largely from the assessment of two accounts.

Seattle, Wash., reports a reduction in delinquent employment taxes of 11.2 percent, thus bringing these delinquent accounts down to an alltime low. At the same time this office reduced its total delinquent accounts by 6.4 percent.

International operations showed delinquent employment taxes as being reduced by 42.4 percent, but this still leaves these accounts more than double the amount reported in 1956. Total tax delinquencies for international operations last year jumped 36.8 percent, bringing this account to an alltime high and to nearly 4 times the amount reported as being delinquent in this category just 7 years ago. These accounts likewise need special attention.

Puerto Rico over the past 9 years has been rendering very poor records of collecting its delinquent income taxes. This year it again reported a 21.6 percent increase in delinquent employment taxes and a 41.3 percent increase in total tax delinquencies. This represents an increase in both categories of nearly 400 percent over the past 9 years. This increase has been rather consistent over the years, and certainly the record demonstrates that this office needs a complete overhauling.

I ask unanimous consent to have printed in the RECORD at this point the letter from the Commissioner of Internal Revenue, Mortimer M. Caplin, dated February 20, 1963, followed by the statistical report for each office.

The PRESIDING OFFICER (Mr. YOUNG of Ohio in the chair). Is there objection?

There being no objection, the letter and tabulation were ordered to be printed in the RECORD, as follows:

U.S. TREASURY DEPARTMENT,
INTERNAL REVENUE SERVICE,
Washington, D.C., February 20, 1963.

Hon. JOHN J. WILLIAMS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR WILLIAMS: This is in response to your request of December 6, 1962, for a report on our taxpayer delinquent account inventories and for a report by district and type of tax showing all tax accounts classified as uncollectible during 1962 or otherwise set aside as being of questionable value.

I am glad to be able to report a more favorable situation in our delinquent account activity. We are beginning to see results from the emphasis we have been placing on taxpayer education and other measures to improve voluntary compliance, followed by prompt and firm enforcement measures in the case of those who do not respond. Delinquent account issuances in 1962 were down 176,000, 5.7 percent in number, and $76.4 million, 5 percent in amount from calendar year 1961. Some of this improvement may be attributed to our emphasis on prompt action in the case of employers who file their employment tax returns unaccompanied by required payments. We are collecting more and more of these accounts in notice status—before they ever reach delinquent status. Rather than simply mailing notices to the taxpayers, personal contact by telephone or a revenue officer is made in every case where the liability is in excess of $2,500. Also in many offices, where the workload permits, contact is made on all amounts in excess of $500. In the last 6 months of 1962, for example, we collected almost 24,000 more of these accounts in notice status than we did in the corresponding period of 1961, and the total of collections attributable to these accounts was almost $78 million, $41 million more than the employment taxes which we collected in notice status during the corresponding period of 1961. Depositary receipts validated by banks provide another indication of improved compliance. While yearend figures are not available, depositary receipts validated for the first 9 months of 1962 were up 7 percent in number and 12 percent in amount over the corresponding period in 1961.

Numerically, our delinquent account inventories are again down; in fact, the lowest since 1959. Were it not for the issuance in December of income and gift tax delinquent accounts totaling over $68 million in the case of two taxpayers in the San Francisco district, our dollar inventory would have continued its downward trend again this year. Large accounts like these distort the inventory picture, and we might note that several others are included in our year-end figures. Of these, the Goldfine accounts alone amount to above $10 million. These large accounts, especially those made against individual taxpayers, are generally the most difficult to collect. It is not unusual to find that the taxpayer does not have sufficient assets or projected income to pay more than a part of his liability. In these cases, the Service has no alternative but to write the balance off as uncollectible.

The table which follows is a summary as of December 31, 1961 and 1962, of the taxpayer delinquent account inventory broken down as to those in an active and an inactive status. As indicated in previous reports, inactive accounts are those on which collection action has been deferred pending the outcome of audit examination, court cases, or other contingent actions.

	Active	Inactive	Total
Amount (thousands):			
Dec. 31, 1961	$637,328	$425,920	$1,063,248
Dec. 31, 1962	668,647	432,133	1,100,780
Change from 1961 to 1962	+31,319	+6,213	+37,532
Percent of change	+4.9	+1.5	+3.5
Number:			
Dec. 31, 1961	972,400	99,260	1,071,660
Dec. 31, 1962	873,077	103,070	976,147
Change from 1961 to 1962	−99,323	+3,810	−95,513
Percent of change	−10.2	+3.8	−8.9

Attached is a tabulation of our delinquent account inventory broken down by the various tax groups, the inactive accounts being shown in the columns to the right. As in previous years, the figures in the inactive category are also included in the figures appearing in the columns under the various tax groups. All offices were current in their issuances as of December 31 which means that the tabulation includes all accounts that were in a delinquent status as of that date.

Regarding uncollectible accounts and accounts disposed of by means other than by collection or uncollectibility, detailed data on such accounts were published prior to fiscal year 1958 in the Commissioner's Annual Report to the Secretary of the Treasury. Beginning with fiscal year 1958, data on these accounts were consolidated and shown in the report as one item, identified as "Other disposals." For your information, we have broken "Other disposals" down into uncollectibles and abatements and show the data below for calendar years 1958 through 1962. The same data for 1961 and 1962 only are shown by district in a tabulation attached. However, our figures on uncollectibles and abatements are not compiled by type of tax, so we are unable to comply with that part of your request. The figures shown in the table below and in the tabulation attached do not, of course, agree with the figures shown in our annual reports to the Secretary since the calendar year is the period used for the figures which we are furnishing you, whereas the annual reports to the Secretary are made on a fiscal year basis:

[Amount in thousands]

Calendar year	Uncollectible	Abated
1958	$227,236	$217,414
1959	285,985	195,493
1960	222,910	195,518
1961	191,878	169.479
1962	189,371	155,593

In the area of uncollectible accounts, I should like to point out that many accounts are assessed, even though it is known at the time that the prospects for collection are extremely poor. Nevertheless, the assessments must be made in order that the liabilities may be established and the interests of the Government fully protected. I might add, however, that the decision to classify these accounts, or any others, as uncollectible is not made until all reasonable efforts have been exerted to locate the delinquent taxpayer and any income or assets from which collection may be enforced. In other words, delinquent accounts are classified as uncollectible only after it becomes clear that the accounts truly qualify as uncollectible. Furthermore, even after a decision has been made that one or more delinquent accounts are uncollectible, collection action is merely suspended until such time as collection prospects are improved or the period of limitations has expired. Many such accounts are reactivated on the basis of improvement in the taxpayer's financial situation and subjected to collection action before expiration of the statute of limitations. Separate records on such reactivated accounts are not maintained and adjustments to the amount reported as uncollectible cannot be made so as to reflect the amount that is ultimately written off as uncollectible.

Abatements are, of course, entirely different from uncollectibles. Except in the case of offers in compromise, an assessment is abated only if it is in excess of the tax amount actually due and owing at the time.

Following is a list of assessments which qualify for abatement.

1. Assessments in excess of the amount legally due as determined by audit examination.

2. Assessments in excess of the amount accepted on an offer in compromise.

3. Jeopardy assessments later determined by court ruling to be excessive.

4. Jeopardy assessments where it is administratively determined that jeopardy does not exist.

5. Transferee assessments in excess of the basic transferor assessment.

6. 100-percent penalty assessments in excess of the basic corporate assessment.

Assessments made in transferee cases always constitute a duplication of an amount already assessed against the transferor, and in cases involving the 100-percent penalty, assessments made against officers or employees of the taxpayer always constitute a duplication of an amount already assessed against the taxpayer himself. In fact, transferee assessments, all representing the same basic transferor liability, may be made against more than one transferee, and the 100-percent penalty may be assessed against more than one person in respect of the same offense. However, no more is actually collected than is actually due, of course, and all assessments over and above the basic one must ultimately be abated.

In jeopardy cases, the situation differs in that the assessments made are usually against the taxpayer and the taxpayer only. However, the amounts involved are determined on the basis of such information, sometimes rather limited, as is immediately available to the Service. Jeopardy assessments may, therefore, be in excess of the true liability as subsequently determined when all the facts are disclosed. In such cases, the amount of the jeopardy assessment is adjusted to the true liability.

We appreciate your interest in this matter and are pleased to supply you with the information requested.

With kind regards,
Sincerely,

MORTIMER CAPLIN,
Commissioner.

Delinquent taxes

---

[1] Merged with Upper Manhattan as Manhattan.

[2] Merged with Lower Manhattan as Manhattan.

[3] Merged with Cincinnati.

[4] Merged with Cleveland.

[5] Alaska included in Seattle prior to 1962. Percentage change for Seattle for 1962 adjusted to reflect separation of Alaska from that office.

[6] Result of district offices' transferring to this division delinquent accounts of taxpayers known to be abroad and out of reach.

UNANIMOUS-CONSENT REQUEST AND LEGISLATIVE PROGRAM

Mr. CHURCH obtained the floor.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. CHURCH. I am happy to yield to the Senator from Montana provided I do not lose my right to the floor.

Mr. MANSFIELD. Mr. President, after conferring with the distinguished acting minority leader, the Senator from California [Mr. KUCHEL], the senior Senator from Colorado [Mr. ALLOTT], and others, I wish to propound a unanimous-consent request. I send it to the desk and ask that it be read.

The PRESIDING OFFICER. The unanimous-consent request will be read.

The Chief Clerk read as follows:

UNANIMOUS-CONSENT AGREEMENT

Ordered, That, effective on Tuesday, April 23, 1963, at the conclusion of routine morning business, during the further consideration of the bill S. 2, the so-called Water Resources Research Act, debate on any amendment, motion, or appeal, except a motion to lay on the table, shall be limited to 1 hour, to be equally divided and controlled by the mover of any such amendment or motion and the majority leader: *Provided*, That in the event the majority leader is in favor of any such amendment or motion, the time in opposition thereto shall be controlled by the minority leader or some Senator designated by him: *Provided further*, That no amendment that is not germane to the provisions of the said bill shall be received.

Ordered further, That on the question of the final passage of the said bill debate shall be limited to 1 hour, to be equally divided and controlled, respectively, by the majority and minority leaders: *Provided*, That the said leaders, or either of them, may, from the time under their control on the passage of the said bill, allot additional time to any Senator during the consideration of any amendment, motion, or appeal.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Montana? The Chair hears none, and it is so ordered.

Mr. MANSFIELD. Mr. President, will the Senator yield further?

Mr. CHURCH. I yield.

Mr. MANSFIELD. I wish to announce to the Senate that the distinguished Senator from New Mexico [Mr. ANDERSON] will lead off in the debate on the measure this afternoon. I assume that the distinguished Senator from Colorado [Mr. ALLOTT] and other Senators will have something to say on the subject.

If there is a lag in the discussion of S. 2, the water resources bill, it is the intention of the leadership to call up the bill S. 1007 to guarantee electric consumers in the Pacific Northwest first call on electric energy generated at Federal hydroelectric plants in that region and to guarantee electric consumers in other regions reciprocal priority, and for other purposes.

I merely make that announcement so that the Senate can be prepared.

I thank the Senator from Idaho [Mr. CHURCH] and the Senator from Rhode Island [Mr. PASTORE] who also has been waiting to address the Senate.

THE U.S.S. "THRESHER"

Mr. PASTORE. Mr. President, on the morning of April 9, at 8 a.m., the SS(N) 593 departed Portsmouth Naval Shipyard to undergo sea trials following extensive shipyard overhaul. This submarine, the U.S.S. *Thresher*, under command of Lt. Comdr. John W. Harvey, had aboard 112 naval personnel and 17 civilians. These men who set sail that morning were never again to see their families and their loved ones. The following morning, while undergoing a deep test dive, approximately 200 miles off the coast of Cape Cod, the submarine went down with all hands. I ask unanimous consent to have printed in the RECORD at this point the names of those men, civilians and military, who went down with the *Thresher*—men whose names will forever be part of the tradition of the U.S. Navy.

There being no objection, the names were ordered to be printed in the RECORD, as follows:

Mr. Fred P. Abrams.
Lt. Comdr Philip H. Allen, U.S. Navy.
Tilmen J. Arsenault, Enca (SS)-P2, U.S. Navy.
Lt. (jg.) Ronald C. Babcock, U.S. Navy.
Ronald E. Bain, En2(SS)-P2, U.S. Navy.
Mr. Daniel W. Beal, Jr.
John E. Bell, Mm1-P2, U.S. Navy.
Lt. Robert D. Biederman, U.S. Navy.
Lt. Comdr. John H. Billings, U.S. Navy.
Edgar S. Bobbitt, Em2(SS)-P2, U.S. Navy.
Gerald C. Boster, Em3(SS)-P1, U.S. Navy.
George Braceyn, Sd3(SS), U.S. Navy.
Richard P. Brann, En2(SS)-P2, U.S. Navy.
Richard Carkoski, En2(SS), U.S. Navy.
Patrick W. Carmody, Sk2, U.S. Navy.
Steven G. Cayey, Tm2(SS), U.S. Navy.
Mr. Robert E. Charron.
Edward Christiansen, Sn(SS), U.S. Navy.
Larry W. Claussen, Em2(SS)-P2, U.S. Navy.
Thomas E. Clements, Etr3(SS), U.S. Navy.
Lt. Merrill F. Collier, U.S. Navy.
Mr. K. R. Corcoran.
Mr. Kenneth J. Critchley.
Francis M. Cummings, Sos2(SS), U.S. Navy.
Mr. Paul C. Currier.
Samuel J. Dabruzzi, Etn2(SS), U.S. Navy.
Clyde E. Davidson III, Etr3-P1, U.S. Navy.
Donald C. Day, En3(SS), U.S. Navy.
Roy O. Denny, Jr., Em1(SS)-P2, U.S. Navy.
Mr. Richard R. DesJardins.
Peter J. DiBella, Sn, U.S. Navy.
Mr. George J. Dineen.
Lt. Comdr. Michael J. DiNola, U.S. Navy.
Don R. Dundas, ETN2(SS), U.S. Navy.
Troy E. Dyer, ET1(SS)-P1, U.S. Navy.
Mr. Richard K. Fisher.
Ellwood H. Forni, SOCA(SS)-P1, U.S. Navy.
Raymond P. Foti, ET1(SS), U.S. Navy.
Larry W. Freeman, FTM2(SS), U.S. Navy.
Gregory J. Fusco, EM2(SS)-P2, U.S. Navy.
Andrew J. Gallant, HMCS(SS)-P2, U.S. Navy.
Napoleon T. Garcia, SD1(SS), U.S. Navy.
John E. Garner, YNSN(SS), U.S. Navy.
Lt. Comdr. Pat M. Garner, U.S. Navy, executive officer.
Robert W. Gaynor, EN2(SS), U.S. Navy.
Robert H. Gosnell, SA(SG), U.S. Navy.
Lieutenant (jg.) John G. Grafton, U.S. Navy.
William E. Grahm, SOC(SS)-P1, U.S. Navy.
Mr. Paul A. Guerette.
Aaron J. Gunter, QM1(SS), U.S. Navy.
Richard C. Hall, ETR2(SS)-P2, U.S. Navy.
Lt. Comdr. John W. Harvey, U.S. Navy, commanding officer.
Norman T. Hayes, EM1-P2, U.S. Navy.
Laird G. Heiser, MM1-P2, U.S. Navy.
Marvin T. Helsius, MM2, U.S. Navy.
Lieutenant (jg.) James J. Henry, Jr., U.S. Navy.
Leonard H. Hewitt, EMCS(SS)-P2, U.S. Navy.
Joseph H. Hoague, TM2(SS), U.S. Navy.
James P. Hodge, EM2, U.S. Navy.
John F. Hudson, EN2(SS), U.S. Navy.
John P. Inglis, SN(SG), U.S. Navy.
Mr. Maurice F. Jaquay.
Brawner G. Johnson, FTG1(SS)-P2, U.S. Navy.
Edward A. Johnson, ENCA(SS), U.S. Navy.
Richard L. Johnson, RMSA, U.S. Navy.
Robert E. Johnson, TMC(SS)-P1, U.S. Navy.
Thomas B. Johnson, ET1(SS)-P2, U.S. Navy.
Richard W. Jones, EM2(SS), U.S. Navy.
Edmund J. Kalusa, SOS2(SS)-P1, U.S. Navy.
Thomas C. Kants, ETR2(SS), U.S. Navy.
Robert D. Kearney, MM3, U.S. Navy.
Donald D. Keiler, IC2(SS), U.S. Navy.
Mr. D. Keuster.
George J. Kiesecker, MM2(SS)-P2, U.S. Navy.
Billy M. Kiler, EN1(SS)-P2, U.S. Navy.
Lieut. Comdr. Robert L. Krag, U.S. Navy.
George R. Kroner, CS3, U.S. Navy.
Norman G. Lannouette, QM1(SS), U.S. Navy.
Wayne W. Lavoie, YN1(SS), U.S. Navy.
Lt. Comdr. John S. Lyman, U.S. Navy.
Templeman N. Mabry, EN2(SS)-P2, U.S. Navy.
Lieutenant (jg.) Frank J. Malinski, U.S. Navy.
Richard M. Mann, Jr., IC2(SS), U.S. Navy.
Julius F. Marullo, Jr., QM1(SS), U.S. Navy.
Douglas R. McClelland, EM2(SS), U.S. Navy.
Donald J. McCord, MM1(SS)-P2, U.S. Navy.
Karl P. McDonough, TM3(SS), U.S. Navy.

Sidney L. Middleton, MM1(SS)-P2, U.S. Navy.
Mr. Henry Moreau.
Ronald A. Muise, CS2, U.S. Navy.
James A. Musselwhite, ETSN(SS)-P2, U.S. Navy.
Donald E. Nault, CS1(SS), U.S. Navy.
Walter J. Noonis, RMC(SS), U.S. Navy.
John D Norris, ET1, U.S. Navy.
Cheslev C. Oetting, EM2-P2, U.S. Navy.
Mr. Franklin J. Palmer.
Lt. (jg.) Guy C. Parsons, Jr., U.S. Navy.
Roscoe C. Pennington, EMCA(SS)-P2.
James G. Peters, EMCS-P2, U.S. Navy.
James G. Phillippi, SOS2(SS), U.S. Navy.
Dan A. Philput, EN2(SS)-P2, U.S. Navy.
Richard Podwell, MM2-P2, U.S. Navy.
Mr. Robert D. Prescott.
John S. Regan, MM1(SS)-P2, U.S. Navy.
James P. Ritchie, RM2, U.S. Navy.
Pervis Robinson, SN, U.S. Navy.
Glenn A. Rountree, QM2(SS), U.S. Navy.
Anthony A. Rushetski, ETN2, U.S. Navy.
James M. Schiewe, EM1(SS)-P2, U.S. Navy.
Benjamin N. Shafer, EMCM(SS)-P2, U.S. Navy.
John D. Shafer, EMCS(SS)-P2, U.S. Navy.
Joseph T. Shimko, MM1-P2, U.S. Navy.
Burnett M. Shotwell, ETRSN, U.S. Navy.
Alan D. Sinnett, FTG2(SS), U.S. Navy.
Lt. John Smars, Jr., U.S. Navy.
William H. Smith, Jr., BT1-P2, U.S. Navy.
Ronald H. Solomon, EM1-P2, U.S. Navy.
Mr. D. Stadtmuller.
Robert E. Steinel, SO1(SS)-P1, U.S. Navy.
James L. Snider, MM1-P2, U.S. Navy.
Rodger E. Van Pelt, IC1(SS)-P2, U.S. Navy.
David A. Wasel, RMSN, U.S. Navy.
Joseph A. Walski, RM1(SS)-P1, U.S. Navy.
Charles L. Wiggins, FTG1-P2, U.S. Navy.
Lt. (jg.) John J. Wiley, U.S. Navy.
Donald E. Wise, MMCA(SS)-P2, U.S. Navy.
Mr. Laurence E. Whitten.
Ronald E. Wolfe, QMSN(SS), U.S. Navy.
Jay H. Zweifel, EM2-P1, U.S. Navy.

Mr. PASTORE. Mr. President, the Nation mourns the loss of this submarine, the first nuclear submarine to be lost at sea. The submarine, however, can be replaced. What cannot be replaced are the lives of these 129 Americans. These men are irreplaceable.

A court of inquiry, under Vice Adm. Bernard L. Austin, has been convened, and since April 11 has been conducting an investigation to ascertain the cause of the loss. Admiral Austin, an officer experienced in the submarine service, is assisted on the court by other senior naval officers from the submarine service. They include Rear Adm. Lawrence Daspit; Capt. James B. Osborn, commanding officer of the first U.S. Polaris submarine—the U.S.S. *George Washington;* Capt. William C. Hushing, and Capt. Norman G. Nash. Capt. Saul Katz is counsel to the court.

The court has been holding hearings at New London, Conn., and Portsmouth Naval Shipyard. The hearings are in public except where classified information is involved.

The Joint Committee on Atomic Energy by law is required to make continuing studies of problems relating to the development, use and control of atomic energy. In compliance with this responsibility, as chairman of the Joint Committee, upon notification of the loss of the *Thresher*, I sent two senior staff representatives to New London, Conn., as official observers to the court of inquiry. The two staff men—Executive Director John T. Conway and Assistant Director Edward J. Banser—have been present during the public and closed sessions as the court of inquiry has been receiving evidence. They traveled with the court by special military plane from New London, Conn., to Portsmouth, N.H., where the court moved the site of investigation on April 12.

Both of these committee staff men are particularly qualified to follow the course of the court of inquiry's investigation. Mr. Conway, a naval officer during World War II, holds a degree in engineering and in law and has been with the Joint Committee staff nearly 7 years. Mr. Bauser is a retired Navy captain with 22 years of active duty. He holds a master's degree in nuclear engineering from MIT and actively participated in the development, design, and test of nuclear submarines including the first one, the *Nautilus*.

These two men have been in continuous contact with me and report that they are receiving the fullest cooperation from the Department of the Navy and the court of inquiry. All classified information and evidence being obtained by the court is being made available to the Joint Committee staff. Mr. Conway and Mr. Bauser advise me that in their opinion the court of inquiry is making every effort to ascertain the true cause of this terrible accident with the hope and expectation of preventing similar occurrences in the future. The members of the court, career Navy officers of the submarine service, have a bond of affinity with their lost comrades that never can be fully understood by those who have not shared the common experiences and dangers of the men in the submarine service. This bond is such that it demands every effort be made to bring forth all facts and that no stone be left unturned in discovering what the fault or faults may be.

On April 17, as chairman of the Joint Committee on Atomic Energy, I represented the committee at memorial services conducted by Francis Cardinal Spellman at the Portsmouth Naval Shipyard, at the conclusion of which His Eminence met with the families of the lost men. I cannot describe to Senators the full depth of the feelings shared by those who were present at these services and the other services held that day by Bishop Henry Knox Sherrill of the Episcopal Church.

Mr. President, I ask unanimous consent to place in the RECORD at the conclusion of my remarks the prayer by Francis Cardinal Spellman and the memorial message by Bishop Henry Knox Sherrill, together with the eulogy by Bishop Daniel Feeney. I also request unanimous consent to place in the RECORD at the conclusion of my remarks the remarks of Rear Adm. J. Floyd Dreith, U.S. Navy, director of the chaplain's division, the remarks by Comdr. Karl G. Peterson, U.S. Navy, Protestant chaplain, Rabbi Abraham I. Jacobson, and the Honorable Kenneth BeLieu, Assistant Secretary of the Navy, at the memorial services for the U.S.S. *Thresher* at the Portsmouth Naval Shipyard on April 15, 1963.

The PRESIDING OFFICER. Is there objection to the request by the Senator from Rhode Island? The Chair hears none, and it is so ordered.

(See exhibit 1.)

Mr. PASTORE. Mr. President, many articles have been written and will be written in honor of the men of the U.S.S. *Thresher*. In a discussion with Vice Admiral Austin, president of the court of inquiry, at Portsmouth last week, he handed me a copy of an editorial of the April 13 issue of the New York Times which had been reprinted in the Portsmouth Naval Shipyard newspaper—the Portsmouth Periscope. Admiral Austin, himself a submariner, described this editorial as symbolizing the true spirit of the U.S. Navy submarine service. I ask unanimous consent to place the editorial in the CONGRESSIONAL RECORD at this point.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THRESHER

She was the finest product of the shipwright's art and one of the maritime marvels of this technological age.

Like the great fish for which she was named, her kingdom was the ocean and its black depths. She was the lead ship of a class designed to run silent, run deep, and run fast—deeper and faster than any submarine of the past. She was shaped like a teardrop and powered with the fissioned energy of the atom. Her cylindrical pressure hull of heavy steel was designed to withstand the crushing weight of deep water.

When the klaxon sounded and the command "Dive! Dive!" echoed through the boat last Wednesday morning there were no intimations of disaster. *Thresher* had already established her preeminence and power. Today, with Lieutenant Commander Harvey and his crew, she lies many fathoms deep off the Continental Shelf. The Navy that built her and manned her may never know what destroyed her; the silent forces of the deep are implacable enemies to detailed investigation.

Yet no investigation is needed to reiterate certain verities. Death—of a ship or a man—is not an end but a beginning; man builds upon the past. Throughout the history of the sea men have died and ships have sunk. In the endless history of conflict between man and nature men have lost but man has triumphed. The earth's mountains have been conquered; the blue sky and the realm of space are sealed and now the forbidding depths—so long beyond the reach of man—are in process of conquest.

Man's indomitable spirit has never in history faltered in such extensions of man's kingdom. The *Thresher* is gone but *Thresher* lives.—New York Times, April 13.

Mr. PASTORE. Mr. President, the Joint Committee on Atomic Energy at 4 p.m. today will meet in executive session at which time it will receive a report from its executive director and assistant director, Mr. Conway and Mr. Bauser, as to the investigation conducted to date by the court of inquiry. Since much of this information obtained by the court is of a classified nature the Joint Committee meeting, of necessity, will have to be in executive session. As chairman of the Joint Committee, I intend to have the committee, through its staff, continue to follow very closely the investigation of the court. The Joint Committee has a responsibility to assure that an investigation is properly and thoroughly conducted. The Joint Committee is particularly concerned that design and manufacturing standards are adequate to meet the exacting service demanded by nuclear submarines. Nuclear submarines must be operated as an integral unit. Standards of all parts must be the highest possible and carefully adhered to. I can assure the American public and the Congress that the Joint Committee will closely follow this investigation. I believe, however, the most efficient manner of obtaining the facts at this time is to permit the court of inquiry to conduct its investigation unhampered by parallel congressional investigation. I believe it is important to permit the comrades of those men lost on the *Thresher* to pursue the investigation without interference of other investigations. The Joint Committee will continue to have representatives of its staff as observers during the closed as well as the open session of the court. I have the assurance of the full cooperation of the court of inquiry. While the investigation may take a long time it is important that it be done thoroughly and fully in order that future tragedies may be forever prevented.

EXHIBIT 1

PRAYER BY FRANCIS CARDINAL SPELLMAN

Let us pray. Oh God, the Creator, Redeemer of all the faithful, hear our supplications and through thy infinite love and mercy graciously grant the souls of thy servants departed remission of all their sins by which they may have deserved the severity of thy divine justice and punishments in the world to come. Vouchsafe to them grace and mercy before the divine tribunal and let them attain to everlasting rest and happiness through the infinite merits of Jesus Christ. Oh God, great and omnipotent Judge of the living and the dead before whom we are all to appear after this short life to render an account of our works. Let our hearts, we pray thee, be deeply moved at this sight of death. Let us be mindful of our own fraility and mortality, that walking always in thy fear and in the ways of thy commandments, we may after our departure from the world, experience a merciful judgment and rejoice in everlasting happiness through the same Christ our Lord.

Grant Oh Lord, we beseech thee that while we lament the departure of thy servants, our brothers, out of this life, we may bear in mind that we are most certainly to follow them. Give us grace to make ready for that last hour by a divine and holy life. Teach us how to watch and pray that when thy summons comes, we may go forth to meet the bridegroom and enter with him into life everlasting through the same Christ our Lord. Almighty and most merciful Father, who knowest the weakness of our nature, bow down thine ear and pity unto thy servants upon who thou hast laid the heavy burden of sorrow. Take away out of their hearts the spirit of rebellion and teach them to see thy good and gracious purpose in all the trials that shall descend upon them. Grant that they should not languish on unabandoned grief nor sorrow as those who have no hope, but through their tears look meekly up to thee, the God of all consolation through Jesus Christ Our Lord. Amen.

I feel sure that all of us have been consoled by the eulogy by Bishop Feeney and in sympathy and sorrow we offer our prayers to Almighty God that God will grant eternal rest to our heroes. Certainly very few tragedies in recent years can so touch the heart of all Americans with sympathy and sorrow—abiding sorrow and a desire to be helpful in their prayers. As Bishop Feeney was speaking I thought of a few stanzas of a verse I learned long ago. "The bravest battle that ever was fought shall I tell you where and when. On the map of the world you find it not—it's in the hearts of the mothers and wives of men," and I am sure that all of us feel and grieve deeply with you in the loss of your dear ones. They however, have reached the goal of eternal life. In the prayers we are reminded that after this short life, and even the longest life is short, but we can be happy in the thought that these men who did their duty to their God and their country have received the award and the reward of eternal life. I like to think that when that last cry echoed through the *Thresher*, "Dive," that shortly afterwards the men of the crew heard the response—the response that came from Almighty God their Creator, their Redeemer and their Saviour; "Well done," and now you faithful servants enter thou in the procession of the kingdom prepared for you from the beginning of the world.

THE MEMORIAL MESSAGE BY BISHOP HENRY KNOX SHERRILL

We are met together this afternoon for meditation, for worship, in order to pray for strength and courage and in order to thank God for lives which have been given in the service of the Nation and the free world. It is not a time therefore for long and intricate speech, as Mr. Lincoln said at Gettysburg so long ago, "it is not what we say here that matters," but certainly the whole Nation, indeed the entire world has been saddened and shocked by this event. This does not change the hard reality of loss, the tragedy still remains and it must not or cannot be underestimated, but the fact that in countless churches on Easter day throughout this Nation prayers were offered for the families of these men, the fact that everywhere people are praying for God's blessing upon them must be a sustaining and a strengthening force in the realization of the great company who share this experience to some degree with you.

These men were, of course, unusual in their gifts. They were chosen because they had special aptitudes of training, of native ability and above else, of character, in order to serve in a pioneer enterprise, in a new type of service for the protection of the Nation and of the free world. So there are many memories of what they were and what they did and a very deep sense of thanksgiving for their service. We live in a strange world, it's a world in which there is peace and yet there is no peace. A world in which, unfortunately it seems to the moment impossible, to have international understanding and a genuine concord among the nations of the world. This kind of service in days of so-called peace is never as dramatic as wartime service—someone said to me this morning that perhaps this tragedy will make the ordinary casual citizen realize more deeply all that the armed services are doing for us today—many times so undramatically. It has been my lot at various times to be in similar situations. I recall conducting a service in Honolulu Harbor over those who were lost in the attack at Pearl Harbor. I remember conducting service during two World Wars where there was again this tremendous loss. But what I would say now is from the point of view of the Nation, these men have given their lives for home and country just as much as if they had been at Pearl Harbor or in the Coral Sea or in the events of actual war.

I am confident that they did not wish war. I am confident that there was no hate of others in their minds or hearts. I have always found in a long experience there is more hatred expressed by those who are at home far away from action, than by those who are actually engaged in the struggle itself. No, they were performing a very important service in keeping the peace of the world, in making it impossible for aggressors to destroy our liberties, our heritage and all that is meant by freedom, in many nations of the world. So we owe them a tremendous debt for they gave their lives very truly, not only that the rest of us may be safe but that liberty and justice and freedom may pass on from our generation to those yet unborn. Again, what I'm saying does not break the impact of the hard loss but I say that here is a cause of humble pride. We are not our own because we have been bought with so great a price. What can be said in the way of comfort and strength? I must be honest, there are no easy answers to many of the things which happen in this world. Again and again, as a parish minister, I have been in difficult circumstances and you just do not know what to say. People say, "Why must this have been, why?" and I have to answer, "I do not know." There is a mystery in life and there is a mystery in death, and no one, I think, clearly can see the way. But I have faith in the Easter hope that someday, freed from the limitations of time and of space when we do not see anymore through a glass darkly but face to face, somehow, sometime, in the goodness of God, these strands will be brought together and in God's Eternity we will find the will of God and know this answer. The problem is as old as suffering, sin and death. St. Paul asked the question that I am suggesting now, St. Paul said, "What can we say to these things, what can we say to these things." Then after discussing some of the tribulations which come to the children of man, he closes with that magnificent statement, which is part of the Christian experience of the ages, and of us all, "for I am persuaded that neither death nor life, nor things present, nor things to come, shall be able to separate us from the love of God, in Christ Jesus, our Lord. I had an old friend in Boston, a wonderful old man who lost a brilliant son at an early age. His son was a remarkable physician, before him were all sorts of opportunities for overcoming illness and disease and suddenly he was stricken just at the beginning of the manifestation of his powers. And I met his old father on Beacon Street in Boston and I said, "We have all been thinking of you and have been helped by the courage and faith which you and your family have shown during this difficult time." The old man said, "Yes, thank you, I had a letter yesterday. The letter read, you have been conquerors, you and your family, through this experience." The old gentleman smiled and then he said, "I wrote back, you entirely misunderstand, we have been more than conquerors through Him that loved us." So we do not meet these changes and circumstances of life by ourselves, there are great invisible spiritual forces, the love of God, the presence of the living Christ who rose from the dead himself, the promise of strength and courage and peace even of deep abiding joy that is the Easter message that is true for all times. So we pray to those who are immediately and specially bereaved that they may feel underneath God's everlasting arms, that they may feel something of this Easter joy. Death is swallowed up in victory. And we pray that we may entrust to God's loving care all those who are dear to us for this life and the life to come. May God give you strength and courage and the everlasting hope.

EULOGY BY BISHOP DANIEL FEENEY

Blessed are the dead who die in the Lord. Your Eminence, your Excellency, good friends all in Christ. It is with the deepest conviction that I believe in the immortality of the soul of man. It is not because great thinkers and philosophers of all shades of culture over the ages have accepted this truth—no. I have a stronger and a sounder basis for the conviction that is mine. We are still within the period of the commemoration of the event that raises the ceremony of this kind above the level of soft sentiment to the very lofty heights of reality. How futile it would be, how permeated almost with mockery. Yes, more, how degrading to the proud who still lives the ceremony of this kind meant only that death was a completion of man's existence. The event that we commemorate this last Friday taught us that death is no more a mystery, but rather that it does not indicate the extension of man but is only an incident in the path of man's existence from this life to the realization, the yearnings, the longings that the human soul has ever experienced that can be satisfied only in the bosom of the Infinite, the Inexhaustible and the Eternal God. This thought alone gives dignity to a ceremony of this nature. The soul of man is immortal. The dominant thought in our minds this noon is union, union of the temporal living with those eternally living. In this spirit of union we cherish the love that has united us over the years. We esteem the memory of friendship and the appreciation of the character and the virtues of the loved ones. We know that the character of a good man does not die, but continues to exercise its beneficent influences just so long as there are those who are to carry on his memory. In this spirit of loving union, we gather here this morning to express also our deep gratitude to those whose services have been offered in behalf of our great country. Many of them had already exposed their lives before for us, others in the first great challenge had already indicated the will to place themselves in peril for us. Heroism is not always in the act, but frequently is it found in the determination and the will and the acceptance of what life may have for them. They have been sacrificed on the altar of freedom. We are not deceived today that our freedom is secure, for our freedom is still in danger and it is those who are willing to accept the risks that we look as its guardians. On this sad and yet solemn occasion I think it is not consolation or even sympathy that those who commemorate their loved ones are seeking from us, but rather I think we all should be actuated by the spirit of mutual suffering and distress in union with those who are suffering and in distress. With the wives, children, fathers, mothers, and all the close kin of those today we commemorate, we do unite in spirit, suffering, sadness, and distress and we all pray together the Almighty Father of us all may look with pitying eye upon them and grant them the release from their suffering. There was a noble President of the United States who had the gift of sympathy and of mutual suffering with those who sought his help and on one occasion in the dark days of the Civil War, Abraham Lincoln penned a letter to a mother who suffered. With a bit of paraphrasing, you will permit me to read it. The great Lincoln said, "I feel how weak and fruitless must be any word of mine which should attempt to beguile you from the grief of a loss so overwhelming, but I cannot refrain from tendering to you the consolation that may be found in the thanks of the Republic for which they died. I pray that our Heavenly Father may assuage the anguish of your bereavement and leave you only the cherished memory of the loved and lost and a solemn pride that must be yours to have laid so costly a sacrifice upon the altar of freedom. May God bless us all, protect us all and make us worthy of those whose memory this morning we cherish."

MEMORIAL ADDRESS DELIVERED BY J. FLOYD DREITH, CHC, U.S. NAVY, DIRECTOR OF THE CHAPLAINS' DIVISION GIVEN AT MEMORIAL SERVICES FOR U.S.S. "THRESHER" AT THE PORTSMOUTH NAVAL SHIPYARD APRIL 15, 1963

Distinguished guests, ladies and gentlemen, but particularly you, the bereaved members of the families of the departed officers and men of the *Thresher*. The entire Nation went into a state of shock last week when the word was flashed on the news wires that the U.S.S. *Thresher*—with 129, both civilian and naval personnel aboard—was lost at sea. Prayer groups were started among those, one by Mrs. Korth, the wife of the Secretary of the Navy, beseeching Almightly God, that He might find it in His wisdom and mercy to bring that ship and those men safely back. In His wisdom and mercy He decreed otherwise. The fact that the Nation went into shock is a high compliment to the U.S. Navy. Seldom a week goes by that we don't read about an airplane crash. Daily, hundreds of lives are taken upon our highways. We take all this more or less for granted. But when a ship of the U.S. Navy is lost in peacetime, the entire Nation is astounded. Because it so seldom happens, and because the Navy has demonstrated such high regard for the safety and welfare of its personnel. Those men that went down on that ship were God's men, and I say this without having had the priviledge of knowing any one of them personally. A Russian cosmonaut may encircle the globe and find no evidence of the existence of God. An American sailor when he goes to sea is very much aware of the fact that he is God's child and in God's hands.

It is given unto all men once to die. We seldom know when and the time is never propitious whenever it does come for any of us, it seems, and we seldom know how. But if we had the choice, the free choice given unto us by Almighty God today, I'm sure that we could ask for no higher honor or glory than that accorded to those men to give their lives in the service of their country upon the altar not only of that country, but the altar of human dignity and freedom throughout the world. And were they here now to speak to us I'm sure that they would ask us not to grieve for them, because they could have selected no higher honor or glory than that which was accorded unto them. The young son of Doctor Keuster, a Navy scientist, who was aboard that ship, said to his mother, "Since God holds the ocean in the hollow of His hands, our daddy is safe." And so in that sense particularly you bereaved members, loved ones of the departed, may I commend unto you that God holds them in the hollow of His hand and as we commend them to the depths of the sea which they loved and their souls to His tender mercy, may we here and now commit ourselves to a nobler service of God in the service of our fellow men. To that may our Heavenly Father strengthen us and bless us.

REMARKS BY COMDR. KARL G. PETERSON, U.S. NAVY PROTESTANT CHAPLAIN, AT THE MEMORIAL SERVICES FOR U.S.S. "THRESHER" AT THE PORTSMOUTH NAVAL SHIPYARD, APRIL 15, 1963

Wives, parents, children, relatives, and friends of those lost in *Thresher*, we are gathered here to honor and to show our esteem for your loved ones: and to express our sincere sympathy to you in your sorrow. To assure you of the deep appreciation of our Nation for the gallant services of those lost in *Thresher*. There are present representatives of our Government, the Department of Defense, the Navy Department, and other agencies dedicated to the protection of our Nation, local and national. Time permits the mention of only the following:

The Honorable Kenneth E. BeLieu, Assistant Secretary of the Navy (Installations and Logistics); Vice Adm. W. R. Smedberg, Chief of Naval Personnel; Vice Adm. E. W. Grenfel, Commander, Submarine Force, U.S. Atlantic Fleet; the Honorable John W. King, Governor, New Hampshire.

The loyalty, dedication, and selfless sacrifice of those lost in *Thresher* demands recognition of our common debt of gratitude. They have written a page in naval history that will not be forgotten.

REMARKS BY COMDR. KARL G. PETERSON, USN, PROTESTANT CHAPLAIN AT THE MEMORIAL SERVICES FOR U.S.S. "THRESHER," AT THE PORTSMOUTH NAVAL SHIPYARD, APRIL 15, 1963

Almighty God, Heavenly Father, to Thee be honor and glory forever. By Thy divine guidance Thou hast led us: by Thy providence Thou hast blessed us. Thou hast lifted us up to be a favored people. These manifestations of Thy power and goodness give substance to our faith in Thee, as we turn to Thee in this memorial service.

O Thou who are the strength of the weak and the consolation of the sorrowful be attentive to the prayers of Thy grief stricken children who turn to Thee now in these solemn moments laden with their sense of tragedy. As Thou hast known the anguish of suffering and sorrow in the death of Thy beloved Son, we beseech Thee in Thy compassion to bring balm and healing to those whose hearts are wounded and burdened with grief. Through Thy gift of faith may the assurance of our Saviour's victory over death proclaimed in the Easter message bring them strength and comfort and provide them with that peace which passes understanding. May the bright rays of the resurrection light shine into every dark place in life. Now we commit to Thy love and mercy, the souls of the shipmates and those builders and engineers who made their last voyage in *Thresher*. Vouchsafe to them light and rest, peace and refreshment, joy and consolation, and the companionship of Thy saints, and in Thine own presence, O Thou gracious, risen Saviour. Amen.

REMARKS BY RABBI ABRAHAM I. JACOBSON, D.D., AT THE MEMORIAL SERVICES FOR U.S.S. "THRESHER" AT THE PORTSMOUTH NAVAL SHIPYARD, APRIL 15, 1963

Psalm 121: "I will lift up mine eyes unto the mountains; from whence shall my help come? My help cometh from the Lord, who made heaven and earth. He will not suffer thy foot to be moved; He that keepeth thee will not slumber. Behold, he that keepeth Israel doth neither slumber nor sleep. The Lord is thy keeper; the Lord is thy shade upon thy right hand. The sun shall not smite thee by day nor the moon by night. The Lord shall keep thee from all evil; He shall keep thy soul. The Lord shall guard thy going out and thy coming in, from this time forth and forever."

PRAYER

Out of the depths we call unto Thee, O God, our heavenly Father. In Thy hands are the souls of all the living and the spirits of all flesh. Thy loving kindness is never withdrawn from us, but abides with us, in death as in life. In Thy wisdom, Thou hast laid upon us this heavy burden. Mayest Thou in Thy mercy, give us the strength to bear it.

Guide us and sustain us. Give us the strength of faith that shall keep us from murmuring against the justice of Thy dispensation, even when Thou dost afflict us. Grant us we pray Thee the understanding which shall enable us to recognize that the hand that woundeth is the hand that bindeth up again. Enable us always to be supported by the knowledge that these dear ones whom Thou in Thy wisdom hast seen fit to take from us have reflected their deep love for our country, their loyalty to their oath, and their courage in the face of their supreme trial. What greater glory than to die for our beloved country. Thou art the Life of all life.

KADDISH MEMORIAL RECITED IN HEBREW

Go your way for the Lord hath called you. Go your way and may the Lord be with you.

May your righteousness go before you and the glory of the Lord receive you. Amen.

Remarks by the Honorable Kenneth BeLieu, Assistant Secretary of the Navy at Memorial Services for U.S.S. "Thresher" at the Portsmouth Naval Shipyard, April 15, 1963

While we gather in solemn reverence in memory of our gallant comrades both civilian and military, it's appropriate to remember the President's words, for he said the courage and dedication of these men of the sea, pushing ahead into depths to advance our knowledge and capabilities is no less than that of their forefathers who led the advance on the frontiers of our civilization. These brave men have joined their comrades 1,500 of whom were lost in submarines in the fight for freedom in World War II. The future of our country will always be sure when there are men such as these to give their lives to preserve it. The Secretary, McNamara, desired that I convey to you these words today. Today the entire Nation and people of the free world as well mourn the brave men of the *Thresher*. The sorrow in our hearts is symbolized by this memorial service. Only those whose loved ones gave their lives can feel the deep sense of personal loss. But that does not preclude us in the Defense Department from our own feeling of grief. The bereaved families may take some measure of comfort from knowing that their men died serving their country. The world will continue to live in freedom as long as men like these devote their lives to the highest service on the land, in the air, and on and under the sea, and as you and I are in memory of these gallant men let us not leave this ceremony alone as the only symbol of our honor. Rather let us resolve here today of this instant that you and I will somehow, someday, each day, in some way, perform some continuing act of patriotism, so in the future when and if we are to give an account to them, they shall know they did not die in vain and we carry the torch with them.

Mr. CHURCH. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. Simpson in the chair). Does the Senator yield?

Mr. PASTORE. I yield.

Mr. CHURCH. I have listened with attentiveness to the remarks the Senator has made. I wish to tell him that every Member of the Senate, as he well knows—as is true of all the American people—keenly regrets the loss of the *Thresher*. This represents the worst submarine disaster in the history of the U.S. Navy. But more important than the loss of the vessel, we feel a very deep and abiding sympathy for the families of the brave crew aboard the *Thresher*.

I am happy to learn that the Senator was present at the memorial ceremonies which recently took place at Portsmouth, N.H. His feeling is shared by all of us for the terrible bereavement suffered by the families of the officers and men of the U.S.S. *Thresher*.

Mr. PASTORE. I thank the Senator.

AMERICAN FOREIGN AID—ECONOMIC CONDITIONS IN JAPAN

Mr. CHURCH. Mr. President, no American who has visited Japan in recent years can fail to be impressed with the astonishing pace of her burgeoning economy. Today Japan enjoys the fastest rate of economic growth of any of the great industrial powers, while the United States continues to suffer from a lingering affliction of stunted growth.

Last December, as I walked the streets of Tokyo, I was amazed at the evidence of economic vitality to be seen at every corner. Hundreds of modern business buildings—factories, hotels, department stores—were under construction. The din of riveting filled the air, and the steel skeletons of high-rising new construction could be seen in all directions across the skyline of the city.

Broad boulevards were being pounded out to make way for the clogged traffic, a vast new subway system was being dug, and expanded terminals were being built to meet the need for rapid transit. Never have I seen an American city more alive with activity than today's Tokyo. Never have I seen a city anywhere experience so surging a boom.

And what is true of Tokyo is true also of Japan itself. Her current production of goods and services dwarfs her prewar yield. Not only has Japan become self-sustaining, she has achieved an unprecedented level of prosperity, far beyond anything her people have ever known before. Alone among the nations of the Orient, Japan is rapidly approaching living standards which are comparable to those that now exist in some countries of Western Europe. If present trends continue, Japan will outdistance most of her rivals, and many of us who now serve in this Senate will live to see the day when Japan is listed in the forefront rank, among the richest nations of the world.

I say this, not in criticism, but in praise of the Japanese. They exult in hard work; they are an efficient and competitive people; they have the good sense to understand the superiority of the incentive system of free enterprise, and they are making it work for them, with startling success, in the marketplaces of the world. They are practicing popular, free government, in an area of the world where one must search for it with the patience and persistence of a Diogenes, and, though recently our enemy, they have forsworn the course of neutralism to ally themselves formally with the United States. For all this, we can rejoice and raise our voices in praise of Japan.

We would also do well to remember—for if we forget, no one else is likely to remind us—the central and controlling role of the United States in the working of the miracle of modern Japan. From the day the war ended, we have treated the Japanese, not as the victor has historically administered to the vanquished, but as a doctor administers to a sick patient. We have nursed Japan back to health and vigor. The economic and political reforms decreed by MacArthur during the period of American occupation, which were unashamedly patterned after our own national experience, furnished Japan the framework for her remarkable recovery. Instead of extracting reparations from Japan for her attack upon us, as other attacked countries in southeast Asia and the western Pacific have done; instead of making Japan repay us for the heavy toll she took in American lives and property when she seized Guam, Midway, and the Philippines, possessions we had to forcibly recover at so dear a price to ourselves; instead of taking any act of retribution or demanding any part of the ransom customarily due a conqueror, we were soon offering our own money to Japan to help her bind up her wounds, repair her wreckage, and regather her strength. From July 1, 1945, through June 30, 1962, the United States has given Japan some $3.3 billion in grant aid.

Again, let me say, I recall these facts, not to deride the policy of the United States, but to praise it. For it matters not whether we were motivated by the fear of communism, as our critics charge, or inspired to act in conformity with the Scriptural injunction, "love thine enemy," in either case the policy was a sound and statesmanlike response to the needs of the postwar era. With it we helped to rejuvenate Japan, and she, in turn, willingly allied herself with us, as the northernmost anchor in the chain of island defenses on which we rely in the far Pacific.

But policies once wisely begun often outlive their usefulness. The respect of a beaten people for a conqueror so strong that he generously extends his own help to put them back on their feet again, can quickly turn to contempt, if, when robust and healthy once more, they discover that the conqueror has somehow turned so weak that he cannot stop the subsidy. This has come to be the hard truth concerning our continuing grants of military equipment and supplies to the Japanese Government, whatever other arguments may be offered to justify the perpetuation of this aid program.

The plans for a demilitarized Japan were punctured by the Korean war. The fear of potential aggression, revived by the Communist invasion of South Korea, led the Japanese Government to reestablish a home defense force, comprising army, navy, and air units. This was done, notwithstanding the prohibition in the Japanese constitution against the maintenance of armed forces, though the legality of the action still remains a troublesome issue in the politics of the country.

We approved the rearming of Japan. Indeed, we consented to help finance it. From July 1, 1953, through June 30, 1962, we have given Japan over $737 million in grants for military supplies and equipment. This represents approximately 18.5 percent of the total cost, during the 9-year period, to the Japanese Government for maintaining her defense forces.

Mr. President, in order to detail the amount of military aid we have furnished Japan over the years in question, I ask unanimous consent to insert at this point in the Record a chart which sets forth these figures, giving the totals for the full period, as well as the breakdown for each fiscal year since 1958.

There being no objection, the chart was ordered to be printed in the Record.

Chart No. 1.—*Japan-United States MAP deliveries, defense expenditures, and defense expenditures as percent of GNP, by fiscal year*

[Dollars in millions]

Country	Total, 1953–62			1962			1961			1960			1959			1958		
	MAP[1] deliveries	Defense[4] expenditures		MAP deliveries	Defense expenditures		MAP deliveries	Defense expenditures		MAP deliveries	Defense expenditures		MAP deliveries	Defense expenditures		MAP deliveries	Defense expenditures	
		Amount[2]	Percent of GNP[3]		Amount	Percent of GNP		Amount	Percent of GNP		Amount	Percent of GNP		Amount	Percent oı GNP		Amount	Percent of GNP
United States	--------	$453,500	10.1	------	$53,400	9.6	------	$49,000	9.4	------	$45,700	9.1	--------	$46,200	9.6	--------	$44,800	10.1
Japan	$737.8	4,424	1.4	$74	572	1.1	$66.9	503	1.1	$85.8	454	1.2	$131.5	436	1.3	$130.9	421	1.5

[1] Figures were furnished by the Department of Defense, and the amounts include only the price of the chargeable program in grant form. The amounts do not include acquisition price of excess material delivered to Japan, which totaled $169,900,000 during the same period of time. MAP to Japan did not commence until fiscal year 1954, so this total is 1954 to 1962, inclusive.

[2] The amounts shown for United States were rounded from figures given in chart No. 3. Amounts shown for Japan were taken from chart No. 2.

[3] The percentages shown for the 10-year period were computed from data contained in charts Nos. 2 and 3. The percentages shown for the individual years were taken from charts Nos. 2 and 3.

[4] As indicated on charts Nos. 2 and 3, the United States totals are in calendar years totals for Japan are in fiscal years commencing April 1 of each year.

Mr. CHURCH. It will be noted that this chart also gives the comparative figures, from fiscal year 1958 forward, of the dollar equivalents spent each year by the United States and Japan, respectively, for defense purposes, together with the percentage these amounts bear to the gross national product of each country. These figures give us an accurate comparison of the proportionate effort each country is making to provide for its own defense. The chart also shows the total amounts for the entire period since American military subsidies to Japan began, fiscal years 1953 through 1962, inclusive. These totals are most revealing. They show we spent the grand sum of $453.5 billion on our own Armed Forces, which was 10.1 percent of our gross national product, while Japan spent $4.4 billion, which was 1.4 percent of her gross national product.

I cite these figures not because I think it realistic to expect Japan to make anywhere near as much an effort, in proportion to her resources, to provide for her own defense, as we make in proportion to ours. Why on earth should she? Under the terms of our mutual defense treaty with Japan, we guarantee to defend her, with our own forces, against attack, and the umbrella of our protection has enabled Japan to escape the stifling burden of armaments. Indeed, this has been one of the primary reasons why Japan has been freed to pour her energies into peaceful, consumer production, and thus to lift her standard of living to an alltime high.

No, Mr. President, I cite these figures merely to show how little Japan is doing in her own behalf. Yet, this very fact is often used as a basis for justifying continued grants on our part, by those ingenious men who think up arguments for perpetuating aid programs. They say we must continue to offer the aid as an encouragement to the Japanese to do more on their own. I have frequently heard such arguments made on behalf of further extensions of military assistance to wholly self-supporting nations, by sober-faced spokesmen appearing before the Senate Foreign Relations Committee.

It is not easy to understand how such contentions go unchallenged, when, year after year, the facts are precisely the contrary. How long are we to permit ourselves to be fooled? We have now given the Japanese Government nearly three-quarters of a billion dollars in military aid. We have been at it for 10 years. Has it induced the Japanese Government to increase their own defense effort, as their capacity to do so has grown with their burgeoning wealth?

It has not. In fact, the very opposite is the case. Just to prove the point, and to demonstrate how the Japanese have slackened their own rate of expenditure for defense, I ask unanimous consent to publish in the Record at this point tables giving the exact data, both for Japan and for the United States.

There being no objection, the charts were ordered to be printed in the Record, as follows:

Chart No. 2.—*Selected data on Japan*

[Calendar years, unless indicated otherwise]

Year	Population[1]	GNP current prices	Per capita GNP	Per capita personal consumption expenditures	Defense expenditures[2]	Percent of GNP spent for defense
	Thousands	*Millions*			*Millions*	
1953	87,000	$19,039	$219	$135	$431	2.2
1954	88,200	20,498	232	147	430	2.1
1955	89,276	22,696	254	156	378	1.7
1956	90,170	24,990	277	167	374	1.5
1957	90,920	28,119	309	180	425	1.5
1958	91,760	27,703	302	188	421	1.5
1959	92,630	33,441	361	201	436	1.3
1960	93,419	38,845	417	223	454	1.2
1961	94,280	47,584	505	253	503	1.1
1962	95,180	[3] 51,700	[4] 543	[4] 295	572	1.1

[1] As of Oct. 1.

[2] Budgeted totals for fiscal years beginning Apr. 1 of year indicated.

[3] Fiscal year ending Mar. 31, 1963.

[4] Estimate.

Prepared by U.S. Department of Commerce.

Mr. CHURCH. Mr. President, a quick glance at these tables will suffice to give the picture. Between 1953 and 1962, the gross national product of Japan nearly tripled, difficult as this is to believe. It jumped from $19 billion to over $51 billion; the per capita income went up from $219 to $543. But Japanese defense expenditures, as a percent of the GNP, went down from 2.2 percent in 1953 to 1.1 percent in 1962. In short, 10 years after our military subsidies to Japan commenced, the Japanese were making only half as much effort to maintain their own armed forces as they had made to start with. The inducement argument obviously lacks any factual basis.

Is it the purpose of the foreign-aid program to subsidize wholly self-supporting countries? If it is, then Congress had better speedily execute the monster once and for all. We have our own solvency to protect, a stubbornly persistent adverse balance-of-payments problem to correct, a deficit to reduce, chronic unemployment to eliminate, and many other urgent problems at home that the money we are spending abroad could help to cure.

If, on the other hand, the purpose of foreign aid is to help poor, undeveloped nations resist communism by arming themselves against it, and by raising the living standards of their people, which I have always understood the purpose of the program to be, then why do we continue to dole out money to Japan?

Groping for an answer to this question, the Pentagon has come up with a new and different argument. By offering money to assist the Japanese in the procurement of certain types of weapons, it is argued, we can influence the kind of forces they maintain, fitting them into our overall strategic plan for the defense of the western Pacific.

Well, perhaps this argument is all that is needed to perpetuate our subsidy to Japan indefinitely. To accept it as valid is to concede that there cannot be an end to our handouts, ever. It is the perfect solution for those who administer the program; it can be applied to any country, rich or poor or in-between; and it has no limits whatever in time.

Mr. President, if Congress will use a little commonsense, it will become at once apparent that the size of Japan's defense force does not even begin to be sufficient to successfully defend her against a full-scale attack. For defense, she relies upon us. We are formally committed to protect her under the terms of the treaty of mutual defense between the two governments. Japan maintains hardly more than token forces, as a semblance of good faith. If they are to be of any use to her in an emergency, they necessarily must fit into the overall strategic plan for the general defense of the area. We do not have to pay Japan to make these forces fit the bigger scheme of things; it is in Japan's own national interest to see to it that they do.

Mr. President, twice before during this session I have taken the floor of the Senate to speak in support of an amendment I propose to offer to this year's foreign-aid bill. This amendment will bar further grants of aid, whether economic or military in form, to self-supporting countries, excepting only that which may be required to fulfill prior commitments.

Mr. MORSE. Mr. President, will the Senator yield?

Mr. CHURCH. I am happy to yield.

Mr. MORSE. I am delighted that the Senator from Idaho will offer his amendment. I understood him to say that he will offer it. If so, he would honor the senior Senator from Oregon if he permitted him to be one of the cosponsors of the amendment again this year, as he was privileged to be when the Senator from Idaho offered the amendment previously.

Mr. CHURCH. I am happy to welcome the senior Senator from Oregon as a cosponsor of the amendment. I wish publicly to thank him on the floor for the very effective help he gives cosponsoring the amendment. I hope Congress will adopt it. If we are to make the kind of sense that we need to make in our foreign-aid program, we must start here. If we cannot stop the subsidies to prosperous, flourishing nations, how on earth can we expect to reform the program elsewhere where we face great difficulties in the underdeveloped areas of the world?

The amendment will, of course, apply to Japan. It will apply also to a number of flourishing countries in Western Europe. I believe it conforms with both the letter and spirit of the Clay report on our foreign-aid program, and so I hope the Congress will approve it. If we do, we will have taken one important step toward making more sense out of foreign aid—a course we must pursue if we expect the American people to continue to accept and sustain this program.

I want to make it clear that my sponsorship of this amendment is, in no sense, a reflection upon the leadership of the President, or the direction he has given our foreign-aid program. He himself has often urged our prosperous allies, in Europe and in the Pacific, to assume a larger part of the aid burden that we have carried so long. It must be very difficult for him to make them believe he means it, when we continue to pour subsidies into the very countries to which he appeals for help.

No, the fault lies with the legacy that Kennedy has inherited. Alone, he has not been able to force an end to programs which are carried along by their own momentum. He needs the help of Congress, and so, too, do the taxpayers of this country.

But we will never accomplish even so sane and sensible an objective as that embraced by the amendment I have mentioned, without hearing the outcry of the easily intimidated: "We dare not change the law to exclude Japan," they will plead, "for this will offend the Japanese."

Mr. President, I shall conclude these remarks as I commenced them—with a personal reference. Twenty years ago, I sat in the great hall at Nanking and witnessed the formal surrender of Okamura Jasugi, commanding general of the Japanese occupational forces, to the Republic of China. That day we thought the Japanese had lost the war. Now we know it was Tojo who lost. As for the Japanese people, they have turned out to be the winners, perhaps more so than any other people involved in the Second War, including ourselves.

Only their total defeat on the warfronts, followed by the surrender and occupation of their country, could have destroyed so completely the military tyrany which had so long dominated their affairs. It was then that we reformed their institutions, and with our own money helped repair the damage they sustained in the war that they themselves had thrust upon us. If now, when Japan has emerged as the fourth greatest industrial power of the world, protected by American might, and free not only to occupy herself with the profitable pursuits of peaceful commerce, but to heap ceaseless criticism upon us in the process—if, in this situation, we cannot even muster the gumption to stop subsidizing the token defense forces Japan does maintain, for fear of offending the Japanese Government, then God pity the United States of America.

Mr. MORSE. Mr. President, will the Senator yield?

Mr. CHURCH. I am happy to yield.

Mr. MORSE. If I were to interrupt the Senator every time I find myself in agreement with him, I would be constantly interrupting him. He is so right in the observations he has made with respect to the position of Japan vis-a-vis the United States.

As the Senator knows, I hold the same point of view in regard to the aid that we are giving to many NATO countries. These countries are simply not carrying their burden of the price of freedom. I see no reason why the American taxpayers should continue to pay through the nose, to pour into Great Britain and France and Portugal and other NATO countries the huge sums of money that we are pouring into them, including, I may say, West Germany, when, first, they are well able to pay their own way with regard to this subject and, second, I am greatly disturbed about the attitude that certain NATO countries have taken with regard to the United States concerning economic relations.

I see no reason why we should continue to pour money into West Germany, while West Germany prepares to take the discriminatory attitudes she is preparing to take against the United States in regard to agricultural products. That is true also of France and of the Low Countries. Once again I call the attention of the State Department to the fact that of the $3 billion-plus of United States exports, more than $1 billion worth in the past has been American agricultural products. Yet when we talk with the officials of the State Department, we continue to be given the old line that we still are selling more to Europe than we are buying from Europe. That does not change the fact that negotiators for the State Department have been for some time selling American agriculture short in our relationships with the NATO countries.

I repeat my notice: I do not intend to vote for this administration's foreign aid policies vis-a-vis the United States and Europe until the State Department proceeds to do a better job of protecting American agriculture.

Mr. CHURCH. Mr. President, I thank the Senator from Oregon. He and I have supported the foreign aid program in the past because we have recognized it to be an essential instrument of American foreign policy in dealing with a world in ferment, and in coping with the Communist menace. This very fact makes it clear that our efforts are not directed toward opposing foreign aid, as such. We have been friends of foreign aid; we have recognized its necessity. What we are striving to do is to reform the program, so that it will make better sense.

I have observed on the floor of the Senate in the past, that if Congress fails to effect such reforms, the day may come when the pendulum of reaction will fill the Halls of Congress and the White House itself with men who would return this country to a last lingering isolation. Foreign aid can be sustained only so long as the American people are willing to sustain it. Their good sense tells them that much is wrong with the foreign aid program, much that must be reformed.

I appreciate the support of the distinguished Senator from Oregon of the amendment I intend to offer. I think it will provide for us, with respect to the NATO countries, Japan, or any other self-sufficient foreign country, the basis upon which we can improve and strengthen our relationships. I believe the NATO Alliance today is weakened because we cannot summon the resolution to stop subsidies to our prosperous NATO allies, for these governments know that they are fully capable of maintaining their own armed forces without further help from the United States.

If we desire to strengthen the NATO Alliance, let us insist that each member with the capability do its share. Ending our subsidies will make it so much easier for the President to say to them that we expect more help from NATO, and more help from Japan, in carrying the heavy burden of foreign aid in the underdeveloped parts of the world which, up until this time, has so largely been borne by the United States alone.

How can we expect them to believe our plea if, on the one hand, we exhort them to greater effort while, on the other hand, we continue to dole out subsidies to the very countries whose help we are asking?

I have made my address today in the spirit of constructive criticism of the foreign aid program, and in the hope that my argument may lead to the kind of reform that will strengthen the program, and thus assure it the continued support of the American people. Before closing, I want to say that I have just received a written message from the Presiding Officer of the Senate, the distinguished senior Senator from Texas [Mr. YARBOROUGH], advising me that he, too, wishes to be a cosponsor of the amendment I propose to offer. I am grateful to him for his expression of support.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE WILDERNESS BILL

Mr. CHURCH. Mr. President, one of the famous daughters of our State of Idaho is Inez Robb, the well-known newspaper columnist. We are extremely proud of Miss Robb, and I have been particularly proud to read her column in the Washington Daily News of Friday, April 13, 1963.

Miss Robb writes eloquently of our need for the wilderness bill, and with a firm logic that should help sustain those of us who have worked so hard for this legislation.

I would like unanimous consent to insert this fine article in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

WE MUST GET WILDERNESS BILL PASSED, CITIZENS

(By Inez Robb)

The Senate has again passed, by overwhelming vote, a wilderness bill that would preserve for future generations some small part of the wondrous natural endowments with which this Nation was originally blessed.

Whether it will pass the House is regarded as chancey. Every bloc in the country that could or would use public land for its own special benefit is fighting the measure. Powerful lobbies for the cattle, sheep, and mining interests have been at work for a long time here in Washington. They have made hay in the House.

There isn't an American alive who doesn't bless the foresight and courage that in the past preserved for the Nation such treasures as Yellowstone, Yosemite, Mammoth Cave, Everglades, Crater Lake, Bryce Canyon, Glacier, Mesa Verde, Shenandoah, Hot Springs, Grand Teton, Platt, and Olympic National Parks, to name a few.

MORE, MORE

We rejoice in such national historical parks as Saratoga, Independence, Appomattox Court House, Morristown, and Minute Man; such national military parks as Gettysburg, Pea Ridge, Vicksburg, Shiloh, and Fort Donelson; such a national seashore project as Cape Cod; and such national parkways as the Blue Ridge, George Washington Memorial, and Natchez Trace.

We count among the Nation's treasures such national historical sites as the Adams house, the Abraham Lincoln birthplace, Fort Laramie, Fort Raleigh, Fort Vancouver, and Hopewell Village.

None of us would change their status. All of us would be horrified at the thought of their merciless commercialization—the hotdog stands and the gum wrappers—if they were denationalized. If any citizen wants to see what happens when such a national treasure as Plymouth Rock is open to exploitation, let him go to Cape Cod and see.

PORTICO HELPS

At least, a granite portico has been built around and over Pilgrim Rock to protect it from the vandals who once felt they were entitled to chip away souvenir pieces to carry home. However, the descendants of these vandals still drop their gum wrappers, popcorn boxes, and paper napkins around the Rock.

If any proof is needed that heedless man would destroy the stars if he could get his hands on them, it lies in what is left of Plymouth Rock.

We can believe that not a stick of Mount Vernon would now remain if it were not for the Mount Vernon Ladies' Association, which bought it around 1858, repaired it, reassembled original Washington furniture, and has guarded the place in behalf of the Nation for more than a century.

If any of this Nation's great wilderness is to remain for posterity, if future generations are to enjoy it as we now enjoy our national parks and monuments, its preservation cannot be delayed. It is a treasure too great to be frittered away.

Now is the time to get out that ballpoint pen and write your Congressman. He has heard from the lobbies. Now, let him hear from you.

LOUISVILLE COURIER-JOURNAL SUPPORTS GI COLD WAR BILL

Mr. YARBOROUGH. Mr. President, on Wednesday, April 10, 1963, I commented in the Senate on the testimony presented at hearings before the Subcommittee on Veterans' Affairs of the Senate Labor and Public Welfare Committee on S. 5, the cold war GI bill. In those comments I complimented the able junior Senator from Indiana [Mr. BAYH] and the other witnesses who appeared during the first 2 days of hearings for the fine statements which were made in support of that bill.

I was not alone in that opinion. Mr. Barry Bingham, editor and publisher of the Courier-Journal, Louisville, Ky, on Saturday, April 13, 1963, published a fine editorial pointing out the merits of the cold war GI bill, not only for the deserving veterans, but for the whole country, as well.

Mr. President, I ask unanimous consent to have printed at the appropriate place in the RECORD, the editorial entitled "The Merits of a GI Bill for Cold War Veterans," published in the Courier-Journal, Louisville, Ky., of April 13, 1963.

There being no objection, the editorial was orderd to be printed in the RECORD, as follows:

THE MERITS OF A GI BILL FOR COLD WAR VETERANS

Senator BIRCH BAYH, of Indiana, is one of the 39 Senate sponsors of a GI bill for cold war veterans. Making his first appearance in behalf of major legislation, the freshman Senator had a persuasive case for the measure, which would give a new group of exservicemen educational and vocational training aid, as well as loan guarantees and direct loans for homes and farms.

The benefits would be available to veterans of the period from January 31, 1955, to June 1, 1963. Senator BAYH noted that only 46 percent of the men in the draft-eligible age group have seen military service since the end of the Korean war. "Those not required to serve in the Armed Forces," he told a Senate subcommittee, "have had the opportunity to advance themselves educationally, professionally, and financially. It is only fair and equitable that those men who have had their lives and careers interrupted by service be compensated for that interruption."

What he is proposing has much more merit than any veteran bonus plan, which would provide, in effect, only a one-shot handout. The great advantage to the kind of legislation Senator BAYH favors is that its effects are cumulative and its benefits of lasting value to the veteran and to the country as a whole.

Senator BAYH pointed out that money spent on the new group of veterans would be returned in taxes because of the higher incomes that "almost inevitably come from a higher education." This is a supportable theory, but whether, in this sense, it would be self-financing is not the main point.

The history of similar legislation for World War II and Korean veterans makes it clear, it seems to us, that its results, in a broader sense, are in the national interest. This legislation underwrote the largest program of mass adult education the world has ever seen. There are intangibles here that cannot be measured in dollars and cents. The veterans alumni group numbers 11 million, including 460,000 engineers, 360,000 teachers, 130,000 doctors, dentists and nurses, and 150,000 scientists. Moreover, every fifth home started since the end of World War II was financed by a GI loan. This was important to the construction business, but it also was important to the psychological well-being of the millions of families who otherwise would not have been able to have a home of their own. And how much better for our social fabric to have millions of people exposed to higher education than to have them nursing festering grievances about being denied this opportunity after serving the Nation in crisis.

The country is richer because these opportunities were made available, and it could be further enriched by extending them to cold war veterans.

ESTABLISHMENT OF WATER RESOURCES RESEARCH CENTERS

The Senate resumed the consideration of the bill (S. 2) to establish water resources research centers at land-grant colleges, and State universities, to stimulate water research at other colleges, universities, and centers of competence, and to promote a more adequate national program of water research.

Mr. YARBOROUGH. Mr. President, I strongly endorse the enactment of S. 2—of which I have the privilege to be a cosponsor—the bill establishing water resources research centers at land-grant colleges and State universities and stimulating other water research.

This is a sound approach to what is to be the biggest problem in the future growth of many areas, including large parts of Texas; namely the need for water. My State, in parts somewhat arid, and with a fast-growing population and economy, is faced increasingly with the need for greater attention to the conservation of water. Much has been done in Texas toward water conservation; billions of dollars have been spent and will be spent toward assuring an adequate water supply.

This great expenditure for water-conservation facilities points up the curious fact that we have been relatively inattentive to the basic need of water-supply control and the need for research into the scientific problems of water conservation. At the hearings on this bill it was stated that nationwide at this time some $10 billion annually are being spent on water facilities, but that expenditures on research on the basic problems amount to only three-fourths of 1 percent of that amount. This percentage for research seems far less than that found necessary by any of our great industries to maintain progress and development within their technologies. Because of the great importance of water to us, we must increase our efforts. There are too many unsolved problems in connection with the overall problems of water scarcity, water pollution, and adequate supplies of pure water.

We know it is not enough to construct a large dam. In my region of the United States, evaporation from a large reservoir under our hot sun can mean a staggering water loss. Research has been done on the effectiveness of spreading a chemical film over the water surface of such a reservoir, but no practical solution has yet been found. This is a prime target for research, one which would be of especial interest at research centers established in the Southwest. This bill is sound in encouraging such State or regional autonomy in the selection of the research problems of great importance.

Another possible field of research likely to be of importance in my area relates to the problem of control of the phreatophytes, the water-loving plants. One type of these plants, the salt cedar, has spread through the Pecos River Valley, choking the water channels and virtually guzzling the flow of the river. It is estimated that unless these plants are checked, before the end of this century, they will be consuming the whole flow of the Pecos River.

I am pleased to be associated with the distinguished senior Senator from New Mexico [Mr. ANDERSON] in the sponsorship of a bill aimed at controlling that particular problem. However, his leadership in connection with the pending bill is even more to be commended, for through the research started under this bill it may be possible to discover a simpler and more economical way to prevent nonbeneficial water use by such plants.

The plan of this bill is good. It will allow the establishment of a water resource research center in each State, at a land-grant college or State university. That is the pattern which was followed in establishing our agricultural research stations, back in 1887. Let us all hope for the same result; namely, that such research, when applied to water problems, will produce in our water supply the same abundance that agricultural research has produced in our food supply. Such research centers can provide the necessary concentration of efforts and talent, especially in encouraging the training of more specialists in water problems. It is not enough to spend millions of dollars for research. Centers where students will be attracted to acquire specialized knowledge and advanced training in water studies are also necessary. At the same time, title II insures that research will continue to be done at other institutions where there are interest and capability in contributing to knowledge of our Nation's water resources.

The cost of these programs is very, very modest, when we compare it with what we spend each year for the construction of new facilities. In Texas, the study completed last year by the U.S. Study Commission recommended the construction of 30 major new reservoirs before 1975, to meet our needs. The cost of these reservoirs alone will be $563 million. Is it too much to hope that research will find a way to reduce the needed costs by 1 or 2 percent? If that happens, certainly the modest investment we make today will be one of the soundest investments it is possible to make.

I yield the floor, Mr. President.

Mr. MANSFIELD. Mr. President, the pending bill is S. 2 to establish water resources research centers at colleges and universities, and to promote a more adequate Federal program in the water research field. The bill was introduced by the distinguished senior Senator from New Mexico [Mr. ANDERSON].

On May 20, a group of national conservation organizations will hold a dinner to honor Senator ANDERSON for his continuing national leadership in the conservation field. During his many years of service, he has promoted many efforts to achieve more adequate forest programs, public land programs, soil conservation programs, programs for the development of the mining industry, recreation, wilderness—in fact, every type of conservation of both natural resources and human resources.

Mr. KUCHEL. Mr. President, at this point will the Senator from Montana yield to me?

The PRESIDING OFFICER (Mr. RIBICOFF in the chair). Does the Senator from Montana yield to the Senator from California?

Mr. MANSFIELD. I yield.

Mr. KUCHEL. Mr. President, I believe I would be recreant in the performance of my duty if I did not take this occasion, as the distinguished majority leader comments upon one of our colleagues, the senior Senator from New Mexico [Mr. ANDERSON], to say that I completely agree with the Senator's characterization of a very great American, a very distinguished citizen of his own State, and one who has served his Government both in the executive branch and now, with supreme distinction, here in the legislative Halls.

I look on CLINTON ANDERSON—if I may say this to my friend—as one of the giants in U.S. Government. I call him my friend, and I am honored to do so.

I have been a member of the Senate Committee on Interior and Insular Affairs for 11 years—during all the years that I have been permitted by the people of my State to be a Member of the Senate. I have enjoyed my work on that committee. From time to time I have brought to the committee matters of great interest to the people of my State. I have never failed to receive full and sympathetic consideration by Senator ANDERSON—and, I may add, on many occasions, full and enthusiastic approval and assistance.

So, Mr. President, as the distinguished Democratic leader rises to pay tribute to one of our colleagues, I am grateful that he has accorded me—sitting here on the other side of the aisle—an opportunity to join him in this deserved tribute to a fine Senator, and one whom I am proud to know as a friend.

Mr. YARBOROUGH. Mr. President, will the distinguished majority leader yield to me?

Mr. MANSFIELD. Certainly.

But, Mr. President, first let me say that I agree completely with what the distinguished acting minority leader [Mr. KUCHEL] has said about the Senator from New Mexico; and I hazard the estimate that the remarks of the Senator from California would be echoed by the other 98 Members of the Senate.

I am glad to yield to the Senator from Texas.

Mr. YARBOROUGH. Mr. President, I desire to say that I concur completely in what the distinguished majority leader and the distinguished minority whip have said about the former chairman of the Committee on Interior and Insular Affairs, the senior Senator from New Mexico [Mr. ANDERSON].

Those of us who live in a neighboring State feel we know him even better than do the Senator from Montana and the Senator from California.

Because of the problems which develop between States, perhaps those who live in a neighboring State are not always the best judges of the true worth of a Senator from an adjoining State, inasmuch as sometimes the interests of the two States conflict. But that is not true in this case. The people of my State honor and congratulate the Senator from New Mexico for his leadership in these fields, including his leadership in connection with Senate bill 2 and other bills which already have been before the Senate and have been passed by the Senate.

The Senator from New Mexico is a distinguished leader. His service as a Cabinet officer, before he became the chairman of this committee, was also of great value to the Nation. Because of his service as Secretary of Agriculture, he has outstanding knowledge of the problems of land, water, and air, and the chemical relationship between them, and also of water, its effect on the land, and the effect of environment on human beings.

So it is a great pleasure to me to state, on behalf of the 10 million people of my State, our profound regard for this distinguished leader of a most important Senate committee.

I thank the distinguished majority leader for yielding to me.

Mr. MANSFIELD. Mr. President, I join the distinguished senior Senator from Texas [Mr. YARBOROUGH] in what he has just said. Both he and the Senator from California [Mr. KUCHEL] serve as members of the Committee on Interior and Insular Affairs. In that assignment they are in a position to see at first hand what magnificent contributions the Senator from New Mexico has made.

Parenthetically, if we in this body have made much of a record to date, it has been because of the efforts of the distinguished Senator from New Mexico and the committee of which he was chairman.

Mr. ANDERSON. Mr. President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. ANDERSON. What we have heard sounds a little like the things that are said after a man dies. Many times I have said that I expect eventually to be dead and buried, but I would like those events to happen in that order, if possible.

The statement made by the Senator from California [Mr. KUCHEL] was one of the kindest things that have been said in a long time.

I greatly appreciate his statement, because of his position on the Committee on Interior and Insular Affairs. No man ever worked with a finer colleague than the distinguished minority whip, the able Senator from California.

I wish to say to my good friend the Senator from Texas that it is difficult to live as close to the Texanos as we do without occasionally having some differences with them. But one of the principal reasons we have gotten along so well is the great spirit of tolerance on the part of the senior Senator from Texas, which I have appreciated. I have long enjoyed his confidence. I sincerely appreciate the kind words he has said about his State, which I love almost as dearly as he does.

Mr. MANSFIELD. For the edification of the distinguished senior Senator from New Mexico, I observe that prior to my obtaining the floor, the senior Senator from Texas [Mr. YARBOROUGH] called attention to the activities of the Senator from New Mexico in regard to, I believe, the salt cedar problem which affects both States, and he did so in a very enthusiastic manner.

As the Senate starts consideration of the third conservation measure sponsored by Senator ANDERSON at this early date in its present session, I want to pay my personal tribute to him.

The Senate passed a bill to make the Bureau of Outdoor Recreation a fully useful, functioning agency. This bill is an outgrowth of the report of the Outdoor Recreation Resources Review Commission which the Senator from New Mexico successfully sponsored in legislation passed in 1958.

The Senate also passed this year, by an overwhelming 73-to-12 vote, a wilderness preservation bill to establish, for the first time in world history, a national reserve of lands to be maintained in their primitive condition for recreational, educational, and scientific values—a measure which reflects the great vision of the Senator from New Mexico as well as other Senators, like my associate, the Senator from Minnesota [Mr. HUMPHREY], who have long sponsored it.

The fact that S. 2, the water resources bill, is his third major measure on the floor this session is not only significant of Senator ANDERSON's energy; it is significant of a timeliness greatly appreciated by the leadership of the Senate. It is an example we may all appreciate more later in the year.

Senator ANDERSON was a member of the Select Committee on National Water Resources which reported to the Senate in 1961 that we should conduct an expanded, coordinated Federal water resources research program, and that we should prepare plans for optimum development of our great river basins by 1970.

The report did not recommend specific legislation. It stated:

> The committee hopes that appropriate legislation to implement these recommendations will be introduced in the Senate and considered by the appropriate legislative committee.

Our colleague from New Mexico does not believe that expensive and arduous studies and research jobs should be printed and the reports allowed to gather dust on shelves.

He believes that they should be implemented and that the studies as well as the river basins should yield optimum benefits.

Since the select committee report was filed, Senator ANDERSON has labored persistently on preparing, introducing, holding hearings, and passing legislation needed to implement it.

Every Member of the Senate is indebted to CLINT ANDERSON for the energy he has given and the leadership he has provided in this body in the conservation field.

Late last year he took the basin act establishing the agricultural experiment stations—which he once directed as Secretary of Agriculture—and converted that long-tested and highly successful measure from an agricultural act to a water resources research act.

As a consequence, he solved the delicate problems of the relationships in a cooperative Federal-State program by simply adopting the pattern of relationships developed in a long-established program over a period of 75 years.

The agricultural research program had its difficulties near the end of the 19th century. The State education institutions did not want Federal dictation. The Federal agencies did not want to dictate, but they wanted to weld the State stations into a coordinated program working on fundamental as well as local problems.

By conferences, give-and-take, they did work out a program which substituted Federal influence for Federal coercion, cooperation for conflict, and—as the Senator from New Mexico and Secretary of Agriculture Orville Freeman well know—agricultural surpluses for scarcity.

The pattern on which S. 2 has been built by the Senator from New Mexico assures its success, in my judgment.

Senator ANDERSON offered his first draft of S. 2 last July. He got departmental reports, and the comments of colleges, universities, State and local officials—in fact, from everyone who had views to express. He then redrafted the first bill into S. 2, the measure now before us, reported by the Interior and Insular Affairs Committee without dissent.

I express to the distinguished Senator, for myself and, I am sure, all other Senators, a sense of deep appreciation for the tireless and effective work he has done in bringing to the Senate this third major conservation bill this year.

I am delighted that conservation groups are going to honor him for his leadership in the conservation field. He richly deserves every honor given him.

Mr. ANDERSON. Mr. President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. ANDERSON. I hope the able Senator from Montana will not forget that all this work is really a product of Senate Resolution 48, which was submitted by the able Senator from Montana, and in which many of us joined. The resolution established a Select Committee on Water Resources. The Senator from Montana, with his usual modesty, declined to be chairman of the committee. Since it was his resolution, he had a right to be chairman of that committee if he had so desired. He turned over the chairmanship to our late great friend, Senator Robert Kerr of Oklahoma, who did a magnificent job in connection with that subject.

I do not desire that the record on the subject should terminate without Senators being reminded again that the able Senator from Montana conceived the idea and broached it to a conference of western Senators. The western Senators thought highly of the idea. The proposal was brought to the floor through a resolution, which was adopted by the Senate.

It was a fine piece of work. I am sure that when the Senator from Montana stops and thinks about his work, he will recognize that one of the ablest things which he has done was his sponsorship of the resolution relating to water resources, which I think has called attention to a great many serious problems and made it possible for many of us to contribute some effective work in that field.

Mr. MANSFIELD. Mr. President, I thank the Senator for his kind remarks. I assure him that the reports of the committee and subsequent measures brought to the Senate after that committee had disbanded have more than justified my hopes and the interest which I showed in the beginning.

Mr. ANDERSON. Mr. President, the pending business of the Senate is S. 2, the water resources research bill, on which I am honored to have 22 cosponsors from both political parties.

S. 2 has a history dating back into the 86th Congress, when a group of us, at the suggestion of the distinguished majority leader of the Senate [Mr. Mansfield], on April 20, 1959, submitted Senate Resolution 48 to establish a Select Committee on National Water Resources.

The resolution was agreed to and a select committee was chosen from among the ranking members of the Committees on Interior and Insular Affairs, Agriculture and Forestry, Public Works, and Commerce.

The late Robert S. Kerr, of Oklahoma, was chairman of the select committee. The distinguished assistant leader of the minority [Mr. Kuchel] was vice chairman. Chairman Dennis Chavez, of the Public Works Committee, Chairman Allen Ellender, of the Agriculture and Forestry Committee, and Chairman Warren Magnuson, of the Commerce Committee, served as members, while the late James E. Murray, of Montana, then chairman of the Interior and Insular Affairs Committee, was an ex officio member.

It was a distinguished committee. Under the leadership of Robert S. Kerr, it did a distinguished job. Hearings were held from ocean to ocean, and from the Great Lakes States to the Gulf of Mexico, giving the committee a firsthand understanding of the variation of water problems in nearly every State in the Nation.

Outstanding students of water problems in and out of Government contributed to a series of 32 committee prints, or studies. Water resources were inventoried. The Nation's needs to the year 1980 and the year 2000 were projected for agriculture, industry, municipal and domestic water supply, recreation, fish and wildlife, dilution of wastes of all kinds, navigation, generation of power—every conceivable use.

The first region-by-region, basin-by-basin, nationwide demand-supply projections were made. These studies demonstrated conclusively that we have entered a period in which serious supply problems are going to spread across the country, from the Southwest to the Great Lakes basins and the Hudson-Delaware region by the year 2000.

We are today using 25 percent of total water runoff to meet our needs. By the year 2000 with medium population growth we will require a supply equal to 75 percent of annual runoff. It would be no great problem if the water fell where the peole live and if each of us—like Joe Bflpsk in the Little Abner cartoon strip—had a private cloud that followed us about and provided us with water. But clouds do not follow people. And rainfall is not timed to come when it is needed.

So the Council for Science and Technology, interpreting the select committee report, tells us:

> To obtain, as an assured supply, such a large fraction of the total runoff would require structures for storage, regulation, transportation, and distribution that would be far more expensive, in proportion to present structures for this purpose, than the proportionate increase in the amount of withdrawal.
>
> If surface storage were used, the required storage sites would intrude on areas already intensively occupied or needed for urban and industrial development.
>
> The total capital cost would be several hundred billion dollars and annual charges would be of the order of tens of billions.
>
> Technological and economic developments leading to marked reductions in future requirements for water withdrawals, to lowering the unit cost of water structures, and to greater utilization of underground storage are clearly desirable. Otherwise, both the economic and social costs of meeting future water needs will be painfully high.

In the face of this sort of situation, the Select Committee on Water Resources agreed that one necessary part of a national water program is accelerated research into every possibility of conserving water, stopping evaporation from reservoirs, reducing or stopping losses in transport of water, reducing cost of water facilities of all kinds, use of underground storage, waste water salvage, recycling and reuse of available supply, desalting saline and brackish water, weather modification, elimination of water-loving plants along watercourses and reservoirs—everything that might stretch or increase our water supplies.

We believed, as does the task force of the Council for Science and Technology, that water problems can be solved and billions of dollars saved by a relatively small investment in research.

The science task group said:

> Research in recent years has led to spectacular savings in construction and operating costs and to provision of structures and facilities that function more efficiently and have a longer effective life. But opportunities and needs for further research-induced economies and other benefits are now greater than ever. Expanding scientific knowledge, improved instruments for measuring and transmitting data, electronic computers for collating and analyzing data, and other technological advances have enhanced opportunities for even greater research gains than have previously existed and, thereby, for comparatively revolutionary advances in the tools and techniques of water resources development.

I happen to believe that the prediction of increasingly great research benefits are correct.

There is some evidence that in areas where provision of storage is essential so high seasonal flows can be stored and held until needed, that it may be feasible to create great underground caverns with high yield nuclear explosions at about one-third the cost of providing surface storage in reservoirs. This would also eliminate the problem of flooding land.

This will take a great deal of research. The geologists are going to have to determine the behavior of various kinds of rock under the intense pressures of a 10-megaton explosion, so the results of such shots can be forecast with some accuracy. We will need to know in advance the size of explosion needed to match capacity requirements, and whether the underground bottle will leak. It is going to take the work of engineers and economists to determine the feasibility of and best location of such storage and pumping projects.

Mr. President, at the present time a most interesting study is being made of testing this possibility of storing water in what is termed an underground bottle. The loss by evaporation in a large reservoir is surprisingly high. Several people, including a very successful businessman in the State of Texas, have suggested the use of such a bottle, using a nuclear explosion to blow out a hole in the ground.

I had the privilege of discussing this proposal with Robert Kleberg, of the King Ranch, a short time ago in San Antonio. He presented information which indicated he had given the proposal substantial study. I transmitted his suggestion to the Atomic Energy Commission and to the Department of the Interior. I look forward to the study being made.

I am not able to say that this will be a successful method of storing water. I can only say that it is a very promising method for the storage of water, which has been brought about as a result of studies made in Nevada, when the results of tests on nuclear projects were reviewed.

With greater knowledge of the basic nature of water and of the physics of the earth's atmosphere, many of us believe that weather modification will be possible, and greater yields of usable rainfall obtained from the sky in water-short areas. There is a bill before the Committee on Commerce to speed experimentation in this field, and particularly to test the practicality of cloud seeding, which is a considerably debated matter. Studies are also underway of the possibility of coaxing rain-producing storms, which move across the Nation from west to east, to make their journey a little farther south, or north, to cross areas where water is needed the most.

A breakthrough in the desalinization of water may come out of research into methods of producing large quantities of low cost energy, or heat—a major ingredient in the desalinization process. Such breakthroughs, combined with water conserving practices, improved methods of storing and transporting water, and of purification and recycling, can provide abundant water for our children and grandchildren at reasonable economic costs. But it will come about, in the opinion of every committee, commission, and task group which has studied water problems in the past decade or two, only if we greatly intensify research and the development of a much larger staff of hydroscientists.

There were 10 Democrats and 6 Republican members of the Senate Select Committee on National Water Resources, which recommended an expanded, comprehensive Federal water research program. Six members from each party joined in the majority report. Then we had minority views, which is not unusual. These particular minority views were a little out of the usual pattern, however, because they did not disagree with the majority. They simply contended, in effect, that the majority recommendations were unrealistically conservative, and that we need to move on our water problems with greater speed and more ambitious programs than the majority had indicated.

Certainly, we have no time to lose. Serious water problems are already upon us. This Congress—the 88th—is going to have to deal with the high salinity of water delivered to Mexico from the Colorado River basin; with water supply for California and Arizona; with Chicago's need for more waste dilution water from the Great Lakes; with development of projects in the Delaware River basin and planning of the Susquehanna to help our great eastern industrial area supply itself, and a great many lesser water problems.

I have previously made two statements of the content, purposes, and rationale of S. 2.

In the CONGRESSIONAL RECORD for January 14, at page 202, will be found my statement upon introduction of S. 2. It includes excerpts from previous remarks on S. 3579, the bill which was introduced in 1962 and was the basis for getting departmental views and making detailed study of the proposal.

The report on S. 2 that is on each Member's desk brings up to date the background of the measure and provides a section-by-section analysis of the measure as it comes before the Senate.

S. 2 is an effort to combine research and training of needed hydroscientists. It would activate, in the water resource field, an alliance between operating agencies and educational institutions which has been strongly recommended by the National Academy of Sciences, the Council for Science and Technology, educators, and officials.

It would begin to implement the recommendations of the Select Committee on National Water Resources in the research field by establishing a research program patterned after the agricultural research and experiment station program. That program was established by the Hatch Act of 1877. It has been operating for 75 years and is an outstanding success.

We are fortunate to be able to adapt from this long-tested program a pattern for one of our water research efforts.

Mr. President, there has been no opposition to S. 2 within the Interior and Insular Affairs Committee. Hearings were held on it February 19 and 20. The committee had probably the most distinguished group of witnesses which has appeared before it in recent years. A panel composed of four State university presidents and the dean of engineering at Utah State University presented an organized case for the bill. The Interstate Conference on Water Problems of the Council of State Governments supported it. A number of scientists in the water field came to Washington to add their endorsement, including Dr. Arthur Maas, of Harvard University, Omer J. Kelley, of the Stanford Research Institute in California, Dr. W. S. Bailey, of the Graduate School at Auburn University, Drs. Milton E. Muelder and L. L. Quill, of Michigan State University, and Dr. Irving Fox, of Resources for the Future.

Numerous organizations appeared in support of the bill including the National Association of Soil and Water Conservation District Officials, the National Reclamation Association, the American Farm Bureau, the Izaac Walton League, the National Wildlife Federation, and last, but far from least, the National League of Women Voters, which is a group of very effective ladies who have made water and water resources the subject of nationwide study.

A number of Senators appeared for the legislation, and I am especially pleased that this included the distinguished Senator from Nebraska [Mr. HRUSKA], who also gave the bill his endorsement in an address on the floor; Senator FONG, of Hawaii, where there is an abundance of salt water but no surplus of fresh water supplies; and Senator GRUENING, Senator MCGEE, Senator BIBLE, Senator ENGLE, Senator HART, and Senator MORSE.

This is bipartisan legislation, Mr. President, which I trust will pass this body with an impressive majority.

Mr. ALLOTT. Mr. President, I rise to support the objectives and purposes which S. 2 seeks to achieve. The importance of water to our society cannot be overemphasized. Those of us who live in the West are particularly conscious of this precious commodity, and the history of the Western States will surely reflect more wars over water than any other commodity.

In Colorado, water is a vital commodity, and a scarce one as well. Where it is available, it has turned arid plains on the eastern slope into productive soil. My home in Lamar is on the eastern slope. I have lived through the droughts of the thirties and the fifties; and still carry with me memories of dry, parched soil, precious topsoil blowing away—all for lack of water. A dust bowl is not a pleasant sight.

As a practicing attorney, I have represented ditch companies and water companies over a long period of time—in fact, about a quarter of a century—and I think I know the intrinsic value of water. I have also represented many farmers and know, from their point of view, what it means to have an adjudicated right to the beneficial use of water.

In fact, I would be inclined to say, with respect to this particular bill, that there is no such thing as a water problem. There are thousands of water problems. If we approach this matter from any other point of view, we are showing a complete lack of regard for the complexities and the kind of problems we are discussing.

Water is a scarce commodity in Colorado on the eastern and western slopes. There simply is an insufficient quantity to meet all the recognized needs. Nor is the problem confined to any one State. It exists in many. Any program which attempts to deal with this deserves to be supported. There is a real need, in my judgment, not only to look to the requirements today, but to plan for the increasing demands ahead. Dr. W. E. Morgan, president of Colorado State University and chairman of the Water Resources Committee of the Association of State Universities and Land-Grant Colleges, pointed up the problem in his testimony before our committee, supporting S. 2. He said:

> Every activity of man, every facet of industry, leaves its influence on the water resource. Water, like sunshine and air, is fundamental to life itself, and the right of the individual to enjoy unpolluted water necessary for the essentials of life and health is today more than just a license. Water is a major concern of civilized society. The story of water is the story of man. As every informed person knows, the demands upon the water resource are rapidly multiplying, and, in an area embracing nearly one-third of the United States, 1980 demands will exceed the supply.

Mr. President, just a few moments ago the distinguished author of this bill [Mr. ANDERSON] enumerated a few of the water problems which we face. I said a few moments ago that there is no such thing as a water problem—that there are thousands of water problems. I think that is an accurate statement.

I should like to cite just one small example to show how this problem can become complicated. Let us consider the use of irrigation water, for example, for a given crop. Assuming the crop is wheat, or alfalfa, or sorghum, or milo, or maize, the application of water upon a given crop in one community may require a completely different sort of approach and type of use than the water would take in another community in the same State. This fact is governed by the altitude, it is governed by the winds, it is governed by the topography, it is governed by the type of soil and land upon which the crop is planted. So that even in the farming and watering of a given crop in just one State, there can be as many as 50 or 60 problems with respect to it.

We have the problem of increasing salinity. In the Arkansas River, in my own State, there are cities in which the people are drinking water which is as bad as we are told is the water we are exporting to Old Mexico. So we have the problem of salinity with respect to producing fresh water from salt or brackish water. We have the problem of producing fresh water under treaties with other countries, such as with Mexico.

We have the problems of conserving our water, and conserving it behind high dams and in high places in the mountains. That was one of the things that gave me the greatest trouble about the wilderness bill which we passed recently, because the best and most logical place for water storage is not in the low reaches of a river, but in the high reaches of the mountains. That is where we get effective flood control, and that is where we get effective water storage.

Therefore we have to consider the matter of water erosion in connection with this subject. If we do not have control of that, of course, we lose land. Then, once having started to lose land, we lose more land by reason of wind.

There is literally no end to the separate and different problems involved in water research and our total water effort.

Water research is now being carried on, not only in the Department of Interior, which would have the responsibility for implementing S. 2, but is the subject of research by many departments and agencies of Government. The Federal Council for Science and Technology in its report to the President on water resources research, dated February 11, 1963, indicates that:

> At present, five major departments—Agriculture, Commerce, Defense, Health, Education, and Welfare, and Interior, as well as three independent agencies—Atomic Energy Commission, National Science Foundation, and Tennessee Valley Authority—conduct or support research programs in one or more fields, related to water resources.

In addition to this, it is safe to say that almost every land-grant college in the Nation conducts some research into water use. In the West they are performing a great amount of research into this effort.

It becomes important, then, to understand the nature and extent of research now being undertaken. Again referring to the report of the Federal Council for Science and Technology, I quote from page 44:

> ### DEPARTMENT OF AGRICULTURE
>
> The Department of Agriculture has interests and statutory responsibilities that comprehend almost every aspect of water.
>
> The Department's responsibility in the effective use of water is evident when one considers some of the data on water use and management. The average annual precipitation on the 48 conterminous States is 4.75 billion acre-feet. The first impact of this primary water supply is on the surface of the land. The nature of vegetative cover, slope, soil characteristics, cropping patterns, and conservation practices influences whether precipitation becomes direct surface runoff, rapid subsurface flow (subsurface storm flow), deep percolation (ground water recharge), or soil moisture for evapotranspiration. About 70 percent of this total water supply presently is consumed by evapotranspiration. The remainder, about 1⅓ billion acre-feet per year, constitutes the water supply presently available to the Nation for all other purposes. And, of the portion of this water that is consumptively used as a result of man's activities, about 90 percent is used by irrigation agriculture.
>
> Authorized operational programs of the Department, carried out through nine different agencies, include (1) technical and other assistance to soil-conservation districts and individual farmers in planning and installing soil- and water-conservation programs, (2) cost-sharing assistance to farmers for specified soil- and water-conservation practices; (3) loans to individuals and water-use associations for water facilities, irrigation improvements, rural waste-disposal systems, soil and water conservation and erosion prevention, and related measures; (4) assistance to local sponsors of resource conservation and development projects; (5) assistance on rural-renewal projects; (6) planning and financial assistance and loans to local watershed organizations in planning and carrying out works of improvement for flood prevention and damage abatement, irrigation and drainage, fish, wildlife, and recreation development, and municipal and industrial water supply; (7) participation in cooperative State and private forestry programs, and management, protection, and development and proper use of the 186 million acres, in the national forests and grasslands; (8) credit and other assistance to organizations furnishing electric energy to persons in rural areas, among other things to finance construction of steam and hydroelectric generating plants; and (9) participation in comprehensive river-basin development activities.
>
> How land in farms and forest, and rangeland not in farms, are managed has a tremendous impact on the potential yield and use of water. The close association in the Department between research and action in land and water use is of great importance. Each serves the other. Action programs in the Department of Agriculture dealing with more than three-fourths of the land area in the United States are principal users—often the first users—of research results.
>
> The Department of Agriculture has broad authority to engage in research as it bears on agriculture and the programs administered by the Department. The Department may engage in research (1) directly through its own facilities and personnel; (2) through the State Agricultural Experiment Stations both by cooperation and through grants; and (3) through research grants and contracts with nonprofit institutions of higher education and other such organizations engaged in scientific research. The following agencies have water-resources research programs that are considered in this report: Agricultural Research Service, Cooperative State Experiment Station Service, Economic Research Service, Forest Service, and Soil Conservation Service.
>
> These programs include basic research in the natural, physical, social, and engineering sciences underlying water research. Applied-research programs include research on soil and water management, on costs and benefits of water-related programs of this and other executive agencies, and on institutional factors affecting water use.
>
> ### DEPARTMENT OF COMMERCE
>
> Department of Commerce agencies having statutory responsibilities entailing water-resources research include the Weather Bureau, Bureau of Public Roads, Coast and Geodetic Survey, Maritime Administration, and Business and Defense Services Administration.
>
> The primary mission of the Weather Bureau is to provide a national service for reporting weather and climate—including precipitation, evaporation, and river stages—and for issuing forecasts and warnings of weather and river conditions affecting the Nation's safety and economic welfare. The reliability of prediction is a true test of knowledge; conversely, erroneous forecasts signify a need for research. Thus, the Bureau has found it necessary to pursue major research programs involving the evaluation and prediction of water movement in all phases of the hydrologic cycle. The agency would also probably have a major responsibility for operational aspects of Federal programs in weather modification, if it becomes feasible, which necessitates a research program in this field. The Weather Bureau receives a considerable portion of its funds for hydrometeorological observations and research by transfer from other agencies.
>
> The Bureau of Public Roads is involved in water-resources research to the extent necessary to provide adequate protection of the highway system and highway traffic against damage by floods and other storm hazards.
>
> The Coast and Geodetic Survey's research program in the field of water resources is largely concerned with the part played by the oceans in the hydrologic cycle. The agency's responsibilities lead it to have an interest in research on land settlement and displacement resulting from lowering of ground-water levels, erosion and sedimentation in coastal areas, estuarine oceanography and coastal engineering, measurement and prediction of tides, and problems of movement of the earth's crust. Part of the Coast and Geodetic Survey's research programs on water is funded and dealt with in connection with the Federal program for oceanographic research.
>
> The Maritime Administration includes among its statutory responsibilities certain missions that have a direct relationship to water-resources programs. Research work is sponsored in connection with development of information on salinity; pollution content of water; bottom relief and characteristics; tide characteristics, volume-discharge, and velocity of flow; flood stages and causes; current directions and velocities; and port development, industrial development along navigable waterways, and long-range planning associated with river and harbor improvements. The Maritime Administration was authorized to prepare for the operation of the atomic vessel N.S. *Savannah*. As a result, certain environmental surveys were or are being carried on by the Public Health Service, Corps of Engineers, Weather Bureau, Coast and Geodetic Survey, and Geological Survey with Maritime Administration and Atomic Energy Commission funds, relative to water circulation in harbors, harbor models, flocculating agents, salinity and pollution, and climatology of 60 selected ports; and to salt-water encroachment into fresh-water aquifers along the Delaware River.
>
> Work of the Business and Defense Services Administration becomes involved with water-resources research in connection with the agency's objective of assisting in the development of the industry and commerce of the Nation. Since industrial growth depends in part on the adequacy of water supply, the Business and Defense Services Administration conducts selected research into the economic aspects of water-resources development and the development of methods for prediction of future trends of water use in relation to economic growth.
>
> ### DEPARTMENT OF DEFENSE
>
> The water resources program of the Corps of Engineers, Department of the Army, has been expanded gradually in nature and scope through a series of Rivers and Harbors and Flood Control Acts since its inception in 1824 by congressional action. It now encompasses a major part of the Federal activity in development of water and related land resources. The Corps of Engineers' civil works program comprises the planning, design, construction, and operation of multiple-purpose projects and systems of projects aimed at meeting the Nation's needs for better waterborne transportation; protection from storms and floods; development of hydroelectric power; conservation of water for domestic, industrial, and agricultural purposes; abatement of pollution through river-flow regulation; and shore erosion control. At the same time its

program is aimed at satisfying the growing needs for outdoor recreation and provides for the conservation and enhancement of fish and wildlife values. The Corps of Engineers also has regulatory functions in connection with navigable waters, is responsible for emergency flood fighting and rescue work, and constructs and operates the water supply system of the Nation's Capital.

In support of these wide-ranging activities, the Corps of Engineers undertakes a comprehensive program of research and development directly oriented toward carrying out its responsibilities with maximum effectiveness and economy. Its research activities are aimed primarily at overcoming existing inadequacies of basic knowledge and development of practical techniques of basic techniques applicable to all aspects of civil works projects and project systems. Corps of Engineers research has heretofore pertained essentially to such technical fields as hydrology and hydraulics, soil mechanics and geology, structures and concrete, and electrical and mechanical equipment. There is now increasing realization that research on resources-oriented, engineering socioeconomics cannot be neglected without detriment to optimum water resources development. With the present emphasis on comprehensive, multiple-purpose, river basin system development (rather than single-purpose individual projects), the Corps of Engineers is interested in broad interdisciplinary research to provide a more intimate understanding of how to formulate and execute a well-balanced water resources program responsive to local and regional requirements and geared to national goals.

The Department of Defense conducts such other types of research and exploratory development related to water resources as are necessary in support of its military operational missions. For example, the Air Force is investigating weather-radar techniques, numerical weather prediction, and meteorological research to improve forecasting; research on basic mechanisms of clouds; and studies of improved methods of terrain assessment including water supply. Similarly, the Navy's research program in the field of water resources includes projects in meteorology, atmospheric physics, oceanography, geography, advanced-base facilities, and utilities and services. The Navy's work is supported by the Office of Naval Research, the Bureau of Yards and Docks, and the Marine Corps.

In the Army, water-related research has as its goal an increase in combat effectiveness. The Army's concern with meteorology stems from the sensitivity of its operations to current meteorological situations. Meteorological information must be ready on the spot, minute by minute. Hence, this capability must be organic to each individual Army unit. The meteorological requirements of the Army are varied and complex, ranging from the routine measurement of meteorological parameters through the computation and application of meteorological corrections for artillery fire, including the desirability of modifying weather conditions to make them more favorable for Army operations. The Army's research and development efforts on mobile weather radar are directed at improved forecasting and observation techniques for use on micrometeorological and mesometeorological scales. From the Army's trafficability and soil-mobility research may come a better understanding of the energy and water-flow systems that occur within the earth-atmosphere boundary environment. The Army Medical Service is responsible for the detection and qualitative analysis of chemical, biological, and radiological contaminants in water. It insures that water is properly treated and, in cooperation with the Corps of Engineers and the Army Material Command, makes studies and recommendations on the design, selection, and operation of water-purifying equipment. It conducts research and investigates new techniques and methods for determining the treatment and disposal of sanitary and industrial wastes. The Army Corps of Engineers has responsibility for supplying water to the Army in the field. Hence, research and development are undertaken on processes and equipment for surface-water treatment and waste-water reuse, on improvements in water storage and distribution facilities compatible with new equipment for water production, on water decontamination, and on techniques and equipment for location and recovery of ground-water supplies. The Army maintains close contact with the Office of Saline Water to exploit the benefits of that Office's research. The Army's mission-related program of research in the field of snow, ice, and permafrost has contributed much to the advancement of knowledge in the water-resources field.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

The Department of Health, Education, and Welfare has basic statutory responsibilities for water resources research under the Federal Water Pollution Control Act and the Public Health Service Act. It has responsibility to support and aid technical research related to the prevention and control of water pollution. The Public Health Service is directed to conduct, and to encourage others to conduct, research relating to disease and impairments of man, including among other subjects water purification, sewage treatment, and ameliorating pollution of lakes and streams. In carrying out its responsibilities, the Department is authorized to make available the results of research and demonstrations relating to the prevention and control of water pollution; to make grants-in-aid and contracts for research or training and demonstration projects; to provide training in pollution control to personnel of public agencies and other persons having suitable qualifications; and, upon the request of any State or interstate water pollution control agency, to conduct investigations and research and to make surveys concerning any specific problem of water pollution confronting any State, interstate agency, community, municipality, or industrial plant, with a view to recommending a solution for such problems.

The Department also has the responsibility, in cooperation with other Federal, State, and local agencies having related responsibilities, for collecting and disseminating basic data and other information on chemical, physical, and biological water quality in relation to water pollution and its prevention and control.

Furthermore, the Department is directed to conduct research and to develop and demonstrate means of treating municipal sewage and other waterborne wastes to remove the maximum possible amounts of physical, chemical, and biological pollutants; and improved methods and procedures to identify and measure the effects on water quality and water uses of augmented streamflows designed to control water pollution not susceptible to other means of abatement.

To carry out these responsibilities, and promote the objectives of the Department, laboratories in addition to those already existing are to be established and maintained for research, investigations, experiments, field demonstrations and studies, and training relating to the prevention and control of water pollution. Location of such a facility in each of seven major geographic areas of the United States is specified. The law states also that the facilities should be located near institutions of higher learning in which graduate training in such research might be carried out.

Research and technical development work and studies with respect to the quality of the waters of the Great Lakes are also authorized.

Two water-quality-standards research laboratories, one for fresh water and one for salt water, are provided for by Congress in the Labor, Health, Education, and Welfare Appropriations Act of 1962.

The responsibilities of the Department for preparation and development of comprehensive programs for eliminating or reducing the pollution of the waters of the United States, and for planning for the inclusion of storage in Federal reservoirs for streamflow regulation for water-quality control, also generate a need for research into ways of dealing with these subjects.

The basic authorities contained in the Public Health Service Act, as amended, also call for research sponsored by the Public Health Service, including research fellowships, and grants-in-aid to universities, hospitals, laboratories, and other public or private institutions, and to individuals, with particular reference to health and medical fields.

DEPARTMENT OF THE INTERIOR

The Department of the Interior is concerned with the study of water as a resource, with the use and control of water, with increasing water supplies from all sources while at the same time serving and developing multiple-purpose uses of existing supplies, with integrated systems of river basin and watershed development, with water in the environment of fish and wildlife, and with the economic and engineering aspects of water projects of many different kinds.

Legal authority for the Interior Department's water resources research is explicit or implicit in a large number of congressional enactments, some of which are specific to particular fields of research and some of which provide for water research very broadly. It is the only Department having authority for water resources research throughout the country without limitation or relationship to specific operational problems.

The Geological Survey carries out water resources research and data collection and interpretation pursuant to the objectives of its Organic Act of March 3, 1879, which directs the examination of the mineral resources and products of the national domain, and of subsequent legislation. Specific appropriations by Congress for gaging streams and performing other functions relating to water resources have been made annually since 1894.

While the systematic collection of streamflow data that constituted the first direct water product of the arid lands work begun by the Survey in 1888 might not now be considered a research program, at the time it broke new ground in developing techniques and defining the resource, and led to the establishing of research programs in basic hydrology. The present research program of the Geological Survey includes study of water in all its forms, solid, liquid, and vapor, of its quantity and quality, and of its distribution in time and in place. It carries out its research with funds provided by Congress—matched, for large segments of its work, with funds provided by the States. Federal water resources research funds expended by the Geological Survey are augmented by State cooperative funds to the extent of about $3.5 million and $4.3 million for 1963 and 1964 fiscal years, respectively. These sums are not included in the totals shown in the tables in chapters 4 and 5. The Survey has no construction or operational responsibilities; its research programs therefore are not aimed at any particular operational program, although they produce information that lies at the foundation of all plans for the improvement of water use and control. The Survey through its broad-gage studies of geology and physiography and its particular experience and personnel makeup in water studies is especially qualified for research on water occurrence and movement in broad hydrologic systems—ground water reservoirs and related surface water bodies—and on the effect of man's activities on these systems and the principles governing their practical development and control.

Over the years, missions of the Department of the Interior have been enlarged to cover many other fields of basic and applied research in water. The Bureau of Land Management carries out research programs in some of the same fields as the Department of Agriculture, in order to discharge effectively its responsibilities for management of more than 467 million acres of public lands. Better means are needed to provide adequate water for the many beneficial uses of these public lands, and to prevent waste and assure conservative use. The development of adapted plant species that utilize water more efficiently than do the most prevalent native species is of importance, as well as the establishment of practical means of vegetative conversion to these superior plants. There is also need for more effective practices in eliminating or reducing the discharge of soil-erosional and other pollutants from public lands, and operations located thereon, to streams and water-storage facilities.

The Bureau of Reclamation was established for the reclamation of arid lands in the West. The early reclamation projects were constructed without sufficient research, and as a result some of the first settlers on reclamation projects experienced severe economic hardships, and several projects had to be abandoned. As the agency gained more experience, mistakes were corrected, and research programs were established to develop the basis for successful reclamation. The Bureau of Reclamation now conducts important research in matters concerning streamflow regulation, water-quality control, evaporation and seepage reduction, and other means of increasing efficiency of irrigation; induced precipitation; control of sedimentation; and economic and other aspects of multiple-purpose river-basin development.

The Bureau of Indian Affairs, having responsibilities for irrigation of Indian lands, is concerned with some of the same problems as the Bureau of Reclamation in the field of water resources. In discharging its responsibilities for the management and protection of watersheds on Indian reservations, the Indian Bureau is concerned also with many of the same problems as the Bureau of Land Management and the Department of Agriculture.

The statutory responsibility of the National Park Service for protection and regulation of national parks and monuments has led the agency to be concerned with research in various aspects of water resources in relation to recreational pursuits.

The Bureau of Mines is concerned with water-resources research because of its primary mission to assure that the Nation has a supply of usable minerals to meet its needs in war and peace. This calls for the prevention or reduction of the waste of mineral resources. Since water is one of the primary raw materials required by the mineral industry, research in the fields of water use, water quality, and water supply are of concern to the Bureau of Mines. Its activities are related to problems of the mineral industry and the national interest in utilization of mineral resources, taking advantage of appropriate research accomplished by others.

The Office of Saline Water was established by the Department of the Interior to carry out the responsibilities placed in the Department by the act of July 3, 1952, as amended June 29, 1955, and September 22, 1961. The primary objective of this legislation is the development of low-cost means for the large-scale production of potable water from saline water, and for studies and research related thereto. The exercise of this responsibility has necessitated the establishment of major water-research programs on an expanding scale.

The Fish and Wildlife Service, composed of the Bureau of Commercial Fisheries and the Bureau of Sport Fisheries and Wildlife, was established to conserve the Nation's fish and wildlife resources. It has responsibilities for the study and protection of the fish and shellfish that inhabit the seas bordering our shores, the fish that inhabit the inland waters, and the wildlife that is part of our natural heritage. To exercise these responsibilities, the Service must be concerned with water resources, and has many programs that deal indirectly with water. To understand the life histories of these animals we must know how water influences their development, how pollution affects their existence, and how manmade changes affect their environment.

Specifically, the Secretary of the Interior, through the Fish and Wildlife Service and the Bureau of Mines, is authorized to make such investigations as he deems necessary to determine the effects on wildlife of domestic sewage; mine, petroleum, and industrial wastes; sediment resulting from erosion; and other polluting substances.

ATOMIC ENERGY COMMISSION

By the Atomic Energy Act of 1954 and subsequent enactments, the Atomic Energy Commission is charged with the responsibility for the development, use, and control of atomic energy in such a way as to make the maximum contribution to the general welfare, defense, and security of the Nation. Specifically, the Atomic Energy Commission is directed to conduct research and development and training activities in or related to nuclear processes, theory and production of atomic energy, utilization of nuclear and radioactive materials, and protection of public health and safety in all nuclear activities. The Atomic Energy Commission is authorized also to make research and development studies in military applications of atomic energy, which also affect water resources.

Activities in the Atomic Energy Commission with respect to the control and disposal of radioactive materials have led to intensive environmental studies involving radioactivity and its effect on ground and surface waters. In connection with the application of atomic energy to improve the welfare of the Nation, the Atomic Energy Commission carries on research into the use of radioisotopes and nuclear techniques as tools for measurement and analysis, and into the development of economical power based on nuclear energy. The Atomic Energy Commission conducts research into ways of using atomic energy in attacking problems of water resources. Many of the Commission's research programs are carried on through transfer of funds to other Federal agencies, such as the Weather Bureau and the Geological Survey, that have primary responsibilities in the field. Similarly, the Atomic Energy Commission does work for other agencies in fields in which it has particular competence—for example, the work it is doing for the Department of the Interior in the field of desalination.

NATIONAL SCIENCE FOUNDATION

The National Science Foundation was created by the National Science Foundation Act of 1950 to promote the progress of science, to advance the national health, prosperity, and welfare, to help secure the national defense, and for other purposes.

The Foundation has the specific mission of strengthening the Nation's scientific-research potential. One of the ways in which this is done is through a program of grants to stimulate basic research in all fields.

With respect to basic research, the Foundation considers all proposals, including those dealing with water-related research. Most proposals to the Foundation originate in or are sponsored by the various universities throughout the country. Because of the relatively small number of water proposals received by the Foundation, it has not been necessary or prudent to provide specialized staff assistance or a special program to handle them. Water proposals therefore go to one of several of the research programs (atmospheric sciences, earth sciences, etc.) where they compete for support with other research proposals. Except for the special field of weather modification, the Foundation has made no effort to channel funds to any one facet of water research.

Under legislation enacted July 11, 1958, the National Science Foundation has been given specific responsibility for initiation and support of a program of study, research, and evaluation in the field of weather modification. A large program of research in this field has been established in cooperation with the Weather Bureau, the Air Force, and other agencies. The weather-modification program of the Foundation supports a full range of theoretical studies and field research on the physics and chemistry of precipitation. The research is in the main experimental and characterized by a long-term, fundamental approach. However, field tests and engineering studies are vigorously pursued when basic discoveries suggest that they will be rewarding.

TENNESSEE VALLEY AUTHORITY

The Tennessee Valley Authority's research responsibilities related to water resources center around the hydrologic and economic problems arising out of the water-control and resource-development functions vested in the Authority. The Authority was created to improve navigation in the Tennessee River and to control the destructive floodwaters in the Tennessee River and Mississippi River basins in the interest of agricultural and industrial development. It is authorized to construct dams and reservoirs in the Tennessee and its tributaries for purposes of navigation and flood control, to undertake cooperative activity for the prevention of soil erosion, and to regulate the streamflow, primarily for the purpose of promoting navigation and controlling floods. In addition, the Authority is empowered to make such studies and experiments as may be necessary and suitable to aid in the proper use, conservation, and development of the natural resources of the Tennessee River drainage basin and adjoining territory.

Mr. President, many difficult problems are involved. I shall not discuss them at this time. Suffice it to say that some eight principal agencies of the Federal Government are already engaged in research in the field of water. The report of the Federal Council for Science and Technology, which I have just completed reading, affords a superficial albeit a good look at the work which is being done in this area by the various agencies of the Government.

The report shows further that during fiscal year 1963 the total programing on all phases of water research, exclusive of amounts reported separately to the Committee on Atmospheric Sciences and Oceanography amounts to $66.327 million and that the total fiscal year 1964 budget calls for an increase of more than $10 million, for a total of $76.419 million. A total showing the breakdown on these figures by Department and Agency as well as by nature of the study appears at page 264 of the report.

Mr. President, I ask unanimous consent to have the table printed at this point in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD.

Summary of 1963 program and 1964 budget for water-resources research

[Excludes amounts reported separately to Committees on Atmospheric Sciences and Oceanography; in thousands of dollars]

	Agriculture		Commerce		Defense [1]		Health, Education, and Welfare		Interior		Atomic Energy Commission		National Science Foundation		Tennessee Valley Authority		Total, 1963 program	Total, 1964 budget

---

[1] Includes Corps of Engineers—civil functions only. Includes only the part of estuarine and coastal studies directly related to water resources; remainder of oceanographic work included in oceanography program.

[2] Grant program cannot be distributed among categories in advance.

[3] Weather-modification program not included; it is included in atmospheric-sciences program.

[4] Totals differ from figures of $12,300,000 and $11,700,000 printed in budget because of calculating-machine error of $100,000 in each year, and of inadvertent inclusion of sums of $140,000 and $150,000 from subcategory IV-A that were already covered in other categories, in figures supplied to Budget Bureau.

[5] Totals shown here differ from those printed in budget because of redefinition of research content of programs, reflecting no increase in departmental 1963 program or 1964 allowance, after figures of $1,900,000 and $2,000,000 were supplied to Budget Bureau.

[6] Totals differ from figures of $24,800,000 and $34,900,000 printed in budget because of incorrect figures for Bureau of Reclamation included in totals supplied to Budget Bureau.

[7] Total differs from figure of $4,000,000 printed in budget, which was derived by rounding upward an erroneous total of $3,958,000 reported to Budget Bureau.

[8] Figure of $900,000 printed in budget was rounded downward from agency asking of $944,000; Budget Bureau allowance of $840,000 received too late for correction of figure supplied for printing in budget.

Mr. ALLOTT. Mr. President, the figures in the table speak for themselves. However, to me it is significant that when all of the water research and development work that has been gathered together in the various departments is analyzed in light of the table, it will be found that we are now planning to spend for fiscal year 1964, $76,419,000 for research in the use of water.

S. 2, would establish water resources research centers at land-grant colleges and State universities and would also provide additional funds, available to the Secretary of the Interior, to encourage research on all phases of water problems. The bill establishes a permanent program which, at the maximum, would require expenditures of $20 million annually. This $20 million is not in place of anything which is now being spent, but is in addition.

My concern is chiefly with the establishment of a permanent program at the outset. It is difficult, in fact impossible to tell how such a program will function, whether it will fill a need, whether it will overlap significantly work presently being carried on elsewhere. I feel certain that much of the work proposed by the bill to be done at colleges will, in fact, overlap work which is presently being financed by the National Science Foundation in those particular areas. For this reason I propose that a limitation of 5 years be placed on the program, in order that Congress can then satisfy itself as to the success being encountered. Frankly, I hesitate to encourage potential participants in this program to look too far down the road, as this bill does, until we have a record to examine.

As matters now stand, the money in S. 2 is subject to appropriation, and although a permanent program, it would be terminated simply by Congress failing to provide the necessary moneys. This is an uncertain status in which to place these potential participants. It seems to me that the wiser course to follow is one which places a limitation at the outset with the understanding that, if a justification exists, this limitation can be lifted at the end of the trial period. To this end, amendments which I submitted earlier, Nos. 50, 51, and 52, and which I intend to offer, would place a 5-year limitation on all three phases of the bill. These amendments would have been offered during committee deliberations on S. 2. However, an emergency situation prevented my attendance at the time.

I observe in the Chamber the distinguished senior Senator from New Mexico [Mr. ANDERSON], the acting chairman of the committee at that time. He is also the author of the bill. What I have said concerning the offering of the amendments is no reflection upon him. He has now had copies of my amendments for about a week and is fully aware of their content. Had it not been for an emergency, and had I been able to attend the executive session of the Committee on Interior and Insular Affairs when it considered S. 2, the amendments would have been offered at that time. I say this because objection is often raised on the floor of the Senate by asking why amendments were not offered in committee prior to their being offered on the floor. I can only say that because of an emergency the amendments were not offered by me in committee.

I have done my best to inform the chairman of the committee of my purpose and my intent; and in the regular course I shall offer the amendments.

Mr. ANDERSON. Mr. President, will the Senator from Colorado yield to me?

Mr. ALLOTT. I am happy to yield.

Mr. ANDERSON. I wish to confirm what the Senator from Colorado has said. Because of an emergency, he was required to be away from the committee. On Thursday, he did provide copies of the amendments; and I am glad to confirm what he has said.

Mr. ALLOTT. I thank the Senator from New Mexico. I have no criticism of him for the failure to consider the amendments at that time. The situation which developed was unavoidable, and was not his fault, nor was it mine.

Five years would seem to be sufficient time in which to have the research projects begin to bear fruit. At the end of that period we shall have an adequate history upon which to make an informed judgment on the questions which, today, have no ready answer. I trust that the Senate will concur, and will adopt these amendments.

Mr. President, tomorrow I shall discuss the amendments at some length.

As an example of what I believe the bill will do—although I am sure it is not the intention of the Senator from New Mexico that the bill will do this—let me refer to section 100(a), of title I, on pages 2 and 3 of the bill, which authorizes the appropriation, for the fiscal year 1964 and subsequent years, for distribution to a college or university in each State and Puerto Rico, of "a sum adequate to provide $75,000 to each State in the first year, to be increased by $12,500 each succeeding fiscal year for 2 years and to continue at $100,000 thereafter, for the purpose of establishing a collegewide or universitywide water resources research institute, center, or equivalent agency."

But in subsection (b), on page 3, we find this provision:

> (b) There is further authorized to be appropriated to the Secretary of the Interior in the fiscal year 1964 the sum of $1,000,000, increasing by $1,000,000 each year for four years to $5,000,000 in fiscal year 1968 and thereafter, which the Secretary of the Interior may use to match, on a dollar for dollar basis, funds made available to State water resources research institutes or centers by the States or other non-Federal sources.

I believe the "non-Federal sources" would certainly include the same universities dealt with in subsection (a) "to meet the necessary expenses of water resources research projects."

And so forth. I believe that, in all likelihood, Congress would continue the grants under subsection (a), but that at the end of the 5 years Congress might decide that it would be more feasible and more desirable for some other agency to utilize the $5 million which now are proposed to be authorized for appropriation to the Secretary of the Interior, to be used for this purpose.

Tomorrow, I shall seek to have corrections made in various other items. Those amendments are chiefly mechanical in nature.

Title II provides:

> SEC. 200. There is authorized to be appropriated to the Secretary of the Interior $5,000,000 in fiscal year 1964, increasing $1,000,000, annually for five years, and continuing at $10,000,000 annually thereafter from which he may make grants, contracts, matching, or other arrangements with educational institutions, private foundations, or other institutions; with private firms and individuals; and with local, State, or Federal Government agencies, to undertake research into any aspects of water problems related to the mission of the Department of the Interior, which may be deemed desirable and are not otherwise being studied.

As I read the provisions of the bill—and I believe I have a correct understanding of the English language—these provisions are to a great extent duplicative. I believe this provision of title II is to a great extent duplicative of the provisions of subsection (b), on page 4.

Tomorrow I shall go further into these matters.

It seems to me foolish to commit ourselves to an open-end authorization forever, when we are not certain that we shall wish to continue it forever.

I hope I shall persuade the Senator from New Mexico to see the light and to take the high road. In answer to my criticism, undoubtedly, it will be said, "If we do not like it, at the end of the 5 years we can revoke these provisions."

But, Mr. President, such a course is never taken; and at the end of the 5 years, the impetus to develop our water resources and to engage in research in that connection will be very great. So let us pass a 5-year authorization bill, and begin that work in a sound manner; and as the program develops let us ascertain how the Secretary of the Interior handles the other two grants made to him, with which he will have almost a free hand. If we then do not like the results, at the end of the 5 years we certainly can pass a new authorization bill. Undoubtedly there will be no difficulty in doing that for any portion of the program which is found to be desirable and good.

In my opinion, the part of the bill which relates to the developmental and research work at land-grant colleges and universities will be the only part which will really pay off in a large way. That is true because particularly in the West, where water has been a pressing problem, beginning with the very first settlements, the people know the importance of water, and have engaged in long-time research programs in regard to the use of water, its conservation, the prevention of water erosion, and similar problems. This work has been going on for years.

Therefore, Mr. President, I believe that the part of the bill which relates to developmental and research work at the land grant colleges and universities will pay off the most, because essentially the other provisions of the bill will duplicate to a certain extent the work of the National Science Foundation, although we would be placing the work in charge of the Secretary of the Interior. So I have my doubts about section 200.

We know that the work under title I must be done. So let us do it, and then examine the entire work done at the end of the 5 years. If that is done, I assure Senators that the part of the bill which I think will pay off—I refer particularly to the part in connection with the land grant colleges—will, if necessary, be renewed and reenacted at that time. As to the balance of the program, all of us will be the beneficiaries by not permanently placing on the statute books legislation which probably has no real need to be there.

Mr. DODD. Mr. President, the most pressing of all our resource problems is that of water. The situation is already acute, with actual scarcity threatening some areas of the country.

Because of the magnitude of this problem, I intend to support S. 2, the Water Resources Research Act. This will be a modest program, but I believe it is an important step toward insuring that the water needs of the American people will be met in the years ahead.

I am especially pleased by the decentralized way in which this water resources program will be set up. S. 2 authorizes $75,000 per year to a land-grant college, State university, or other institution of higher education in each State, at the discretion of the State, to establish and maintain a water-resources research institute or center. This is based on the highly successful agricultural research stations at land-grant colleges and State universities.

It assures that each State will be able to establish a water-research center, where attention can be focused on the water problems peculiar to a State or area. A few comments about my State should illustrate how important and eminently reasonable this State-by-State approach is.

Connecticut is a highly urbanized State, with a substantial amount of industry. The solution of our water problems does not lie in moving large quantities of water hundreds of miles, as, for example, from northern California to the southwestern part of that State.

In my State, we need research in pollution abatement, so as to develop improved methods for the treatment or control of the waste materials that are disposed of in water.

We need better ways to salvage waste water.

We need more insight and knowledge about the reuse, recycling, and the elimination of wasteful water use by industry and by urban areas.

It would be helpful to learn how to reduce evaporation from the surface of reservoirs.

These areas of study will benefit Connecticut and other States in a similar position. California and other Western States, with their vast geography, can at the same time concentrate on their own immediate problems.

One further field of study, which holds great promise for the alleviation of a future water shortage, is the desalting of saline or brackish water. Connecticut, as an eastern seaboard State, will no doubt want to go into this area of research, to help with its local needs. And this would be to the benefit of the rest of the United States and to other countries as well. Under the water resources research program, my State could look in depth into the possibilities of desalting water.

Several years ago, Connecticut and the other five New England States negotiated a northeastern water and related resources compact, so that a cooperative, areawide effort could be made to study and work out the best ways for the six States to assure an adequate water supply in the years ahead. To date, four of the State legislatures have ratified this compact, and I intend to reintroduce shortly a bill to give congressional consent to this interstate agreement.

The northeastern compact and the Water Resources Research Act have the same objective in mind, to assure a continued abundance of water, and the two, once operative, should complement each other nicely.

In fact, S. 2 would allow two or more States to designate a single interstate or regional research institute or center. This is a possibility that the State officials may want to look into and consider, in connection with the compact.

Each year the American people spend $10 billion on public and private water facilities. It is estimated that during the 16-year period between 1959 and 1975, $171 billion will be spent for these facilities. Against this background, the cost of the research bill we are debating today is indeed modest.

For the first year, the total cost of S. 2 would be just under $10 million. Once it is in full operation the annual expenditure of Federal funds would be around $20 million.

I am sure that the benefits we will receive from these research centers and the programs of matching grants for research by the centers and by other educational institutions, private foundations and business, and by individuals, will be worth many times our investment.

I hope the Senate will pass S. 2, and that the House, too, will take favorable action at an early date.

I observe that my colleague [Mr. RIBICOFF] is the Presiding Officer of the Senate at present. We are all familiar with his great and continuing interest in the problem of air pollution. But he has also been a leader in our State in the fight to rid our waters of pollution as well. It is a pleasure for me to join with him in the Senate in the struggle to clean up our streams and rivers and reserve an adequate water supply for our people.

Mr. METCALF. Mr. President, the kind things which have been said about the senior Senator from New Mexico, and the leadership he has provided in the conservation field, have been very much deserved.

It was my privilege to serve on the Interior and Insular Affairs Committee during his chairmanship in the 87th Congress. It was a privilege for, under his leadership, the committee has purposefully approached major conservation issues and attempted to implement programs which would deal with them wisely.

Since 1958, when he successfully sponsored the bill establishing the Outdoor Recreation Resources Review Commission, the Senator has kept recreation matters moving. A long stalemate in the development of parks has been ended. We have authorized a number of new areas in the past 2 years and we are now in the process of implementing on a nationwide basis, a thoughtful, forward-looking program to provide needed Federal, State and local recreation facilities, including a Wilderness Preservation System, seashores, and some magnificent new national park areas.

The Senator had a leading role in the enactment of a helium conservation program before many knew how important this rare element was becoming in our new technology.

Under Senator ANDERSON's guidance, effort is being made to keep the Nation abreast of its water problems not only through research, as proposed in the pending legislation, but by getting an adequate water resources planning program underway.

The Senator's energy and initiative have made him a very successful citizen in private business. He has worked at his public tasks just as assiduously, both to the great benefit of his State, and to the great benefit of the Nation.

Things which have been said of him here today, and will be said at the dinner in his honor May 20, are well deserved and even more.

In proposing and pressing the pending water resources research bill, the senior Senator from New Mexico has outdone himself and brought about what I regard as a miracle.

Last week, the members of the Interior and Insular Affairs Committee of the Senate received a letter from the Chamber of Commerce of the United States which is unprecedented in my experience in Congress, which dates back to the 83d.

For the first time in my experience, the Chamber of Commerce of the United States has agreed that a new Federal program, entailing Federal expenditures, is needed and would serve a useful purpose. They do not quibble over a penny of the money to be appropriated.

Of course, the chamber wants amendments to S. 2—amendments which I regard as unnecessary or unwise—but that was to be anticipated. The really significant thing about the chamber of commerce letter is its agreement that S. 2 has merit. I want to read into the CONGRESSIONAL RECORD what, to me at least, are some historical sentences. The Chamber of Commerce of the United States has written me:

> Additional research, investigations and experiments in the field of water and related resources are needed to help meet the water demands of future generations. The training of additional scientists to conduct such activity is vital.
>
> The stimulation of more research effort at industrial, State, and local levels and the training of additional scientists by the States and other agencies are the most satisfactory methods of achieving greater knowledge about water because they would minimize unwarranted Federal research activity, providing a preferable alternative to the expansion and duplication of federally conducted research effort.

> The Chamber of Commerce of the United States supports S. 2 subject to the amendments suggested hereafter.

I recognize that the endorsement of S. 2 has reservations. I want to deal with them, so the Senators may know that they are making no mistake to adopt S. 2 as it has been reported to the Senate.

First, however, I want to congratulate the senior Senator from New Mexico for having proposed the first new Federal program, involving an expenditure of funds, which, in my experience, at least, has received that sort of endorsement from the Chamber of Commerce of the United States. And I want to congratulate the chamber for going as far as it did.

Chambers of commerce in my home State of Montana, I am proud to say, have frequently suported desirable programs in past years. A number of them have given intelligent support to the programs for farmers. A number of them have endorsed proposals in the recreation field. In several instances they have taken progressive positions on measures which the chamber here in Washington has opposed.

Occasionally I have observed that other western chambers were becoming a little more progressive. It pleased me recently to see that the Salt Lake City Chamber of Commerce has given support to S. 859, the Land and Water Conservation Fund bill to implement a national recreation program, subject to a couple of amendments on distribution of funds which, while very important, are technical rather than fundamental. The fundamental principles and purposes of the bill were given support—just as the chamber of commerce of the United States has now, for the first time in my experience, given support to the fundamentals of proposed national legislation involving a new Federal program.

I want to discuss the amendments proposed to S. 2 by the chamber because there are pending several amendments, offered by the senior Senator from Colorado, some of which parallel the chamber's suggestions.

The first proposal is to amend the preamble of the bill to state that one of its purposes is to reduce the need for expansion of Federal water research agencies and activities.

S. 2 will have that effect. It will avoid the necessity of Federal laboratories handling a great many practical, local water problems. It will bring into water resources research non-Federal matching funds and non-Federal personnel—scientists in colleges and universities, foundations, and private life—who will undoubtedly make a great contribution in both practical and fundamental research if given the opportunity.

But there will remain water problems of national significance, as Senator ANDERSON has been careful to point out, which require major laboratories and major test facilities—and I am thinking in terms of saline water conversion, weather modification and aspects of pollution control—in which Federal expenditures will need to be increased. There is a possibility that we can provide underground storage for water, which avoids loss from evaporation and flooding of lands, at a fraction of reservoir costs, with atomic explosives. Development of this potentiality will necessarily have to be a Federal project.

So it would be a mistake, in my judgment, to put language in S. 2 that might later be interpreted as a declaration that need for expanded Federal research in the water resources field was being eliminated by S. 2. We should adopt the bill and actually reduce the demand without encumbering the measure with phraseology subject to later misinterpretation.

The chamber's second suggestion is for an amendment to assure that there will be optimum utilization of existing water research facilities located in the individual or several States before any new water research agency or center is assisted.

A study of water resources research underway around the country made by the Interior and Insular Affairs Committee, showed that every land-grant college or university in the Nation, except possibly in Connecticut the home State of the Presiding Officer where the experiment station is a separate institution, is doing water research. Each has a water resource facility of some sort. There are scores of facilities in other institutions ranging from one-faucet laboratories to a multiple-faucet laboratory with electronic computers in other institutions.

The very well intended suggestion of the chamber would lead to more debates over interpretation than results. What is a facility? What is a center? What is optimum utilization? I am happy to see that no such amendment has been offered.

A third suggestion of the chamber of commerce is that an advisory board of "qualified, top level scientists other than Federal employees" be given the power to allocate basic support funds under section 100(a) and to advise the Secretary whether certain water research efforts will contribute to a comprehensive, nationwide water related resources research program.

S. 2 provides, at section 300, that the Secretary of the Interior shall arrange for the regular advice and cooperation of all Federal agencies, of State and local governments, and of private institutions and individuals, in the administration of the program. It would be highly unwise, in my opinion, to exclude the fine scientists—some of the finest in the world, who have dedicated their lives at modest salaries to public service with Federal agencies—from the Secretary's council. It would be both improper and unwise to delegate the power to allocate and direct the expenditure of Federal funds to a group which has no responsibility to the Federal Government.

It is always difficult for me to understand the sort of prejudice against anyone who works for the Federal Government reflected in such a recommendation. Each of us in the Senate of the United States is a Federal employee—a part of the Federal Government. I do not believe that entering upon Federal service somehow automatically robs a man of all competence. I cannot believe that the Senate will for a moment consider an amendment that carries such an implication.

The most dangerous amendment suggested by the chamber of commerce, and I regret that such an amendment has been placed before us, is a proposal to put a termination date on the S. 2 program.

Mr. President, the ability of the senior Senator from New Mexico to diagnose and analyze problems, and get to the core of them, is nowhere better reflected than in S. 2's proposal of continuing program of Federal support of water resources research at non-Federal centers of competence.

The Department of Health, Education, and Welfare has for some time sought to place research contracts in the water pollution field at colleges and universities.

Last fall, Mr. Leonard B. Dworsky, assistant to the chief of the Division of Water Supply and Pollution Control at HEW, appeared at a symposium on social and economic research at Portland, Oreg., and complained a little about their experience. He said:

> The universities are best geared to assume the major role of research in water pollution control needs. With isolated exceptions, however, there is little effort, little interest, and seemingly little understanding at the university level of these needs.

In contrast, S. 2 has created a great deal of interest on the part of universities in water research.

A panel of four State university presidents and the dean of engineering from Utah State University appeared at our hearings on S. 2 to endorse its passage. Other volunteer witnesses came from Michigan, Auburn, Harvard, California and elsewhere. There have been many enthusiastic letters of endorsement.

The difference between the HEW's disappointing experience, and the response to S. 2, lies in the assurance of continuity which S. 2 carries—a repeat of the now 75-year-old agricultural research program.

Dr. W. B. Morgan, president of Colorado State University, who is chairman of the Water Resources Committee of the National Association of State Universities and Land Grant Colleges, has described the importance of continuity to us as follows:

> Colleges and universities cannot afford to build and equip laboratories and rearrange curriculums to accommodate a short-term program. Top scientists in disciplines related to water resources—physics, engineering, geology, botany, silviculture, meteorology, economics and many others—are not easily persuaded to specialize in water problems if there is the threat of termination of the principal program in the field. They look for specialties in which they may find a lifetime career. Neither can students be persuaded to spend many years in graduate training for work which may be stopped before they complete their training. The assurance of continuity which S. 2 provides is one of the basic strengths of the bill. Provision is made at section 305 for a comprehensive review at the end of 5 years. Congress can itself review the results of the work whenever it deems it appropriate. The

adoption of the suggestion (for a termination provision) would be especially injurious to the bill.

Dr. Wayne Reitz of the University of Florida has commented to the author of S. 2:

> To establish a definite termination date would mitigate against a State developing sound and farsighted programs for research in this important field. Had termination dates been provided for agricultural research, we would never have made the progress that has been made.

Mr. President, S. 2 has ample provision for review. That provision carries with it a notice to the participants in this program that results will be expected. But S. 2 does not carry a threat of termination which would stifle the project before it got started.

If we put a 5-year termination in S. 2, we are in reality postponing for 5 years the opportunity to have an effective program. Many colleges, universities and needed scientists and students will undoubtedly wait to see if the program is to be renewed and continued before they dedicate their assets and their careers to the water research field.

Finally, Mr. President, the chamber of commerce has asked that sections 302 and 303 be eliminated. They authorize a Water Resources Service in the Department of the Interior to administer the S. 2 program, and 5 positions in that Bureau, in addition to the usual number, at a grade above civil service grade 15.

Many of us regularly oppose statutory direction or authorization of a subordinate agency in a department. The Cabinet Secretaries have authority to develop their own organizational patterns. They can establish bureaus and services as they feel the need.

The S. 2 provision is not mandatory. It authorizes a service.

There are both internal and external reasons why the provision for a service is appropriate in S. 2.

There are several agencies in the Department of Interior concerned with water resources. They would not be very alert, ambitious, or aggressive if they did not each want jurisdiction over the new S. 2 program, or at least a part of it. There will be pressure within the Department of Interior to assign the administration to a single existing agency, with a limited mission in the water resources field, or to segment it among several such agencies and thereby make it a disorganized operation by limited mission agencies.

In accordance with strong recommendations of our own Select Committee on Water Resources, of the National Academy of Sciences and other agencies which have studied the water research problem, S. 2 calls for a broad, multidisciplinary approach to water research.

It wisely calls for collegewide or universitywide institutes or centers at the State level, so no single discipline will dominate and narrow the approach to water problems at State level.

We must have that same broad, multidisciplinary approach at the Federal level—a single agency which looks at water from the viewpoint of all sciences and disciplines, not a single, narrow one.

The external pressure which the Department will feel in regard to administration of the program is exemplified in the chamber of commerce letter itself. It says:

> Existing bureaus and services within the Department of the Interior should be assigned the responsibility of administering the programs that would be authorized by this legislation. * * *

Here again, from the outside, is the pressure to segment and disperse responsibility for the program, so it will become a group of limited mission programs rather than a broad approach.

Since section 302 only authorizes a water resources service, it in reality amounts to a strong expression of the belief of Congress that a single, new broad agency should handle administration, which is certainly desirable.

There is an unusually high relationship between the competence of people who run research programs and the results, or returns, from those programs. Highly trained, alert, and ingenious men can make research dollars repay investment hundreds of times over. No amount of money can produce results from a staff which lacks competence to do research work.

The provision for five extra positions in the water resources service at salaries which will attract and hold competent men will undoubtedly prove a very wise investment.

Mr. President, I regret that the chamber of commerce did not have a witness at the hearing on S. 2. I believe that we might have persuaded them, or they might have been persuaded by other witnesses, that the suggestions they have made are either sufficiently provided for in the bill, or would work to its detriment.

But, in any event, Mr. President, the most significant fact about the chamber is that it has, in this instance, approved a new Federal program.

The chamber has not quibbled about the expenditures proposed.

It has not objected to the formula Senator ANDERSON has given for basic support to State research centers, supplemented by two matching funds which will increase over 5 years to a total of $15 million per year.

I want to congratulate the Chamber of Commerce of the United States for recognizing the basic merit of S. 2, and to congratulate the Senator from New Mexico for presenting us a proposal so obviously right that it has won this unusual approval.

Mr. MOSS. Mr. President, every time a measure which implements recommendations of the Senate Select Committee on National Water Resources takes a stride closer to enactment, I feel there should be rejoicing in the arid sections of the West and Southwest, because our very future is tied up in the extent to which we can husband our water supply—can increase and make better use of the water we have.

This bill before us today, S. 2, would help fulfill the third recommendation made by the Water Committee—the recommendation calling for a greatly expanded and comprehensive Federal program of scientific research on water, probing ways both to increase our supply and to increase the efficiency of the use of available water. And it would do this in a most practical and effective way in that it would, in many cases, strengthen research already established and staffed in many of our land-grant colleges and universities, or in other competent institutions of higher education in many States. In others it would provide a modest beginning, which we hope would attract other funds.

It was my privilege to serve on the Water Resources Committee and although I knew previously in general the outlines of our coming water shortage, my service on that committee has intensified my interest in legislation to head off our impending water bankruptcy.

Full development of all available water supplies will be necessary if we are not to be deficient in meeting consumptive water requirements by 1980 in five major river basins or areas: The South Pacific area, the Great Basin area, the Rio Grande-Pecos, the Lower Colorado and the Upper Missouri River Basin. I would point out that my State of Utah lies astride two of these water deficient basins—the Great Basin and the Lower Colorado River Basin.

Another three great water areas will be at the limit of their supplies, with full development by the year 2000. This group includes the western Great Lakes area composed of Michigan, northern Indiana, most of Illinois, and eastern fractions of Wisconsin and Minnesota. It also includes the western gulf area in Texas, and the upper Arkansas-Red River Basins involving major parts of Colorado, Kansas, and Oklahoma, and smaller sections of northeastern New Mexico and northern Texas.

Briefly, by the year 2000 the western half of this Nation excepting the Upper Mississippi, the immediate Mississippi River drainage area, the Lower Missouri and the Columbia River Basins will have come to the end of present available water resources.

Nor will the rest of the Nation escape the water shortage—by the year 2000 they will also be trying to conserve purify, recycle, and transport water to points where needed, and their investments in water facilities could run well over $10 or $15 billion a year.

So this is not just a regional problem. It is one all of us must solve, and this bill before us today takes a giant step in that direction.

The 50 water research centers which this bill would establish in universities or colleges, and for which it would authorize $100,000 each a year, would be ideally located and suited to passing on to water users the fruits of their research.

Dr. D. F. Peterson, dean of engineering at the Utah State University, who testified in behalf of the bill, made an excellent statement on the capability of colleges and universities to make available the knowledge resulting from work done in this field. Although Dr. Peterson's statement has been summarized in the very well prepared report on this bill—Senate Report 117—I would like to repeat parts of it for emphasis. He stated:

> Many of the problems of applied research will have to be attacked item by item, location by location. Water resources development must be closely linked to community and even individual objectives and I believe the State research efforts will greatly assist the States in discharging their responsibilities in planning and development.
>
> Bringing the universities into the picture has many advantages besides the production of increased manpower. Universities since World War II have demonstrated their capability in administration of research. The interdisciplinary resources of the university should accelerate the progress of basic and interdisciplinary research. In the university, research and teaching work together not only to develop the body of new knowledge, but with the same effort to spawn the manpower capability which can carry the new knowledge to common practice.

Dr. Peterson is well equipped to make such observations. Utah's land grant college, Utah State University, is already far advanced in the development of a water research institute—the Utah Water Research Laboratory. The Utah State Legislature has appropriated substantial amounts for it, and during the past 2 years two Federal grants of $200,000 each were obtained for the Logan laboratory, one from the National Science Foundation and one from the National Institutes of Health. The laboratory is now a going concern, and is in a strong position not only to soundly expand its research activities through the additional funds which would be made available through passage of this bill, but to provide the research facilities and instruction necessary to train some of the water scientists which will be needed in States and areas just inaugurating water research programs.

The Utah State University is also the location of a new Forest Service Watershed Research Laboratory for which facilities are now being constructed, and for which funds were appropriated in the 87th Congress. These facilities should be ready for use in about a year, and they will contribute to the growing reputation of the university as a water center.

It has been most satisfying to me to have a part in securing the additional Federal financing for the State water research laboratory and to work with the distinguished Senator from Mississippi [Mr. STENNIS] in establishing the watershed research laboratory at USU, just as it has been my pleasure to cosponsor S. 2 and support it in committee and here on the floor.

So I say with great earnestness that this is one of the most significant bills on which we will have an opportunity to act this session. It is important to all of us in all sections of the country—only through basic research can we increase our available supply of water and make the most efficient use of what we now have. I trust that this bill will pass.

PRIORITY TO ELECTRIC CONSUMERS IN PACIFIC NORTHWEST TO ENERGY GENERATED AT HYDROELECTRIC PLANTS

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the pending business be temporarily laid aside, and that the Senate proceed to the consideration of Calendar No. 100, Senate bill 1007, to guarantee electric consumers in the Pacific Northwest first call on electric energy generated at Federal hydroelectric plants in that region and to guarantee electric consumers in other regions reciprocal priority, and for other purposes.

Mr. KUCHEL. Mr. President, if I correctly understand the request of the Senator from Montana, it is that the pending business be temporarily set aside and that the bill, the title of which has been read, be placed before the Senate.

The PRESIDING OFFICER. The bill S. 2 would be temporarily set aside for consideration of the bill S. 1007. The Senator is correct.

Mr. KUCHEL. For the RECORD, so that the situation will be clear in the RECORD for Senators to see tomorrow, it is my understanding that the bill S. 2 would be temporarily set aside so that the distinguished author of the bill S. 1007, the junior Senator from Washington [Mr. JACKSON], may speak concerning it. No votes of any kind on the measure are contemplated today. At the end of whatever discussion may ensue on the bill S. 1007, the Senate will return to consideration of Senate bill 2.

Mr. MANSFIELD. Tomorrow. The Senator is correct.

Mr. KUCHEL. I thank my able friend.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Montana?

There being no objection, the Senate proceeded to the consideration of the bill (S. 1007) to guarantee electric consumers in the Pacific Northwest first call on electric energy generated at Federal hydroelectric plants in that region and to guarantee electric consumers in other regions reciprocal priority, and for other purposes.

Mr. JACKSON. Mr. President, S. 1007, a bill to guarantee electric consumers in the Pacific Northwest first call on electric energy generated at Federal hydroelectric plants in that region and to guarantee electric consumers in other regions reciprocal priority, and for other purposes, is similar to S. 3153, passed by the Senate on August 8 of last year. It differs from S. 3153 in that two clarifying amendments suggested by Governor Hatfield of Oregon have been added to the bill.

The purpose of this bill is to define the primary marketing area of the Bonneville Power Administration and permit the orderly marketing of surplus or seasonal hydroelectric power outside Bonneville's present marketing area.

The Northwest is unique in generating 97 percent of its electricity by water power. The area has had for many years and will continue to have large surpluses of seasonal or dump power, that is, power which is available when streamflows are normal but is not available in critical water years. At the present time, billions of kilowatt-hours of this power and millions of dollars of revenue are being wasted in water spilled over the great power dams of the Northwest. A market for this surplus power is available in the Southwest, principally in California.

At the time of the passage of the Bonneville Power Act in 1937, Bonneville's marketing area was defined as that area within "economic transmission distance." Transmission distance then was limited by technology to approximately 200 miles. With the technological developments of recent years, it is now possible to transmit power thousands of miles. As a result, with the surplus seasonal power in the Pacific Northwest and a marketing need for such power in the Southwest, it was inevitable that there would be proposals to construct a high-voltage interconnection or intertie linking the Pacific Northwest to the Pacific Southwest and permitting the sale of Pacific Northwest surplus power. The early construction of such an interconnection was recommended by a special task force of the Department of the Interior. Subsequently the Pacific Gas & Electric Co. and the Pacific Power & Light Co. announced plans for a 110-mile 230,000-volt interconnection between southern Oregon and northern California, capable of being stepped up to a total voltage of 550,000 volts. Recently, at the request of the House and Senate Appropriation Committees, the Bonneville Power Administration circularized the utility industry of the west coast to determine the extent of interest among non-Federal utilities in the construction and use of such an intertie. To date Bonneville has received seven proposals for non-Federal construction of all or parts of two intertie lines.

This bill, like last year's bill, contains no authorization for a Federal intertie. Existing statutes authorize the Secretary of the Interior to construct such a line. This bill does facilitate the fullest practical use of an intertie whether it is built by the Federal Government or by non-Federal public or private utilities. It provides for the sale in the Pacific Southwest of existing Northwest surplus energy and any additional surplus energy which may be installed. It provides for transmission north of energy made available in the Southwest to firm up a portion of the Northwest's secondary energy, thereby making optimum use of the plant facilities in both regions. This is possible because the Northwest's electric consumption has a winter peak and the Southwest's electric consumption has a summer peak. It will be possible by maximum use of the resources of both regions to save new plant investment greater than the cost of any intertie, with resulting economies to electric users in both regions.

Whatever form an intertie may take, it is necessary to define the primary marketing area of the Bonneville Power Administration and to establish by law the ground rules for transfers of power between that marketing area and other regions. This legislation meets that need. Under this legislation an intertie could not be used to sell outside a region year-round firm hydroelectric power generated by the Federal Government in that region. Firm power is power that could be produced if the most critical river flow on record should reoccur. It is power absolutely essential to the region. None of the intertie proposals and none of the users of the proposed intertie has asserted that year-round firm hydroelectric power for which there is a demand in a region should be sent outside that region. Yet if an intertie is built without the orderly ground rules for transfer of power set up by this proposed legislation, it would be possible to require such a shipment of needed firm power with disastrous economic consequences to long-established industries and private utilities. S. 1007 expressly permits the Bonneville Power Administration to sell surplus electric energy and peaking capacity outside its described marketing area subject to recall when such electricity is needed within the marketing area.

The marketing area described in S. 1007 was selected because it makes economic sense. It would comprise some 259,000 square miles and would be one of the largest marketing areas of any electric utility system in the United States. By comparison, the marketing area established by Congress for the Tennessee Valley Authority is about one-third the area described in this bill.

This bill has been drafted by the Bonneville Power Administration with great care in consultation with all of its customers, public agencies, private utilities, and private industry, and the Governors of Washington, Oregon and California.

I add that the bill is being sponsored by all the Senators from the Pacific Northwest.

In summary, S. 1007 should be enacted:

First. Because it will help end a shocking waste of resources. In 1962 $23 million of unsold surplus power were lost over the spillways in the Pacific Northwest; this is the equivalent of 20 million barrels of oil wasted.

Second. It will provide for the orderly transfer of large quantities of power between the regions of the Pacific Northwest and the Pacific Southwest with great savings to the electric consumers of both regions.

Third. It will provide for the sale of such surplus power without disastrous and indefensible economic consequences to private investment and employment which might otherwise occur.

Mr. President, these are only some of the compelling reasons for the enactment of S. 1007.

The PRESIDING OFFICER. What is the will of the Senate?

Mr. METCALF. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. CLARK. Mr. President, I ask unanimous consent that further proceedings under the quorum call may be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE UNITED STATES-UNITED NATIONS POLICY IN THE CONGO

Mr. CLARK. Mr. President, when I had occasion to address the Senate a month or so ago I pointed out the substantial success of the United States-United Nations policy in the Congo. I invited attention to how wise the policy of our President and of our State Department in that area had been, as a result of which the Congo had been pacified under the leadership of the United Nations and peace reestablished there under the leadership of Premier Adoula.

Recent newspaper accounts indicate that, despite the criticism of many in this country and elsewhere—criticism by those who felt we should not have supported the United Nations; criticism by those who supported Mr. Tshombe and his white mercenaries in Katanga—peace and parliamentary government are making substantial progress there.

Mr. President, I ask unanimous consent that an article which appeared in this morning's New York Times, entitled "Congo's Regime Wins First Test," under the byline of J. Anthony Lukas, written in Leopoldville, may be printed in the Record at this point in my remarks.

There being no objection, the article was ordered to be printed in the Record, as follows:

Congo's Regime Wins First Test—Adoula's New Government Beats No-Confidence Move

(By J. Anthony Lukas)

Leopoldville, the Congo, April 21.—Premier Cyrille Adoula's new "Government of National Reconciliation" has defeated the first challenge by the die-hard opposition in Parliament.

After a noisy 7-hour debate that ended late last night, government supporters in the senate defeated a nonconfidence motion against the cabinet. The vote was 31 to 20 with 4 abstentions.

The margin indicates that Mr. Adoula's new coalition, formed only 5 days ago, has at least a temporary majority in Parliament.

The new government contains a wide sampling from the opposition, which has been harrying the Premier for months. Only the extremists remain in opposition.

SIGNIFICANT VICTORY

Observers believed last night's victory was particularly significant because the no-confidence motion was based on an issue that had aroused concern cutting across party lines. This was that Mr. Adoula planned to send the legislators home for an extended vacation June 30 and rule by decree.

Opposition speakers charged during the debate that the Premier recently told associates he would take this step, relying on powers in the controversial article 67 of the country's fundamental law.

This article provides that the present legislature must sit at least 3 years, but not more than 4 years. The 3 years would be up June 30.

Opposition speakers charged last night that Mr. Adoula would close the legislature on that day and rule by decree until new elections could be held. That would probably be several years away.

As evidence of Mr. Adoula's intentions, the motion cited statements he was alleged to have made to his associates, his past handling of the Parliament and a message sent from New York to the Adoula government here.

Etienne Kikaka, chief spokesman for the opposition, declared that this message contained instructions for Mr. Adoula from quarters in the United States on how to deal with Parliament.

"This is an authentic document," he shouted, waving a piece of paper.

It was later identified as a French translation of an article that had appeared in the New York Times. The message apparently was sent to the Ministry of Foreign Affairs here by the Congolese Mission at the United Nations.

The article, written by the Times' correspondent in Leopoldville, was an analysis of the political situation here on the eve of last week's cabinet reshuffle. It appeared in the Times of April 7.

The motion of no confidence quoted only part of one paragraph from the French translation in support of the charge against Mr. Adoula. The quotation, in the original English, is as follows:

"A cabinet reshuffle may ease the situation, but skeptics have their doubts. There are increasing suggestions that the way to handle Parliament is to send it on a nice long vacation again, maybe 2 years instead of 2 months this time. There is even talk of a military coup d'etat."

In the original article that paragraph ended with the words "if the opposition should get out of hand again."

In his response last night Mr. Adoula did not deny he was considering using article 67 as a means of ending this legislature's term on June 30.

He denied, however, that this would amount to a dissolution of Parliament, as the opposition alleged. The Premier said Parliament could be dissolved only by the head of state, President Joseph Kasavubu, with the concurrence of two-thirds of at least one chamber.

Mr. CLARK. Mr. President, the article points out that Premier Cyrille Adoula's new "Government of National Reconciliation" has defeated the first challenge by its diehard opposition in the Parliament. It should be pointed out that, in an effort to pacify the various political factions in the country, Premier Adoula had brought into his government all save the most irreconcilable factions in the Congo. The question was raised as to a vote of confidence for his government, and the Premier won by a vote of 31 to 20.

This new government contains a wide sampling from the various factions of the opposition which had been harrying the Premier for months. I believe it is an indication of the sound statesmanship of Mr. Adoula, who is strongly supported by the United Nations and the United States, that he has been able to win this parliamentary fight.

It is interesting to note that those who are attempting to create more havoc in the Congo, including, of course, the Soviet Union, which has found some rather strange allies in this country in that regard, have been misquoting newspaper articles which have appeared in this country—indeed, in the New York Times.

The New York Times account referred to in the article which I have placed in the Record was quoted out of context, and if read as a whole is clearly a sound report of political conditions in the Congo, and not critical of Mr. Adoula's government.

I am happy to note again for the record that the U.S. policy in the Congo has been extremely successful.

In this connection, I ask unanimous consent that an interesting column by Mr. Roscoe Drummond, which appeared in the Philadelphia Inquirer this morning, may also be printed in the Record at this point in my remarks.

There being no objection, the article was ordered to be printed in the Record, as follows:

Column by Roscoe Drummond

Washington.—Whenever the Soviet Union loses the diplomatic initiative, it turns to propaganda to cover up. Moscow is up against it in Africa. Things are going badly, with their reach for power blocked or blunted by the African nations themselves.

So Pravda is called to the front lines. It aims a barrage at those awful "Western imperialists," whom it accuses of being intent upon fastening colonial rule on the whole African continent.

This bizarre blast comes in the wake of one of the most remarkable achievements in behalf of political freedom in all human history: In only 3 years—from 1960 to 1963—the once colonialist Western nations have furthered the independence of 23 African countries and welcomed them into the United Nations.

At the same time the Soviet Union grips tenaciously the nations of Eastern Europe which it took by force after the Second World War and which it had to hold by force when the people of East Germany, Hungary and Poland successively sought to free themselves from Soviet rule.

It reached out to expand its imperialist power to Cuba and has made such menacing gestures toward the Middle East and Africa that local communism has lost much of its lure.

The fact that the Kremlin has been so unsuccessful in extending its sway into the Middle East and into Africa undoubtedly explains, in part, the full-page editorial in Pravda appealing to the Africans to be wary of any and all association with the West. This is what's been happening:

Ghana and Guinea have shown themselves exceedingly disappointed in their relations with the Soviets and are encouraging investment of Western capital to reinforce their economies.

The new African states are showing little interest in embracing the proclaimed Communist answer to their economic ills. The broad tendency is toward a mixed economy with some public ownership and a substantial borrowing from the ways of Western society.

Former French colonies which have now won their independence have their eyes far more on the burgeoning European Economic Community than on Russia.

Arab Nations in North Africa have been giving the Reds the back of their wrist. Arab-Soviet ties have been steadily deteriorating, as evidenced by the suppression of Communist parties in Iraq, Syria, Algeria, Morocco, Tunisia and the United Arab Republic.

The Kremlin is not, of course, giving up. It never does. It is staking much of its hopes for expanding its influence on the indoctrination of several thousands of African students who have been attending Soviet universities and colleges.

But the indoctrination isn't going very well. There are signs that the African students are becoming disenchanted. A group of them recently bolted Bulgaria, complaining of racial discrimination and police brutality.

Mr. CLARK. This article points out, in Mr. Drummond's usual, clear style, how very successful U.S. policy has been, under the Kennedy administration, throughout Africa; how 23 new African countries have obtained their independence between 1960 and 1963; have been welcomed peacefully into the United Nations; how much of this is due to the efforts of both the Kennedy administration, and the Eisenhower administration. This article points out that this has been a great diplomatic triumph over the Kremlin and Russia, because of the support we have given the African policy of the United Nations.

I think everyone in our country who supported either President Eisenhower or President Kennedy in their African policy is entitled to feel well rewarded for standing up against the divisive forces of this country which did so much in the last 12 months to try to confuse and obstruct the policy of attaining peace and nationalism in the new nations of Africa.

I am happy to say that whatever efforts there have been from certain racist groups in this country to keep the people of Africa from obtaining control of their own countries, and getting their independence and freedom, appear to have been defeated.

No one can say how long this success can continue, and I would be the last to predict that our policy in Africa will not suffer setbacks in the future, as they have in the past; but I am confident we are on the right track. When we stand up for freedom and independence without regard to race, color, or creed, we are standing for the finest traditions of our country, and we have achieved great success in following that policy in what was once called the Dark Continent.

U.S. POLICY TOWARD CUBA

Mr. CLARK. Mr. President, I have noted during the weekend and the last few days a new spate of criticism with respect to the administration's Cuban policy. Articles have appeared with the suggestions that the authors have had access to confidential intelligence information indicating there has been a large buildup of Russian forces in Cuba.

It is suggested that the number of troops there has increased substantially, rather than been reduced. It is even suggested that the President of the United States has been fooled in the intelligence information which he is receiving. It is suggested that a certain U.S. Senator on the other side of the aisle knows more about the intelligence situation in Cuba than does the President of the United States, the Chief of our CIA, the intelligence agencies of the Joint Chiefs of Staff, and others.

This may well turn out to be correct in the long run, Mr. President. I have no secret information with respect to intelligence in Cuba. I do have a feeling that the President of the United States and Mr. McCone, head of the CIA, who, I am sure, is advising the President on the basis of the most accurate and up-to-date intelligence information which is available to our country, are receiving a great deal better information than one could get from reading Hanson Baldwin in the New York Times and listening to certain Members of this body who would have us believe that they know more about what is going on in Cuba than do the President and his advisers.

It so happens that there appeared in this morning's Philadelphia Inquirer a lead editorial entitled "Charting a Course on Cuba."

I ask unanimous consent that the editorial may appear in the Record at this point in my remarks.

There being no objection, the editorial was ordered to be printed in the Record, as follows:

Charting a Course on Cuba

America's agonizing debate over the problem of Cuba, and what to do about it, is in danger of getting bogged down in generalities at a time when the emphasis should be on specific courses of action.

Discussion of hypothetical conditions under which U.S. Armed Forces might invade Cuba does not get to the nub of the matter.

As we see it, U.S. policy on Cuba should have these four fundamental components:

1. The foremost objective should be the establishment of national independence, individual freedom and democratic government for the Cuban people.

2. The primary emphasis should be on attaining this objective by peaceful means rather than by war. (War is not a legitimate arm of diplomacy; it is the result of the failure of diplomacy.)

3. The first priority of immediate goals should be to obtain the removal of Soviet troops from Cuba and whatever weapons of aggression may still be there.

4. The sole authority over U.S. foreign policy must be held at all times by responsible officials of the U.S. Government, not by Cuban exiles who have been given sanctuary in this country. Aid and advice of the exiles should be enlisted when appropriate but a great nation cannot allow any foreign group, no matter how sympathetic we are to their aspirations, to call the shots in a situation where the issue of peace or war may hang in precarious balance.

To supplement this kind of policy on Cuba it will be necessary to learn definitively and at an early date whether or not Premier Khrushchev intends to get those Russian troops out of Cuba. This query must be put to Moscow in a reasonable but blunt manner. If Mr. Khrushchev chooses to consider such a question an ultimatum, then so be it.

An affirmative response is not so unlikely as some of the pessimists think. The Soviets, for all their ruthlessness, are practical men. They know that America, not Russia, holds the high cards in the Cuban controversy.

If the Russians insist on continuing their moves to make Cuba a Soviet military state there are a number of steps open to the United States and other members of the Organization of American States, and perhaps the North Atlantic Treaty Organization, that need not provoke war. Collective economic sanctions—including, possibly, some kind of quarantine or blockade—could be applied as circumstances warrant.

Bang-bang boys who want to solve the problem by opening fire on Cuba ought to bear in mind that the aim is to save the country, not annihilate it. Last resorts should not be applied until first resorts have been fairly tried.

The weakness in American policy on Cuba is not, as some critics contend, a reluctance to use armed force. That is a strength. The great need is for more vigorous application of economic and diplomatic weapons.

Mr. CLARK. Mr. President, that editorial, from my point of view, states accurately and ably what our policy in Cuba should be. The policy advocated by this fine Philadelphia newspaper is the exact policy of the President of the United States.

It calls for, first, as the foremost objective, the establishment of national independence, individual freedom, and democratic government for the people of Cuba.

That is our national objective, the first and primary one. That is the policy of the President of the United States.

The second point is stated as being the attaining of that objective by peaceful means rather than by war. The Inquirer points out that war is not a legitimate arm of diplomacy; it is the result of the failure of diplomacy.

I am glad to say that despite the many war-whoopers, as Mr. Lippmann calls them, some of them among our own Members of this body, the President of the United States is committed to the objective of attaining that goal through diplomacy, legitimate sanctions short of war, conferences with our allies in the Organization of American States, and, through diplomatic efforts on the part of Latin American countries as well as our own, toward attaining the first and foremost objective, which is the establishment of national independence, individual freedom, and democratic government for the people of Cuba.

The third point made by the editorial is that the first priority of immediate goals should be to obtain the removal of Soviet troops from Cuba and whatever weapons of aggression may still be there.

That surely is true. That is certainly one of the most important objectives of this administration. The point is we mean to do it by diplomatic means, we mean to do it by keeping our treaty obligations, not by violating them, we mean to do it by supporting the United Nations, we mean to do it by supporting the Organization of American States. We do not mean to do it in an immature, childish way, by taking an attitude of "March up San Juan Hill"; by sending American boys to die in Cuba; by starting a war which, almost without question, would spread across the world; or imposing that kind of blockade which would, in itself, be a violation of international law, and therefore an act of war.

The fourth point made in the editorial is that the sole authority over U.S. foreign policy must be held at all times by responsible officials of the U.S. Government, and not by Cuban exiles.

We want to support the Cuban exiles in their legitimate desires to return to Cuba. We hope in due course they will be able to return and take their legitimate place in the economy and in the Government of that country, which we can hope will be under democratic auspices. We hope that they may be able to return to their native country and help their country take its rightful place among the democratic nations and people who believe in freedom.

But the way to do it is to make perfectly clear that we, too, believe in freedom, that we, too, believe in international law, that we, too, believe in keeping our treaty commitments. Here is the sentence from the editorial which I commend to the consideration of my colleagues in the Senate:

> Bang-bang boys who want to "solve" the problem by opening fire on Cuba ought to bear in mind that the aim is to save the country, not annihilate it.

I support that position wholeheartedly. I am happy to note that it is the policy of the President of the United States. I call attention to the fact that the Philadelphia Inquirer, its publisher and editor, my good friend, Walter Annenberg, has always supported the Republican Party in national elections. That makes this editorial even more significant than before.

In this connection we should give careful attention to the very intelligent answer made by the President of the United States in the question and answer period which took place after his address to the American Society of Newspaper Editors in Washington last Saturday.

I ask unanimous consent that the question asked at the conclusion of his speech and the answer that he made thereto may be printed in full in the RECORD at this point in my remarks.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

RIFT WITH CUBAN EXILES

Q. Mr. President, would you give us your views or whatever you have to say about Miró Cardona and his charges that you backed out on a promise for a second invasion and the other things in his statement?

A. Why, I think the Department of State has already made a comment which represents the views of the Government. Dr. Cardona lives in Miami which is the center, of course, of the exiles, the center of their hopes, and I think that a good many Cubans feel that the only way that they can return to Cuba is by a military action of the United States.

We're conscious of our obligations to our own people, our own security, our alliances, our responsibilities, as I said, as the chief defender of freedom all over the world. We have not determined that it's in our national interest or in the general interests of the hemisphere for us to launch an invasion. And naturally, that disappoints the exiles. But, as the State Department statement said, the foreign policy of the United States, when so much depends upon us, must be made by the United States. And however much we may sympathize with their desire to be free, the United States cannot launch itself into a massive invasion of Cuba without considering the worldwide implications to other free countries and also its effect upon our own position.

Now, as to his charges, I don't think it's necessary to go through them. Quite obviously nobody in the U.S. Government ever informed anyone in the Government or outside the Government, Dr. Cardona or anyone else, that we were going to launch, or committed ourselves to launch, a military invasion of six divisions.

We appreciate very much the fact that a good many Cubans have volunteered for the American Armed Forces. I think that they can be very valuable there. No one knows what the future is going to bring. But I hope that Dr. Cardona and others will realize that this is not a struggle between the United States and the exiles. It's really a struggle against the Communist infiltration in this hemisphere. And while we may disagree as to what actions we should take to remove it, and while my obligations are somewhat different from Dr. Cardona's, I would hope that it would be possible for us to work together in the general interest, and that is the object of this Government.

We want to work with Dr. Cardona and all the other Cubans, but we must maintain the control of our policy here in the United States and here in Washington, and will continue to do so.

RELATIONS WITH CASTRO

Q. I'd like to read two others here also on the question of Cuba. If Castro remains in power for another 5 years, will the United States continue in its refusal to deal with his government? And the second one is, 2 years ago tomorrow, Mr. President, you stood here and told us Fidel Castro's days were numbered. You said, "Our restraint is not inexhaustible." You said we must not let, "the inter-American doctrine of noninterference conceal or excuse a policy of nonaction." Now, sir; Communist domination of Cuba is, if anything, more complete than 2 years ago and is stiffened by Russia. Many Americans believe our policy toward Cuba is indeed one of nonaction. What can you say to persuade them that this is not so? When, if ever, is our restraint going to come to an end?

A. Well, I hope our restraint or sense of responsibility will not ever come to an end. Now in the general question, since the last 2 years the United States has taken a good many actions in—to contain the spread of communism in the hemisphere. We—a good many nations in the Alliance for Progress, the Punta del Este declaration, the San Jose declaration—a number of nations have broken off diplomatic relations. Only five continue them with Cuba.

The free world trade—has dropped from 800 million to 80 million. The—efforts are being made since the San Jose conference to work with other countries to control the movement of personnel in and out of Cuba. It's quite obvious now to the hemisphere and, in fact, to the world, that Castro is merely a Soviet satellite. Every survey, every study, every meeting shows a sharp deterioration in the image that he once had as a great nationalist leader. And now he's generally regarded in the hemisphere as having sold out to the Communist movement and having now become a spearhead for the Soviet advance.

CONSTANT SURVEILLANCE

In addition, the United States maintains a constant surveillance. We've indicated that we would not permit any troops from Cuba to move off the island of Cuba in any offensive action against any neighboring country. We've indicated, also, that we would not accept a Hungary in Cuba—the use of Soviet troops against Cubans if there was any internal reaction against Castro. In many ways, we have attempted to isolate Cuba and to indicate our determination to continue that policy until Cuba is free.

Now after we've done all those steps, the—there are two alternatives—there are two additional policies which could be carried out.

I think that when those talk about—talk about Cuba, we ought to say what we want to do. We shouldn't say, Well, let's do something, or How long is our restraint going to last? I would think the two remaining policies are, one, a blockade, which of course brings us once again to a confrontation with the Soviet Union, and the other is invasion of Cuba.

In my judgment, it would be a mistake to carry out either one of those policies today. I don't know what conditions are going to bring in the future. No one predicted with certainty what was going to happen last fall. I don't know what's going to happen any place in the world. But—therefore, I think that we should maintain our strength and our determination, but I don't think that the conditions would serve the interest of the United States or of our allies to carry out either an invasion or blockade under these present conditions.

The United States is responsible for the independence of dozens of countries stretching from South Korea to Berlin. It is responsible for the defense, really, of Western Europe. It is responsible for the major struggle against the Communists in our own hemisphere. For 6 percent of the world's population we carry tremendous burdens. I do not think we can indulge ourselves at this point, if that is the proper word, in concentrating all of our material strength in one section of the world and be indifferent to its consequences elsewhere.

Now I don't know—I don't accept the views Mr. Castro is going to be in power for 5 years. I can't indicate the role by which there will be a change. But I've seen enough—as we all have—enough change in the last 15 years to make me feel that time is on the—that time will see Cuba free again, and I think when that happens the record will show that the United States has played a significant role.

But for the present, and for a great power which carries worldwide responsibility, I think our present policy is the right one. If the American people decide differently, then, of course, they have an obvious remedy. But for now we intend to follow this policy.

Mr. CLARK. Mr. President, the answer, in short, given in colloquial terms, but with the clarity for which our President is famous, indicates his strong support of the present policy in Cuba. I call particular attention to the fact that he says in his statement, after reviewing the strong steps we have taken to discourage Mr. Castro:

> After we've done all those steps * * * there are two additional policies which could be carried out.

Then he points out that one is a blockade, which, of course, once again brings us into confrontation all over the world with the Soviet Union, and the other is an invasion of Cuba.

The President turns his back on both of these courses. He takes what I believe, I say again, to be a mature and sensible and commonsense approach to the very difficult problem confronting us 90 miles from our shore. I commend him for his maturity. I commend him for the soundness of his policy.

TEXAN STRESSES NEED FOR S. 1200 WHICH WOULD GIVE VALIDITY TO THE WORDS "FHA INSURED"

Mr. GRUENING. Mr. President, on March 28 I introduced a bill designed to give validity to the term "FHA insured" as a protection for home buyers. Twelve Members of the Senate have joined as cosponsors.

The national response to this legislation is heartening, and I will from time to time bring to the attention of my colleagues comments which are particularly pertinent.

Therefore, I ask unanimous consent that the text of a letter I have received from Texarkana, Tex., be printed in the RECORD at the close of my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

TEXARKANA, TEX., *April 1, 1963.*

Senator ERNEST GRUENING,
Senate Office Building,
Washington, D.C.

DEAR SIR: It is my understanding that you plan to submit a bill that will require the Federal Housing Administration to correct major defects that appear after construction of an FHA house.

We need such legislation badly in this country, as the public is being cheated right and left on FHA housing.

FHA has had the responsibility, by implication if not by law, to protect the public in the past but has not lived up to this responsibility.

How many times have you seen the advertisement "Built Under FHA Inspection," or "Conforming to FHA Specifications"?

The average citizen, who is not expert in construction, believes that FHA sees that their insured loans houses are properly built and this certainly is not the case.

I know of several persons who contacted FHA about defective construction and were told that this was a matter between builder and buyer, in spite of the fact that they had made several inspections while the house was being built.

Another example of FHA's laxity is in the evaluation of houses. Old John Q. Citizen doesn't know the value of a house and is generally content to pay what FHA says a place is worth. I will bet you that more often than not, the FHA evaluation is higher than the actual market value of the house.

I am sure that all FHA people are honest, but if they are not, this would be a real fine opportunity for an unscrupulous builder and FHA employee to rook the public. Maybe they do, who knows?

I surely hope you get some help from Congress on this.

Very truly yours,

——— ———.

AUTHORITY FOR THE VICE PRESIDENT TO SIGN THE ENROLLED BILL H.R. 4715

Mr. HARTKE. Mr. President, I ask unanimous consent that notwithstanding the adjournment of the Senate today the Secretary be authorized to receive messages from the House and that the Vice President be authorized to sign the enrolled bill (H.R. 4715) to incorporate the Eleanor Roosevelt Memorial Foundation, duly passed by the two Houses and found truly enrolled.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADJOURNMENT

Mr. HARTKE. Mr. President, I move that the Senate adjourn until tomorrow at 12 o'clock noon.

The motion was agreed to; and (at 3 o'clock and 46 minutes p.m.) the Senate adjourned until tomorrow, Tuesday, April 23, 1963, at 12 o'clock meridian.

EXTENSIONS OF REMARKS

Washington Report

EXTENSION OF REMARKS
OF

HON. BRUCE ALGER

OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Monday, April 22, 1963

Mr. ALGER. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following newsletter of April 13, 1963:

WASHINGTON REPORT BY CONGRESSMAN BRUCE ALGER, APRIL 13, 1963

SUPPLEMENTAL APPROPRIATION BILL—ADMINISTRATION BOONDOGGLE

The fiscal irresponsibility of the Kennedy administration was clearly indicated this week with the passage by the House of the supplemental appropriation bill of 1963 containing $450 million worth of new public works projects. In spite of determined Republican effort to cut this $450 million boondoggle from the bill it was passed with 208 Democrats voting for it, and 151 Republicans against it. Only 20 Republicans (of 177) voted for the spending and 33 Democrats (of 258) against it, proving once again that basically the Republicans stand for fiscal responsibility and reduced Federal spending. I spoke against the bill as follows:

"I oppose this deficiency or supplemental appropriation bill because we are appropriating money for new projects which is not the purpose of a supplemental appropriation bill. The list of new starts * * * clearly shows the improper procedure. Further, it is wrong to spend additional money for public works at this time of deficit financing. The accelerated public works project was wrong at its inception last year and restoring money to the program is wrong now. Pump priming did not work before in correcting or relieving unemployment and it will not now.

"Our country faces fiscal collapse because of wild Federal spending. We must economize to protect our currency value, gold on hand, and our entire economy. We must bolster confidence in our economy and Government by responsible action now. Let us reduce Federal spending, not increase. Let us cut the national debt, not add to it. Let us then reduce taxes. Each of these steps separately and collectively will bolster confidence in our Government's fiscal self-discipline and preserve our private economy. Let us stop financing socialism. Capitalism is the bulwark of our country's economic health, not Federal spending."

DEVALUING OUR CURRENCY THROUGH SUBTERFUGE

H.R. 5389, to repeal the law dealing with the purchase of silver, passed the House: This action in reality sets the stage for devaluation of our currency and, in fact, actually does devalue the dollar. The bill's stated purpose is to free silver from Federal controls by (1) Repealing the Silver Purchase Acts, (2) Permit the Federal Reserve System to issue in $1 denominations under the same terms and conditions it now issues currency in $5 and higher denominations. (This means substituting Federal Reserve notes for the present $1 bills which are silver certificates, backed by 100 cents on the dollar in silver.) (3) Remove the tax on transfers of any interest in silver bullion. This legislation rightfully comes within the jurisdiction of the Banking and Currency Committee, but because of the part dealing with the transfer tax, it had to also be considered by my Committee on Ways and Means.

The repeal of the Silver Purchase Act is long overdue and I am for it. Federal pegging of the price of silver, instead of a free market, is wrong. My opposition to this bill is the lack of guidelines and stemmed from (1) it actually does devalue the dollar because it provides that our $1 bills which are now backed by 100 cents worth of a precious metal (silver) will henceforth be supported by 25 cents in a precious metal (gold), (2) Secretary of the Treasury Dillon admitted, though not planned, this step is necessary if our currency is to be devalued, (3) Chairman of the Federal Reserve Board, William McChesney Martin, testified it would affect our gold supply by $500 million, (4) President Kennedy is selling a capital asset ($2 billion in silver), to pay current expenses. These views in opposition contradicted the bland assurances of the chairman of the Banking and Currency Committee that our gold supply would not be reduced and that silver would not be sold to pay current Government expenses.

The further pressure on our imbalance of payments contained in this bill concerns me and I presented tables showing that as a result of five large successive deficits in our balance of payments we have transferred to foreigners some $7 billion from our monetary gold stock and added another $9 billion to our liquid liabilities. Foreign nations now hold $24 billion of our money, callable in gold ($11.7 billion of our $15.8 billion gold supply must be reserved for backing our currency). In this dangerous position we, as the world's banker, could not withstand a run on the bank if our foreign creditors demand payment of outstanding obligations. It is long overdue, but let us hope not too late, that Congress immediately direct its attention to solving the imbalance of payments and the gold outflow. This means cutting Federal spending, an immediate balanced budget, a reduction in our debt, and with that background, tax reform which primarily means a drastic cutback in the tax progression and a reduction of rates.

CONFUSED AND BEWILDERED PRESIDENT NOW PROTECTING COMMUNISTS

The United States, on Presidential order, is now taking a stand against freemen and using our might to protect a vicious and bloody-handed dictator. The end result of the confused and bewildered policies of President Kennedy must be the complete Communist takeover of Central and Latin America and Communist encirclement of the United States. The brave actions of President Kennedy this week included the arrest of more Cuban exiles whose crime is wanting to free their homeland; a break with Dr. Jose Miro-Cardona, Cuban exile leader, and further efforts to curtail critics of Communist dictators Khrushchev and Castro in order that the administration could make deals with the Soviet boss. There is no reasonable explanation for the Kennedy failure to enforce the Monroe Doctrine or to refuse to demand the immediate removal of all Russian troops and war material from Cuba. Whatever his motive, the actual result is appeasement of the Communists and history records that appeasement always results in victory for the Reds and defeat for us. Last year the Kennedy administration bought the Communist coalition as a solution in Laos. As we all knew, the Communists are at this moment, after breaking another agreement, taking over completely there. What is the President's answer to this failure? He has rewarded the architect of the Laos disaster, Averell Harriman, by promoting him to a higher position in the State Department where he will be responsible for mapping all our political relationships with the Communists. An insertion in the CONGRESSIONAL RECORD by Congressman J. ARTHUR YOUNGER, of California, notes the activities of Dr. Walt Rostow and McGeorge Bundy, close advisers to the President and apparent architects of a new U.S. policy reversing our support of anti-Communist exiles which is forcing Russian and Baltic exile groups to restrict their anti-Communist activities. Before it is too late, President Kennedy should tell the American people now what secret deals are planned and who and what is behind the strange policies, or lack of policies, which continue to increase the strength and prestige of the Soviet Union and weaken U.S. leadership of the free world.

SPOTLIGHT ON URBAN RENEWAL

In an effort to expose the direction in which Federal urban renewal and public housing is leading this free Nation, I took the floor of the House this week for another major speech on this subject. The bill of particulars against Federal urban renewal and public housing includes: (1) Because of urban renewal, the Supreme Court has reinterpreted the Constitution, and violated the letter and spirit of the law, (2) private property can be taken away for esthetic and spiritual reasons for private—not public—use, (3) the Federal contribution results in Federal control of local government, (4) local need for Federal help has been fraudulently determined both by local and Federal Government, (5) the financially less able cities and States are supporting the wealthier cities and States in the Federal aid distribution, (6) Federal guidelines, procedures, criteria, and formulas are inequitable and cannot be made equitable, (7) misuse of Federal aid is scandalous, (8) windfall profit at taxpayer expense is commonplace, (9) public housing is forced on communities that want urban renewal, (10) crime abounds in public housing and is getting worse; morals and moral values are being destroyed, (11) urban renewal and public housing are being use to effect sociological changes in U.S. society at the planners' whim, (12) when people know the facts and there is a referendum, public housing is rejected.

The 27th Annual National Trout Festival

EXTENSION OF REMARKS
OF
HON. VICTOR A. KNOX
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Monday, April 22, 1963

Mr. KNOX. Mr. Speaker, on April 26 the village of Kalkaska, in Kalkaska County, Mich., opens its 27th Annual National Trout Festival. This is one of the most unique celebrations in the country and Kalkaska County is probably the most suitable location in the United States for such an event.

With its 275 miles of trout streams, 85 lakes, 25 of which are abundant with fighting brown, brook, rainbow and lake trout, Kalkaska County is a virtual fisherman's paradise, attracting literally thousands to this event annually and throughout the year.

The scenic splendor of Kalkaska County complemented by an abundance of deer, partridge, bear, and other wildlife gives me a feeling of homesickness, particularly at this time of year.

For this reason I would like to extend a cordial invitation to all my colleagues in the House to come to Kalkaska, Mich., this coming weekend and enjoy the wonderful hospitality that Kalkaska's citizens so freely offer.

If it is not possible to join in Kalkaska's National Trout Festival, I would like to extend an invitation to visit Kalkaska County at any time of year. Its recreational facilities know no season. I assure you will not be disappointed.

Taxpayers: Paying More but Getting Less

EXTENSION OF REMARKS
OF
HON. PAUL FINDLEY
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Monday, April 22, 1963

Mr. FINDLEY. Mr. Speaker, I challenged Secretary of Agriculture Freeman—on Tuesday, April 16—to explain why taxpayers are paying more but getting less results in the feed grains program this year, compared with 1962.

In my letter to Freeman, I quoted Department of Agriculture reports which predict Government stockpiles will be reduced far less while payments to farmers are up $98 million.

The stockpile cutback was 393 million bushels for the 1962 marketing year. Payments were $842 million, for a $2.14 average for each bushel cutback. In 1963 the predicted cutback will be only about 107 million bushels. Payments will be $940 million, for an $8.78 average for each bushel cutback.

Why this shocking jump in cost for 1963? Before Congressmen give the feed grains program a new 2-year lease on life, an explanation is in order.

Full text of my letter follows:

APRIL 16, 1963.

Hon. ORVILLE L. FREEMAN,
Secretary of Agriculture,
U.S. Department of Agriculture,
Washington, D.C.

DEAR MR. SECRETARY: Next Wednesday the House of Representatives takes up the proposed 2-year extension of the feed grains program. Before debate begins I respectfully suggest you explain why taxpayers are paying more but getting less results in the feed grains program this year, compared with 1962.

According to your Department's "Feed situation" report released April 10, this year's feed grain crop will be 151.6 million tons—up 8.5 million tons from 1962. After harvest, feed grain supplies will be only 2 million tons less than the year before. Feed grain disappearance during the 1963–64 marketing year, according to the report, may "rise a little from the 154 million tons estimated for 1961–62 and 1962–63."

If disappearance holds even, stockpiles would be down only 2.4 million tons when the 1963 marketing year is over. This compares with an 11 million-ton cutback in the 1962 marketing year. Clearly disappearance would have to rise more than "a little" to match the 1962 marketing year cutback.

What makes this especially puzzling is the fact that payments to farmers in the 1963 program are up $98 million from 1962.

In 1962, payments were $842 million with a stockpile cutback of 393 million bushels (11 million tons) for the 1962 marketing year. This figures $2.14 per bushel.

In 1963, payments will be $940 million. If we allow "a little" increase in disappearance, say, 600,000 tons, that would mean stockpiles would be down 3 million tons, or 107 million bushels. This figures $8.78 per bushel. Even if disappearance should climb to 155 million tons, the cost per bushel would still be $7.74, compared with $2.14 the year before.

These cost figures include only payments to farmers. Realized losses to Commodity Credit Corporation and administrative costs are not included.

Why this shocking jump in cost for 1963? Before Congressmen give the feed grains program a new 2-year lease on life, an explanation is in order.

President Kennedy Urges Federal Agencies To Work as Hard as They Can To Reduce Jet Noise at Major Airfields

EXTENSION OF REMARKS

OF

HON. ROMAN C. PUCINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, April 22, 1963

Mr. PUCINSKI. Mr. Speaker, recently it was my privilege to fly to Chicago, together with other members of the Chicago delegation, with President Kennedy to participate in the dedication of O'Hare International Airport which lies on the very edge of my congressional district.

I was very much inspired to hear the President make an eloquent plea to the Federal agencies and the airlines to work as hard as they can to make sure that noise from jet aircraft which use O'Hare and other major airfields in the country is reduced to a minimum.

Millions of Americans can find comfort in knowing that the President of the United States, with all of his complex national and international problems, is cognizant of the way in which the jet age has disturbed and changed the lives of these people who live in the proximity of major airfields which have jet operations. The greatness of President Kennedy is reflected in this ability to understand the problems of each individual American.

President Kennedy stated in Chicago:

> I hope that the National Government, along with the airlines, will continue to work as hard as they can to make sure that the noise from these jets which take us in and out do not disturb the lives of a half-million people whose homes are in the immediate area.

It is my hope that those Federal employees at all levels who are charged with the responsibility for operating traffic to and from airfields will heed the President's eloquent plea. Certainly, Mr. Speaker, if the President of the United States can find understanding of this very serious problem affecting the daily lives of millions of people throughout this country, it is not asking too much that his subordinates at all levels of government show the same concern.

It was my privilege to discuss this matter with President Kennedy during our flight to Chicago and I know that the people who I represent and who have suffered indescribable hardship from the noise at O'Hare appreciate the fact that President Kennedy would personally help seek a solution to this problem.

In addition, Mr. Speaker, I should like to add here that Mr. Najeeb Halaby, Administrator of the Federal Aviation Agency, and Mr. Alan Boyd, Chairman of the Civil Aeronautics Board, accompanied the President on this trip and witnessed his eloquent statement in Chicago. I am sure that all the people living in proximity of major jet airfields would be pleased to learn that both Mr. Halaby and Mr. Boyd shared the President's concern over this new phenomena of jet noise which has followed the advent of the jet age in aircraft.

Both these men have assured me of their full cooperation to carry out the President's request.

Mr. Speaker, the text of President Kennedy's remarks at the O'Hare Field dedication follows:

REMARKS OF THE PRESIDENT AT THE DEDICATION OF THE O'HARE INTERNATIONAL AIRPORT, CHICAGO, ILL.

Mayor Daley, Governor Kerner, Senator Douglas, Government and State officials, ladies and gentlemen: 21 years ago this year, a young Navy officer stood at the White House and was decorated by President Roosevelt with the Congressional Medal of Honor for heroism extending far beyond the line of duty. I remember as a young naval officer myself how the extraordinary feat of "Butch" O'Hare captured the imagination not only of our Armed Forces but also of the country. His extraordinary act in protecting his ship, shooting down, while he was alone, shooting down five of the enemy, during the difficult days in the Second War, gave this country hope and confidence not only in the quality and caliber of our fighting men, but also in the certainty of victory.

Therefore, 21 years later, I am proud to come to Chicago, to this airport, to take part in this act which commemorates his public service, his great naval service, and also reminds me of how much we owe to those who made this country of ours.

I think one of the extraordinary facts of the Second War was this number of men who were highly decorated, particularly with the Congressional Medal of Honor, who later lost their lives in combat in later days. "Butch" O'Hare was one of them, being killed 18 months after the act of honor by the President of the United States, when his life could have been much easier. John Basilone, who got the Congressional Medal of Honor, in the Marine Corps, in Guadalcanal, and who was later killed on the beach at Iwo Jima, was another. But time after time, men who could have stayed at home and felt their duty done, went out again and some of them were killed. So today we not only dedicate the International Airport, but we also recall all those who made it possible. This is an extraordinary airport in an extraordinary city, in an extraordinary country, and it is a tribute to the constructive action of the Federal Government, the State government, and the city government, under the distinguished leadership of your great mayor, Mayor Daley.

To keep these various interests working together and make this the most extraordinary airport in the world for this great city is an amazing feat. This airport lives up to its name. There is no other airport in the world where planes can make instrument landings on parallel runways, simultaneously. There is no other airport in the Nation which maintains three instrument landing systems. And there is no other airport in the world, and this should be a source of satisfaction to the people of Chicago, there is no other airport in the world which serves so many people and so many planes. Some 13.5 million airline travelers passed through O'Hare Airport last year. In 5 years it has gone from the 16th most active field in the country to the 1st, like so many other things about Chicago. During this airport's daily peak periods, an airliner lands and takes off every 43 seconds. Every day, 1 out of every 5 air travelers in this country passes through this airport, enough people in 1 day to equal the population of Bloomington, Ill. Every day, some 1,300 to 1,400 landings and takeoffs occur. So I think this airport is an extraordinary national asset, named after an extraordinary American.

All of this traffic in and out of Chicago proves, as it has since the beginning of this country, that Chicago occupies a most important and vital strategic area in the United States, where all the lines of communication cross. That is why the future of this city is so bright. Indian canoes traveled this route from Lake Michigan and the Mississippi River before this was the United States.

And it will be doing the same thing in the year 2000. Railroads, highways—all the rest will come and meet in Chicago and make this a vital, booming city. These are all the things that can be done, but I think a good deal more must be done. One of the problems is with the people who live around the airports. I hope that the National Government, along with the airlines, will continue to work as hard as they can to make sure that the noise from these jets which take us in and out do not disturb the lives of a half million people whose homes are in the immediate area. In addition, air cargo is only beginning in importance. In addition, I think we must make a special effort at O'Hare and all our other airports to welcome the people who come from abroad. This may be the first view they have of America. We want them to know what a warm and vital and vigorous country this is. And I hope we will make every effort to make them at home, and to urge their countrymen to come and visit us.

Finally, we look forward to the day in aviation when we are going to travel three times the speed of sound, and go to any place in the world in a few hours. And when that happens, we want the United States to be in the lead, as it has been in the lead in jet transportation since the jet was invented. All in all, I am proud to be here in Chicago taking part in a great ceremony, honoring a great American to whom we owe much, looking to the past and saluting him, and looking to the future and saluting the city of Chicago. Thank you.

Warsaw Ghetto Uprising, April 19, 1943

EXTENSION OF REMARKS

OF

HON. ROBERT R. BARRY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, April 22, 1963

Mr. BARRY. Mr. Speaker, 20 years ago, when power-hungry Nazi forces under their evil-minded leader, were on their victorious rampage in most of the Eurasian Continent, destroying and devastating everything before them, and terrorizing peoples by the hundreds of millions, a small band of gallant, stouthearted, and desperately embattled people in Warsaw initiated a glorious fight against their ruthless and unconscionable Nazi oppressors. That bold and daring move marked the uprising of the remnants of once the largest Jewish ghetto in Europe, numbering at one time more than 400,000 but now, through deportation, starvation, and death, reduced to only 63,000. While many of these were not physically fit to fight, they all were determined to carry on the struggle against their mortal enemy, and they all managed to sell their lives at a terrific cost to the enemy. In this unequal struggle, in which no quarter was given and no prisoners taken, 13,000 fighting Jews lost their live in the course of 27 days, while some 50,000, mostly aged, women, and children, surrendered, and it is estimated that less than 80 escaped through the sewers under the ghetto walls.

In that uprising and desperate fight the oppressed and downtrodden Jewish people proved to the world that, even under an impossible and despairing circumstance they still retained their faith in the righteousness of their cause, their right to live and the right to fight for the preservation of their lives. While so many of these unfortunate souls lost their lives in this historic uprising, yet by that very act they covered themselves with glory and honor, profoundly setting a moving example to their descendants. We honor the memory of these unknown gallant fighters for freedom, fighters for elemental human rights, on the 20th anniversary of the Warsaw ghetto uprising against the Nazis.

National Park Proposal

EXTENSION OF REMARKS

OF

HON. JACK WESTLAND

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Monday, April 22, 1963

Mr. WESTLAND. Mr. Speaker, a study of the North Cascades area of Washington State is scheduled to begin soon. Much of the area involved lies in the Mount Baker and Snoqualmie National Forests of the congressional district which I represent. The outcome of the study, therefore, will have a direct effect upon my constituents, many of whom rely upon these forests for their income.

Because this matter is of utmost importance to the State of Washington and to the Second Congressional District, I have made it the subject of my current newsletter.

Mr. Speaker, under leave to extend my remarks, I include this newsletter in the RECORD.

The article follows:

PROPOSED NATIONAL PARK

You know, the bureaucrats are at it again. Secretary of Interior Udall and Secretary of Agriculture Freeman, with the President's approval, have authorized a study of the area between Mount Baker and the Canadian border, ostensibly to determine the best way to use the resources of the North Cascades.

But, the North Cascades Conservation Council has prepared a draft bill to create a 1,308,168-acre North Cascades National Park. The Seattle-based council claims Secretary Udall suggested it prepare the bill for introduction in Congress.

The proposed legislation, which is marked confidential, calls for a national park that would extend from Stevens Pass to Ross Dam, including 606,429 acres of the Mount Baker and Snoqualmie National Forests of the second district. Maybe the people of Washington State want another national park, I don't know. If they do, I'll have no objections. However, I don't want to see a decision by bureaucrats in Washington, D.C., instead of by the citizen owners.

I know the national forests belong to all the people of the United States, but I believe the people back home should have something to say about this proposal, because they are the ones who are really affected.

It seems to me another study of the North Cascades will only duplicate what has gone before. In 1939, a committee composed of National Park, Forest Service, and State officials made a study. The people of Washington State didn't go along with the idea of a national park then.

When Glacier Peak was being considered as a possible wilderness area, there were further studies. Again, last year a study to set the policy for use of our high mountain country was completed. Now, the taxpayers are being asked to finance another study.

During 1962, about 450 million board feet of timber was harvested in the Mount Baker and Snoqualmie National Forests. This volume is capable of supplying jobs to 4,500 persons employed directly in the timber industry and would support another 11,250 persons indirectly. A national park would mean the loss of livelihood for a great percentage of these people, because timber isn't harvested in national parks. Unemployment is too high as it is without adding fuel to the fire.

Each year the Forest Service returns 25 percent of its receipts to local counties in proportion to the amount of national forest area each contains. This amounted to $304,476 for Whatcom, $173,783 for Skagit, and $244,199 for Snohomish last year. Any area redesignated national park land would reduce these payments now available to the counties for schools and roads.

I'm for more recreational opportunities and have supported both the Forest Service and the National Park Service in their efforts to provide for the recreational needs of our growing population. And, as I've mentioned before, if the people of Washington State really want another national park, I'll have no objections. However, the decision should be left to the people, not the bureaucrats in Washington, D.C.

Sincerely,

Congressman JACK WESTLAND.

Midtown Plaza: The Nation's Showplace

EXTENSION OF REMARKS

OF

HON. FRANK J. HORTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, April 22, 1963

Mr. HORTON. Mr. Speaker, while in my home community of Rochester, N.Y., during the Easter recess, I had the honor and great pleasure to participate in the ceremonies held on April 15 to mark the first anniversary of the Nation's first and only urban shopping plaza. This is Midtown Plaza, a 7-acre business and shopping complex in the very heart of downtown Rochester.

The celebration of Midtown Plaza's first year centered around a patriotic theme and was highlighted by the raising of an American flag. The flag was one with special significance attached to it: It had flown over our Nation's Capitol.

At the anniversary ceremonies, I spoke to those gathered on one of the elements that has made our country the great and free land we cherish today.

That element is individual initiative—the kind of self-starting action that punctuates our national history—the kind of free enterprise which has built Midtown Plaza.

Midtown Plaza is a monument to the free enterprise system and a challenge to every urban redeveloper in the United States. It symbolizes the best in the American tradition, a willingness to take a chance, individual enterprise, courage, and faith in the future.

Midtown Plaza comprises a 1-acre 2-story covered Mall; Midtown Tower, an 18-story, office-hotel-restaurant building; and a 2,000-car city-owned and operated underground garage.

Midtown Plaza created 220,000 square feet of new retail space in downtown Rochester. More than a million square feet of retail space is accessible from it.

Midtown Tower is composed of 13 floors of office space, a 220-seat restaurant, and a 3-floor, 78-room hotel. It is Rochester's highest building. The Tower building provides 173,000 square feet—more than 4 acres—of new office space in the center of the downtown business district.

The 3-level underground municipal garage has an average daily turnover of 4,500 automobiles.

The stimulus to downtown business and the assurance of a prosperous and vital future for both business and the city provided by Midtown Plaza, mark Midtown as one of the most remarkable undertakings by American businessmen in recent years.

Midtown Plaza was built with private capital by its cosponsors, the McCurdy and Co. Department Store and the B. Forman Co., Women's Specialty Store. The stores have been close neighbors and keen competitors for many years.

The project is a monument too, to cooperation between a municipality and private business. In an agreement believed to be the only one of its kind, the city committed itself to build and operate the 2,000-car underground garage and make necessary street improvements all at a cost of more than $11 million.

The owners of Midtown agreed to construct a covered mall and an office building at least 10 stories high above the garage. The happy result for downtown business and the city of Rochester is a revitalized city.

Midtown Plaza today is the home of 33 shops and services, 6 of them new businesses in Rochester. Midtown Tower provides space for 34 firms. Of the 173,000 square feet, or more than 4 acres of space, all but 12,000 feet is leased or occupied.

Midtown Plaza is more than a complex of steel and stone. It is the fulfillment of a community desire to preserve a civic asset.

Midtown Plaza is living witness to the ability of local interests and local government to develop a community resource. This ability has caught the imagination of other communities throughout the Nation and has been well publicized in their news media.

But, above all, Midtown Plaza has become a source of pride for all of us who live in Rochester. We are proud of this downtown Plaza. We tell our visitors about it and delight in giving them a tour of it.

Midtown Plaza is durable. It will live and grow as part of a dynamic Rochester, a Rochester made more dynamic by its presence in the heart of the city.

The Warsaw Ghetto Uprising April 1943

EXTENSION OF REMARKS

OF

HON. HERMAN TOLL

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 22, 1963

Mr. TOLL. Mr. Speaker, 20 years ago a group of tortured and abandoned men and women, their children hidden out of sight, gave vent to the desperation of their situation and with guns, bricks, bottles, and even their own bodies as weapons, took on the might of a well-equipped army with but one idea—to fight, to the death if necessary.

The Nazi army marched into Poland in September of 1939. Not only did this mean the beginning of a war that would rock the world for the next 6 years, it also marked the start of a campaign of mass slaughter and extermination that still leaves one stunned at the enormity of the crime committed. Before the end of the war 6 million Jews, mostly of Eastern Europe, would be dead, methodically killed under the orders of one man, Hitler, carried out by his sadistic henchmen. The center of this slaughter was Poland. Throughout Nazi-conquered Europe, a policy of Jewish extermination was carried out against heroic resistance by many of those doomed. Yet the heart is stirred most by what happened when the Warsaw ghetto finally exploded with wrath against the mass murder camps in the Polish countryside to which the Jews of the ghetto were taken to die, just for being Jews.

When the first stories began to circulate among the ghetto population of what actually happened to those who were taken off to "work camps" in the country and never heard of again, there was disbelief. When the real nature of these camps was established beyond doubt, there was fear. When the word was passed that the Nazi commandant had been ordered to dispose of the remaining Jews of the ghetto in a like manner, there was finally a will to fight.

It was the time of the Passover, a time of reflection for all Jews on the greatness of their history; it was the evening of April 18, 1943. The news spread quickly among the remaining 40,000 in the ghetto that tomorrow the Nazis would come to round them up for their one-way trip to death. But they had decided that the end would not come without resistance. As the storm troopers, with their Polish and Ukrainian police support, marched into the ghetto that Saturday morning, the fighting began. Since the invaders were taken completely by surprise, German dead sprawled on the streets. The Nazi high command was aghast. More troops were sent in and repulsed. The situation was serious, and Hitler was in a rage at the spirit shown by the Jews. Finally the local German commander took the last course available—he put the torch to the ghetto area. The partisans were driven from their attic hideouts into underground bunkers, covered by the rubble of falling buildings. Food and water were short, and weakened women and children were dying. The weak in spirit, willing to sell their souls for food and the chance to live a little longer, stole out to the Nazis and gave away some of the hiding places of the fighters. Rather than fall into German hands, sons shot their own mothers, mothers killed their own children, and still the resistance went on.

Outside the walls of the ghetto it was Easter. Spring had come to Warsaw, and while thousands were dying in the flames, the rest of the city carried on its usual business with only the smoke and ash marring the festive spirit.

On May 8 the main bunker was captured and most of the leaders of the movement killed. By the end of May most of the ghetto area had been destroyed and all but a handful of the fighters vanquished. The end had come, but only in Warsaw. The fight was carried on in the woods and hills. It is still going on today in the creation and preservation of the Jewish State of Israel. It is for us to remember in all honor and humility the brave freedom fighters of the ghetto of Warsaw. A monument to their sacrifice must be built and maintained in all our souls.

Jefferson-Jackson Day Address by Senator Bayh

EXTENSION OF REMARKS

OF

HON. VANCE HARTKE

OF INDIANA

IN THE SENATE OF THE UNITED STATES

Monday, April 22, 1963

Mr. HARTKE. Mr. President, on April 6, 1963, at Indianapolis, Ind., the junior Senator of Indiana [Mr. Bayh] was called upon to deliver the principal address at the Indiana Democratic Jefferson-Jackson Day dinner.

The junior Senator of Indiana performed eloquently, giving to his audience a clear picture of Jeffersonian and Jacksonian principles, and how those principles are applicable today.

For the benefit of all of those who did not have the privilege of hearing my distinguished colleague of Indiana, I ask unanimous consent to have his remarks printed in the Record.

There being no objection, the address was ordered to be printed in the Record, as follows:

Jefferson-Jackson Day Speech

(By Senator Bayh)

Tonight we meet to celebrate a victory, a victory most Hoosiers thought an impossible task only 12 short months ago. Through your faith and devotion, with your energy and dedication to purpose, together we won the good fight. Words are insufficient to express the deep gratitude which Marvella and I feel in our hearts for you who honored me by bestowing the honor of serving as your U.S. Senator from Indiana.

Yes, there were those who said Democratic victory in Indiana was impossible. There are those who utter this same sterile sounding slogan tonight. Let us here and now proclaim to those pitiful prophets of doom who declared it impossible to elect Vance Hartke to the U.S. Senate, who thought it impossible to seat Matthew Welsh in the Governor's chair, who pessimistically prophesied that a young State legislator from the city of Terre Haute was wasting his time, let us say to them at this very hour that the Democratic Party does not now nor will we ever again believe that the election of Democrats in Indiana is impossible.

Let us start now determined to elect and reelect Democratic mayors throughout this State. Let us decide now that a Democrat will be elected Governor, that Indiana will continue to have two Democratic Senators, that Democrats shall control the next general assembly and that Indiana shall cast its electoral votes for John Fitzgerald Kennedy in 1964.

The people of Indiana want good government and we are giving it to them. Hoosier citizens demand straight talk and solutions to complicated problems. This we pledge. This is our goal.

As Democrats we can be proud of the heritage to which we fall benefit. From the time the principles of the Democratic Party were laid down by Thomas Jefferson and Andrew Jackson, ours has been the party of the people, the defender of minority groups, the party of progress.

Shortly after the founding of our party, Thomas Jefferson defined its goals, characterized its philosophy and contrasted it with opposing forces when he said:

> "Men by their constitutions are naturally divided into two parties those who fear and distrust the people and wish to draw all powers from them into the hands of the high classes; and those who identify themselves with the people, have confidence in them, cherish and consider them as most honest and safe."

In the span of nearly a century and a half from Jefferson to Kennedy, a great nation and the world's oldest democracy has sprung from the waiting lands of a continent and the hearts of a people and has spread around the world. And across this Nation is emblazened the record of the Democratic Party, its belief in the people, its belief in the dignity of every man, its belief that there is no more noble aspiration for a political party or government than to tend to the needs of its citizens and to promote the basic opportunities of each individual American.

The Democratic Party has pursued these goals with concrete legislative programs. Democrats have been responsible for the cornerstones of family security, the social security program, unemployment compensation, consideration for the aged, the blind, our children. Democrats established the minimum wage and throughout the years we have improved it and increased its coverage. We have made considerable progress in the field of civil rights.

But we need not dwell in the past to talk of Democratic accomplishments. The Democratic Party is a party of the present and the future. After 2 years of the New Frontier, at the quarter post of the presidency of John F. Kennedy, we can see progress that has improved life here and around the world. Great progress has been made. Yet we are determined to solve problems still unsolved.

America has long been known for its Bill of Rights. Franklin Delano Roosevelt spoke eloquently of the four freedoms. Today a space age America must echo these thoughts and must rededicate itself to ensure certain basic opportunities for each American.

Each American must be given the opportunity to secure a job sufficient to provide for his family. Through the leadership of President Kennedy more Americans are gainfully employed today than at any other time in the history of our Nation.

Over 71 million American working men and women labor in the industries, shops, farms and mines of this country. Yet the challenge remains as long as many American workers cannot find jobs; as long as young minds and bodies are not properly equipped to find employment in space-age occupations. We, as Democrats are determined to meet this challenge with tax reviews to spur lagging economic growth; with retraining programs to assist those with unneeded skills; with a special youth program to guide and assist our younger citizens.

We are equally determined to provide this opportunity for those who labor on the farms of America. The efforts of the present administration have brought about an increase in farm income of approximately 10 percent during the last 2 years. Yet we will not rest until the American farmer enjoys equal prosperity with the rest of America, and the abundance from American farms is utilized as a blessing to a hungry world rather than as a stumbling block to high farm income.

Those who labor in business, large and small, must be guaranteed the opportunity to trade in an atmosphere of freedom from unfair competition and domination by monopolies at home and abroad. We, as Democrats, believe in a truly free economy, free from Government control and free from the oppression of monopolistic power. Ample opportunity for the small businessman is an important goal.

Each American, as a member of a family group, should be afforded the opportunity for compatible family living. The opportunities for jobs, for decent housing, and for adequate medical care during the twilight years of life are important steps toward attaining this goal. And we as Democrats must continue the efforts made in past years to see that adequate legislative programs are enacted in this important area.

Finally, each American child must have the opportunity for a good education. No investment we make as a nation is more important than that which we make in providing adequate training for our most valuable natural resource, our children. Every child must have the opportunity to develop full his own potentiality. To be sure it takes classrooms, it takes teachers; and these take money. But investment in our Nation's future through education is our best guarantee of meeting the challenges of the space age and the future.

If these opportunities are to be provided for Americans today, each of us must be resolute in opposition to these few persons who would deprive them to some Americans because of race, religion, or national origin; for full American citizenship means freedom of worship, freedom of access to public places, freedom to speak without fear of reprisal, and freedom to vote one's own convictions in the privacy of a polling place.

The cold war struggle today finds communistic totalitarianism and democratic freedom locked in mortal combat.

A waiting world is watching the American response to the challenges of this age. Awakening nations, searching for a better way of life, are asking will democracy and freedom work?

Let us answer with a hearty chorus of yes. Let us answer by renewing our determination to keep the United States of America a land of opportunity, for all Americans, for each American.

A Rebuke to the New England Council

EXTENSION OF REMARKS
OF
HON. JOHN P. SAYLOR
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Monday, April 22, 1963

Mr. SAYLOR. Mr. Speaker, on April 4, my colleague from Massachusetts [Mr. Conte] inserted in the daily Congressional Record a statement entitled "New England Council Statement in Answer to Representative John P. Saylor." It not only challenged my knowledge of the problems of the coal industry, but also questioned my veracity in this regard.

The council purported to substantiate its attack through the medium of a report on residual oil imports issued by the Office of Emergency Planning, whose conclusions on the oil import control program were so obviously fallacious that even the Department of Interior took issue and the White House itself rejected the Office of Emergency Planning recommendations.

It is not my purpose today to reexamine the Office of Emergency Planning proposals or to protest the New England Council's vicious attack. In view of the selfish attitude of the council in years past, its latest unfounded and inexcusable charges are not surprising. What is disturbing, however, is that this scurrilous material would find its way into the Congressional Record.

In assuring the gentleman that I have no intention of replying in kind to this abusive treatment, I should like to suggest that he and his New England colleagues may in the future choose to examine closely any and all council statements before repeating them.

I recognize that the gentlemen are so hard put to satisfy the council's voracious demands that it is impossible for them to give the necessary attention to the statistical information brewed in defiance of accuracy and principle at the council's chambers in Boston. Apparently frantic distribution of the propaganda is deliberately planned on the theory that the delegation patently and patronizingly serving the council will place the material on public display without questioning its authenticity. I trust that my friends from New England will in the future be more cautious on this treatment of the printed products of the council.

The council attack on me inserted in the April 4 issue of the Congressional Record is by no means the first instance of the careless handling by the New England delegation of matters pertaining to the question of oil imports. When the gentleman from Massachusetts was recognized on the floor of the House for 3 hours last March 28, I sat throughout the subsequent discussion and was frankly fascinated at the coordinated participation of the several Representatives from New England and the Members from other areas they had been able to solicit for the meeting that—unless so well managed—would have fallen completely flat because of the obvious exaggerations and irrelevancies that echoed time and again through this Chamber. The gentleman was so gracious as to permit me and my colleague from West Virginia [Mr. Moore] time to inject pertinent questions which, of course, were never answered but nevertheless became an official part of the proceedings.

It was not until the transcript of those proceedings reached my office later that evening that I discovered that the New England floor show had apparently been contrived in the same haste that has marked other instances of the campaign against the oil import control program. Without in anyway attempting to embarrass any of the Members who participated in that day's discussion, I should like to call your attention to a photostatic copy of a page that inadvertently had become a part of the transcript. Scribbled in longhand on one page of the transcript—the official transcript of the proceedings of the House, I remind you—was the notation:

> Questions will be asked by Mr. ———— of ————.

So perhaps, with evidence such as this at hand, we should be more cognizant of the pressure exerted by the New England Council. We should be more disposed to understand why the gentleman from Massachusetts would be so indifferent to the House amenities as to insert in the Record the inexcusable statement by the New England Council attacking the integrity of a Member of Congress.

Mr. Speaker, I trust that subsequent presentations produced in deference to the imported oil merchants of the East will also provide for a response to one question which I have submitted without success to my friend from New England for the past several years:

Is New England willing, if in fact the oil import control program should be abolished and no restrictions placed on the volume of foreign oil moving into this country, to permit free import—without tariffs, quotas, or other restrictions—of textiles, fish, brass mill products, rubber products, footwear, watches, bicycles, and whatever other products are manufactured in the northeastern portion of our country?

Here is the fundamental issue. In its glib reference to the restoration of free enterprise, does the New England Council proclaim to want the products of New England accorded the same competitive conditions to which it would subject America's coal industry?

Mr. Speaker, can we expect this matter to be resolved at the next New England prayer meeting that takes place here in the House of Representatives? I repeat that I do not wish to embarrass any of my colleagues, even those who would give publication to improper and undignified remarks such as those leveled by the New England Council. For this reason I shall not name the Member of the House who, just 5 days after he took part in the March 28 rumble against oil import restrictions, stood on this very same floor and made violent protest against importation of woolen goods so destructive of the New England economy that they have been responsible for the closing of a plant in the home State of my friend who gives currency to the New England Council's criticism of a Member of Congress.

The two-part travesty is available for reading on pages 4951 and 5540. In the first instance, the gentleman stanchly asserts that New Englanders want to pay the free world price for their fuel; the next week he demands that the President immediately impose quantitative restrictions on the importation of woolen goods. New Englanders must pay 27 cents more for domestic than for foreign residual oil, he asserted on March 28; 5 days later he said that the Massachusetts plant had been closed because their fabrics cannot meet the competition of Japanese products, which sell for 40 cents per yard cheaper. As I interpret these remarks, our friends in New England expect Americans to pay more for textiles in order to keep New Englanders employed. I concur with that philosophy. But I should like to hear some attempt at justifying the position of those same New Englanders who are willing to see Pennsylvania and West Virginia coal miners lose their jobs in order that greater volumes of foreign residual oil may be made available on the Atlantic seaboard.

For the record, I feel compelled to dwell briefly on that 27-cent figure to which I have just referred. Here is the way my colleague used it on March 28:

> Mr. Speaker, New Hampshire residual oil consumers feel they are being unfairly treated by the Kennedy administration. They are being forced to pay 27 cents extra for a barrel of residual oil than foreign consumers pay.

Now, this difficult-to-understand conclusion is another indication of how the New England Council has been able to confuse even their protagonists in Washington. I would suspect that most economists would accept as a truism the fact that a commodity—any commodity—would vary in sales prices according to points of production and consumption. A barrel of oil—any kind of oil—would be expected to be cheaper in Saudi Arabia or Venezuela than it is in Portsmouth, Pendleton, Pago Pago, or Rahway Junction. It is also likely that a sheaf of writing paper produced in New Hampshire is going to cost more at Las Vegas or Buenos Aires than it does in Manchester.

Now let us take a look at the New England Council's own reference to this magic figure unquestionably developed in Boston's Statler Building. The attempted calumniation of a Member of Congress by the council, as placed in the CONGRESSIONAL RECORD by my friend from Massachusetts, includes this sentence:

> Residual import restrictions have forced the cost of residual oil to 27 cents per barrel more than in Canada and other countries.

It is my earnest hope that, when the New England delegation next favors us with its stereotyped routine, an attempt will be made to get that 27-cent item on the proper shelf. If it has not been picked out of thin air, then certainly it can be presented with some degree of lucidity. Meanwhile the New England delegation might want to attempt to square its calculations with data released April 15 by the Office of Emergency Planning, the outfit whose recommendations for abandoning the oil import controls program was evidently not politically agreeable to the White House. OEP lists the February residual oil cargo sales price at $2.01 in New England, a reduction of $1.18 since February 1957. You will remember that the mandatory control program, which went into effect in April 1959, used the 1957 figure as criteria for the quota system. The OEP chart shows no indication that at any time in the past 8 years has the selling price of residual oil in New England been lower than it is at the present time.

The New England Council, as reported through the good offices of the gentleman from Massachusetts, quotes me as having said that the import quota system has at no time been used to benefit affected coal producing regions. I have indeed made such a charge, and I reiterate it. The April 1 increase in quota allocations is summary proof that the levels have been adjusted to court the favors of New England Members of Congress and President Betancourt of Venezuela without regard to the economic impact upon coal mining areas. If, as the gentleman from New Hampshire [Mr. CLEVELAND] averred on March 28, unemployment in West Virginia is of concern to all Americans, then I ask him to consider the impact of the increase in residual oil imports that went into effect on the first day of this month.

For the past year coal companies, railroads, and public utilities have been cooperating in an effort to bring about a substantial reduction in the delivered price of coal through the introduction of the unit train. The experiments have been so successful that some of the lines were able to initiate price reductions of as much as $1.50 per ton on coal moving from western and central Pennsylvania to the east coast—traffic that would normally cost from $4 to $4.50. This new concept in coal transportation has been looked to by residents of mining regions as the method through which present markets could be preserved and others regained. Since oil importing companies are able to adjust sales prices without regard to production and shipping costs, the peddlers of foreign oil need have no worry about competing with domestic coal regardless of the extent to which delivered prices may be reduced.

The increase allowed by the Department of Interior in residual oil imports for the year beginning April 1 amounts to 50,000 barrels per day. To serve the markets into which this foreign fuel will move would require the service of a series of unit trains, two of which—each made up of 100 60-ton cars—would move every day of the year from Pennsylvania's mines to the east coast. Under the new order, those trains will not go into service. Their operating crews and maintenance men will remain idle. The miners who would produce the coal will continue to wait for their jobs to reopen.

This prospect obviously meets with the approval of the New England Council. I am hopeful that my colleagues in the House of Representatives, assuming a less narrow perspective, will no longer concur in this malevolent philosophy and will no longer stand ready to broadcast character assaults on Members of Congress as perpetrated and effectuated by the Council.

Chicago's Northwest Side Needs Mass Transit Bill

EXTENSION OF REMARKS

OF

HON. ROMAN C. PUCINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, April 22, 1963

Mr. PUCINSKI. Mr. Speaker, last week the Jefferson-Park Press, which is published in my district by Mrs. Morton Steinman, carried a most convincing editorial in support of the mass transit bill which we hope will come before the House for action very soon.

Miss Sally Swanson, very capable civic affairs editor of the Jefferson-Park Press, has certainly stated the case in support of the mass transit bill in terms which should help every Member of Congress better understand how the people at the grassroots level in this country feel about the massive traffic jams which clog our large and small cities daily during rush hours.

I was very pleased to see this frank editorial since it has been my privilege to be among the first Members of Congress to cosponsor this legislation.

Recently, I appeared before the House Banking and Currency Committee in support of this proposal to help America's communities develop a more effective mass transit system.

More than one-half million people living in Chicago's Northwest Side, most of whom I represent in Congress, would benefit from this legislation.

I am including my own testimony in my remarks today following the excellent editorial by Miss Sally Swanson.

Mr. Speaker, Miss Swanson's editorial and my own remarks follow:

MOON TALK MAY GET COOL RECEPTION ON NORTHWEST EXPRESSWAY

(By Sally Swanson)

Yesterday the Nation's first astronaut to orbit the earth, John Glenn, came to town, signalling the start of Chicago space month, and for the next 30 days talk of spaceships, meteorites, and moon blast-offs should excite the imagination.

One segment of the population may be indifferent. A trip to the moon in this decade? How will that strike the bumper-to-bumper crowd known collectively as the Northwest Expressway commuting public?

The man caught twice a day in a car-choked nightmare, may consider a moon launch ludicrous as he stops, starts, dodges, and listens to his car radio chide: "Northwest Expressway congested today." Like yesterday and tomorrow.

A trip to the moon? The trip to work is challenge enough.

Two and a half years ago when the expressway opened, the Northwest Side hailed a new era of automobile transportation. The area has drawn closer to distant parts of Chicagoland, with driving time unthinkable a few years ago.

But not during rush hours. Disgruntled motorists insist they make better time on city streets.

The congestion could be eased simply enough, according to experts, by installation of CTA tracks in the expressway's median strip. Simple enough except for one problem: money.

About $46 million is needed to install the tracks, including an extension from Logan Square el, to O'Hare Field.

INFLUENTIAL GROUPS REAPPRAISE STAND

Provisions were made for the CTA system when the road was built, and installation was expected in due course. The plan toppled in the spring of 1961 when four powerful business and civic groups which had planned to help the CTA get the necessary money withdrew their support.

Instead they asked for a study of the Northwest Side's overall transportation situation.

It surprised no one when a bill for the CTA expressway subsidy failed to pass the State legislature.

Last November—18 months and several thousand dollars later—the transportation survey reported that the CTA tracks would be "the most effective single improvement in public transportation" to relieve the Northwest Side's traffic woes.

The CTA expressway received a second important endorsement last fall from the Chicago area transportation study, a 6-year research program costing $3½ million.

Principal opposition has come from the Chicago & North Western Railroad, whose officials complain that as a private enterprise the railway could not compete with a subsidized public agency.

Perhaps the protests have been effective because of the railroad's sincerity in attempting to make its commuter business pay.

It has replaced dirty, ill heated, and often overcrowded coaches with doubledeckers that are roomy, air conditioned, and altogether comfortable. It has added more trains to its schedule, and inaugurated a river cruiser connection from its depot to Michigan Avenue. All draw the respect of a free enterprise society.

RAILROADS HAVE DISADVANTAGES

But railroads best serve the suburban commuter—Northwest Expressway is within the city of Chicago—and it has distinct disadvantages for city riders: High fares, few stops, no transfer privileges.

Long delay in the CTA system could be costly. Experience proves that congested expressways create a demand for more expressways.

And expressways are expensive. Their construction costs many times that of a CTA installation and they remove land from the tax rolls, to say nothing of incalculable expenses from disrupted neighborhoods, displaced homes, and air pollution.

And so it was encouraging news when Walter J. McCarter, general manager of the CTA, proposed Thursday that construction of Northwest Expressway CTA have top priority if Federal aid to mass transportation is approved by Congress.

The bill, which would offer up to two-thirds of the difference betwen the cost of the project and the amount paid by fares, has been approved by the Senate. It faces a steep hurdle in the House.

Hence the fate of the urban transit bill this week in Washington is vitally important to Northwest Side motorists. Possibly more important than an "Operation Moonlift."

STATEMENT OF CONGRESSMAN ROMAN C. PUCINSKI BEFORE BANKING AND CURRENCY COMMITTEE, HOUSE OF REPRESENTATIVES, WASHINGTON, D.C., MARCH 6, 1963

Mr. Chairman, permit me to express my gratitude to you and your committee for affording me an opportunity to testify in support of H.R. 3881, which would provide up to $500 million for development of mass urban transportation systems.

It has been my privilege to submit identical legislation—H.R. 807—both in the last Congress and again in this Congress.

Gentlemen, I have here an aerial photograph of my district showing the Northwest Expressway which goes right through my district. It has been our hope to develop in the median strip of this expressway a rapid transit system to relieve the tremendous automobile congestion which makes this expressway one solid mass of automobiles every working day during the early morning rush hour and the evening rush hour.

Chicago at present has three expressways: the Congress Expressway, the Northwest Expressway, and the Dan Ryan Expressway. We are now in the process of building our fourth expressway, cutting through the southwest section of our city. All of our expressways have been specially designed to provide a median strip for rapid transit.

The Northwest Expressway, the Dan Ryan Expressway, and the Southwest Expressway were all financed by Federal grants-in-aid as part of the National Defense Highway System.

I am sure your committee will agree that with 78 percent of America's population now living in urban areas, the decision to extend the National Defense Highway System into the large cities is indeed a wise one. This decision to extend the National Defense Highway System in the large cities was made in order to afford these cities an opportunity to move huge masses of people out of the city very quickly in the event of a national emergency.

However, Mr. Chairman, it appears to me that under the existing situation in all of the large cities of America, including Chicago, if an enemy force ever wanted to wreak havoc and destruction on this country, the time for a sneak attack would be during the early morning rush hour or the evening rush hour when perhaps as much as 60 percent of this Nation's entire industrial labor force is hopelessly bogged down in traffic snarls all over America.

While I hope this bizarre prospect never develops, I mention this merely to emphasize to the committee the complete futility which faces the large urban communities of America in trying to relieve this indescribable traffic congestion during rush hours without some form of Federal assistance.

Mr. Chairman, I consider this legislation to provide assistance to our cities for development of rapid transit systems as important to our national defense effort as any single appropriation now before us in the multibillion-dollar defense program.

The Chicago Transit Authority has done a magnificent job in developing what I believe to be the finest mass transportation system in the world.

Earlier this year you heard testimony from Mr. Virgil Gunlock, chairman of the Chicago Transit Authority, and also from Mr. Walter McCarter, general superintendent of the Chicago Transit Authority. I am sure their experience is similar to that of transit operators all over the country, whether the transit system they operate is privately owned or publicly owned. In each instance they are faced with the dilemma of either raising the fares to bring about necessary improvements and seeing their passenger volume decline, or leaving fares at their present rate and forsaking the needed modernization programs.

There is no question in my mind that in all of the large cities of this country, present rates have reached their peak, and any further increases would result in a tremendous decline in rider volume.

It is quite proper that the urban communities of America should turn to their Federal Government for assistance. These large cities are the lifeblood of the Nation. From these large industrial centers flows the revenue that makes it possible for this country to meet its defense commitments and, yes, Mr. Chairman, its very struggle for survival.

We do not hesitate to appropriate an estimated $8 billion a year in this country to help the people in the rural areas of America remain in the economic stream of the Nation. It is a long-established fact that when the rural areas of America suffer economically, it is only a matter of a short time before the economy of America falters.

Mr. Chairman, nor did we hesitate to appropriate billions of dollars in our country in military and economic assistance to our allies because we realize that the survival of freedom could be decided by the rebuilding of the large industrial centers of Europe in making these countries economically independent.

Why, then, should there be any strong objection to helping solve one of the most serious problems facing America's urban areas in this 7th decade of the 20th century?

If the local communities could resolve this problem through their own resources, I certainly would agree there is no need for Federal intervention. But study after study shows conclusively that these urban areas of the country cannot solve their transportation problems without some form of assistance from the Federal Government, and for this reason I strongly urge adoption of this measure.

I would, however, like to call your attention to some provisions of this legislation which would create very severe hardships to employees of the mass transportation industry.

Section 3 of the bill provides for grants or loans to State or local public bodies or agencies for the purpose of acquiring, constructing, reconstructing, or improving existing transit systems.

In many States, when a private operation has been acquired by the State or a political subdivision of a State, the public body has taken the position that it is legally disqualified from entering into collective bargaining with the collective bargaining agent of the employees and also from entering into arbitration agreements with such collective bargaining agent, even where, as is usually the case, the employee has been for many years represented by a union under a system of collective bargaining with provisions for arbitration.

It would be my hope that this legislation can be amended to include provisions to protect public utility workers in the right to union recognition.

It is my further hope that some provision can be made which would give these employees of publicly owned mass transportation systems the right to enter into collective bargaining agreements and to negotiate with management. Certainly these provisions should include the right to agreements which would provide some channel for settling grievance disputes.

Mr. Chairman, if in the judgment of this committee you cannot agree on appropriate language to guarantee these rights to collective bargaining of employees working for publicly owned mass transportation systems, perhaps the committee would consider including in its report language which would make it clear that the intent of Congress on this legislation is not to deny in any manner or form, directly or indirectly, workers from exercising their right to collective bargaining if in fact the majority of the workers in a given union endorse such an action for collective bargaining.

A second shortcoming in this legislation which I hope will be corrected by the committee is its failure to provide protective conditions for employees who would be displaced or adversely affected as a result, at least in part, of the Federal financial assistance program.

One way in which transit employees of existing transit companies could be adversely affected is where a rapid transit operation is undertaken by a public agency with Federal assistance, and the private transit company continues in existence. It is inevitable, for example, that if a rapid transit line is erected which serves the same area as is presently served by a private bus line, that patronage will be attracted from the bus line, and employees of the bus line will be adversely affected.

Here, also, perhaps this problem can be resolved by language in the report establishing legislative intent that an effort should be made to absorb displaced workers from existing public transit systems to newly developed transit systems financed through Federal assistance. I would suggest that perhaps some reference should be made to the Manpower Retraining Act so that where employees are dislocated from their existing jobs because of new transit systems, these dislocated workers, if they need additional training, should get this training under the Manpower Retraining Act and then be absorbed by the newly developed transit system.

Certainly if we are going to spend Federal funds to develop new mass transit facilities, it is not asking too much that we at least establish in the committee report a recommendation that displaced workers in existing facilities, wherever practicable, be given priority in applying for employment with the new facility.

I am reasonably convinced that the Federal assistance which urban areas could receive under this legislation would indeed create so impressive an expansion of mass transit facilities throughout America that the workers presently employed in this country would be absorbed into new job opportunities. However, I am sure that we can understand the concern of those presently employed in the transit industry that modernization and automation may eliminate their jobs. It is my hope that the committee will give serious consideration to this concern, and I am confident that reasonable men can work out reasonable solutions in this difficult field.

Mr. Chairman, I am grateful to you for giving me this time to appear before this committee, and I shall be very happy to answer any questions you might have.

SENATE

TUESDAY, APRIL 23, 1963

The Senate met at 12 o'clock meridian, and was called to order by Hon. E. L. BARTLETT, a Senator from the State of Alaska.

Rev. Harry W. Campbell, the Methodist Church, Washington, D.C., offered the following prayer:

O Thou, whose yearning is for noble men and nations, inspire us by Thy presence in these days. Let Thy spirit fill these venerable walls and touch our tempers and our words. Walk amongst us, and through these galleries, and across our land, we pray, and cover us all with the mantle of Thy protection.

Grant us to be so broad in vision as to be incapable of narrow prejudice. Teach us to aim so high that we can walk through mires of circumstance and remain clean. Protect us from too much trust in our skills, and grant us the grace to lean on Thee for guidance through the dark places. Make us, we pray, eager to reach for heaven, but able also to touch the oppressed of earth. And through all our deliberations, help us to be wise. In the blessed name of Jesus. Amen.

DESIGNATION OF ACTING PRESIDENT PRO TEMPORE

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., April 23, 1963.

To the Senate:

Being temporarily absent from the Senate, I appoint Hon. E. L. BARTLETT, a Senator from the State of Alaska, to perform the duties of the Chair during my absence.

CARL HAYDEN,
President pro tempore.

Mr. BARTLETT thereupon took the chair as Acting President pro tempore.

THE JOURNAL

On request of Mr. MANSFIELD, and by unanimous consent, the reading of the Journal of the proceedings of Monday, April 22, 1963, was dispensed with.

ENROLLED BILLS AND JOINT RESOLUTION SIGNED DURING ADJOURNMENT

Under authority of the order of the Senate of yesterday, the Vice President, on yesterday, signed the enrolled bill (H.R. 4715) to incorporate the Eleanor Roosevelt Memorial Foundation, Inc.

The ACTING PRESIDENT pro tempore announced that on yesterday, April 22, 1963, the Vice President had signed the following enrolled bills and joint resolution, which had previously been signed by the Speaker of the House of Representatives:

H.R. 277. An act to amend the act of April 22, 1960, relative to the transfer of certain public lands to the Colorado River Commission of Nevada;

H.R. 1087. An act to release the right, title, or interest, if any, of the United States in certain streets in the village of Heyburn, Idaho, and to repeal the reverter in patent for public reserve;

H.R. 1544. An act to authorize David H. Forman and Julia Forman to bring suit against the United States to determine title to certain lands in Maricopa County, Ariz.;

H.R. 2291. An act regarding a homestead entry of Lewis S. Cass;

H.R. 2294. An act to authorize the Secretary of the Interior to convey certain land situated in the vicinity of Unalakleet, Alaska, to Mrs. William E. Beltz;

H.R. 5067. An act to amend the Agricultural Adjustment Act of 1938, as amended; and

H.J. Res. 234. Joint resolution to provide for the reappointment of John Nicholas Brown as Citizen Regent of the Board of Regents of the Smithsonian Institution.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States submitting nominations was communicated to the Senate by Mr. Jones, one of his secretaries.

EXECUTIVE MESSAGE REFERRED

As in executive session,

The ACTING PRESIDENT pro tempore laid before the Senate a message from the President of the United States submitting sundry nominations, which was referred to the Committee on the Judiciary.

(For nominations this day received, see the end of Senate proceedings.)

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the House had passed the following bills and joint resolution, in which it requested the concurrence of the Senate:

H.R. 1049. An act to amend sections 334, 367, and 369 of the Bankruptcy Act (11 U.S.C. 734, 767, 769) and to add a new section 355 so as to require claims to be filed and to limit the time within which claims may be filed in chapter XI (arrangement) proceedings to the time prescribed by section 57n of the Bankruptcy Act (11 U.S.C. 93n);

H.R. 1159. An act to amend the Classification Act of 1949 to authorize the establishment of hazardous duty pay in certain cases;

H.R. 1213. An act for the relief of World Games, Inc.;

H.R. 1267. An act for the relief of Lawrence E. Bird;

H.R. 1286. An act for the relief of Lt. Claude V. Wells;

H.R. 1292. An act for the relief of Carmela Calabrese DiVito;

H.R. 1428. An act for the relief of Mrs. Ethel Knoll;

H.R. 1447. An act for the relief of T. W. Holt & Co. and/or Holt Import & Export Co.;

H.R. 1459. An act for the relief of Oliver Brown;

H.R. 1492. An act to provide for the sale of certain reserved mineral interests of the United States in certain real property owned by Jack D. Wishart and Juanita H. Wishart;

H.R. 1561. An act for the relief of Melborn Keat;

H.R. 1853. An act for the relief of Patti Jean Fulton;

H.R. 1876. An act for the relief of Mrs. Rita M. Bravi;

H.R. 2179. An act for the relief of Mrs. David Ishmael, Manhattan, Kans.

H.R. 2245. An act for the relief of Stella McKee;

H.R. 2257. An act for the relief of Kenneth F. Miller;

H.R. 2292. An act for the relief of Marvin M. Greenlee;

H.R. 2302. An act for the relief of James M. Norman;

H.R. 2326. An act for the relief of Maurice Casner and Eileen G. Casner;

H.R. 2327. An act for the relief of Lt. Col. Edward C. Campbell;

H.R. 2364. An act for the relief of the Clay County Hospital, Brazil, Ind.;

H.R. 2699. An act for the relief of Victor L. Ashley;

H.R. 2700. An act for the relief of Francis Janis and certain other Indians;

H.R. 2708. An act for the relief of Vasiliki Moundroukas;

H.R. 2736. An act for the relief of William C. Jessup;

H.R. 2743. An act for the relief of Mrs. Mary E. O'Rourke;

H.R. 2772. An act for the relief of Mr. and Mrs. Harley Brewer;

H.R. 2798. An act for the relief of Mrs. Helen Veselenak;

H.R. 2859. An act to provide for the promulgation of rules of practice and procedure under the Bankruptcy Act, and for other purposes;

H.R. 3022. An act for the relief of Gene H. King;

H.R. 3029. An act for the relief of Maj. Arnold M. Anderson;

H.R. 3190. An act to amend the act of March 3, 1901, relating to devises and bequests by will;

H.R. 3240. An act for the relief of Mrs. Josephine Dubins;

H.R. 3356. An act for the relief of Josephine Maria (Bonaccorso) Bowtell;

H.R. 3369. An act for the relief of Mrs. Elizabeth G. Mason;

H.R. 3450. An act for the relief of Herbert B. Shorter, Sr.;

H.R. 3545. An act to amend section 131 of title 13, United States Code, so as to provide for taking of the economic censuses 1 year earlier starting in 1968;

H.R. 3574. An act to provide for the withdrawal and reservation for the use of the Department of the Air Force of certain public lands of the United States at Cuddeback Lake Air Force Range, Calif., for defense purposes;

H.R. 3612. An act to define the term "child" for lump-sum payment purposes under the Civil Service Retirement Act;

H.R. 3623. An act for the relief of Col. Frank D. Schwikert, U.S. Air Force;

H.R. 3624. An act for the relief of Maj. Donald B. Powers, U.S. Air Force;

H.R. 3625. An act for the relief of Maj. Leonard H. Potterbaum, U.S. Air Force;

H.R. 3627. An act for the relief of Arthur C. Berry and others;

H.R. 3755. An act for the relief of Glendal W. Hancock;

H.R. 4214. An act for the relief of the Stella Reorganized Schools R–I, Missouri;

H.R. 4330. An act to amend the District of Columbia Business Corporation Act;

H.R. 4349. An act for the relief of Robert O. Nelson and Harold E. Johnson;

H.R. 5044. An act to amend the act entitled "An act to provide for a mutual-aid plan for fire protection by and for the District of Columbia and certain adjacent communities in Maryland and Virginia, and for other purposes";

H.R. 5081. An act to authorize the Commissioners of the District of Columbia to sell a right-of-way across a portion of the District Training School grounds at Laurel, Md., and for other purposes; and

H.J. Res. 180. Joint resolution to authorize the continued use of certain lands within the Sequoia National Park by portions of an existing hydroelectric project.

HOUSE BILLS AND JOINT RESOLUTION REFERRED

The following bills and joint resolution were severally read twice by their titles and referred as indicated:

H.R. 1049. An act to amend sections 334, 367, and 369 of the Bankruptcy Act (11 U.S.C. 734, 767, 769) and to add a new section 355 so as to require claims to be filed and to limit the time within which claims may be filed in chapter XI (arrangement) proceedings to the time prescribed by section 57n of the Bankruptcy Act (11 U.S.C. 93n);

H.R. 1213. An act for the relief of World Games, Inc.;

H.R. 1267. An act for the relief of Lawrence E. Bird;

H.R. 1286. An act for the relief of Lt. Claude V. Wells;

H.R. 1292. An act for the relief of Garmela Calabrese DiVito;

H.R. 1447. An act for the relief of T. W. Holt & Co. and/or Holt Import & Export Co.;

H.R. 1459. An act for the relief of Oliver Brown;

H.R. 1561. An act for the relief of Melborn Keat;

H.R. 1853. An act for the relief of Patti Jean Fulton;

H.R. 1876. An act for the relief of Mrs. Rita M Bravi;

H.R. 2179. An act for the relief of Mrs. David Ishmael, Manhattan, Kans.;

H.R. 2245. An act for the relief of Stella McKee;

H.R. 2257. An act for the relief of Kenneth F. Miller;

H.R. 2292. An act for the relief of Marvin M. Greenlee;

H.R. 2302. An act for the relief of James M. Norman;

H.R. 2326. An act for the relief of Maurice Casner and Eileen G. Casner;

H.R. 2327. An act for the relief of Lt. Col. Edward C. Campbell;

H.R. 2364. An act for the relief of the Clay County Hospital, Brazil, Ind.;

H.R. 2699. An act for the relief of Victor L. Ashley;

H.R. 2700. An act for the relief of Francis Janis and certain other Indians;

H.R. 2708. An act for the relief of Vasiliki Moundroukas;

H.R. 2736. An act for the relief of William C. Jessup;

H.R. 2743. An act for the relief of Mrs. Mary E. O'Rourke;

H.R. 2772. An act for the relief of Mr. and Mrs. Harley Brewer;

H.R. 2859. An act to provide for the promulgation of rules of practice and procedure under the Bankruptcy Act, and for other purposes;

H.R. 3022. An act for the relief of Gene H. King;

H.R. 3029. An act for the relief of Maj. Arnold M. Anderson;

H.R. 3240. An act for the relief of Mrs. Josephine Dubins;

H.R. 3356. An act for the relief of Josephine Marie (Bonaccorso) Bowtell;

H.R. 3450. An act for the relief of Herbert B. Shorter, Sr.;

H.R. 3623. An act for the relief of Col. Frank D. Schwikert, U.S. Air Force;

H.R. 3624. An act for the relief of Maj. Donald B. Powers, U.S. Air Force;

H.R. 3625. An act for the relief of Maj. Leonard H. Potterbaum, U.S. Air Force;

H.R. 3627. An act for the relief of Arthur C. Berry and others;

H.R. 3755. An act for the relief of Glendal W. Hancock;

H.R. 4214. An act for the relief of the Stella Reorganized Schools R–I, Missouri; and

H.R. 4349. An act for the relief of Robert O. Nelson and Harold E. Johnson; to the Committee on the Judiciary.

H.R. 1159. An act to amend the Classification Act of 1949 to authorize the establishment of hazardous duty pay in certain cases;

H.R. 3545. An act to amend section 131 of title 13. United States Code, so as to provide for taking of the economic censuses 1 year earlier starting in 1968; and

H.R. 3612. An act to define the term "child" for lump-sum payment purposes under the Civil Service Retirement Act; to the Committee on Post Office and Civil Service.

H.R. 1428. An act for the relief of Mrs. Ethel Knoll;

H.R. 2798. An act for the relief of Mrs. Helen Veselenak; and

H.R. 3369. An act for the relief of Mrs. Elizabeth G. Mason; to the Committee on Finance.

H.R. 1492. An act to provide for the sale of certain reserved mineral interests of the United States in certain real property owned by Jack D. Wishart and Juanita H. Wishart;

H.R. 3574. An act to provide for the withdrawal and reservation for the use of the Department of the Air Force of certain public lands of the United States at Cuddeback Lake Air Force Range, Calif., for defense purposes; and

H.J. Res. 180. Joint resolution to authorize the continued use of certain lands within the Sequoia National Park by portions of an existing hydroelectric project; to the Committee on Interior and Insular Affairs.

H.R. 3190. An act to amend the act of March 3, 1901, relating to devises and bequests by will;

H.R. 4330. An act to amend the District of Columbia Business Corporation Act;

H.R. 5044. An act to amend the act entitled "An act to provide for a mutual-aid plan for fire protection by and for the District of Columbia and certain adjacent communities in Maryland and Virginia, and for other purposes"; and

H.R. 5081. An act to authorize the Commissioners of the District of Columbia to sell a right-of-way across a portion of the District Training School grounds at Laurel, Md., and for other purposes; to the Committee on the District of Columbia.

LIMITATION ON STATEMENTS DURING MORNING HOUR

On request of Mr. **Mansfield**, and by unanimous consent, statements during the morning hour were ordered limited to 3 minutes.

EXECUTIVE COMMUNICATIONS, ETC.

The ACTING PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

Report on Actual Procurement Receipts for Medical Stockpile of Civil Defense Emergency Supplies and Equipment Purposes

A letter from the Secretary of Health, Education, and Welfare, transmitting, pursuant to law, a report of actual procurement receipts for medical stockpile of civil defense emergency supplies and equipment purposes, for the quarter ended March 31, 1963 (with an accompanying report); to the Committe on Armed Services.

Report on Backlog of Pending Applications and Hearing Cases in Federal Communications Commission

A letter from the Chairman, Federal Communications Commission, Washington, D.C., transmitting, pursuant to law, a report on backlog of pending applications and hearing cases in that Commission, as of February 28, 1963 (with an accompanying report); to the Committee on Commerce.

Additional Assistant Secretary of State

A letter from the Secretary of State, transmitting a draft of proposed legislation to authorize one additional Assistant Secretary of State, and for other purposes (with accompanying papers); to the Committee on Foreign Relations.

Audit Report on Alaska International Rail and Highway Commission

A letter from the Comptroller General of the United States, transmitting, pursuant to law, an audit report on the Alaska International Rail and Highway Commission, for the period July 30, 1957, through June 30, 1961 (with an accompanying report); to the Committee on Government Operations.

Report on Review of Employees' Air Travel Authorized by the Washington Office, Veterans' Administration

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report on the review of employees' air travel authorized by the Washington office, Veterans' Administration, dated April 1963 (with an accompanying report); to the Committee on Government Operations.

Amendment of Section 104(b)(5), Title 23, United States Code, Relating to Certain Cost Estimates for Completion of the National System of Interstate and Defense Highways

A letter from the Secretary of Commerce, transmitting a draft of proposed legislation to amend section 104(b)(5) of title 23, United States Code, to provide for the submission of certain cost estimates for the completion of the National System of Interstate and Defense Highways, and for other purposes (with an accompanying paper); to the Committee on Public Works.

PETITIONS AND MEMORIALS

Petitions, etc., were laid before the Senate, or presented, and referred as indicated:

By the ACTING PRESIDENT pro tempore:

A joint resolution of the Legislature of the State of California; to the Committee on Appropriations:

"Senate Joint Resolution 5

"Joint resolution relative to itinerant offices for unemployment insurance benefits

"Whereas unemployment is not limited to the heavily concentrated population areas but extends into the suburban areas; and

"Whereas individuals who are unemployed are often required to go great distances in order to negotiate and claim their accrued State unemployment benefits; and

"Whereas the burden of the travel expense falls upon those who are in a position least able to shoulder such expense and this added expense tends to vitiate the objectives of the unemployment compensation program; and

"Whereas a program conducted in Anderson, Calif., has indicated that establishment of itinerant offices to handle unemployment benefits is administratively feasible and will result in only a small added cost; and

"Whereas this program at Anderson, Calif., has saved those claimants using the local unemployment insurance benefits office in 1962 a total travel mileage of 39,314 miles; and

"Whereas the above 39,314 miles saved represented an approximate 25 percent of those eligible to receive pay in the Anderson area and had the other 75 percent of those eligible received their pay in the Anderson office there would have been a total mileage saving of 167,000 miles at a cost to the unemployment insurance agency of only 600 miles. The other 75 percent of those eligible to receive pay in the Anderson office penalized themselves an additional 127,686 miles of travel in order to receive their pay weekly instead of semimonthly, as the Anderson office is on a semimonthly basis; and

"Whereas additional funds from the U.S. Government are necessary in order for the State of California to implement a regular program of itinerant unemployment insurance offices: Now, therefore, be it

"*Resolved by the Senate and the Assembly of the State of California, jointly,* That the Congress of the United States is urged to enact legislation granting additional funds which will enable the States to establish a system of itinerant unemployment insurance benefit offices, on a weekly payment basis, for suburban areas; and be it further

"*Resolved,* That the secretary of the senate be hereby directed to send copies of this resolution to the President of the United States, the President pro tempore of the Senate, the Speaker of the House of Representatives, and each member of the California delegation in the Congress of the United States."

A resolution adopted by the Harvey W. Seeds Post No. 29, the American Legion, Miami, Fla., favoring the enactment of legislation to name the new veterans hospital to be erected in Miami, Dade County, Fla., the Joe H. Adams Memorial Hospital; to the Committee on Labor and Public Welfare.

A resolution of the House of Representatives of the State of Texas; to the Committee on Foreign Relations:

"House Resolution 247

"Whereas the U.S. Arms Control and Disarmament Agency, created by act of Congress in September 1961, has supported and promoted the "U.S. Program for General and Complete Disarmament in a Peaceful World," which could result in complete disarmament in the United States in less than 10 years; and

"Whereas history has taught us that peace is only achieved when a free people stay militarily strong; and

"Whereas Khrushchev has sworn he will bury us, but he intends to bury our freedom, take our children and place us in slavery; and

"Whereas personal freedoms and economic security can be enjoyed only by those who possess the power to protect their citizens against the invasions of other systems of government; and

"Whereas an understanding of the disarmament policy of our administration, Congress, and the State Department is the most crucial issue facing our citizens today: Now, therefore, be it

"*Resolved by the House of Representatives of the State of Texas,* That the house of representatives of the 58th legislature wishes to go on record in opposition to the disarmament policy of the U.S. Arms Control and Disarmament Agency; provided, that the Congress of the United States is notified that, irrespective of Federal action, the sovereign State of Texas will never release her State military forces to any international organization, but will forever retain her right under the Constitution of this Republic and State to keep a militia for the protection of her citizens; and be it further

"*Resolved,* That copies of this resolution be prepared and sent to members of the Texas delegation in the National Congress and to Vice President LYNDON B. JOHNSON as an indication of the views of this house concerning our present disarmament policy as proposed by the U.S. Arms Control and Disarmament Agency.

"BYRON TUNNELL,
"*Speaker of the House.*
"DOROTHY HOLLMAN,
"*Chief Clerk of the House.*"

A resolution of the Legislature of the State of Florida; to the Committee on Labor and Public Welfare:

"House Memorial 229

"Memorial to the Congress of the United States to more fully recognize that the impact of approximately 150,000 Cuban refugees has created a substantial and persistent unemployment and social problem, which has and does exist in the heavily populated Dade County area and that further and immediate action must be taken and prompt remedies be found to alleviate the harmful conditions that do now exist and will continue to exist and become acute with the continuous heavy influx of these refugees among the residents of this State

"Whereas the Congress of the United States has heretofore given recognition to the existence of the large numbers of Cuban refugees in this State and to the problems caused thereby; and

"Whereas this large number of refugees who continue to flee from the tyrannical and oppressive conditions of the communistic Government of Cuba to seek a haven in a democratic country where human rights and dignity are recognized supreme; and

"Whereas it has become obvious that the needs of these refugees who, through no fault of their own, have become a burden on certain local areas of this State and that the local resources and facilities of these areas have been taxed beyond their capacities; and

"Whereas the education of Cuban refugee children is now pressing hard on the educational funds and facilities provided by the State of Florida; and

"Whereas the present existence of this large number of Cuban refugees has already placed tremendous and herculean economic burdens upon the local residents and the local governments of these areas in that the local labor market has been drastically affected to the detriment of the permanent working population; and

"Whereas many of these local residents are being displaced from their regular employment and thus becoming an additional economic burden to the local welfare bureau and in many instances causing the permanent residents in these areas to become a burden on their friends and relatives; and

"Whereas the charitable organizations in these areas have also had placed on them an unduly heavy economic burden arising as a result of the tremendous influx of Cuban refugees which has strained their resources to the breaking point; and

"Whereas it has become obvious that the needs of these refugees cannot be met from local resources and facilities which have been substantially depleted; and

"Whereas regardless of previous measures to alleviate this burdensome problem, the continued increase in the numbers of refugees to be found in the Dade County area, which is the major port of entry for these helpless and unfortunate refugees, due to the existing policy of the U.S. Government; and

"Whereas there is the ever-present danger that the problems created by this tremendous influx of Cuban refugees may spread to other areas of Florida and aggravate their problems; and

"Whereas this tremendous problem must be immediately alleviated in order to prevent irreparable harm, both to the economic and social well-being of the citizens of this State; and

"Whereas these helpless and unfortunate Cuban refugees and local residents who have been displaced from their places of employment because of these problems in these local areas now have more than doubled in number the unemployment in these local areas and have brought the unemployment situation in these areas to a critical stage; and

"Whereas there is pending legislation in the Congress of the United States with a definite purpose to alleviate the acute economic and social problems caused in these local areas by Cuban refugees fleeing the tyrannical and oppressive pressure of the communistic government of Cuba: Now, therefore, be it

"*Resolved by the Legislature of the State of Florida*, That the Congress of the United States be and it is hereby respectfully urged and requested to give full recognition to the fact that the Cuban refugee problem in this State is primarily the responsibility of the Federal Government and of national concern and ask that additional assistance and relief be provided to Dade County and any other counties similarly affected and that other Cuban refugee centers be established in the United States and other ports of entry be established for the entrance of these unfortunate and helpless refugees from Communist tyranny; and be it further

"*Resolved*, That copies of this memorial be dispatched to the President of the United States; to the President of the U.S. Senate; to the Speaker of the House of Representatives of the United States; to the Secretary of Commerce of the United States; to the Secretary of Labor of the United States; to the Secretary of Health, Education, and Welfare of the United States; and to each member of the Florida congressional delegation."

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. EASTLAND, from the Committee on the Judiciary, without amendment:

S. 1196. A bill for the relief of Mrs. Maria Nowakowski Chandler (Rept. No. 143);

H.R. 2833. An act to amend subdivision d of section 60 of the Bankruptcy Act (11 U.S.C. 96d) so as to give the court authority on its own motion to reexamine attorney fees paid or to be paid in a bankruptcy proceeding (Rept. No. 144);

H.R. 2837. An act to amend further section 11 of the Federal Register Act (44 U.S.C. 311) (Rept. No. 145);

H.R. 2842. An act to amend section 3238 of title 18, United States Code (Rept. No. 146); and

H.R. 2849. An act to amend section 47 of the Bankruptcy Act (Rept. No. 147).

By Mr. EASTLAND, from the Committee on the Judiciary, with an amendment:

S. 787. A bill for the relief of Zofia Miecielica (Rept. No. 148).

By Mr. EASTLAND, from the Committee on the Judiciary, with amendments:

S. 495. A bill for the relief of Evanthia Haji-Christou (Rept. No. 149); and

S. 732. A bill for the relief of Antonio Zorich, Amabile Miotto Zorich, and Fiorella Zorich (Rept. No. 150).

By Mr. JOHNSTON, from the Committee on the Judiciary, without amendment:

S. 980. A bill to provide for holding terms of the U.S. district court for the district of Vermont at Montpelier and Saint Johnsbury (Rept. No. 152).

By Mr. JOHNSTON, from the Committee on the Judiciary, with amendments:

S. 102. A bill to amend title 28, United States Code, to provide for additional commissioners of the U.S. Court of Claims, and for other purposes (Rept. No. 151).

By Mr. KEATING, from the Committee on the Judiciary, without amendment:

S.J. Res. 39. Joint resolution designating the week of May 20–26, 1963, as National Actors' Equity Week (Rept. No. 142).

REPORT OF JOINT COMMITTEE ON REDUCTION OF NONESSENTIAL FEDERAL EXPENDITURES—FEDERAL STOCKPILE INVENTORIES

Mr. BYRD of Virginia. Mr. President, as chairman of the Joint Committee on Reduction of Nonessential Federal Expenditures, I submit a report on Federal stockpile inventories as of February 1963. I ask unanimous consent to have the report printed in the RECORD, together with a statement by me.

There being no objection, the report and statement were ordered to be printed in the RECORD, as follows:

FEDERAL STOCKPILE INVENTORIES, FEBRUARY 1963

INTRODUCTION

This is the 39th in a series of monthly reports on Federal stockpile inventories. It is for the month of February 1963.

The report is compiled from official data on quantities and cost value of commodities in these stockpiles submitted to the Joint Committee on Reduction of Nonessential Federal Expenditures by the Departments of Agriculture, Defense, and Health, Education, and Welfare, and the General Services Administration.

The cost value of materials in inventories covered in this report, as of February 1, 1963, totaled $14,159,810,325, and as of February 28, 1963, they totaled $14,025,156,888, a net decrease of $134,653,437 during the month.

Different units of measure make it impossible to summarize the quantities of commodities and materials which are shown in tables 1, 2, 3, and 4, but the cost value figures are summarized by major category, as follows:

Summary of cost value of stockpile inventories by major category

Major category	Beginning of month, Feb. 1, 1963	End of month, Feb. 28, 1963	Net change during month
Strategic and critical materials:			
National stockpile [1]	$5,879,281,200	$5,870,072.100	−$9,209.100
Defense Production Act	1.500,905,400	1,500 308.600	−596.800
Supplemental—barter	1,304,643,502	1,312,701,632	+8.058,130
Total, strategic and critical materials [1]	8,684,830,102	8.683,082,332	−1,747,770
Agricultural commodities:			
Price support inventory	5,042,931,625	4,903.701,615	−139,230,010
Inventory transferred from national stockpile [1]	127,874,190	127,874,190	
Total, agricultural commodities [1]	5,170.805.815	5,031,575,805	−139,230,010
Civil defense supplies and equipment:			
Civil defense stockpile, Department of Defense	32,377,298	32,846,003	+468,705
Civil defense medical stockpile, Department of Health, Education, and Welfare	177,403,810	182,862.548	+5.458,738
Total, civil defense supplies and equipment	209,781,108	215,708,551	+5,927,443
Machine tools:			
Defense Production Act	2.230,800	2,230,800	
National Industrial Reserve Act	92.162,500	92,559,400	+396.900
Total, machine tools	94.393.300	94,790,200	+396,900
Total, all inventories	14,159,810,325	14,025,156,888	−134,653,437

[1] Cotton inventory valued at $128,409,100 withdrawn from the national stockpile and transferred to Commodity Credit Corporation for disposal, pursuant to Public Law 87–548, during August 1962.

Detailed tables in this report show each commodity, by the major categories summarized above, in terms of quantity and cost value as of the beginning and end of the month. Net changes figures reflect acquisitions, disposals, and accounting and other adjustments during the month.

The cost value figures represent generally the originally acquisition cost of the commodities delivered to permanent storage locations, together with certain packaging, processing, upgrading, et cetera costs as carried in agency inventory accounts. Quantities are stated in the designated stockpile unit of measure.

The appendix to this report, beginning on page 19, includes program descriptions and statutory citations pertinent to each stockpile inventory within the major categories.

The stockpile inventories covered by the report are tabulated in detail as follows:

Table 1: Strategic and critical materials inventories (all grades), February 1963 (showing by commodity net changes during the month in terms of cost value and quantity, and excesses over maximum objectives in terms of quantity as of the end of the month).

Table 2: Agricultural commodities inventories, February 1963 (showing by commodity net changes during the month in terms of cost value and quantity).

Table 3: Civil defense supplies and equipment inventories, February 1963 (showing by item net changes during the month in terms of cost value and quantity).

Table 4: Machine tools inventories, February 1963 (showing by item net changes during the month in terms of cost value and quantity).

TABLE 1.—*Strategic and critical materials inventories (all grades), February 1963 (showing by commodity net changes during the month in terms of cost value and quantity, and excesses over maximum objectives in terms of quantity as of the end of the month)*

Commodity	Cost value			Quantity					
	Beginning of month, Feb. 1, 1963	End of month, Feb. 28, 1963	Net change during month	Unit of measure	Beginning of month, Feb. 1, 1963	End of month, Feb. 28, 1963	Net change during month	Maximum objective [1]	Excess over maximum objective

See footnotes at end of table.

Table 1.—*Strategic and critical materials inventories (all grades), February 1963 (showing by commodity net changes during the month in terms of cost value and quantity, and excesses over maximum objectives in terms of quantity as of the end of the month)*—Continued

Commodity	Cost value: Beginning of month, Feb. 1, 1963	Cost value: End of month, Feb. 31, 1963	Cost value: Net change during month	Quantity: Unit of measure	Quantity: Beginning of month, Feb. 1, 1963	Quantity: End of month, Feb. 31, 1963	Quantity: Net change during month	Maximum objective [1]	Excess over maximum objective
Cobalt:									
National stockpile	$169,363,300	$169,313,100	−$50,200	Pound	76,788,587	76,768,118	−20,469		
Defense Production Act	52,076,600	52,074,600	−2,000	do	25,195,172	25,194,122	−1,050		
Supplemental—barter	2,169,000	2,169,000		do	1,077,018	1,077,018			
Total	223,608,900	223,556,700	−52,200	do	103,060,777	103,039,258	−21,519	19,000,000	84,039,258
Coconut oil:									
National stockpile	16,981,400	16,763,800	−217,600	do	112,057,733	110,630,853	−1,426,880	(2)	110,630,853
Colemanite:									
Supplemental—barter	2,636,400	2,636,400		Long dry ton	67,636	67,636		(2)	67,636
Columbium:									
National stockpile	23,860,400	23,860,400		Pound	7,488,960	7,488,960			
Defense Production Act	50,255,500	50,255,500		do	8,222,684	8,222,684			
Supplemental—barter	799,000	799,000		do	388,877	388,877			
Total	74,914,900	74,914,900		do	16,100,521	16,100,521		1,900,000	14,200,521
Copper:									
National stockpile	522,204,700	522,308,400	+103,700	Short ton	1,008,351	1,008,351			
Defense Production Act	62,779,600	62,258,600	−521,000	do	112,064	111,116	−948		
Supplemental—barter	8,242,803	8,242,803		do	12,381	12,381			
Total	593,227,103	592,809,803	−417,300	do	1,132,796	1,131,848	−948	1,000,000	131,848
Cordage fibers, abaca:									
National stockpile	38,198,900	38,148,200	−50,700	Pound	151,574,148	151,321,593	−252,555	150,000,000	1,121,593
Cordage fibers, sisal:									
National stockpile	43,701,600	43,420,400	−281,200	do	323,078,769	320,346,127	−2,732,642	320,000,000	346,127
Corundum:									
National stockpile	393,100	393,100		Short ton	2,008	2,008		2,000	8
Cryolite:									
Defense Production Act	8,197,000	8,197,000		do	29,685	29,685		(2)	29,685
Diamond dies:									
National stockpile	465,300	475,800	+10,500	Piece	15,313	15,464	+151	25,000	(3)
Diamond, industrial, crushing bort:									
National stockpile	61,609,500	61,609,500		Carat	31,113,411	31,113,411			
Supplemental—barter	15,456,700	15,456,700		do	5,523,748	5,523,748			
Total	77,066,200	77,066,200		do	36,637,159	36,637,159		30,000,000	6,637,159
Diamond, industrial, stones:									
National stockpile	100,501,500	100,501,500		do	9,315,183	9,315,183			
Supplemental—barter	186,159,160	186,160,100	+940	do	15,394,744	15,394,743	−1		
Total	286,660,660	286,661,600	+940	do	24,709,927	24,709,926	−1	18,000,000	6,709,926
Diamond tools:									
National stockpile	1,015,400	1,015,400		Piece	64,178	64,178		(2)	64,178
Feathers and down:									
National stockpile	38,797,100	38,563,800	−233,300	Pound	9,364,689	9,308,390	−56,299	8,800,000	508,390
Fluorspar, acid grade:									
National stockpile	26,167,500	26,167,500		Short dry ton	463,049	463,049			
Defense Production Act	1,394,400	1,394,400		do	19,700	19,700			
Supplemental—barter	33,465,200	33,495,700	+30,500	do	673,232	673,232			
Total	61,027,100	61,057,600	+30,500	do	1,155,981	1,155,981		280,000	875,981
Fluorspar, metallurigical grade:									
National stockpile	17,332,400	17,332,400		do	369,443	369,443			
Supplemental—barter	1,508,100	1,508,100		do	42,800	42,800			
Total	18,840,500	18,840,500		do	412,243	412,243		375,000	37,243
Graphite, natural, Ceylon, amorphous lump:									
National stockpile	937,900	937,900		do	4,455	4,455			
Supplemental—barter	341,200	341,200		do	1,428	1,428			
Total	1,279,100	1,279,100		do	5,883	5,883		3,600	2,283
Graphite, natural, Madagascar, crystalline:									
National stockpile	7,092,500	7,088,500	−4,000	do	34,410	34,390	−20		
Supplemental—barter	90,736	109,421	+18,685	do	826	938	+112		
Total	7,183,236	7,197,921	+14,685	do	35,236	35,328	+92	17,200	18,128
Graphite, natural, other, crystalline:									
National stockpile	1,896,400	1,896,400		do	5,487	5,487		2,100	3,387
Hydrochloride of quinine:									
National stockpile	1,400	1,400		Ounce	103	103		(2)	103
Hyoscine:									
National stockpile	30,600	30,600		do	2,100	2,100		2,100	(3)
Iodine:									
National stockpile	4,082,000	4,082,000		Pound	2,977,648	2,977,648			
Supplemental—barter	1,018,222	1,039,500	+21,278	do	996,958	994,920	−2,038		
Total	5,100,222	5,121,500	+21,278	do	3,974,606	3,972,568	−2,038	4,300,000	(3)

See footnotes at end of table.

TABLE 1.—*Strategic and critical materials inventories (all grades), February 1963 (showing by commodity net changes during the month in terms of cost value and quantity, and excesses over maximum objectives in terms of quantity as of the end of the month)*—Continued

Commodity	Cost value			Quantity					
	Beginning of month, Feb. 1, 1963	End of month, Feb. 28, 1963	Net change during month	Unit of measure	Beginning of month, Feb. 1, 1963	End of month, Feb. 28, 1963	Net change during month	Maximum objective [1]	Excess over maximum objective
Iridium:									
National stockpile	$2,525,800	$2,525,800		Troy ounce	13,937	13,937		4,000	9,937
Jewel bearings:									
National stockpile	3,805,800	3,809,600	+$3,800	Piece	51,037,267	51,088,611	+51,344	57,500,000	(2)
Kyanite-mullite:									
National stockpile	824,400	820,200	−4,200	Short dry ton	9,536	9,486	−50	4,800	4,686
Lead:									
National stockpile	319,298,100	319,298,100		Short ton	1,050,370	1,050,370			
Defense Production Act	2,461,800	2,415,900	−45,900	do	6,499	6,377	−122

---

[1] Maximum objectives for strategic and critical materials are determined pursuant to the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98–98h). The present objectives represent quantities of materials estimated to be necessary in the event of a 3-year war in which oversea sources would not be available.

[2] No present objective.

[3] Not in excess of maximum objective.

APPENDIX

STRATEGIC AND CRITICAL MATERIALS

National stockpile

The Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98–98h) provides for the establishment and maintenance of a national stockpile of strategic and critical materials. The General Services Administration is responsible for making purchases of strategic and critical materials and providing for their storage, security, and maintenance. These functions are performed in accordance with directives issued by the Director of the Office of Emergency Planning. The act also provides for the transfer from other Government agencies of strategic and critical materials which are excess to the needs of such other agencies and are required to meet the stockpile objectives established by OEP. In addition, the General Services Administration is responsible for disposing of those strategic and critical materials which OEP determines to be no longer needed for stockpile purposes.

General policies for strategic and critical materials stockpiling are contained in DMO V–7, issued by the Director of the Office of Emergency Planning and published in the Federal Register of December 19, 1959 (24 F.R. 10309). Portions of this order relate also to Defense Production Act inventories.

Defense Production Act

Under section 303 of the Defense Production Act of 1950 (50 U.S.C. App. 2093) and Executive Order 10480, as amended, the General Services Administration is authorized to make purchases of or commitments to purchase metals, minerals, and other materials, for Government use or resale, in order to expand productive capacity and supply, and also to store the materials acquired as a result of such purchases or commitments. Such functions are carried out in accordance with programs certified by the Director of the Office of Emergency Planning.

Supplemental—Barter

As a result of a delegation of authority from OEP (32A C.F.R., ch. I, DMO V–4) the General Services Administration is responsible for the maintenance and storage of materials placed in the supplemental stockpile. Section 206 of the Agricultural Act of 1956 (7 U.S.C. 1856) provides that strategic and other materials acquired by the Commodity Credit Corporation as a result of barter or exchange of agricultural products, unless acquired for the national stockpile or for other purposes, shall be transferred to the supplemental stockpile established by section 104(b) of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1704(b)). In addition to the materials which have been or may be so acquired, the materials obtained under the programs established pursuant to the Domestic Tungsten, Asbestos, Fluorspar, and Columbium-Tantalum Production and Purchase Act of 1956 (50 U.S.C. App. 2191–2195), which terminated December 31, 1958, have been transferred to the supplemental stockpile, as authorized by the provisions of said Production and Purchase Act.

AGRICULTURAL COMMODITIES

The price-support program

Price-support operations are carried out under the charter powers (15 U.S.C. 714) of the Commodity Credit Corporation, Department of Agriculture, in conformity with the Agricultural Act of 1949 (7 U.S.C. 1421), the Agricultural Act of 1954 (7 U.S.C. 1741), which includes the National Wool Act of 1954, the Agricultural Act of 1956 (7 U.S.C. 1442), the Agricultural Act of 1958 and with respect to certain types of tobacco, in conformity with the act of July 28, 1945, as amended (7 U.S.C. 1312). Under the Agricultural Act of 1949, price support is mandatory for the basic commodities—corn, cotton, wheat, rice, peanuts, and tobacco—and specific nonbasic commodities; namely, tung nuts, honey, milk, butterfat, and the products of milk and butterfat. Under the Agricultural Act of 1958, as producers of corn voted in favor of the new price-support program for corn authorized by that act, price support is mandatory for barley, oats, rye, and grain sorghums. Price support for wool and mohair is mandatory under the National Wool Act of 1954, through the marketing year ending March 31, 1966. Price support for other nonbasic agricultural commodities is discretionary except that, whenever the price of either cottonseed or soybeans is supported the price of the other must be supported at such level as the Secretary determines will cause them to compete on equal terms on the market. This program may also include operations to remove and dispose of or aid in the removal or disposition of surplus agricultural commodities for the purpose of stabilizing prices at levels not in excess of permissible price-support levels.

Price support is made available through loans, purchase agreements, purchases, and other operations, and, in the case of wool and mohair, through incentive payments based on marketings. The producers' commodities serve as collateral for price-support loans. With limited exceptions, price-support loans are nonrecourse and the Corporation looks only to the pledged or mortgage collateral for satisfaction of the loan. Purchase agreements generally are available during the same period that loans are available. By signing a purchase agreement, a producer receives an option to sell to the Corporation any quantity of the commodity which he may elect within the maximum specified in the agreement.

The major effect on budgetary expenditures is represented by the disbursement for price-support loans. The largest part of the commodity acquisitions under the program result from the forfeiting of commodities pledged as loan collateral for which the expenditures occurred at the time of making the loan, rather than at the time of acquiring the commodities.

Dispositions of commodities acquired by the Corporation in its price-support operations are made in compliance with sections 202, 407, and 416 of the Agricultural Act of 1949, and other applicable legislation, particularly the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1691), title I of the Agricultural Act of 1954, title II of the Agricultural Act of 1956, the Agricultural Act of 1958, the act of August 19, 1958, in the case of cornmeal and wheat flour, and the act of September 21, 1959, with regard to sales of livestock feed in emergency areas.

Inventory transferred from national stockpile

This inventory, all cotton, was transferred to Commodity Credit Corporation at no cost from the national stockpile pursuant to Public Law 85–96 and Public Law 87–548. The proceeds from sales, less costs incurred by CCC, are covered into the Treasury as miscellaneous receipts; therefore, such proceeds and costs are not recorded in the operating accounts. The cost value as shown for this cotton has been computed on the basis of average per bale cost of each type of cotton when purchased by CCC for the national stockpile.

CIVIL DEFENSE SUPPLIES AND EQUIPMENT

Civil defense stockpile

The Department of Defense conducts this stockpiling program pursuant to section 201(h) of Public Law 920, 81st Congress, as amended. The program is designed to provide some of the most essential materials to minimize the effects upon the civilian population which would be caused by an attack upon the United States. Supplies and equipment normally unavailable, or lacking in quantity needed to cope with such conditions, are stockpiled at strategic locations in a nationwide warehouse system consisting of general storage facilities.

Civil defense medical stockpile

As authorized under Public Law 920, 81st Congress, and following the intent of Reorganization Plan No. 1, 1958, the Director, Office of Emergency Planning, has delegated responsibility to the Department of Health, Education, and Welfare to plan and direct operation of the medical supply portion of the OEP stockpile. The warehousing of the medical stockpile is principally within the OEP warehouse system; in addition, the medical stockpile includes a program designed to preposition emergency hospitals and other treatment units in communities throughout the Nation.

MACHINE TOOLS

Defense Production Act

Under section 303 of the Defense Production Act of 1950 (50 U.S.C. App. 2093) and Executive Order 10480, as amended, the General Services Administration has acquired machine tools in furtherance of expansion of productive capacity, in accordance with programs certified by the Director of the Office of Emergency Planning.

National industrial equipment reserve

Under general policies established and directives issued by the Secretary of Defense, the General Services Administration is responsible for care, maintenance, utilization, transfer, leasing, lending to nonprofit schools, disposal, transportation, repair, restoration, and renovation of national industrial reserve equipment transferred to GSA under the National Industrial Reserve Act of 1948 (50 U.S.C. 451–462).

STATEMENT BY SENATOR BYRD OF VIRGINIA

The cost value of Federal stockpile inventories as of February 28, 1963, totaled $14,025,156,888. This was a net decrease of $134,653,437 as compared with the February 1 total of $14,159,810,325. Net changes during the month are summarized by major category as follows:

Major category	Cost value, February 1963	
	Net change during month	Total, end of month
Strategic and critical materials	−$1,747,770	$8,683,082,332
Agricultural commodities	−139,230,010	5,031,575,805
Civil defense supplies and equipment	+5,927,443	215,708,551
Machine tools	+396,900	94,790,200
Total	−134,653,437	14,025,156,888

These figures are from the February 1963 report on Federal stockpile inventories, compiled from official agency data by the Joint Committee on Reduction of Nonessential Federal Expenditures, showing detail with respect to quantity and cost value of each commodity in the inventories covered.

STRATEGIC AND CRITICAL MATERIALS

So-called strategic and critical materials are stored by the Government in (1) the national stockpile, (2) the Defense Production Act inventory, and (3) the supplemental-barter stockpile.

Overall, there are now 95 materials stockpiled in the strategic and critical inventories. Maximum objectives—in terms of volume—are presently fixed for 76 of these 95 materials. Of the 76 materials having maximum objectives, 65 were stockpiled in excess of their objectives as of February 28, 1963.

Increases in cost value were reported in 30 of the 95 materials stockpiled in all strategic and critical inventories, decreases were reported in 21 materials, and 44 materials remained unchanged during the month of February 1963.

National stockpile

The cost value of materials in the national stockpile as of February 28, 1963, totaled $5,870,072,100. This was a net decrease of $9,209,100 during the month. The largest decrease was $5,449,600 in rubber.

Defense Production Act inventory

The cost value of materials in the Defense Production Act inventory as of February 28, 1963, totaled $1,500,308,600. This was a net decrease of $596,800. The largest decreases were in copper and nickel, partially offset by an increase in aluminum.

Supplemental-barter

The cost value of materials in the supplemental-barter stockpile as of February 28 totaled $1,312,701,632. This was a net increase of $8,058,130. The largest increases were in manganese, thorium, aluminum oxide, and chromite.

OTHER STOCKPILE INVENTORIES

Among the other categories of stockpiled materials covered by the report, the largest is $5 billion in agricultural commodities. Major decreases in agricultural commodities during February were reported for corn, grain sorghum, wheat, and soybeans in the price support inventory.

Inventories of civil defense supplies and equipment showed increases in radiological equipment and medical stocks; and the machine tools inventories showed a net increase during February.

EXECUTIVE REPORTS OF COMMITTEES

As in executive session,

The following favorable reports of nominations were submitted:

By Mr. EASTLAND, from the Committee on the Judiciary:

Louis M. Janelle, of New Hampshire, to be U.S. attorney for the district of New Hampshire;

Paul G. April, of New Hampshire, to be U.S. marshal for the district of New Hampshire; and

Frank Udoff, of Maryland, to be U.S. marshal for the district of Maryland.

By Mr. FULBRIGHT, from the Committee on Foreign Relations:

Brewster H. Morris, of Pennsylvania, a Foreign Service officer of the class of career minister, to be Ambassador Extraordinary and Plenipotentiary to the Republic of Chad;

George C. McGhee, of Texas, to be Ambassador Extraordinary and Plenipotentiary to the Federal Republic of Germany;

Roger, Hilsman, Jr., of Maryland, to be an Assistant Secretary of State;

David Elliott Bell, of Massachusetts, to be alternate Governor of the Inter-American Development Bank;

Edwin M. Martin, of Ohio, Assistant Secretary of State for Inter-American Affairs, to be the representative of the United States of America to the 10th session of the Economic Commission for Latin America of the Economic and Social Council of the United Nations; and

Walter M. Kotschnig, of Maryland, to be the representative of the United States of America to the 18th plenary session of the Economic Commission for Europe of the Economic and Social Council of the United Nations.

BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. FULBRIGHT:

S. 1343. A bill providing for the improvement of public education; to the Committee on Labor and Public Welfare.

(See the remarks of Mr. Fulbright when he introduced the above bill, which appear under a separate heading.)

By Mr. GOLDWATER:

S. 1344. A bill to provide for the precise determination of the southern boundary of the Salt River Indian Reservation, Arizona; to the Committee on Interior and Insular Affairs.

By Mr. SCOTT:

S. 1345. A bill to prohibit the introduction into interstate commerce of any shipping container manufactured in the United States from imported steel unless the container is marked so as to indicate the country of origin of the steel; to the Committee on Commerce.

(See the remarks of Mr. Scott when he introduced the above bill, which appear under a separate heading.)

By Mr. ALLOTT (for himself, Mr. Anderson, Mr. Dominick, and Mr. Mechem):

S. 1346. A bill to consent to the amendment by the States of Colorado and New Mexico of the Costilla Creek Compact; to the Committee on the Judiciary.

(See the remarks of Mr. Allott when he introduced the above bill, which appear under a separate heading.)

By Mr. BURDICK:

S.J. Res. 70. Joint resolution to provide for an investigation by the Interstate Commerce Commission of railroad freight rates applicable to shipments of grain in carload lots from States in the Midwest region of the United States; to the Committee on Commerce.

(See the remarks of Mr. Burdick when he introduced the above joint resolution, which appear under a separate heading.)

CONCURRENT RESOLUTION

BACK PAY FOR CAPTIVE ARMED SERVICES PERSONNEL

Mr. DOMINICK submitted the following concurrent resolution (S. Con. Res. 38); which was referred to the Committee on Armed Services:

Whereas many naval and Marine Corps officers were captured by the enemy during World War II, and, although selected for promotion to higher rank by ALNAV or block promotion lists, were not promoted because of their captivity; and

Whereas many of these officers, upon repatriation, received one or more promotions by means of appointments predated to show appropriate dates of rank, but received pay for the higher grades only from the dates on which the promotions were actually made; and

Whereas, despite the language of section 2 of the Act of March 7, 1942 (56 Stat. 143, 144), as amended, commonly called the Missing Persons Act, that such person shall "be entitled to receive or have credited to his account the same pay and allowances to which he was entitled at the beginning of such period of absence or may become entitled thereafter", these officers have consistently been denied increases in pay and allowances from date of rank to the actual date these promotions were made: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is affirmed that it is the intent of Congress that those officers of the Navy and Marine Corps whose promotion was authorized by ALNAV or block promotion lists during the periods when they were prisoners of the enemy during World War II but not effected because of such imprisonment, and who were promoted after repatriation with dates of rank relating back to the dates on which they would have been promoted but for their captivity, shall by authority of section 2 of the Act of March 7, 1942 (56 Stat. 143, ch. 166), be entitled to pay, allowances, and precedence from the date of rank stipulated in the later appointing orders.

FEDERAL AID TO EDUCATION

Mr. FULBRIGHT. Mr. President, the senior Senator from Oregon [Mr. Morse] has announced that the Education Subcommittee of the Senate Committee on Labor and Public Welfare will begin hearings on aid to education and related bills beginning Monday, April 29.

I know that the members of the committee will want to consider all possible approaches to this controversial subject. For this reason, I am introducing today a bill based on principles recommended by the bipartisan Citizens Committee for Federal Aid for Public Elementary and Secondary Education and the Council of Chief State School Officers. A distinguished educator of my State, A. W. Ford, State Commissioner of Education, is president of the council.

This is a companion bill to H.R. 5344 which was introduced by Representative Carl Perkins on April 1. I do not necessarily endorse every detail of this bill, but I did want to assure that the proposals recommended by the Council of Chief State School Officers and the bipartisan citizens committee, composed of many distinguished individuals of all walks of life, were considered during the Senate committee's study of education bills. This bill expresses the composite views of the State school officers and, in view of the continuous controversy about Federal control in connection with aid to education, their views should be considered very carefully by the Congress.

I ask unanimous consent that the text of the bill be printed in the Record following my remarks. I also ask unanimous consent that a series of questions and answers and a State-by-State tabulation pertaining to the bill be printed in the Record.

The ACTING PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the bill, questions and answers, and tabulation will be printed in the Record.

The bill (S. 1343) providing for the improvement of public education, introduced by Mr. Fulbright, was received, read twice by its title, referred to the Committee on Labor and Public Welfare, and ordered to be printed in the Record, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—SURVEYS OF EDUCATIONAL NEEDS BY THE STATES

Statement of purposes and policies of act

Sec. 101. The Congress finds that Federal financial assistance to the States for the further improvement of public elementary and secondary education is necessary in the national interest, and declares that its policy requires that allocation of Federal funds for this purpose shall be made after assurance by each State that the Federal funds can and will be allocated among its local education agencies according to their relative needs and for purposes that have been carefully determined by the State educational agency to be relatively most important in improving the scope and quality of public education.

The Congress finds that data adequate to enable each State educational agency to make such assurances require that each State educational agency desiring to participate in the allocation of Federal funds as authorized by title II shall make a survey of the educational needs of all local education agencies within the State prior to application for such funds.

Guidelines for State surveys

SEC. 102. It is the intention of the Congress that State surveys made under the provisions of this title shall ascertain the relative needs among the local education agencies of each State for Federal financial assistance for the improvement of public elementary and secondary education, expressed in terms of relative priorities among the needs specified in this section, and other similar needs in each State. In undertaking the survey, the State educational agency shall agree to establish and to describe educational priorities in a manner that will form a reasonable basis for a practicable formula under which commingled State and Federal funds may be allocated among local education agencies to meet these needs according to their respective priorities. Each State educational agency in making this survey shall take into account the following factors, among others, in determining relative need in each local education agency within the State:

(a) Adequacy of the scope of the curriculum and the quality of instruction in the elementary schools; (b) adequacy of the scope of the curriculum and the quality of instruction in the secondary schools, with particular reference to basic subjects such as English, history, government and other social sciences, mathematics, natural and physical sciences, modern foreign languages, fine and industrial arts, and vocational education; (c) provisions of school programs giving special attention to particular problems of education such as opportunities for gifted, retarded, mentally or physically handicapped, prospective dropouts, and other exceptional or underachieving pupils; (d) guidance and other personnel services for all pupils; (e) provisions for vocational and technical education suitable for modern society; (f) school plant and equipment suitable for housing of an improved educational program and the relative financial ability of local education agencies to supply the same; (g) special situations in local education agencies that can be improved by the use of additional funds, such as overcrowding, teachers having insufficient preparation and experience or inadequate laboratories, equipment, materials, supplies, teaching aids, or library services; (h) the relative cost of current operation per pupil in average daily attendance; and (i) the relative economic ability of local education agencies to finance public education, including funds available from the State and other sources.

Authorization of appropriations

SEC. 103. In order to enable the States to carry out the purposes and policies of this title, there is hereby authorized to be appropriated the sum of $6,000,000, to remain available until expended. The sums appropriated pursuant to this section shall be used for making payments to State educational agencies whose applications for funds for carrying out such purposes and policies have been approved under section 104.

Applications for funds

SEC. 104. The Commissioner shall approve any application from a State educational agency for funds to carry out the purposes of this title, provided such application: (a) designates the State educational agency as the sole agency for carrying out such purposes; (b) provides for making a survey under the general supervision of a committee composed of not fewer than five or more than ten persons skilled in public school work and an equal number of lay citizens broadly interested in education, and the members of the committee shall be appointed for the term of the survey by the State board of education or, in States having no such board, by the chief State school officer, and the chairman shall be the chief State school officer or a staff member of the State educational agency appointed by him; (c) provides that the State educational agency will make such reports, in such forms, and containing such information as the Commissioner may from time to time reasonably require, and, to assure verification of such reports, give the Commissioner, upon request, access to the records upon which such information is based; (d) meets all other requirements of this title necessary to qualify a State for allocations of Federal funds under title II of this Act.

Allocation of funds

SEC. 105. Of the sums appropriated pursuant to section 103, $175,000 shall be allotted by the Commissioner to American Samoa, the District of Columbia, Guam, Puerto Rico, and the Virgin Islands according to their respective needs and upon the basis of agreements made with their respective State educational agencies, and the remainder shall be allotted to the other States in the same proportions as their respective school-age populations bear to the total school-age population of such other States; except that no such allotment to any State (other than to American Samoa, the District of Columbia, Guam, Puerto Rico, or the Virgin Islands) shall be less than $20,000.

The Commissioner shall from time to time estimate the sum to which each State will be entitled under this section during such ensuing period as he may determine, and shall thereupon certify to the Secretary of the Treasury the amount so estimated, reduced or increased, as the case may be, by any sum by which the Commissioner finds that his estimate for any prior period was greater or less than the amount to which the State was entitled for such period. The Secretary of the Treasury shall thereupon, prior to audit or settlement by the General Accounting Office, pay to the State, at the time or times fixed by the Commissioner, the amount so certified.

Survey report and distribution plan

SEC. 106. Upon the completion of the survey provided for in this title, each State educational agency shall file with the Commissioner ten copies of the survey report, together with ten copies of a practicable plan, approved by the State educational agency and based on the survey report, for the distribution to local education agencies within the State of the funds authorized by title II of this Act. The plan for distribution of funds shall include, in addition to the distribution formula, a description of the administrative processes to be used by the State educational agency in supervising the use of such funds in local education agencies and of the accounting procedures to be used by the local education agency in accounting to the State educational agency for the use of such funds.

Certificate of eligibility under title II

SEC. 107. The Commissioner shall approve the distribution plan of each State eligible to receive funds under title II of this Act if such distribution plan has been formulated according to the provisions of title I and is certified by the State educational agency to the Commissioner as the distribution plan of the State.

The final refusal of the Commissioner to approve any State distribution plan certified by a State educational agency under this title, and the Commissioner's final action, shall be subject to judicial review on the record, in the United States court of appeals for the circuit in which the State is located, in accordance with the provisions of the Administrative Procedures Act.

TITLE II—GENERAL ASSISTANCE

Authorization of appropriations

SEC. 201. There is hereby authorized to be appropriated for making grants under this title for the fiscal year beginning July 1, 1964, and for each of the two succeeding fiscal years, such amounts as Congress shall determine.

Allotments to States

SEC. 202. (a) For each fiscal year, the Commissioner shall make a basic allotment to each State that has qualified under title I of this Act, to be paid from funds appropriated pursuant to section 201, equal to 2 per centum of the public school expenditures of the State during the most recent year for which satisfactory data are available.

(b) In the case of each State whose per capita personal income for a fiscal year is below that of the State having the highest per capita personal income for that fiscal year, such State's basic allotment under this section for that fiscal year shall be increased by an amount equal to the product of such State's basic allotment and six times the percentage by which the State's per capita personal income is less than the per capita personal income of the State having the highest per capita personal income for that fiscal year.

Payments to States

SEC. 203. Subject to the provisions of section 205, upon certification of the allotment for each State by the Commissioner to the Secretary of the Treasury not later than the first day of the fiscal year for which the allotment is made, the Secretary of the Treasury shall pay to each State one-fourth of its allotment on or before the following July 31, one-fourth on or before the following October 31, one-fourth on or before the following January 31, and one-fourth on or before the following April 30 of that fiscal year.

Purposes for which Federal funds may be expended

SEC. 204. Upon receipt by the State, funds received under this title shall be added to State funds appropriated for public elementary or secondary education and shall thereafter be deemed to be State funds. The commingled funds from both State and Federal sources shall be distributed or expended under State law for the benefit of local education agencies in the State in accord with the provisions of the distribution plan of the State educational agency approved by the Commissioner under title I of this Act.

Maintenance and improvement of State and local support for public school financing

SEC. 205. (a) The sum otherwise allocable to any State under section 202 for any fiscal year after the fiscal year beginning July 1, 1964, shall be reduced if such State's effort for such fiscal year is not at least equal to such State's base effort for such year. The amount of such reduction shall be the difference between the State's public school expenditures in such year and the public school expenditures it would have made in such year had it exerted the State's base effort for such year.

(b) The sum otherwise allocable to any State under section 202 for any fiscal year after the fiscal year beginning July 1, 1964, shall also be reduced if such State's effort for such year is not at least equal to the State's base effort for such year plus the average annual rate of increase in the national effort over the five fiscal year period beginning July 1, 1959, and ending June 30, 1964. The amount of the reduction under this subsection (which shall be in addition to the reduction, if any, under subsection (a)) shall bear the same relation to the sum otherwise allocable to the State under section 202, (1) as the difference between the State's effort and the national effort for such year bears to the national effort for such year, or (2) if it would result in a smaller reduction, as the difference between the State's expenditure per public school pupil and 110 per centum of the national expenditure per public school pupil for such year. This subsection shall not apply to any State for any year for which the State's effort equaled or exceeded the national effort for such year or the State's expenditure per public school pupil equaled or exceeded 110 per centum of the national expenditure per public school pupil for such year.

(c) The total reductions which may be made under subsections (a) and (b) from the sum otherwise allocable to a State for any fiscal year shall not exceed one-third of such sum.

State matching contributions

SEC. 206. (a) The Commissioner shall determine for each State for each fiscal year after the fiscal year beginning July 1, 1964, the amount (if any) by which such State's contributions (derived from State sources) to its local educational agencies for the support of public elementary and secondary schools exceeds such contributions of that State for the preceding fiscal year. The Commissioner shall also determine, as provided in subsection (c), a State percentage for each such fiscal year for each State.

(b) If for any fiscal year the product determined by multiplying the State percentage of a State by the amount determined for such State for such year under the first sentence of subsection (a) is less than the State's allotment under section 202, after any reductions under section 203, then the State's allotment shall be reduced to the amount of such product.

(c) The "State percentage" for any State shall be 100 times the quotient obtained by dividing the per capita personal income of the State by the per capita personal income of the Nation.

Reporting

SEC. 207. Each State educational agency receiving and distributing funds under this Act shall make a complete report to the Commissioner on how the Federal funds have been distributed and expended not later than the October 31 following the close of each fiscal year. The Commissioner is hereby authorized to accept for these purposes the normal accounting procedures used by each State for State funds allocated to local educational agencies for public elementary and secondary school purposes. Not later than the January 1 following the close of each fiscal year the Commissioner shall transmit all such State reports to the Congress, together with his recommendations for the next fiscal year.

Prohibition of Federal control

SEC. 208. In the administration of this Act, no department, agency, officer, or employee of the United States shall exercise any direction, supervision, or control over the policy determination, personnel, curriculum, program of instruction, or the administration or operation of any school or school system.

TITLE III—DEFINITIONS OF TERMS

SEC. 301. Definitions for purposes of this Act:

(a) The term "Commissioner" means the (United States) Commissioner of Education.

(b) The term "State" means a State, Puerto Rico, Guam, the Virgin Islands, American Samoa, and the District of Columbia.

(c) The term "State educational agency" means the State board of education or other agency or officer primarily responsible for the State supervision of public elementary and secondary schools, or, if there is no such officer or agency, an officer or agency designated by the Governor or by State law.

(d) The term "local education agency" means a board of education or other legally constituted local school authority having administrative control and direction of public elementary and secondary education in a city, county, township, school district, or political subdivision in a State; and includes any State agency which directly operates and maintains public elementary or secondary schools.

(e) The term "public elementary and secondary schools" means schools providing education in the kindergarten and in the first twelve grades beyond the kindergarten, under the public supervision and control of a local educational agency and without tuition charge to resident pupils.

(f) The "public school expenditures" of any State in any fiscal year means the total expenditures by the State and subdivisions thereof in such year for public elementary and secondary education made from funds derived from State and local sources in the State (including payments received under Public Laws 815 and 874, Eighty-first Congress, as amended, and other payments in the nature of payments in lieu of taxes from any sources).

(g)(1) A "State's effort" for any State for a fiscal year is the quotient obtained by dividing (A) the State's expenditure per public school pupil in such fiscal year by (B) the income per such pupil for the State for such year; except that the State's effort shall be deemed to be equal to the State's base effort and to the national effort in the case of Puerto Rico, the Virgin Islands, Guam, American Samoa, and the District of Columbia.

(2) A State's "base effort" for the fiscal year means the average State effort over the three immediately preceding fiscal years.

(3) The "income per public school pupil" for a State or for all the States for any fiscal years means the total personal income for the State or for all the States in the calendar year ending in such fiscal year (exclusive of Puerto Rico, Guam, American Samoa, and the Virgin Islands), respectively, divided by the number of public school pupils in the State or in all such States, respectively, in such fiscal year.

(h)(1) The "national effort" for any fiscal year is the quotient obtained by dividing (A) the expenditure per public school pupil for all the States in such year (exclusive of Puerto Rico, Guam, American Samoa, the Virgin Islands, and the District of Columbia) by (B) the income per such pupil for all such States for such year.

(2) The average annual rate of increase in the national effort over the five-fiscal-year period beginning July 1, 1959, and ending June 30, 1964, shall be determined by dividing the difference between the national effort for the fiscal year beginning July 1, 1959, and for the fiscal year beginning July 1, 1963, by four.

(i)(1) The "expenditure per public school pupil" for any State for any fiscal year means the quotient obtained by dividing the State's public school expenditures in such year by the number of its public school pupils for such year.

(2) The "national expenditure per public school pupil" for any fiscal year means the quotient obtained by dividing (A) the public school expenditures of all the States in such year (exclusive of Puerto Rico, Guam, American Samoa, the Virgin Islands, and the District of Columbia) by (B) the number of public school pupils in all such States for such year.

(j) The "per capita personal income" of the State and of the Nation for a fiscal year shall be determined on the basis of the latest data available from the Department of Commerce, except that the per capita personal income of Puerto Rico, Guam, American Samoa, and the Virgin Islands shall be deemed to be 75 per centum of the Nation's per capita personal income, and the Nation's per capita personal income shall be computed without regard to persons residing in such areas.

(k) The Commissioner's determinations of the State effort, base effort, income, public school expenditures, and expenditure per public school pupil, per capita personal income, for any State, and his determinations of the national effort, average rate of increase, and expenditure per public school pupil, per capita personal income, shall be conclusive for purposes of this Act, except that the Commissioner may estimate and subsequently revise any such determination, and as so revised, such determination shall be equally conclusive.

The questions and answers, and tabulation presented by Mr. FULBRIGHT, are as follows:

QUESTIONS AND ANSWERS ON THE PUBLIC EDUCATION IMPROVEMENT ACT OF 1963

1. What organizations are making this proposal available?

The proposal follows the basic principles of the Bipartisan Citizens Committee for Federal Aid for Public Elementary and Secondary Education and the policies of the Council of Chief State School Officers. It is substantially within the policies of numerous organizations interested in public education.

2. What are its major purposes?

To achieve further improvement of public education in the national interest. The proposal would authorize allocation of Federal funds among the States on the basis of need and State effort. It would enable each State to allocate commingled funds from State and Federal sources among local school districts according to their relative educational needs, fiscal abilities, and economic capacities for purposes determined, after a careful statewide survey, to be relatively most important for the improvement of public education (sec. 101).

3. What would be the term and cost of the proposal?

It suggests a 4-year bill, with a complete district by district survey report and State proposal for fund distribution, supervision of expenditures and reporting during the first year (secs. 102, 106). The surveys would be made by the State educational agencies under the general supervision of a committee composed of public school authorities and lay citizens, and the cost would be $6 million of unmatched Federal funds for all of the States (including American Samoa, the District of Columbia, Guam, Puerto Rico, and the Virgin Islands) (secs. 104, 103, 105, 301(b)). The U.S. Commissioner of Education would certify the eligibility of each State to participate in the final 3 years of the program if such distribution plan has been formulated according to the provisions of title I and is certified by the State educational agency to the Commissioner as the distribution plan of the State (sec. 107).

The Federal cost would be on the order of $500 million annually for the final 3 years (secs. 201, 202).

4. What is the formula for Federal allotments to the States?

The basic Federal allotment during each of the last 3 years is 2 percent of public school current expenditures in each State. In addition, each State except the one having the highest average per capita personal income would receive 6 times the percentage by which its average income falls below that of the State having the highest average income, multiplied by the 2 percent basic allotment. To illustrate, a State 50 percent below the average income of the State with the highest income would receive the basic 2 percent increased by 6 by 50 percent or 300 percent of its basic allotment. Thus the total allotment of this low income State would be 2 percent plus 6 percent, or a total of 8 percent of its current expenditures. A State with income falling 25 percent below that of the highest State would receive 2 percent plus 150 percent of 2 percent, or a total of 5 percent of its current expenses; a State with average personal income 10 percent below that of the highest State would receive 2 percent plus 60 percent of 2 percent, or 3.2 percent of its current public school expenses.

If more equalization among States is desired, an equalization factor of 7, 8, 9, or even

10 could replace the factor of 6 suggested here; if less equalization among States is desired, the factor could be reduced from 6 to 5, 4, or 3. This formula would give cumulative financial improvement of from 2 percent, 8 percent, 9 percent, 10 percent or more each year for the poorest State, after the fashion of a growth stock investment in educational improvement. It removes stumbling blocks of the past, such as counting pupils according to average daily enrollment, average daily membership, school-age population, total enrollment, etc. Current expenditures are substituted for pupil counting in the formula (sec. 202).

5. Purposes for which Federal funds may be expended.

Public elementary and secondary education purposes as defined by the State, but limited to the distribution plan of the State as approved by the U.S. Commissioner of Education (sec. 204).

6. Matching by State appropriated funds.

The proposal includes variable State matching through State appropriations for this purpose. A State of average per capita personal income would match Federal funds dollar for dollar; a State 25 percent below the national average per capita income would match each Federal dollar with 75 cents; a State 25 percent above the national average per capita personal income would match each Federal dollar with $1.25 (sec. 206).

7. Maintenance of State and local financial effort: reward for effort.

The proposal penalizes reductions in State and local financing of schools by reducing the amount of Federal funds allotted. The policy is that the State shall not use the Federal public school funds to reduce State and local financial effort. On the other hand, the States would receive financial rewards for State and local financial effort because increased State and local expenditures would provide a larger base for computation of the Federal share in future years (sec. 205).

8. Payments to States and reporting on use of Federal funds.

Payments to the States would be made quarterly by the U.S. Treasury, after certification of the amounts for each State on an annual basis by the U.S. Commissioner of Education (sec. 203). Each State would make a complete report to the Commissioner annually according to the normal accounting procedures used for the State funds (sec. 207), but the distribution plan approved by the Commissioner would furnish guidelines for local-State and State-Federal accounting (sec. 106).

The Commissioner would submit the State reports to Congress not later than the January 1 following the close of each fiscal year, together with his recommendations for the next fiscal year (sec. 207).

9. Proposal concerning Federal control of education.

The draft contains a standard statutory prohibition of such controls (sec. 208).

The Federal funds are specifically commingled with State funds upon receipt by the State, and thereafter are deemed to be State funds to be distributed to local districts and their use reported upon under provisions of State law (secs. 204, 207). During the first year, carefully guarded discretionary authority has been given to the U.S. Commissioner of Education to approve State distribution, supervision, and reporting plans that meet Federal fiscal requirements (sec. 107). Subsequently, Federal administrative discretion is absent. The Congress reviews the annual State reports directly rather than having to rely entirely upon generalized Federal administrative reports based on Federal forms to which each State must have adapted its system of accounting as best it could.

State and local autonomy in education is completely protected in this proposal, and Federal control of State and local educational programs is made both illegal and impossible.

Official data—Estimated allotments to States under title II based upon total expenditures for public elementary and secondary education[1] *and per capita income,*[2] *fiscal year 1963*

State (1)	Allotments to all States (2 percent of total expenditures, 1959-60 [3]) (2)	Percent that each State is below the national average per capita income in 1960 (3)	Additional allotment to States below national average per capita income [4] (4)	Total State amount (5)	Total allotment percentage (6)
50 States, District of Columbia, American Samoa, Guam, Puerto Rico, and Virgin Islands	$315,323,780	--------	$122,535,750	$437,859,530	--------

---

[1] Total expenditures within each State for public elementary and secondary education are assumed to be the total expenditures reported for public elementary and secondary day schools. They are for current expense, interest, and capital outlay including expenditures of public school building authorities. Expenditure data are obtained from preliminary statistics for 1959-60, and are for total revenue from all sources.

[2] Based on per capita income data for 1960. Per capita income for the territories is assumed to be 75 percent of the national average.

[3] Allotments to all States were computed as the product of (1) 2 percent and (2) total expenditures within each State for public elementary and secondary day schools.

[4] Additional allotments to States below the national average in per capita personal income were computed as 6 times the product of (1) the percentage which the State is below the national average per capita personal income and (2) the State allotment based upon total expenditures.

[5] Expenditures for summer schools and adult education and community colleges are included with current expenditures for elementary and secondary day schools.

STEEL SHIPPING CONTAINER IDENTIFICATION ACT

Mr. SCOTT. Mr. President, I introduce, for appropriate reference, a bill to prohibit the introduction into interstate commerce of any shipping container manufactured in the United States from imported steel unless the container is marked so as to indicate the country of origin of the steel.

The PRESIDING OFFICER (Mr. KENNEDY in the chair). The bill will be received and appropriately referred.

The bill (S. 1345) to prohibit the introduction into interstate commerce of any shipping container manufactured in the United States from imported steel unless the container is marked so as to indicate the country of origin of the steel, introduced by Mr. SCOTT, was received, read twice by its title, and referred to the Committee on Commerce.

Mr. SCOTT. Mr. President, the intended purpose of the Steel Shipping Container Identification Act is to (1) permit the buyers of steel shipping containers to know when foreign steel is used in the manufacture of the containers, and (2) promote the use of steel produced in this country.

Customs laws in the United States do require that a foreign product be marked plainly with the country of origin in which it was produced. However, the courts sustain the fact that the authority and jurisdiction of the Bureau of Customs ends when the product has been released from its custody. In other words, while the bundles or coils of foreign sheet steel are marked with the country of origin, no agency of the United States under present regulations has any further jurisdiction over the marking or identification of products such as drums and pails which are ultimately manufactured from the imported sheet steel.

The proposed bill would require that drums and pails made of foreign steel be plainly marked with the country of origin of the steel and would place enforcement of the act under the jurisdiction of the Federal Trade Commission and would include their usual penalties for noncompliance. The act is not otherwise punitive and asks no special favors, tariff protection, or increased duties.

The Steel Shipping Container Institute believes that this bill, if enacted, will be of substantial value to the fabricators and purchasers of steel shipping containers. It would in turn benefit the basic steel industry and its employees through increased use of domestic steel, thereby curtailing unemployment resulting from the use of imported steel.

As a matter of information, here are the latest available hourly employment costs of American versus foreign steel workers, which include direct and all supplemental wage costs: Japan, 63 cents, European Coal & Steel Communities, $1.25, and United States, $3.99.

In the State of Pennsylvania, in addition to the basic steel producers, there are six members of the Steel Shipping Container Institute:

Manion Steel Barrel Co., Rouseville, Pa., U.S. Steel Products, division of U.S. Steel Corp., Sharon, Pa., Standard Can Corp., Leetsdale, Pa., Virginia Barrel Co., division of the Greif Bros. Cooperage Corp., Eddystone, Pa., Jones & Laughlin Steel Corp., container division, Lancaster, Pa. and Philadelphia, Pa., U.S. Barrel Co., Philadelphia, Pa.

In conclusion, the Steel Shipping Container Institute believes that this legislation will be of great benefit to the steel industry, the steel shipping container industry, and to the general public in the State of Pennsylvania.

COMPACT BETWEEN NEW MEXICO AND COLORADO GOVERNING COSTILLA CREEK

Mr. ALLOTT. Mr. President, I introduce, for appropriate reference, on behalf of the Senators from New Mexico [Mr. Anderson and Mr. Mechem], my colleague from Colorado [Mr. Dominick] and myself, a bill to give the consent of Congress to an amended interstate compact entered into by the States of New Mexico and Colorado governing Costilla Creek.

Costilla Creek arises in Colorado, crosses the Colorado-New Mexico boundaries three times above its confluence with the Rio Grande in New Mexico. The original compact between the two States was entered into in 1944 for the purpose of apportioning the use of Costilla Creek waters between the two States and for resolving jurisdictional conflicts in regard to the appropriation, diversion and use of water from the creek to irrigate lands on both sides of the boundary.

The amended compact permits the Colorado users to change their point of diversion to a different interstate delivery point. This change, agreed to by both parties to the compact, is permitted on condition that a stated fraction of water be diverted at the original point in order to compensate for losses.

Neither the original nor the amended compact establishes any general principle or precedent in respect to any other interstate stream.

I would hope, Mr. President, that action can be taken on the bill soon. The legislatures of the States of Colorado and New Mexico have ratified this amended compact and the consent of Congress is the final step.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

The bill (S. 1346) to consent to the amendment by the States of Colorado and New Mexico of the Costilla Creek compact, introduced by Mr. Allott (for himself and other Senators), was received, read twice by its title, and referred to the Committee on the Judiciary.

STUDY OF FREIGHT RATES FOR SMALL GRAINS

Mr. BURDICK. Mr. President, a serious maladjustment in freight rates for small grains exists in many areas of the Midwest. A thorough investigation is needed and corrective action should be taken.

I introduce, for appropriate reference, a joint resolution directing the Interstate Commerce Commission to make a full and complete investigation of the situation and to recommend remedial measures.

My State of North Dakota faces a particularly bad problem, because the costs of shipping grain to markets are disproportionately high, putting the State at a serious competitive disadvantage. Adjustments would benefit not only farmers but also shippers and common carriers.

Not since 1934 has the ICC made a comprehensive, general investigation of freight rates on grains in the West. It is time for a complete analysis of the situation to eliminate discriminatory rates.

The North Dakota State Legislature took cognizance of the problem in approving House Concurrent Resolution R-1. The joint resolution that I am introducing today is aimed at relieving an unfair situation not only for my State but for other areas in the Midwest, as well. I ask unanimous consent that the joint resolution be printed at this point in the Record.

The PRESIDING OFFICER. The joint resolution will be received and appropriately referred; and, without objection, the joint resolution will be printed in the Record.

The joint resolution (S.J. Res. 70) to provide for an investigation by the Interstate Commerce Commission of railroad freight rates applicable to shipments of grain in carload lots from States in the Midwest region of the United States, introduced by Mr. Burdick, was received, read twice by its title, referred to the Committee on Commerce, and ordered to be printed in the Record, as follows:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Interstate Commerce Commission shall make a full and complete investigation and study of freight rates charged by carriers subject to part I of the Interstate Commerce Act for the shipment of grain in carload lots from the various States in the Midwest region of the United States, for the purpose of determining whether any such rates are discriminatory in any way. The Commission shall report the results of such investigation and study to the Congress as soon as practicable. Such report shall include a description of any action taken or proposed by the Commission to remove any discrimination determined to exist, and any amendments to the Interstate Commerce Act which the Commission recommends, as a result of such investigation and study.

CHANGE OF REFERENCE
